DESCRIPTORS- \*Abstracts; Catalogs; Education; \*Educational Resources; \*Indexes; Resource Materials

IDENTIFIERS- \*Resources in Education

Resources in Education (RIE) is a monthly abstract journal that announces (catalogs, indexes, abstracts) documents of interest to the educational community (including researchers, teachers, students, school board members, school administrators, counselors, etc.). Each issue announces approximately 1,100 documents and provides indexes by Subject, Personal Author, Institution, Publication Type, and ERIC Clearinghouse Number. This special Computer Output Microfiche (COM) edition is prepared directly from the ERIC magnetic tape database prior to publication of the printed journal and therefore is lacking the cover and other regular introductory and advertising matter contained in the printed journal. The COM edition contains only the first three of the five indexes in the printed edition. The first accession in each issue of RIE is the issue itself. In this way, the monthly microfiche collection for each issue is immediately preceded by a microfiche index to that collection. This practice began with the RIE issue for May 1979. (CRW/WTB)

PUB TYPE- Speeches, Conference Papers, "Papers Presented at..." (150), Historical Materials (060)

DESCRIPTORS- Adult Education; \*Black Achievement; \*Black Education; \*Black History; Black Influences; Black Institutions; Blacks; \*Black Studies; \*Educational History; \*Lifelong Learning; North American History; Racial Relations; Racial Segregation; Slavery; United States History

IDENTIFIERS- African Americans

This overview of the history of lifelong learning for African Americans is in a chart format. Lifelong learning events are matched with social and historical events and with black adult educators and black adult education-related institutions. The chart begins with slavery around 1800, a time when slaves were forbidden to learn how to read. It highlights organizations that provided educational opportunities of various kinds during the 1800s and continues through events of the abolition crusade and emancipation proclamation. These post-Civil War lifelong learning events are then charted: industrial training schools; settlement house movement; musical, literacy, and artistic events sponsored by black women's organizations; and farmers conferences. The role of Booker T. Washington is emphasized.

Conceptual and Methodological Issues in Assessing Work Skills: A Multi-Disciplinary Analysis.

SPONS. AGENCY- Spencer Foundation, Chicago, Ill.

PUB DATE- Jun 88

NOTE- 51p.

LANGUAGE- English

EDRS Price- MF01/PC03 Plus Postage.

PUB TYPE- Reports - Research/Technical (143)

DESCRIPTORS- Adult Education; \*Change; Educational Research;

\*Employment Qualifications; Evaluation Methods;

Interdisciplinary Approach; \*Job Analysis; \*Job Skills; Labor

Force Development; \*Measurement Techniques; Postsecondary

Education; Psychological Studies; Qualitative Research;

Secondary Education; Skill Analysis; Vocational Education

One possible reason for ambiguous findings regarding changes in work skills is the way work skills are defined and measured.

Five conceptual bases for defining work skills are illustrated

in the research literature: abilities of individuals, behavior

requirements of jobs, ability requirements of jobs, behaviors

exhibited at work, and abilities exercised or used at work.

Outside of the field of psychology, issues about the dimensions

of skills have not received great attention. No universal

taxonomy for defining the dimensions of work skills exists.

Issues of measurement differ depending on whether the focus is

on measuring skills of individuals or measuring skill

requirements of jobs. Much interest in work skills concerns

issues of change. Existing evidence, based on both large-scale

assessments of skill changes and case studies, yields no firm

conclusions about whether skill requirements of jobs are

changing and, if so, in what ways. One way to further

understanding of skill changes is to understand how various

forces interact to influence skill requirements. Steps to help

improve understanding of work skills and how they change are as

follows: (1) studies of job skills should be based on

comprehensive measures of both the qualitative and quantitative

dimensions of work skills; (2) the concepts and measures of

work skills should be applied both to capabilities of

individuals and requirements of jobs; and (3) future research

should attempt to develop a more complete model of the forces

affecting job skill requirements. (Contains 77 references.)

The old "nature versus nurture" argument has resurfaced in a new guise--the role of inherent ability or of education as the source of skill and the reason for achievement. Research shows that even one additional year of schooling raises a person's wages. Even when the relationship among education, productivity, and wages appears obvious, there is evidence for two arguments. The screening argument holds that investments in education reveal the job-relevant abilities and skills that students already possess--stopping some while allowing others to pass through the mesh. The human capital model argues that skills are acquired through investment in education, which adds to the overall volume of ability. Driving this debate is the notion of the returns provided both to the individual and society by educational attainment. However, structural changes in the economy, changes in policy, and shifts in demographics illustrate how societal trends contribute to the fluctuations in returns to education. Recommendations to find the most effective location for educational attainment include the following: developing better means of determining job-relevant abilities, encouraging business-school networks, increasing retention and educational attainment, and making educational loans and financial aid more accessible to students for whom investment in educational attainment shows real promise. IDENTIFIERS- \*Laubach Literacy Action; \*Literacy Volunteers of America Inc

A study confirmed that Laubach Literacy Action (LLA) and Literacy Volunteers of America (LVA) remain the primary national providers of volunteer-based literacy instruction. Both organizations provide basic literacy instruction and beginning instruction in English as a Second Language on a one-to-one or small-group basis by tutors. Each organization has developed its own formal training program for tutors and its own training methods and materials. LLA and LVA programs are often considered the outreach arm of the adult education system. As of 1990, LLA reported 98,271 volunteer tutors serving 147,087 adult learners through 1,023 local LLA councils in 45 states. As of 1991, LVA reported 51,437 volunteers serving 52,338 adult learners through 434 state and local LVA affiliate programs in 41 states. The instructional approaches of both organizations are firmly grounded in phonics; however, both organizations incorporate other teaching approaches and tools to meet students' individual goals and interests. Of LLA's \$8.7 million annual budget for 1990, \$7.5 million came from the sale of LLA publications. Forty percent of the LVA national budget of \$2.2 million came from the sale of LVA publications. (Case studies of a state LLA program, a state LVA program, and three local programs of each organization are appended.) (MN)

IDENTIFIERS- \*United Kingdom

This report provides results both in narrative and graphic formats of the Annual Fees Survey that included all 115 Local Education Authorities (LEAs) in the United Kingdom. Throughout the report, distinction is made between two hourly rates of fees charged for part-time education: courses categorized under Schedule 2 of the Further and Higher Education Act 1992, formerly "vocational" or "certificate-bearing" courses, and those not so categorized under Schedule 2, formerly "nonvocational" or "leisure" courses. Section 1 focuses on variations in fees within LEAs. Section 2 reports on fees charged for Schedule 2 courses: examination courses and basic education. Extra fees (examination and registration) and reduced fees for second courses are also reported. Section 3 reports on fees for courses outside Schedule 2. Variations between centers and according to type of LEA are discussed as are extra fees and reduced fees for second courses. Section 4 summarizes fee changes and the reasons for them. Section 5 focuses on concessionary fees. Narrative and bar charts are provided on concessions to the following groups: older adults, unemployed students, unwaged students, students receiving Income Support or Family Credit, physically handicapped students, students with learning disabilities, and students aged under 18. Sections 6-8 report findings on number and length of class meetings, methods and timing of payment, and enrollments. (YLB)

Employment Patterns; \*Employment Problems; \*Federal  
Legislation; Federal Programs; Fringe Benefits; Job Layoff;  
Labor Force Nonparticipants; State Legislation; \*State  
Programs; \*Unemployment; \*Unemployment Insurance

This 10-chapter book covers the history of unemployment insurance  
(UI) in the United States from its beginning in the 1930's to  
the present and describes how the program evolved in response  
to various economic and other factors and to the controversies  
that emerged in the process. Chapter 1 provides background on  
trends in the extent, duration, and nature of unemployment as  
well as employment and labor force trends. Chapter 2 explores  
each broad objective generally indicated for UI for its  
significance. Chapter 3 shows that unemployment is an insurable  
risk and discusses features that make the program "social  
insurance." Chapter 4 summarizes foreign experience with UI.  
Chapter 5 reviews voluntary UI programs and traces the history  
of legislative activity prior to passage of the Social Security  
Act in 1935. Chapter 6 highlights Congressional considerations  
of UI proposals and changes made as those proposals were  
fashioned into law. Chapter 7 focuses on passage of state UI  
legislation, early experience under state laws, and  
reconversion of the economy after World War II. Chapter 8  
describes management of federal responsibilities for UI and  
reviews federal legislation for 1947-69. Chapter 9 summarizes  
principal changes produced by federal legislation enacted after  
1969 as they affected major aspects of the UI program. Chapter  
10 reviews patterns and trends of state statutory provisions  
since 1948. An epilogue summarizes the temporary emergency  
program of 1991 and other legislative changes of importance  
adopted in the early 1990s. A list of 152 references and an  
index are provided. (YLB)

DESCRIPTORS- \*Adult Basic Education; \*Basic Skills; Community Colleges; Corporate Education; Educational Needs; Educational Policy; Federal Government; Government Role; \*Inplant Programs; Policy Formation; \*Program Effectiveness; Program Implementation; Public Policy; \*School Business Relationship; \*Small Businesses; Two Year Colleges

IDENTIFIERS- \*Workplace Literacy

An 18-month, 3-phase study examined formal employer-sponsored basic skills instruction in small- and medium-sized firms. Data were gathered through the following methods: in-depth case studies of 72 small and medium firms in 5 states, a series of linked national surveys of 11,000 randomly selected firms, follow-up telephone surveys of 4,317 of those firms, a telephone survey of a random sample of 775 small firms, and a survey of 1,535 members of the American Association of Community and Junior Colleges. The data collected were synthesized into an overview of the evolution of basic skills training programs for employees of small and medium businesses and current trends in their implementation. The perspective of providers of basic skills instruction (community and two-year colleges in particular) were identified along with barriers to the development of expanded and improved services by training providers. The study findings were also analyzed from the standpoint of their implications for public policy and private action. Overall, the study confirmed that workplace education offers a simple economical solution to the problem of training workers with low basic skills and that neither present policies nor new ideas offer an approach better than workplace education. DESCRIPTORS- \*Admission (School); \*Clinical Psychology; \*College  
Applicants; College Graduates; \*Doctoral Programs; Graduate  
Study; Higher Education; Interviews

This document presents tips for individuals applying to doctoral programs in clinical psychology. Suggestions are made for what applicants can do before they apply to improve their "applicant quality." Applicants should increase their Graduate Record Examination scores, go back to school if necessary to improve their grade point averages, obtain good letters of reference, obtain research experience, show how the applicant would fit in to the school, obtain clinical experience, be informed about the school, have publications or conference presentations, and treat rejections as inside information (by finding out what prompted the rejections) to help one's chances next time. A number of things that can go wrong through no fault of the applicant are considered and ways to avoid these problems are discussed. Problems with getting professors to write good reference letters, obtaining transcripts from schools, getting accurate test scores sent on time, making sure the application was received and sent to the right department, and avoiding problems with the postal service are included. A timetable is included to help applicants start early and complete necessary steps on time. The importance of packaging is discussed and a number of suggestions are offered for successful interviews. Sample vitae and sample personal and objectives statements are appended. (NB)

IDENTIFIERS- \*Colorado

In April 1991, the Youth Risk Behavior Survey was administered to a sample of 1,412 high school students in Colorado public schools to collect information about priority health-risk behaviors among adolescents. Questionnaires were received from 1,170 students, a response rate of 83%. Classes in Colorado's 280 public schools were also selected to participate in the survey if they included 9th-12th graders; 68 classes out of 105 responded for a 65% response rate. The findings, based on unweighted data, revealed that over one-half of the students surveyed were sexually active; 60% of the males and 48% of the females reported using condoms during last intercourse. From 23% to 39% of sexually active students used alcohol or drugs before their last intercourse. Ten percent of high school seniors had been pregnant or had caused a pregnancy. Over 25% of the students rarely or never used seat belts. Nearly one-half of the male students indicated that they had carried a weapon within the past 30 days. Nearly one-third of respondents had seriously considered suicide; 19% had made a suicide plan, and 8% had attempted suicide. Females were at higher risk than males in all three categories. Eighty-five percent of respondents reported having used alcohol, with one-half indicating use within the past 30 days. Seventy percent indicated they had smoked cigarettes, with over one-quarter having smoked within the past 30 days. One-third reported having tried marijuana; 19% indicated they had tried other illicit drugs. These results suggest that Colorado high school students continue to engage in health-compromising behaviors at alarming rates. (NB)

\*Experiential Learning; Higher Education; Inservice Teacher  
Education; Multicultural Education; Reading Research; \*Teacher  
Attitudes; \*Teacher Response; \*Whole Language Approach

IDENTIFIERS- Experienced Teachers; New Teachers

A study examined the reactions and responses of new and veteran teachers throughout a full semester graduate in-service course which introduced whole language theory through experiential learning. The 30 K-8 teachers in the course came from 7 schools of a large inner-city school district where 70% of the students lived below the poverty level. Two-thirds of the teachers were African-American or Hispanic. The class environment revolved around variability, variety, choice, flexibility, and multicultural awareness. Data included teacher learning logs, an "examination" which solicited what teachers understood and liked or did not understand or like about whole language, application projects, and classroom visits after the course ended. The teachers came to trust the class, each other, and themselves as they experienced a range of writing tasks and shared their difficulties in analyzing the journal articles which they read. They expressed an excitement about learning, sharing, and grappling with issues and they underwent a series of reactions to interactive and cooperative learning methods. All attempted some whole language activities with their classes and reflected upon the strengths and weaknesses of whole language. Findings suggest the need for more avenues of professional collaboration for teachers to discuss professional issues; integrated and interactive activities for teachers to learn through experience and with one another; and opportunities for teachers to engage in spiral learning in conjunction with practice. PUB TYPE- Reports - Research/Technical (143)

DESCRIPTORS- Audience Awareness; Content Analysis; Correlation; Higher Education; \*Newspapers; \*News Writing; \*Readability; Readability Formulas; Reading Research

IDENTIFIERS- \*Florida (Central); Journalism Research

A study analyzed the readability of seven central Florida newspapers (one of which is a college newspaper) and "USA Today." "Rightwriter," a grammar checker and readability computer program, was used to evaluate front page articles for each of the eight newspapers. The readability formulas invoked in the readability program included the Flesch-Kincaid, Flesch, and FOG indexes. Results indicated that the average readability levels of the individual newspapers ranged from 9.37 to 14.68 using the Flesch-Kincaid, 10.28 to 15.78 using FOG. A rank order correlation of the three possible pairs of the tests was statistically significant for all pairs. Findings suggest that each of the papers (except the college paper) should consider encouraging its reporters and editors to write articles that are more easily understood by their target population. (Four figures of data are included; 20 references, a glossary of terms, a description of each front page and the text of the articles, a sample hardcopy of the "Rightwriter" program, and an appendix of data are attached.) DESCRIPTORS- Classroom Environment; \*Controversial Issues (Course Content); English Instruction; Higher Education; Ideology; Political Issues; \*Politics; Student Motivation; \*Writing Instruction

IDENTIFIERS- \*Political Literature; Writing Contexts

One of the most interesting controversies in the theory of teaching composition--and one that has profound consequences for classroom practice--is the debate over "ideological" or "radical" pedagogy. In the minds of most mainstream Americans, an ideological education is associated with dictatorship and state control of education. Every pedagogy, to quote James Berlin (1988) "is imbricated in ideology--a set of tacit assumptions about what is real, what is good, what is impossible, and how power ought to be distributed." Attempting to avoid all controversy and all political discussion can lead to textbooks and classroom atmospheres that are hostile to the values of critical inquiry. A composition instructor, noting

IDENTIFIERS- Academic Discourse; Bakhtin (Mikhail); Vygotsky (Lev S)

Peer tutoring sessions involving two eighth-grade girls were recorded and analyzed through a Vygotskian lens. A "microgenetic analysis" of particular protocol excerpts from the tutoring sessions was conducted. When a lapse of intersubjectivity existed, participants frequently launched into narrative as a mediating device to negotiate a shared sense of reality. When the tutee became capable of independently solving problems involving the scientific concept of operations with negative numbers, none of the verbiage, none of the semiotic mediators were necessary any longer. The role of language as a mediating factor in the learning process can be seen in the process of an anthropology undergraduate attempting to enter an academic discourse community. What is particularly intriguing are the multivoices within the presentation of the Native American ritual "Vision Quest." This phenomenon of multi-voices points to several Bakhtinian notions. In Vygotskian terms, all learning experiences are first inter-psychological or social in nature before they are internalized as a part of the intra-psychological plane of consciousness. (Excerpts from the undergraduate student's journal entries, a portion of a taped interview with the student, and an excerpt from the script are attached.) (RS)

DESCRIPTORS- Curriculum Development; Language Usage; \*Literacy; Primary Education; Social Experience; \*Teacher Student Relationship; Urban Education; Writing Instruction

IDENTIFIERS- Childrens Writing; \*Literacy as a Social Process  
Exploring the concept of a "permeable" curriculum, this paper provides concrete examples of the social and cultural challenges of a curriculum that allows for the interplay between teachers' and children's language and experiences. The paper uses a recent study in an urban primary school to provide an illustration of the diverse kinds of social goals that energize young children's language use. The paper focuses on the children's composing, the diverse kinds of cultural material they draw upon, and the ways in which teachers may work to enact a permeable curriculum in which the worlds of teachers and children come together in instructionally powerful ways. The first section of the paper provides a perspective on children and on literacy in which children are social negotiators, addressing others as they explore and exploit the power of symbolic tools as social mediators. The next two sections feature the curricular negotiations of Eugenie (a second-grader), her peers, and her teachers. The final section of the paper elaborates on the theoretical substance of the permeable curriculum. Six figures presenting students' drawings and one table illustrating that words like "audience" and "sense" do not have generic meaning are included. Contains 55 references. (RS)

DESCRIPTORS- Communication Research; \*Females; \*Persuasive Discourse; Research Methodology; Secondary Education; \*Secondary School Students; Smoking; Social Cognition

IDENTIFIERS- California (North); Health Communication; Issue Salience; \*Message Responses; \*Public Service Advertising

A study explored the impact on junior high school females of "don't smoke" public service announcements (PSAs) created by two groups of high school females. The study extended the research on relevance and persuasion by utilizing intimate issues, and by exploring the potential for increasing message relevance by using persuasive messages created by peer member focus groups. Four female smokers and four female non-smokers were recruited from a northern California suburban public high school. The two groups (working separately) decided on a scenario and a script to be videotaped for their respective PSAs. To measure responses to the PSAs, 217 eighth-grade students from a junior high school completed a questionnaire. Results indicated that: (1) female smokers rated the smokers group PSA to be more relevant and to be of greater perceived effectiveness than the nonsmokers group PSA; (2) female adolescents who have experimented with cigarette smoking did not perceive more relevance in the smokers group PSA than in the PSA created by the nonsmokers; however, (3) females who have experimented with smoking found the smokers group PSA to be significantly more effective than the nonsmokers group PSA. Findings suggest the contributions that can be made by those who are usually on the receiving end of pedagogy should be recognized and affirmed, and that further research is needed to distinguish between issue relevance and message relevance. (Eight tables of data are included; 31 references are attached.) (RS)

IDENTIFIERS- Gamesmanship; \*Organizational Culture; Student Surveys

A communication instructor designed the "Organizational Feud" game to emphasize the variety and pervasive influence of organizations upon students' lives. In this game, students complete surveys indicating the organizations to which they belong and the values reflected in the organizations. The instructor codes the responses on the surveys and develops a profile of the organizations to which students belong and the organizations which are listed most frequently. The class is divided into two groups. Categories are announced and group members confer. The team correctly answering the initial category is given two more opportunities to score before the other team can respond. Scores are determined according to the frequency with which a response occurs. After competition as heated and excited as any televised version of the "Family Feud," the instructor and students discuss the impact of organizations in the student's everyday lives. (A sample criteria sheet used for scoring and the survey are attached.) (RS)

Findings of a study that examined Colorado administrators' perceptions of the adequacy of their administrator preparation programs are presented in this paper. The primary purposes of the project are to provide feedback to institutions from former students regarding their administrator preparation so that they may continue to improve their programs, and to provide the State Board of Education with information concerning the adequacy of standards and programs. During spring 1992, surveys were sent to 193 Colorado administrators who had received certification from an approved Colorado program since 1989. A total of 96 usable returns were received. At least 90 percent of the administrators perceived 25 of the 29 preparation areas as relevant to their current positions. The following 3 preparation areas received 85 percent or more affirmative responses with regard to adequacy of preparation: ensuring that legal responsibilities of the school are being met and safeguarding legal rights of students, staff, and parents; articulating the role and purpose of education in contemporary society; and planning. Sixty percent or fewer of the respondents said that they were adequately prepared in the following areas: assessing learning abilities and disabilities of students; utilizing auxiliary business services effectively; administering provisions of negotiated employment contracts; and identifying and utilizing resources available to schools. Overall, the percentage of respondents who indicated adequate preparation increased from 1991 to 1992. One table and one figure are included. The appendix contains a copy of the survey. (LMI)

In this book, faculty from nine universities describe innovations undertaken in the context of their institutions' administrator preparation programs. The goal is to inform the profession about recent efforts to strengthen preparation programs in school administration. Following the introductory material--the preface, foreword, and introduction--chapter 1 sets the stage for the case studies that follow by describing three eras of ferment in school administration in the United States. Chapters 2-10 offer stories of nine institutions actively engaged in comprehensive program improvement efforts. The institutions include the University of New Mexico, Stanford University, the University of Washington, the University of Utah, East Tennessee State University, the University of Colorado, Miami University, and the University of North Carolina at Chapel Hill. A concluding chapter discusses implications of these cases for more widespread reform in administrator preparation. Notes and references accompany each chapter. (LMI)

\*Educational Improvement; \*Effective Schools Research;

Elementary Secondary Education; \*Problem Solving; \*School Effectiveness

This monograph describes a number of successful solutions that have been used in schools involved in school improvement planning. Problem-solving strategies used by schools across the United States to address various situations are described, in which each school focused on student achievement and teaching learning for all students. The practices, based on effective schools research, were utilized in seven elementary schools, six junior high and middle schools, five high schools, and one school district. Programs, each of which is described in this report, addressed leadership training, alternative learning, reading improvement, participative action research, at-risk students, student mediation, individualized tutoring, mathematics achievement, and parent involvement. Data-based results are described and a contact source for each school is provided. (LMI)

DESCRIPTORS- \*Curriculum Development; \*Educational Cooperation;

Educational Improvement; Effective Schools Research; Elementary Secondary Education; Foreign Countries; \*School Districts

IDENTIFIERS- \*Australia (Victoria)

Findings of a study that examined the development of district cooperation to provide a comprehensive curriculum in Victoria, Australia, are presented in this paper. Methodology involved observation and interviews with 34 key participants from schools in two districts. Participants expressed positive attitudes toward the district provision process but expressed underlying concerns. Conclusions are that the district provision process enables schools to cooperate on curriculum and learning issues, but that successful collaboration is hindered by too many schools involved in each district and lack of supportive leadership and time. Districts can be valuable coordinating structures when they focus on articulating curriculum programs on a P-12 basis. Finally, if district

IDENTIFIERS- \*Elementary Secondary Education Act; Goals 2000; National Education Goals 1990; \*Reauthorization Legislation

Established in 1965, the Elementary and Secondary Education act (ESEA) offered federal support to schools in low-income communities. Over the years, Congress amended and expanded the Act seven times. Evaluations of ESEA indicate that funds are spread thinly, instead of being targeted where the needs are greatest. The traditional add-on programs supported under ESEA are not powerful enough to help America reach the National Education Goals. The United States Department of Education recommends here that when ESEA is reauthorized it must set five clear priorities: (1) high standards for all children, with the elements of education aligned, so that everything is working together to help all students reach those standards; (2) a focus on teaching and learning; (3) flexibility to stimulate local school-based and district initiative, coupled with responsibility for student performance; (4) links among schools, parents, and communities; and (5) resources targeted to where needs are greatest and in amounts sufficient to make a difference. A detailed description of the changes proposed is presented title by title and program by program: "Helping Children in Need Meet High Standards" (Title I); "Improving Teaching and Learning" (Title II); "Expanding Opportunities for Learning" (Title III); "Safe and Drug-Free Schools and Communities" (Title IV); "Promoting Equity" (Title V); "Indian Education" (Title VI); "Bilingual and Immigrant Education" (Title VII); "Impact Aid" (Title VIII); and "General Provisions" (Title IX). Each program section contains "what's new," "what we've learned," and "what we propose." Also discussed are amendments to the General Education Provisions Act, the Individuals with Disabilities Education Act, and the Stewart B. McKinney Homeless Act. The program sections are followed by a total of 96 notes. (MLF)

IDENTIFIERS- Individuals with Disabilities Education Act; \*New York

These nine guides (in Italian, Vietnamese, Japanese, Korean, Greek, Khmer, Arabic, Haitian-Creole, and Spanish, respectively) are designed to provide parents with the knowledge they need to ensure appropriate educational programs for students (ages 5-21) with disabilities. It describes the special education process, programs, services, and the rights of children with disabilities in New York to a free appropriate public education in accordance with the Individuals with Disabilities Education Act of 1990. The guide has been revised to reflect changes in Education Law and Regulations of the Commissioner of Education made through March 1, 1992. Part I provides information related to the special education process, including an historical view of student rights, regular and special educational services, steps in the process from referral to triennial evaluation, due process procedures, and preparation for future education and employment opportunities. Part II is a practical handbook which includes suggestions for record keeping, participation in a parent/school partnership, and resource materials. At the end of each section, a summary of due process procedures relevant to that section is provided. A list of frequently used acronyms is provided, and lists of other resources are also presented, including New York State Early Childhood Direction Centers, special education training and resource centers, Office for Special Education Services (OSES) Regional Offices, and a checklist of publications available from the OSES. DESCRIPTORS- Adults; \*Aesthetic Values; Artists; \*Cognitive Processes; \*Creative Development; \*Creative Thinking; Problem Solving; \*Talent; Visual Arts

IDENTIFIERS- Aesthetics; \*Expertise; \*Problem Finding

This paper on the nature of expertise discusses implications of findings of an earlier study into the problem-solving, problem-finding and thought processes of 3 groups: 20 professional artists (experts), 20 semiprofessional artists (non-experts), and 20 non-artists (novices), each group consisting of 10 male and 10 female adults. Subjects were all given a "game" and instructed to "do whatever you like with it" and then asked later to verbally recount their mental processes as they observed a videotape of themselves. Results are discussed in terms of differing attitudes of experts versus non-experts and novices toward play, creative thought, personal aesthetic biases, and selected perception. Examples from the study are used in a discussion of the role of aesthetics in creative thought and sense of responsibility to the solution; i.e., knowing when a solution is "good," or "right," not simply when the task is "done." Implications considered include the possibility that aesthetic development may be critical to the development of creative thought and the need to reconsider the pedagogy involved in developmental approaches to defining or identifying exceptional ability in the visual arts. This report on Colorado's efforts to develop early intervention services for infants and toddlers with special needs and their families begins with a planning matrix displaying the program's philosophical base, methods, and system components. The report points out that the statewide service system should be designed to ensure access for all children with special needs.

Activities conducted or planned from June 1987 to June 1992 in each of the 14 systems components of Part H of Public Law 99-457 are documented. A planning strategy for 1990-92 is presented; an implementation strategy is spelled out; policies for implementing the 14 systems components are discussed; and objectives of Part H planning for 1990-91 are presented. These objectives focus on community development initiatives, a training and technical assistance network, support structures, and program administration. (JDD)

IDENTIFIERS- \*Conversational Markers; \*Macrostructures (Information)

This paper attempts to show that certain structural relations that contribute to creating text in spoken and written monologue also bind segments together in conversation. Methodology is based on a model of text as consisting of sequences of a problem-solution structure. Analysis of texts from 12 purpose-oriented telephone conversations focuses on how macrostructural patterns are jointly created and made clear by the speakers in the course of the interaction. It is shown that speakers use two types of markers to clarify the macrostructure of the conversations: markers signaling the type of component in the problem-solution structure for a given unit, and markers that signal boundaries between units. Most markers of the latter type also focus attention on upcoming talk. Speakers used markers indicating the type of component in more than 50% of the structural units in the conversations, whereas 34% of the boundaries between units are specially marked. (Author/JP)

DESCRIPTORS- Communication Skills; Cultural Context; \*Cultural Differences; \*Discourse Analysis; Foreign Countries; \*Language Patterns; Language Usage; \*Lexicology

This paper is concerned with a discourse-based approach to lexis and, in particular, the discourse role of lexical patterns or lexicalized sequences which are completely or partially preassembled and more or less fixed in form. Lexical patterns, their function in a community's codes, and the cultural differences that may arise in their use, are briefly discussed. The relationship of lexical patterns to social competence and to two general discourse strategies, framing and symbolizing, is described. Lastly, the latent, pragmatic nature of lexical patterns is addressed. (Author/JP)

IDENTIFIERS- \*Arkansas; Language Minorities

Aspects of state planning for language in education in Arkansas are examined and of several models of language planning that illuminate this case are analyzed. Information was gathered on language minority populations in Arkansas from census data, reports, and public and private sources. From this, an overall picture of language planning in the state was constructed. Three case studies of areas with language minority populations are used to illustrate the findings: the Hmong in Fort Smith; the Springdale School District; and Paragould Junior High School. As background, the evolution of state policy on English as the official language and on intervention with limited-English-proficient students is chronicled. The case studies are then outlined. In Fort Smith, federally-funded bilingual education was not able to serve the Hmong population, which later relocated to Georgia. The Springdale School District obtained federal funds to train teachers for rapid transitional bilingual education, to mainstream students as quickly as possible. In Paragould, the arrival of two Hispanic junior high school students, an unusual occurrence, caused school personnel to improvise, successfully, by treating the students' native language as a resource, not a barrier. It is concluded that Arkansas' decentralization of policy concerning language in education and the state's limited financial resources suggest that policy supporting native language maintenance may not be feasible. IDENTIFIERS- \*SREB Vocational Education Consortium

This paper summarizes strategies that have been successfully implemented at 3 of the 40 pilot sites working toward the goal of improving the academic competencies of students completing high school vocational programs. The strategies were culled from 30 interviews with academic teachers, vocational teachers, counselors, vocational directors, principals, a supervisor, and a remediation specialist at the three selected sites (a comprehensive high school and two vocational centers that serve four feeder high schools) operated by the Southern Regional Education Board/Vocational Education Consortium. A total of 215 strategies were summarized in 4 categories: (1) instructional strategies; (2) curricular strategies; (3) cooperative efforts between vocational and academic teachers, and (4) administrative practices and procedures. The 69 strategies highlighted in this paper are those actually used to achieve the integration of vocational and academic education at the school-site level. (KC)

This index provides entries for business education articles and research studies compiled from a selected list of periodicals and yearbooks published during 1992. Priority is given to journals essential to research and teaching in the broad business education spectrum with emphasis on information systems (including business communications), business teacher education, and vocational education (primarily marketing education). All entries have the title, author(s), journal, volume and number (if applicable), inclusive pages, month, and year. Subjects are arranged in alphabetical order first by main category and then by subcategories. Main categories contain miscellaneous entries related to that category; subcategories contain more specific entries. Each article is indexed under at least one and no more than four subjects. Major categories are as follows: accounting, accreditation, administration and supervision, business administration, business education, business communications, curriculum, document design and processing, educational institutions, employment, equipment and supplies, general education, guidance and counseling, human relations, information management/processing, keyboarding/typewriting, legislative issues, marketing, microcomputers, minorities, office management, professional development, reprographics, research, shorthand, special education, standards, teaching, testing and evaluation, and training and development. An author listing in alphabetical order follows the subject section. (YLB)

The research on the demand for skills in the U.S. economy is split over the issue of whether technological change has tended to increase or decrease job skill requirements. The question of whether job skill requirements have been rising is important to public policy debates concerning the skill gap, wage inequality, and the changing quality of jobs. Some researchers have attempted to use indirect measures of skill requirements, whereas others have used direct measures and have concentrated primarily on case studies. Neither approach is free of problems, however. A far better data source is job analysis. The job analysis measure developed by Hay Associates is similar to the Dictionary of Occupational Titles (DOT) measure and includes a series of variables that capture the autonomy and complexity of jobs with respect to areas such as know-how,

Environment; Work Experience  
IDENTIFIERS- Canada

A study to explore organizational conditions that facilitate workplace learning involved 35 resource development consultants in Calgary, Alberta, Canada and line staff from 22 organizations in a 9-hour participatory research workshop using Appreciative Inquiry--a technology emphasizing the positive or "life-giving" forces which contribute to a person's ability to be effective in an organization. The workshop format consisted of three separate 3-hour segments. Session 1 activities included naming 235 life-giving forces, grouping them into 17 categories, naming the affirmative topics, and selecting topics related to self-directed learning. Between sessions, the steering committee met to collapse the 17 categories into 7 topic headings. A 42-cell matrix was created to guide examination of the effects of these 7 life-giving forces upon Weisbord's (1976) 6 organizational factors. The second session was devoted to developing "provocative propositions" for each cell. During the final session, participants validated the final "provocative propositions." Using thematic analysis, 10 main propositions or major enhancers of self-directed learning in the workplace were identified: continuous improvement, involving individuals, taking personal responsibility, harmonious values, leadership that sets an example, valuing differences, communication, taking risks, teamwork, and innovation. (Appendixes include a description of the five steps in the Appreciative Inquiry process, information on development of the affirmative topics, 42 provocative propositions, a summary of participant evaluations, and definitions of the 10 organizational enhancers of self-directed learning. Contains 21 references.) (YLB)

IDENTIFIERS- \*Washington (Booker T)

Born into slavery in 1856, Booker T. Washington overcame staggering obstacles to lead emancipated blacks into a quiet revolution against illiteracy and economic dependence. In his lifetime, the national focus became more democratic, and the education of adults proliferated, bringing social change. The first public efforts to educate freed slaves were instigated by the northern military, philanthropic groups such as the American Missionary Association, and the short-lived Freedmen's Bureau. Washington formed his early vision of the world in Hale's Ford, Virginia, an isolated rural crossroads where conditions were bleak for both blacks and whites, and at Hampton Institute in Hampton, Virginia, where the principal, Samuel Chapman Armstrong, became his most significant white mentor. Inbued with Armstrong's model of "head-hands-heart" education, Washington believed that to compete for justice, people must be trained and their training must be determined by

responsibilities of beginning licensed practical nurses (LPN). Project staff reviewed existing medical vocabulary texts and assembled a list of medical vocabulary word parts that were then each reviewed by three working registered nurses to determine their relevance to a beginning LPN. A pretest/posttest format was used to field-test 11 adult learners at two sites in Pennsylvania. The mean pretest score was 6.91 out of 45 (range, 3 to 15), and the mean posttest score was 39.27 (range, 33 to 44). Both the instructors and adult learners who used the new curriculum and materials reacted positively to them when interviewed. (MN)

IDENTIFIERS- \*United Kingdom

This paper promotes the adoption of the lifetime learning targets that form part of National Education and Training Targets (NETTS) for Lifetime Learning in the United Kingdom. Section 1 defines NETTs as goals for levels of participation in education and training. Section 2 considers the characteristics and current profile of adult learners. Section 3 identifies challenges to be overcome if there is to be a greater commitment to education and training, if individuals are to undertake more learning, and if current nonparticipants are to be attracted into education and training during adulthood. Employment issues considered include the priority given to training and development, investment in training for older workers, core and peripheral workers, and the self-employed. Issues are identified that affect participation in education and training of significant groups presently underrepresented in programs. The section concludes by identifying structural challenges relating to the provision of education and training: curricular/sectoral boundaries, student support, access to guidance, the qualifications jungle, access to assessment, and appropriately skilled staff. Section 4 describes current initiatives that seek to overcome the educational concerns and other difficulties in expanding learning activity. Section 5 outlines 10 steps for achievement of NETTs. Section 6 refines the issues identified into a set of general recommendations and a set of key short-term actions which should be taken by particular players. Contains 69 references. (YLB)

This curriculum guide contains five units designed to help high school, college, or postsecondary teachers and trainers to make workplace gender equity issues clear to their students and to lead students to think about and prepare for changing conditions. The units cover the following topics: changing roles and life styles, gender bias and sex role stereotyping, equity in the workplace, individual and institutional opportunities to promote gender equity, and exploring selective equity topics and issues. Each unit contains the following: an outline correlating objectives to content, teaching strategies, and resources; suggestions for the instructor, information sheets to hand out, instructor resources, such as sample lectures, transparency masters, activities, checklists, and references. A resource list includes 38 books and 31 audiovisuals, with sources. (KC)

This handbook contains 48 articles on adult and continuing education. Part 1, which deals with adult education as a field of professional practice, includes articles on such topics as the social and historical contexts of adult and continuing education, adult education and international development, the voluntary sector and adult education, and public policy and finance. Covered in Part 2 are topics related to adult learners and the educational process, such as: adult development and learning, nontraditional education, distance education, program planning and evaluation, and facilitating adult learning. The following are among the major providers of educational programs for adults that are examined in Part 3: public schools, four-year colleges and universities, community colleges, cooperative extension, the armed forces, correctional facilities, public libraries and museums, adult education agencies in the United States and Canada, religious institutions, proprietary schools, and business and industry. Part 4 deals with various adult education program areas and special clienteles, including speakers of nonnative speakers of English, women, older adults, rural adults, racial and ethnic minorities, and developmentally disabled adults. Part 5 presents three perspectives on adult education in the future. The contents of 14 past handbooks

training, learner-centered learning, preventing training problems, additional training concepts, and customer connections. Each chapter stands alone in addressing a particular aspect of training, but at the same time each chapter builds on the information provided in the preceding chapter, progressing to the last chapter, which ties training requirements to customer needs. Checklists, charts, comparisons, questionnaires, and survey samples from many sources provide information to support all training efforts. Most chapters contain a bibliography; a composite bibliography at the end of the book lists 2 resource organizations, 47 books, an article, and a training program. (KC)

IDENTIFIERS- \*Great Britain

Employer approaches to work-based training were identified in a survey of 106 private sector companies based in Scotland in 1989. The survey data were analyzed in relation to the following: Britain's economic weakness, the industrial relations and educational reforms developed by the state as a response to the weak economy, existing labor force policy, training policies and practices in other countries, training provision in Britain overall, training and the personnel function, and training in practice. The study uncovered little evidence of "revolutionary" change in the employer-provided training practices and policies since the 1980s, during which most employment and training practices and policies in Britain were market driven. Per-employee training expenditures still remained relatively low, respectively, and there were few signs that government-sponsored programs for young trainees and long-term unemployed adults were being included as part of any strategic human resource planning system. The study findings were used to demonstrate the shortcomings of a market-based approach to solving Britain's deep-seated economic weaknesses. An alternative strategy calling for government coordination of a more substantial training and vocational education framework was presented. (Contains 22 tables, 2 figures, and 201 references.) (MN)

differential response latency measure of gender schematicity. Eighty female college students completed the Sex Role Behavior Inventory Short Form. Subjects who scored masculine or at the higher levels of androgynous, feminine, or undifferentiated were selected to participate in a reaction time experiment using the computer. Response time latency was used to measure the gender schema. The results of analyses revealed no expected relationship between sextyping and gender schematicity, suggesting that gender schematicity and sextyping are separate and distinct characteristics. Highly sextyped women did not appear to be highly gender schematic, nor did those reporting less sextyping appear to be less gender schematic. (Author/NB)

PUB TYPE- Reports - Research/Technical (143)

DESCRIPTORS- \*College Freshmen; Higher Education; \*Locus of Control; \*Sex Differences; \*Sex Role

Locus of control has most frequently been measured using Internal versus External measures. Some researchers have suggested that the External category should be broken down into two subcategories of powerful others and chance. In much previous research, Internality has been found to be related to positive adjustment. This may have implications for women and minorities, both of whom are more frequently found to attribute control to external factors. While several researchers have examined sex differences, few have used gender role measures in this research. This study was undertaken to examine the relationship between locus of control and gender role. Subjects (N=102) were college students who completed the Bem Sex Role Inventory and the Powerful Others, Chance, and Internal attribution scale. Eighty-four of the subjects were classified as having an internal locus of control, none as having powerful others, four as having chance. Twenty-five subjects were not classifiable by their scores. A nonsignificant trend for the interaction of sex by locus of control was found. Findings further indicated that Internal locus of control may be over-represented in some college populations. This study replicated an earlier study which identified five subtypes of outpatient alcoholics (Uninvolved, Participation,

have for counselors who work with relationship issues. Subjects were 21 women and 16 men recruited from various sources: church groups, groups of graduate students, and community contacts. The subjects completed the Commitment Inventory, a 60-item, 10-subscale inventory that measures the components of constraint and dedication separately. The two constructs were studied by comparing personal dedication to constraint and by studying each construct over time. The results showed that males had a higher level of constraint than did females and that the level of constraint seemed to increase over time. Dedication was similar for both males and females, and the level remained relatively steady over time. It is possible that, among clients who seek counseling for marital distress, those who rate high in personal dedication might be able to work through problems that those who score lower could not. If this appears to be the case, working to increase or develop personal dedication may be a start in early treatment of marital difficulties. (NB)

EDRS Price- MF01/PC01 Plus Postage.

PUB TYPE- Reports - Evaluative/Feasibility (142)

DESCRIPTORS- \*Children; Classification; Clinical Diagnosis; Etiology; Outcomes of Treatment; \*Psychosis; \*Research Needs; \*Schizophrenia; Symptoms (Individual Disorders)

Childhood schizophrenia is a rare but serious disorder with complex symptoms that affect children and their families. Childhood schizophrenia was once the term applied for all childhood psychoses, including autism and mood disorders, but more recently researchers have distinguished childhood schizophrenia from other disorders. There are differing views on the continuity of childhood schizophrenia into adult schizophrenia and on similarities between childhood and adult schizophrenia. A number of symptoms that some very young children with schizophrenia may exhibit have been identified by age, including lethargy (newborns); perseveration (3-12 months); and hypotonia and phobias (2 years). While many of these symptoms may continue through the elementary years, thinking, language, balance, and motor functions also may become disordered. The time of onset of the symptoms of schizophrenia seems to be an important variable in the course and outcome of the illness. The diagnostic criteria of childhood schizophrenia are the same as those for adult schizophrenia. Evidence has suggested that both biological and environmental factors play a role in the development of schizophrenia, although direct causes are still in question. Multimodal treatment programs, based on the child's individual cognitive level, have been suggested in working with children and adolescents. Much more methodologically sound research is needed in the areas of treatment, symptomatology, diagnosis, and etiology of childhood schizophrenia. (Contains 19 references.) (NB)

Parents as Resources When Adult Children Divorce.

PUB DATE- Nov 92

NOTE- 13p.; Paper presented at the Annual Conference of the

replaced by more interactive and integrated approaches to text, based primarily upon a whole language philosophy. Intervention aspects purposely remained open-ended to accommodate each teacher's understandings and preferences. Built-in, weekly, three-way meetings between researcher and teachers created the necessary interaction for grounded theory to become operative. Quantitative data included surveys, teacher tests, student work samples, and gradebook records of student scores. Teachers read literature regarding interactive teaching methods, and, for 5 weeks, ongoing coaching sessions and researcher participant observations enabled teachers and students to experiment with interactive methods in terms of reading. Lorraine, a ninth-grade teacher, dropped inhibiting methods she had developed over the years and invited and weighed suggestions, adapting them to her needs and those of her students. She recognized the extent to which she had dominated the entire teaching/learning situation and noted the consequent negative effect on students. Sarah, an eighth-grade teacher, identified control as the major issue in her classroom. Her students liked and admired her intense desire to get them to learn, but they resisted her regimentation and disciplinary methods. The students thrived with the changes. Overall, student marking period grades increased appreciably. Findings suggest that interactive methods of reading allowed greater student voice and choice of content and method of studying literature. Teachers revitalized themselves and their classrooms. PUB TYPE- Speeches, Conference Papers, "Papers Presented at..." (150), Reports - Research/Technical (143)

DESCRIPTORS- Classroom Research; \*Dialog Journals; \*English Instruction; Literature Appreciation; \*Reader Response; Reading Research; Secondary Education; Student Attitudes; Teacher Attitudes; \*Whole Language Approach

IDENTIFIERS- English Teachers; \*Response to Literature

A study underscored the potential of whole language philosophy as a framework for secondary English teachers and students as they move away from strictly traditional methods. Research methods included case study, grounded theory, and qualitative inquiry. Participants included 2 veteran teachers who taught in a predominantly white, suburban high school which housed 1,000 students in grades 7 and 12. Data collection spanned 1 year and included interviews with the teachers, anecdotal field notes, lesson plans, assignments, student work samples, and teacher learning logs. By the end of the second semester, one teacher who taught 7th and 11th graders regretted having stalled in using dialogue journals. Though she had primarily held to traditional ways of insisting upon required readings of common texts, she had found students read more willingly and more carefully when engaged in dialogue journal activities which enabled them to verbalize opinions in writing and then share ideas with peers. The other teacher, who taught 8th and 12th graders, introduced dialogue journals differently: she used three forms of dialogue journals and quickly recognized the potential for students to grapple with words and ideas. The

the boredom his students showed with their standard collection of essays, created, along with his students, a series of essay topics drawn from the most important problems facing society. Students' essays written in this manner were better in form and content. Another composition instructor experienced a "teaching epiphany" during a discussion of an essay concerning what motivated people to risk their lives to help save Jews from Nazis. As the students discussed what they would do, they recalled Martin Luther King's "Letter from Birmingham Jail," which addressed that very issue. A passionate and heated discussion ensued, which lasted to the end of the class period and spilled out into the hallway after class. Political literature can play an essential role in motivating students to think deeply, in teaching them to write better, and in preparing them for the world beyond the classroom. (RS)

DESCRIPTORS- Cognitive Development; Higher Education; Paraprofessional Personnel; \*Peer Teaching; Program Descriptions; Role Playing; \*Training Methods; \*Tutorial Programs; \*Tutoring; \*Writing Instruction

IDENTIFIERS- Blooms Taxonomy; California State University Northridge

Tutor training programs in composition which emphasize interpersonal skills while offering concentrated correctness doses of mechanics and grammar are inherently limiting. While interpersonal skills are important, they only superficially address the complex situation of tutoring. A prescription for a healthy tutor program, one which would allow tutors to become paraprofessionals, must include measured doses of cognitive training. The tutoring program at the California State University (Northridge) combined Bloom's taxonomy into three "therapies": observation, interaction, and talk. Observation therapy is itself continuous and mirrors the peer collaboration techniques stressed in the program. Tutor trainees meet twice a week for a total of 3 hours. Once a month, the class is converted into a general meeting during which trainees and veteran tutors meet to discuss writing center experiences and issues and to engage in peripheral participation activities. Interaction therapy allows tutors to role play with the knowledge developed during observation therapy. Role playing emphasizes remembering and applying the generalizations and principles developed during observation treatment. Talk therapy, a tutor training course, focuses on the tutors' needs and allows the time for synthesis and evaluation by holistically and organically combining and recombining knowledge, comprehension, application, and analysis. Knowledgeable, well prepared tutors are needed, especially on campuses with rapidly growing diverse populations. (Two figures representing aspects of the tutor training program are included.) (RS)

comments themselves and the flagrancy with which the electronic medium asserts itself. For some teachers, a "flaming" InterChange threatens their position in the classroom and challenges their authority. The idea of the classroom as a nonflammable area seems to be desirable to many an instructor, in disregard of the fire that is raging outside of the safe and privileged setting of the computer classroom. InterChange can be an empowering experience for the students as well as the teacher. Flaming sessions tend to occur when students enter under a pseudonym and abuse the fact that they are completely invisible. During one such "flame," the other students and the instructor protected themselves and their writings by indirectly excluding the flamer from the discussion. However, in a session on the exploitation of women in beer commercials, the traditional power structures were reinforced and the exchange became hostile. The instructor incorporated the transcript of the flaming session as a primary text and had the students discuss the transcript during the next InterChange session. Used as a primary text, InterChange holds a lot of potential as a teaching tool. Teachers should not extinguish the flames but burn down the walls that separate the classrooms and the outside world where flaming is a fact of life. (RS)

PUB TYPE- Opinions/Personal Viewpoints/Position Papers/Essays (120), Speeches, Conference Papers, "Papers Presented at..." (150)

DESCRIPTORS- \*Course Content; Democracy; English Instruction; Freedom of Speech; \*Freshman Composition; Higher Education; Ideology; Intellectual Freedom; Marxian Analysis; \*Political Issues; Teacher Attitudes; Textbook Content

IDENTIFIERS- Aristotle; \*Composition Theory; Marx (Karl); Writing Contexts

The classical marketplace metaphor for intellectual exchange forms the ideological basis for the way argument is still taught in composition classrooms, where supposedly students are being prepared to participate as full citizens in an equal democracy. However, such a view of democratic citizenship, free speech, and argument is open to criticism for many reasons. Three chapters on argument from commonly used composition textbooks were analyzed for signs of this ideology. The textbooks described argument as practiced by equal participants on a level playing field. Participants must play by the rules, according to the texts. Facts and figures that are judged scientifically are privileged forms of information. The texts ask writers to move toward a consensus rather than become involved as interested partisans. Many teachers continue to believe in the myth of democratic participation. Karl Marx has critiqued such a position as being merely the veiled tricks of the ruling class to maintain control and power. Oppressed peoples must be convinced that they are not, in fact, oppressed. Preaching to economic and social subordinates that they are democratically "equal" to their oppressors is to obscure the truth of their situation and to deny them freedom

Americans, and Native Americans--who make up approximately 95% of the minority population of the United States and who are underrepresented in educational and economic achievement and overrepresented in poverty, joblessness, educational failure and attrition. Sections of the paper discuss: how educators contribute to student failure; attacks on minority culture from the society at large; the "English only" movement; differential treatment established by traditional school funding; identification of the root cause; how educators can become advocates for minority students; and retrieving the dream of the civil rights movement of the 1960s. IDENTIFIERS- \*Childrens Writing; Writing Contexts

Intended for both experienced and novice K-12 teachers, this book invites teachers to bring new life into the reading-writing workshop and calls for teachers to push back the frontiers of their thinking about teaching writing and reading. The book includes chapters on establishing courses of study in which children read and write memoir, picture books, and nonfiction; the story of how writers' notebooks and a new focus on rehearsal have led to a major rethinking of the writing workshop; a look at the qualities of good writing; an introduction to literature and ways these texts can enrich classrooms; and an invitation to pioneer new ideas about conferring, record keeping, mini-lessons, and organizational structures for the workshop. Chapters in the book are: (1) Big Dreams and Tall Ambitions in the Teaching of Writing; (2) A Place for Writing and Reading; (3) Shared Stories Turn Classrooms into Communities; (4) The Notebook: A Tool for Writing and Living; (5) Rereading and Reflecting: Adding Growth Rings of Meaning to Our Writing; (6) From Notebooks to Projects; (7) Revision of Teaching; (8) When Writers Clear the Sills of Their World; (9) Silent Spaces and Study Groups in the Reading and Writing Workshop; (10) New Frontiers; (11) Picture Books and the Magic of "Once upon a Time"; (12) Memoir: Reading and Writing the Story of Our Lives; (13) And the Walls Come Tumbling Down: Bringing Our Lives to Nonfiction Research; (14) Learning to Confer in Ways That Last a Lifetime; (15) Records of Growth; (16) Hopes and Horizons: Understanding Our Children's Images of Good Writing; (17) Density in Writing: When Tests Take Writers and Readers on Significant Journeys; (18) On Loving Words; and (19) Nurturing Writing, Nurturing Teaching. Ideas Plus: A Collection of Practical Teaching Ideas. Book Ten.

competing in rhetorical criticism forensic events. Subjects, 31 students at the Michigan Intercollegiate Speech Association state championship, completed a questionnaire. Results indicated that: (1) only 1 of the 11 subjects who had experience in competitive rhetorical criticism chose to stop participating in the event; (2) of the 20 respondents who had never competed, only 8 claimed that they believed a rhetorical criticism speech was too difficult to write; (3) gender differences apparently played no part in competitor apprehension; (4) several subjects indicated an influence of educational level, interests and exposure on participation in rhetorical criticism; (5) lack of understanding about the rhetorical criticism event appeared to be a primary reason for competitor avoidance; and (6) encouragement from coaches was a significant factor in a student's decision to pursue success in rhetorical criticism. Findings suggest that intercollegiate forensic coaches and facilitators need to provide ample encouragement to their students and decide exactly what rhetorical criticism is. (Twenty-three references are attached.) (RS)

DESCRIPTORS- \*Advertising; Cognitive Development; Elementary Secondary Education; Literature Reviews; \*Mass Media Effects; Mass Media Role; \*Media Research; Research Needs; Research Utilization; \*Smoking; \*Young Children

IDENTIFIERS- Advertising Effectiveness; \*Content Regulation (Broadcasting); \*Joe Camel; Media Literacy

The Joe Camel campaign by RJR Nabisco began in 1990 in an attempt to increase the brand's sagging market share. Studies showed the campaign's appeal to young children and teenagers. In the debate that followed, several children's advocates renewed their appeals for restriction on cigarette ads. A review of the literature shows that children are at a disadvantage when confronted with television and its advertising content. Young children are more attracted by perceptual features of content, have difficulty processing all but the most explicit stimuli, and often cannot comprehend the meaning or intent of broadcast material. The government agencies that called for this research in the 1970s often ignored relevant findings when setting policy. Deregulated broadcasting of the 1980s led to a dramatic increase in the number of independent stations, children's programming, and children's advertising. The Camel campaign appealed to youngsters who read magazines like "Sports Illustrated" and saw Joe Camel on billboards and store windows. Rather than trying to guide policy, researchers should focus future work on more basic questions concerning the cognitive development of children, and how they process information from all mass media. Such study can explore the viewing and consumer situations young people face every day and how these situations trigger important steps in the cognitive development process.

large midwestern university, rated the communicator style and power bases used by either a highly effective or highly ineffective teacher. Results indicated that both groups of students agreed on the communicator style and power variables that characterize a bad teacher. However, the two groups differed in their perceptions of how good teachers communicate and use power in the classroom. (One table of data is included.) (Author/RS)

IDENTIFIERS- Communication Behavior; \*Communication Strategies; \*Compliance Gaining Strategies; Safe Sex Practices

A study examined the likelihood of using compliance-gaining strategies when engaging in safe-sex situations. A sample of 110 college students from a large midwestern university completed a 16-item questionnaire that utilized G. Marwell and D. Schmitt's compliance-gaining typology. Results indicate that female college students were significantly more likely than males to use nine of the strategies: threat, expertise-positive, expertise-negative, aversive stimulation, self-feeling-positive, self-feeling-negative, altercasting-positive, altercasting-negative, and altruism. Findings suggest that males and females differ somewhat in their use of compliance-gaining strategies when engaged in safe sex situations. Future research should investigate specifically the content of the communication. (Two tables of data are included; 22 references and the survey instrument are attached.) (Author/RS)

The New Jersey State government could reduce pupil transportation aid payments to local school districts by between \$35 million and \$50 million by eliminating support for questionable expenditures and by using the funding formula adopted in the Quality Education Act of 1990. This report describes how these dollar savings can be achieved. The major conclusion is that the general approach of the new funding formula affords a matchless framework for controlling costs, if properly employed. At present, however, needlessly high payments are being made to a number of districts. Problems with the new formula include inaccuracy in reporting, overpayment, rewards for past inefficiencies, transportation for special education students, the use of population density as a factor for determining transportation costs, and "aid-in-lieu of" transportation of private school pupils. Five recommendations are made to change the aid formula, data-collection process, and practices. Six tables are included. (LMI)

IDENTIFIERS- \*San Antonio Independent School District TX

This report describes the collection of baseline demographic data for a 3-year study of private and public school choice programs in San Antonio, Texas, for grades 1-8. The two choice programs involved are: (1) the privately funded Children's Education Opportunity Foundation (CEO) program providing partial scholarships to low-income children for use in private and out-of-district public schools; and (2) a districtwide multilingual public school choice program offered by the San Antonio Independent School District (SAISD). The baseline data report encompasses both choosers and nonchoosers. Findings show that both programs primarily serve Hispanic families. Anglos are slightly overrepresented among CEO-choosing families. African-Americans are slightly overrepresented in the multilingual program. The CEO program primarily serves low-income families, while the SAISD multilingual program serves a wider income range. Choosing families are better educated and have higher incomes, fewer children, more female parents in the work force, and higher educational expectations for their children than nonchoosing families. Over half the choosing students are females; almost two-thirds of nonchoosing students are males. CEO parents selecting private sectarian schools are more involved in religious activities than either multilingual or nonchoosing parents. Both choosing and nonchoosing families highly value education, compared to other goals. Participating CEO parents were satisfied with the scholarship amount. The discussion is accompanied by 32 tables and an executive summary. (MLH)

This book provides a personal look at the styles of several school leaders, probes the literature on school leadership, and explores some of the instruments designed to measure leadership style. The introduction explains the need to change leadership styles as education changes. Chapter 1 examines the redefinition of leadership roles and the role of leadership styles in the changing educational system. The second chapter describes two theories--leadership as management and situational leadership. Leadership most effective for rural schools and in reform contexts are described. Instruments to measure leadership styles are discussed in the third chapter, which provides a checklist for selecting a useful measure. Chapter 4 describes leadership roles that will see the greatest change in the future and offers resources for more information. Five figures and chapter endnotes are included. Appendices contain information about 28 leadership styles instruments. (LMI)

DESCRIPTORS- \*Educational Improvement; \*Educational Policy; Educational Quality; \*High Schools; \*Outcomes of Education; \*School Restructuring; State Action; \*State Standards

IDENTIFIERS- \*Texas

In creating the Texas Task Force on High School Education, the State Board of Education directed the task force to review the status of public high school education in Texas and develop a policy to prepare the state's high schools for the 21st century. This report is the task force's response to that charge. The first section analyzes the need for restructuring Texas high school education. Inadequacies of the current system are demonstrated in academic underachievement, particularly among minority students, and health and safety issues. Subsequent sections offer information on each part of the high school education policy: mission; community of learning; organization; curriculum, instruction, and assessment; professional growth and development; and student supports. Recommendations for restructuring include the following: abandon academic tracking and class ranking; pair each student with a teacher to develop an individualized learning plan; improve teacher working conditions and give teachers more control; coordinate student support services with other professionals; and develop an instruction-focused, flexible daily school schedule. To implement the task force policy, it is recommended that secondary education build educational excellence and equity, provide professional development, create a network to support high school restructuring, communicate and coordinate high school reform, and establish local and state conferences on high school education. This proceedings reports on a national conference which explored means of eliminating and reducing barriers to employment, educational opportunities, and rehabilitative services for minority individuals with disabilities. Section I, titled "Policy Implications and Future Forecasts," contains five papers with the following titles and authors: "Future Frontiers in the Employment of Minority Persons with Disabilities: NIDRR's Role" (William H. Graves); "Status of Minority Persons with Disabilities: Where Do We Go from Here?" (Howard Moses); "Prevalence, Distribution and Impact of Disability among Ethnic Minorities" (Sylvia Walker and others); "Differences in Rehabilitation Service Utilization Patterns of African Americans and White Americans with Disabilities" (Faye Z. Belgrave and Sylvia Walker); and "Substance Abuse among Physically Disabled Patients in a Hospital Serving Urban Minorities" (Herbert L. Thornhill). Section II, titled "New Frontiers in Multicultural Approaches," includes: "Enhancing Diversity: A Multicultural Employment Perspective" (Lynda R. Campbell); "Hispanics with Disabilities in the Work Force: A Window of Opportunity" (Antonio Suazo); "Vocational Rehabilitation and the American Indian: Where Is the Innovation?" (Jennie R. Joe); and "The Employment of Asian/Pacific Minority Persons with Disabilities" (Alan H. Woo). Section III, "Frontiers in Assistive Technology," offers the following five papers: "Future Frontiers in the Access to Technology" (Robert W. Nicholls); "Hearing To Read: The Kurzweil Reading Machines" (Grace J. Lyons); "What Is Appropriate Technology?" (Jan Galvin and Betsy Phillips); "The Computer: A Vehicle for Access for People with Disabilities" (Susan Boaz); and "Information Technology Program for Persons with Disabilities" (Patrick Sheehan). The final section, "Advancing Frontiers through Collaboration," contains "Bridges to Leadership 2000: Howard University Youth Leadership Training Program" (Sylvia Walker and Satwant Kaur); "Maximizing Potential: The Parents' Role" (Shirley Poindexter Dyer); "America's Mean Streets: A Challenge to Youth" (Isaac W. Hopkins); "Collaborative Models: Partnerships for Success" (Joyce Keener); and "Empowering Minority Persons with Disabilities through Collaboration" (Toni Killings). (JDD)

This guide presents a model for evaluation of educational outcomes appropriate for use with all students (with and without disabilities). It addresses specific post-school outcomes, associated indicators, and possible sources of data for the indicators. The model identifies seven measurable outcome domains and three to five outcomes per domain. The seven domains are as follows, with sample outcomes in parentheses: (1) presence and participation (individual is employed); (2) physical health (individual makes healthy lifestyle choices); (3) responsibility and independence (individual functions independently); (4) contribution and citizenship (individual votes and pays taxes); (5) academic and functional literacy (individual demonstrates competence in communication); (6) personal and social adjustment (individual gets along with other people); and (7) satisfaction (individual reports satisfaction with current status). For each of the outcomes, one to seven possible indicators are then identified (for example, percent of individuals in the workforce). Finally, steps toward identifying sources of data for indicators are suggested, with such examples as informed respondent interviews, individual surveys, observation records, parent reports, and supervisor ratings. IDENTIFIERS- \*Colorado

This document summarizes the final reports of five Colorado classroom projects funded to promote and evaluate effective instructional techniques for students with learning disabilities. (However, the projects also involved students who were not disabled.) The five projects dealt with: (1) effectiveness of using an edu-kinesthetic whole brain learning program with students with learning disabilities, students with speech/language delay, and regular classroom students; (2) fruits of team teaching within mainstream writing classrooms; (3) making phonics multisensory via visual phonics to enhance early reading instruction; (4) using recorded books to enhance regular and learning-disabled first graders' natural enthusiasm for reading and to maintain their self-confidence about learning; and (5) improvement of decoding skills and perceptual motor speed through use of a combination of visual, auditory, kinesthetic, and tactile approaches to learning sound/symbol relationships. IDENTIFIERS- Defendants; \*Open Ended Questions; Witnesses; \*Yes  
No Questions

To account for coercive force in questions posed by counsel to  
defendants and witnesses, several levels of speech must be  
addressed. Forensic linguistics literature discusses the scale  
of coerciveness as reflected in the syntactic form of the  
questions. It is argued that this type of analysis fails to  
account for the inferences made by hearers (i.e., judge and  
jury) and that syntactically coercive questions can be highly  
cooperative and vice versa. An analysis of the televised mock  
trial of Lee Harvey Oswald showed that the most coercive forces  
were found not so much at the syntactic level as at the  
pragmatic, situation-bound level, with control strategies  
isolated. On the surface, courtroom evidence consists of facts  
but in practice, facts are produced under syntactic and  
pragmatic coercion because they are tailored to the needs of  
the real addressee, the judge and jury. (JP)

Analysis; Foreign Countries; \*Languages for Special Purposes;  
\*Literary Genres; \*Sciences; \*Text Structure; \*Written Language

This article presents methods and results from diachronic studies  
of articles carried out within the project "LSP Texts in the  
20th Century," a study of genre-bound linguistic change and  
variation in science and popular science in the fields of  
economics, medicine, and technology. The interrelationship  
between text and context is central for the general theoretical  
model within which the LSP studies at the cognitive, pragmatic,  
macrothematic, and microsemantic levels are carried out.  
Methods for cognitive and macrothematic analyses and results  
from the study of the superthematic structure of 90 articles  
within science and popular science are described. Findings  
point to clearer genre boundaries for the scientific text genre  
and homogeneity of the scientific articles. (Author/JP)

analyzed in terms of several models of language planning. First, the stated foreign language proficiency goals of the four undergraduate colleges (arts and sciences, nursing, economics, and engineering and applied science), the Penn Language Center, the Office of International Programs, and the various foreign language departments are outlined. Strategies used for implementing those goals are then enumerated, including proficiency testing, the less commonly taught languages and content-based instruction used at the Penn Language Center, other study abroad programs sponsored by the Office of International Programs and campus-wide resources and projects to promote language use. Outcomes in the various programs are examined, and it is concluded that, despite the apparent dedication and achieved outcomes of these efforts, there is evidence of some hesitancy to commit fully to language instruction, including reluctance to require language skills before matriculation and limited articulation or interaction between language centers and related programs. In the context of a language planning framework such as that of J. Fishman (1979) problems or areas for improvement are identified in the phases of issue clarification, codification of purposes and procedures, elaboration of priorities and deadlines, implementation, evaluation, and iteration/cultivation. EDRS Price- MF01/PC01 Plus Postage.

PUB TYPE- Reports - Evaluative/Feasibility (142), Journal Articles (080)

DESCRIPTORS- \*Classroom Communication; Cultural Differences; Discourse Analysis; Elementary Secondary Education; Group Dynamics; Interpersonal Communication; \*Listening Skills; \*Multicultural Education; \*Personal Narratives; \*Self Expression; Sociocultural Patterns; \*Story Telling

The role of personal narrative in multicultural education is examined. First, the relationship between student voice, storytelling, and the transmission of culture is discussed in the context of recent literature on those topics. The concept of voice describes the process of expressing oneself meaningfully through utterances and actions according to rules of social discourse. It is argued that the individual develops an individual and cultural voice through narration and dialogue, his/her own and/or others'. However, narrative is seen as rarely being given that positive a role in the classroom. Narrative is often treated as a lower form of discourse, and students are pushed to leave it behind as they progress through school. Expository or essayist writing is emphasized. As a result, cultural forms of narrative that are not essayist are de-emphasized. Teacher perceptions of the non-conforming discourse of some students may affect the students' access to literacy-related events, depending on the degree to which teacher and child share discourse conventions and strategies. It is proposed that teachers be taught the politics of discourse and learn listening skills that convey to students the message that while the cultural stories they have to tell are different, none is inferior. (MSE)

IDENTIFIERS- France; Germany; Latin America

Three centuries ago only religious schools and apprenticeship controlled by the guilds existed to provide training. Regular academic schools originated in religions that needed a well-educated clergy, and these schools offered the model for the universal basic and secondary schools that exist today in nearly all countries. The European guilds gave structure and substance to learning through the opportunity to study with a master. Apprenticeship has survived the centuries. At its most sophisticated, it has become very complex and structured, as in the German dual system. Three types of training have roots in the regular schools: arts and crafts schools, vocational and technical schools, and comprehensive high schools. Although France offers many other forms of skill training, the typical French system provides for the simultaneous delivery of skills and the regular school curricula. A system that has greatly influenced other countries is the U.S. comprehensive high school. Its main characteristic is to keep all students together until the end of the secondary level. Three systems are descendants of the apprenticeship tradition: the dual system from Austria, Germany, and Switzerland; enterprise-based training centers in Latin American countries; and the Japanese system in which vocational training is offered by large corporations. These systems cannot simply be transplanted from one society to another. They must be adapted to local conditions. In addition, their shortcomings in the country of origin tend to be exaggerated. IDENTIFIERS- Europe; \*Instrumental Enrichment

The discussion of long- versus short-term effects is usually absent when it comes to the choice of training technology. Short-term effects become the major criteria for the choice: training resolves a concrete problem. An important reason for thinking about long-term effects of training and training strategies is the ultimate objective of training the European work force: to become flexible enough to face the uncertainties of the future. The Instrumental Enrichment Program (IEP) illustrates how firms and human development specialists deal with the dilemma of short- and long-term effects. IEP is an intervention program to improve cognitive development and thus make learners more eager and more able to learn. The research and evaluation of experimental applications of IEP in the workplace have not achieved the same positive, long-lasting effects of cognitive change that have been verified with

problem solving, and accountability. The Hay technique of job analyses was used to study the changing skill requirements for production and clerical jobs. The results suggested support for highly significant skill increases in production jobs. The results for clerical jobs, on the other hand, varied significantly by function. Half the clerical jobs examined experienced significant increases in skill needs, whereas the other half experienced significant decreases. Appendices contain data on the Hay technique, a list of production job titles, and graphical analyses of eight jobs. (Contains 83 references.) (MN)

IDENTIFIERS- \*Systematic Curriculum and Instructional Develop;

\*Tech Prep

The Systematic Curriculum and Instructional Development (SCID) model provides a tested procedure for developing high-quality, low-cost competency-based education and tech prep curriculum and instructional materials. It consists of 5 phases--analysis, design, development, implementation, and evaluation--and 23 components. The analysis phase includes needs, job, and task analyses. In the design phase, the task performance information collected during analysis is used to determine a training approach and develop learning objectives, performance measures, and a training plan. The development phase results in the production of whatever instructional materials, including media, were decided upon during the design phase. In competency- and performance-based programs, the instructional materials typically take the form of competency profiles, learning guides, and modules. The more traditional education and training programs usually produce curriculum guides, courses of study, and lesson plans. Implementation involves putting the education or training program into actual operation. The training is conducted, and learner performance is evaluated. Results of instruction are documented in the form of student and instructor performance records. Summative evaluation data is collected and analyzed; corrective actions are initiated. (Attachments include graphic and descriptive information about the model.) (YLB)

IDENTIFIERS- \*Business and Techn Educ Council (Great Britain); Great Britain

In a yearlong project, Britain's Business and Technology Education Council (BTEC) investigated why some students leave their educational programs before achieving their certificates or diplomas. The project drew information on completion rates from the BTEC database. Views of BTEC centers' staff were canvassed through a national survey covering 348 programs in business and finance, computing, and engineering. Center staff and BTEC's lead moderators shared views on good practice and the development work going on in their centers to improve completion rates. Field work visits involved interviewing program teams and 60 students and studying programs. A postal survey obtained insights from noncompleting students on their reasons for leaving their programs. Analysis revealed the following: personal attention was the basic principle behind good retention rates; most BTEC students left a program with some recorded achievement; getting a job was one of the main reasons for full-time students leaving programs; loss or change of employment and other work-related reasons were among the main reasons why part-time students left early; and most students who left early did so for program-related reasons, such as poor grades or poor achievement. Examples of good practice in centers include the following: improving personal attention, student support and personal tutoring; supporting large numbers of students; providing links with employers; dealing with anxiety; providing preenrollment attention; and using open and flexible learning techniques. IDENTIFIERS- \*Nova University FL; \*Total Quality Management

This package includes a description of Nova University's Human Resource Development (HRD) core seminar and seven doctoral student papers. The description (by Warren Groff) explains how a major curriculum change was made to convert the vocational, technical, and occupational specialization seminar, Personnel-Human Resources Development, to the core seminar, Human Resources Development (HRD). The conceptual framework for the HRD core seminar involved an audit of HRD within the student's work context, a vision of a strategic direction and preferred scenario for an area of responsibility within each student's work context, and creation of a multiyear HRD action plan. An important issue for the Ed.D. Programs for Higher Education was seen to be assembling the critical mass of HRD Systems Engineers who would design and implement forms of alternative education that would produce a critical mass of high performance learners and leaders who could create learning communities in an advanced technical era. Appendixes include 24 references and the 7 student papers: "An Analysis of Governance Structure of the Amarillo Hospital District and Northwest Texas Hospital" (Richard Pullen); "Strategic Planning: Delivery of Quality Care through Nursing's Commitment to Quality Improvement" (Pullen); "Goals: Implementation of a Program to Enhance Nursing Commitment to Total Quality Improvement at NTH" (Pullen); "An Analysis of Human Resource Development at Arkansas Technical University" (Kathryn D. IDENTIFIERS- \*Motorola Inc

A study examined mentoring as a means of furthering the career development of managers, technicians, and highly skilled workers employed by Motorola Incorporated, which has had a formal mentoring program in operation since 1980. Senior managers and new employees who were paired in Motorola's mentoring program were surveyed to determine their perceptions regarding the need for mentoring help, the effort expended in gaining mentoring help, the help received, and the effectiveness of help received. Formally assigned mentors were not the proteges' primary source of mentoring help. Proteges did not find the mentoring relationships as helpful as their mentors believed them to be, and mentors did not feel that proteges put as much effort into finding help as the proteges stated. Exclusive one-to-one mentoring relationships proved to be quite rare and, in most cases, could not be successfully mandated by the company. The proteges recognized a need for mentoring help, made efforts to obtain help, and managed to obtain most of the help they needed from sources within the Motorola organization. A mentoring system designed as a protege-driven open system in which proteges seek and receive needed mentoring help from a number of sources was recommended. This digest contains three articles on gender equity in vocational education, especially in relation to the provisions of the Vocational Education Act of 1976 and the Carl Perkins Act of 1984. "Gender Equity in Vocational Education" (Debra J. Robbin) describes interviews with students at a New England vocational school, in which they reported a generally equitable school environment, but some striking gender differences appeared in opinions about the roles of females and males in the workplace; "Vocational Education in the School Reform Movement" (Sundra Flansburg) highlights some of the equity issues raised in school reform discussions and their implications for vocational education; and "Shaping a New Decade: Women in Construction" (Susan Eisenberg) provides a perspective on the status of women in the building trades. An annotated list describes 11 publications on gender equity available from the Women's Educational Equity Act Publishing Center. (KC)

McAuliffe, Anne, Ed.

Mentoring in Educational Settings: Unresolved Issues and

Ambivalent, Precontemplation, Contemplation) according to the stages of change model, extending the effort to 404 polydrug users at a Veterans Administration hospital. Subjects were administered a demographic questionnaire; the Alcohol Use Disorders Identification Test (AUDIT); modified drug, psychiatric and legal sections of the Addiction Severity Index (ASI); the Short Michigan Alcoholism Screening Test (SMAST); the Drug Abuse Screening Test (DAST); and the University of Rhode Island Change Assessment Scale (URICA). Scores on the URICA were subjected to a cluster analysis, yielding four of the five profiles identified in the earlier alcoholism study. Since four out of the five profiles were nearly identically replicated in a more diverse substance abuse population, there do appear to be reliable differences in motivation as measured by the URICA in individuals applying for a variety of addiction treatment services. Continued replication of the profiles in different settings may clarify the parameters of the Uninvolved cluster not replicated in the current study. Members of the Precontemplation cluster scored significantly lower on the SMAST, DAST, and AUDIT; were significantly more likely to have had legal pressure to enter treatment; and were more likely to be referred to outpatient or community services than to inpatient treatment. The results are interpreted as suggesting that differences between the four clusters are most meaningful between the Precontemplation and successive stages of change. (Author/NB)

DESCRIPTORS- \*Acquired Immune Deficiency Syndrome; At Risk Persons; \*Caregivers; \*Chronic Illness; Death IDENTIFIERS- \*Stigma

In this paper, human immunodeficiency virus (HIV) and Acquired Immune Deficiency Syndrome (AIDS) are analyzed in terms of stigma and illness trajectory. The primary purpose is to conceptualize how individuals with HIV/AIDS experience stigma and to demonstrate how these experiences are affected by the social and biophysical dimensions of the HIV/AIDS disease course. This paper is informed by existing conceptualizations and ongoing research into the experience of HIV/AIDS caregivers. Three stages are used to analytically describe the HIV/AIDS illness trajectory: the At Risk stage, the Latent stage, and the Manifest stage. The Latent stage is subdivided into the Latent Acute and Latent Asymptomatic phases while the Manifest stage is subdivided into the Early Manifest and the Full Blown AIDS phases. It is noted that the nature of stigma and its management change as the individual progresses from one stage in the trajectory to the next. It is proposed that, in going from being at risk for HIV infection to full blown AIDS, the individual and the caregiver must address several problems: (1) the experience and impact of stigma; (2) information control and management; (3) identity changes; and (4) physical decline and impending death associated with HIV/AIDS. How the individual and caregivers address these and other problems of

Adults; \*Parent Child Relationship; \*Parent Role; \*Social  
Support Groups

Although a vast proportion of the literature within the last decade has been devoted to the role of adult children in caring for aging parents, family specialists need to acknowledge how older parents continue to function as family resources to their adult children, especially when these children are coping with major life problems. A study was conducted to explore how aging parents serve as resources for their adult children when children experience dissolution of their marriages. Fifty-two parents, ranging from 54 to 87 years of age, were asked to describe their experience of their adult children's divorces and to reflect upon ways in which they were helpful to their children during this life transition. Taxonomical analyses of the qualitative data were conducted. Results suggest that virtually all of the parents aided their children in one way or another. Although advice was provided sparingly and with some trepidation, emotional support was freely given. Frequently cited modes of instrumental assistance included provision of financial support for basic needs, attorney fees, or mortgage payments; housing; and childcare. (Contains 20 references.) DESCRIPTORS- Higher Education; \*Majors (Students); \*Psychology;  
\*Self Help Programs; \*Social Support Groups; \*Undergraduate  
Students; Undergraduate Study

This document notes that the academic and emotional needs of undergraduates planning their futures in psychology are not often addressed. It proposes self-help support groups as a means of alleviating the tension and stress faced by psychology majors. The model for the support group described in this paper is adapted from Yalom's (1985) 11 therapeutic factors in group therapy (installation of hope, universality, imparting of information, altruism, corrective recapitulation of the primary family group, development of socializing techniques, imitative behavior, interpersonal learning, group cohesiveness, catharsis, and existential factors). The formation and functioning of an 11-week self-help group consisting of 11 female undergraduate psychology majors who were in danger of dropping out of the field of psychology is described. Areas discussed include interviewing of potential group members, group rules, open versus closed groups, the life span of the group, the duration of group sessions, group size, and group members' rights. A section on theoretical models notes that the support group was guided by behavioral and person-centered models. Included in this paper are suggestions for the formation of a group; a discussion of group dynamics; and descriptions of specific interventions, processes, and follow-

teachers approached change warily, yet found the results edifying. The students reacted strongly to restraints imposed by required readings and study guide questions; they much preferred the freedoms of selecting their own reading, exploring their own ideas, and consulting with one another to construct meaning. IDENTIFIERS- Chesterfield County School District SC; Direct Instruction; Middle School Students

A program was developed and implemented to improve the reading achievement of 56 learning-disabled (LD) students in grades five through eight in a rural school district in South Carolina. Only 12% of the students were meeting the state standard in reading. Baseline test data indicated that reading achievement was from two to six grade levels below grade placement. Problems identified were absence of written basic skills curriculum aligned with the tests used to measure achievement; lack of consistent, effective instruction in the basic skills areas; and the need for more parental support and involvement in the education of students with special needs. Solution strategies for improving reading achievement of LD students included the development of functional basic skill curriculum guides, training for teachers in the use of direct instruction techniques, field testing the curriculum guide, inclusion of the basic skills objectives in the individualized education programs of the students, implementation of a direct-instruction model in the teaching of reading, use of the Corrective Reading Program, and involvement of parents. As a result of intervention strategies, 25% of the targeted students met the state standard on basic skill tests. Over 55% of the targeted students gained two or more grade levels in reading. The discrepancy between the students' estimated ability and reading achievement was reduced by 41%. Parent involvement increased from 10% to 75%. (Seventeen tables of data are included; 49 references, 10 appendixes of data, table of contents of the Students Offered Success curriculum, evaluation forms, and a newspaper article are attached.) National Writing Project reports show that writing process institutes and workshops have effected some positive changes in attitudes toward personal writing. The many teacher-written articles appearing in professional journals attest to the use and benefits of personal writing in the classroom.

Nevertheless, there is still no evidence that whatever has taken place in writing or content-area classrooms as a whole in the last two decades has improved student writing or content-area learning. The lack of positive evidence from existing research as well as the absence of truly cogent research on the subject is striking and must, until proven otherwise, constitute negative evidence on the usefulness of personal writing. Much criticism of the personal narrative is coming from university researchers and scholars; K-12 teachers either have not raised their voices or, if they have, have not sought or found publication. Why are there so few teacher-written articles pointing out problems with an emphasis on experience-based writing? Perhaps highly touted pedagogical ideas cannot be evaluated by K-12 teachers until university researchers and scholars begin to criticize them. Professional organizations urgently need to find ways to encourage and present ongoing critical dialogues by K-12 teachers on the pedagogical beliefs and practices advocated by university researchers and scholars, no matter how reasonable and appealing these beliefs and practices may seem. IDENTIFIERS- Student Empowerment

The use of peers has long been beneficial to students: especially useful are cross-age projects, where students in the elementary and secondary grades engage in a common unit featuring projects separate to each grade and whole group activities. Cross-age projects are workable with careful planning in advance among teacher and administrators. Finding an expendable, yet educationally sound, topic for cross-age grouping in the language arts classroom is perhaps the more difficult task. The topic itself should be chosen first with the elementary student in mind. Topics and their accompanying activities must be selected with care and specifically tailored to each grade level. One successful topic centered around Beatrix Potter and her classic tales featuring Peter Rabbit and other characters. A cross-age unit was designed to last 16 days, with 4 of those days combining both grades--first and eighth or seventh and second). Activities within the unit incorporated the language arts skills normally taught. For cross-age projects, students should be graded upon participation and the quality of the activities completed. Although time-consuming and sometimes difficult to plan, cross-age projects more than make up for their troubles to teachers in student enjoyment, empowerment, and achievement. (Four figures that illustrate the unit in full and describe a collaborative research paper activity, a list of activities for a "Peter Rabbit Day," and a list of questions for a book review/response activity are attached.) Contributed by English teachers across the United States, the activities contained in this booklet are intended to promote the effective teaching of writing and literature. Teaching strategies offered in the first section of the booklet are designed to stimulate language exploration and include activities in which students write family newspapers that include the proper journalistic components; use clustering to write poetry; and use a variety of artistic media to illustrate the landscape of Dante's "Inferno." Activities in the second section, which are designed to stimulate an appreciation and understanding of literature, include discussions in which students cast actors to star in novels the class is studying; select a dozen powerful quotations from Alice Walker's "The Color Purple" and then investigate how Stephen Spielberg treated these passages in his film of the novel; and adopt journalistic roles that enable them to produce a historical newspaper from a time and place depicted in a novel. Teaching ideas in the third section provide the means for students to learn about various stages of the writing process. These include activities in which students become consumer reporters; engage in mocked-up conversations for practice in writing dialogue; and make "poetry earrings" by writing pithy metaphoric statements or haikus on small, rectangular pieces of paper. IDENTIFIERS- Speech Communication Education; \*University of Alaska Fairbanks

The Department of Communication at the University of Alaska, Fairbanks restructured its major requirements to prepare majors for a multicultural world. After constructing a new mission statement, the faculty reviewed the requirements for its majors to see how much the current major requirements supported the mission. Four conclusions were reached. The faculty: (1) agreed that all majors should have exposure to issues related to cultural diversity; (2) concluded that a single exposure would not be enough for majors to be able to understand how cultural diversity affects the communication process across varying contexts; (3) broadened the concept of culture to include other diversity issues such as gender, ethnicity, age, ability, and sexual preference; and (4) set a goal to integrate all of this information surrounding diversity to the communication process itself, and therefore across the entire curriculum. Two new courses were established--a basic oral communication core course and a course called "Communication and Diversity." The dialog that emerged and is still continuing among the faculty regarding communication and diversity has clarified and identified issues that are central to the discipline. Restructuring was accomplished by integrating vertically and horizontally cultural diversity issues into every course in the curriculum. (The mission statement, new and old course requirements, and detailed syllabi for the two new courses are attached.) (RS)

course for teachers specializing in reading on the elementary level. After teaching the course once, the instructor decided to adapt the course to the needs of the students by using children's literature instead of adult literature for the performance assignments and emphasizing practical performance skills more and theory less. The course has become a service course whose goal is to stimulate the future teacher's interest in basic techniques of analysis and performance. The first few classes of the semester are a half-and-half mixture of lecture and reading lab. During the reading class, the instructor concentrates on vocal techniques while referring to points made in the appropriate text chapter. Performances from the text follow after discussion of the practical aspects of integrating the vocal and physical requirements. The instructor uses video modeling at this point. As the semester continues, students continue with performances of prose and poetry. The final assignment involves them in a group performance of some combination of prose, poetry, or drama. The final goal is to prepare these reading majors to be good models of classroom performance who will encourage an appreciation of literature in their students. (RS)

IDENTIFIERS- Fantasy Theme Analysis; Opinion Polls

A study compared the portrayal of teachers in a sample selection of American movies with recent trends in the public perception and opinion of teachers, education, and the nation's public schools. E. G. Bormann's fantasy theme analysis was used to examine themes and myths developed in "Goodby Mr. Chips," "The Corn Is Green," "Blackboard Jungle," "The Prime of Miss Jean Brodie," "To Sir with Love," "Teachers," "Dead Poets Society," "Summer School," "Lean on Me," and "Stand and Deliver." The most frequent fantasy type in these films was "good versus evil," where the "good" teacher challenges the "evil"--other teachers and administrators. These "great teachers" are atypical--typical teachers in this myth are far from competent. A number of benchmark trends (based on the Gallup/Phi Delta Kappa polls conducted annually from 1969 to 1990) indicated that public perceptions of schools, teachers, and the teaching profession became increasingly less positive through the 1980s. Since it is difficult to make a causal link between the fantasy themes of the movies and the parallel trends in public opinion, cultivation theory and symbolic convergence theory offer a potential explication with at least face validity. Both theories suggest that repeated exposure to the myths and themes of the movies on teachers and teaching should influence an individual's perceptions of teachers and school systems.

IDENTIFIERS- \*Total Quality Management

This book shows how Deming's Total Quality Management (TQM) theory for organizational management can be integrated with the effective-schools literature. Part 1 compares the 14 principles of TQM with the tenets of effective-schools research. The second part develops a blueprint for creating the total quality effective school. The conceptual framework is based on four common places--the teacher, the learner, the subject, and the setting--which interact with instructional processes to produce student learning outcomes. Tools for implementing the total quality effective school are described in part 3, which include the following: restructuring yesterday's school; changing the locus of decision making; empowering teachers; aligning curriculum and instruction; using information-processing technology; identifying the best practices; applying statistical process controls; using student performance measures; and assessing correlates of effective schools. Finally, the implementation process follows five stages: clarify and codify goals; establish student-performance standards; operationalize performance measures; analyze quality; and implement solutions in a quality way. DESCRIPTORS- \*Educational Assessment; Educational Environment; Educational Quality; \*Effective Schools Research; Elementary Secondary Education; Foreign Countries; Models; \*Organizational Climate; \*School Effectiveness

IDENTIFIERS- \*Australia

Conceptual problems in the school-effectiveness literature are examined in this paper, with a focus on the development of two models for school effectiveness. Four necessary components of an effective-schools model include the nature and extent of the educational goals, techniques for recognition, methods for measuring school effectiveness, and school processes. The first model presented deals with how to recognize an effective

response rate. Findings indicate a strong association between emotional exhaustion and role conflict/ambiguity, and between ambiguity and personal accomplishments. Only one of four factors of stress, conflict-mediating stress, was highly associated with role conflict and ambiguity. Overall, the data support prior findings that role conflict and ambiguity represent distinct aspects of professional burnout. The recommendation is made to include mediation training in administrator-preparation programs. Two figures and two tables are included. (Contains 43 references.) (LMI)

DESCRIPTORS- Elementary Secondary Education; Family School Relationship; \*Parent Participation; \*Participative Decision Making; Program Effectiveness; Program Implementation; \*Research Methodology; \*Urban Education

IDENTIFIERS- \*New York City Board of Education

Much evidence indicates that raising the overall achievement level of an urban school requires parent participation in the school--participation beyond the traditional fundraising activities. This study identified program characteristics and district and school conditions that affect the implementation of parent-involvement programs. The first section describes the development of a methodology for measuring parent-involvement program implementation across diverse program sites. The methodology was used to investigate the implementation of the 1990-91 New York City Parent Involvement Program (PIP). The sample consisted of 34 school sites--13 district-funded and 21 school-funded--and 33 programs. Data were collected through site visits, surveys of program coordinators, and analysis of district and school demographic information. Findings suggest that programs that respond to the needs of various parent groups are able to promote parent participation among diverse parent populations. Program planning by school staff and parents rather than by district staff is important, as is effective parent-school communication, especially in communities with large percentages of parents with limited English proficiency. Two tables, one figure, and a copy of the program coordinator survey are included in this section. The second (and shorter) section outlines data collection methodology. (Contains 79 references.) Drawing on extensive staff interviews, this publication profiles a high school principal in Eugene, Oregon, who exhibits many aspects of transformational leadership. Transformational leadership is improvement oriented and comprises three elements: (1) a collaborative, shared decision-making approach; (2) an emphasis on teacher professionalism and empowerment; and (3) an understanding of change, including how to encourage change in others. Bob Anderson is principal at North Eugene High School, which has evolved into an outstanding, innovative school under his leadership. Chapter 1 tells how Anderson entered the administration field and describes his personality. Chapter 2, devoted to Anderson's first years at North Eugene, traces his evolution as a transformational leader and describes how he set the stage for risk-taking, growth, and change. Chapters 3 through 7 focus on five key aspects of transformational leadership: working in teams, seeing the big picture, empowering others, creating ownership, and continually improving the school. Chapter 8 summarizes and analyzes Anderson's leadership style, discussing how it differs from models in the literature, describing the way he leads, and identifying how his leadership has affected North Eugene High School. Anderson is a nondirective, flexible, nurturing, and intuitive administrator who has successfully striven for improved student achievement, collaborative school restructuring, and leader expendability. (Contains 23 references and 14 interviews.) (MLH)

Teacher Attitudes; Teacher Retirement

Findings of a study that examined retired educators' attitudes toward their retirement are examined in this paper. A survey of 260 educators--of whom three-fourths were K-12 teachers and one-fourth were school administrators--in four California counties elicited a 52 percent return rate. Findings indicate that retired educators were not inclined to complain about their circumstances. However, many respondents perceived that their former employing organizations did not regard and respect them. Retirement is also compared to the process involved in suffering a major loss. It is recommended that districts provide expanded preretirement orientations, recognize service and express appreciation in a well-planned and executed ceremony, make efforts to maintain contact with retirees, and utilize the energy and talents of retirees. Five tables are included. (Contains 33 references.) (LMI)

DESCRIPTORS- \*Autism; Child Development; \*Child Rearing; Communication Skills; Coping; \*Disabilities; Elementary Secondary Education; Intervention; Motivation; \*Parent Role; Parents as Teachers; \*Personal Narratives; \*Self Actualization  
The mother of a 16-year-old daughter with autism offers a parental perspective on coping with a child's disability. The paper emphasizes that through direct interaction with the child and the child's teacher and through taking an active role in the child's activities and achievements, the child's potential can be discovered and the child can be motivated to achieve it. The development of communication skills in the 16-year-old girl, through use of such techniques as "reverse echolalia" and having family members join in with her during her self-stimulatory acts, is described. The parents' role in educating and sensitizing the public, school personnel, and physicians about the needs of children with disabilities is also discussed. (JDD)

 \*Educational Practices; Elementary Secondary Education;  
 \*Interpersonal Communication; \*Intervention; Knowledge Level;  
 \*Severe Disabilities; Social Integration; Teacher Education;  
 \*Theory Practice Relationship

This keynote address begins with a discussion of the difference between words and action, directed specifically to the practitioner's task of meeting the communication needs of children and youth with severe disabilities. Brief overviews of current perspectives and practices are provided, considering such areas as how communicative acts are defined and understood and the need for inclusionary environments that are rich in communication opportunities for individuals with severe disabilities. Specific problem areas are identified, including: the need for disseminating and implementing the extensive knowledge base on communication practices, the need for improved preservice and inservice training, and the need to match words with action. participants, who were severely intellectually and physically handicapped young adults of Aboriginal or Torres Strait Islander descent. Interviews were conducted with teaching and residential program staff at the commencement, the midpoint, and the conclusion of the program. The program was regarded as successful, as all participants were involved in activities within the mainstream community, noticeable gains in language and vocalization by one participant were noted, and swimming and water skills for some participants improved. Other findings in the areas of course planning, human resources, program location, transport, inservice education, and networking are discussed. Notable issues to emerge concerned the lack of lead-time to develop the course, the inappropriateness of the curriculum, and communication and logistical difficulties. (JDD)

DESCRIPTORS- At Risk Persons; \*Congenital Impairments; \*Delivery Systems; \*Drug Abuse; Family Programs; \*Federal Aid; \*Financial Support; Infants; Models; Pregnancy; Prenatal Influences; Private Financial Support; Public Policy; Resources; Substance Abuse

IDENTIFIERS- \*Drug Exposed Children; \*Fetal Drug Exposure

This document describes a comprehensive service delivery model for drug-exposed infants and their families, provides a compendium of programs and funding sources that target the needs of these families, and delineates areas in need of financial support and further exploration. Development of the model required a literature review, interviews, and networking to: (1) create a service delivery consensus document that provides an appropriate continuum-of-care of comprehensive medical, social, and support services for at-risk or drug-exposed infants and their families; (2) develop the compendium of funding sources and programs; and (3) develop policy recommendations and options for future directions. Descriptions of several federal government agencies and programs are provided, including the Substance Abuse and Mental Health Services Administration, the National Institute on Drug Abuse, and the Administration for Children and Families. Appendixes, comprising about half the report, discuss legal aspects of maternal drug abuse, treatment criteria, core services of residential rehabilitation programs, model projects, and program evaluation. A copy of the compendium of funding sources is also provided in an appendix; it lists funding programs of the General Services Administration; U.S. Departments of Agriculture, Education, Health and Human Services, Housing and Urban Development, and Justice; and private sources. (Contains approximately 126 references.) (JDD)

IDENTIFIERS- \*Schema Theory; Text Patterns; Textual Analysis

One of the analyses carried out within the University of Uppsala (Sweden) study, "LSP Texts in the 20th Century," classified the cognitive text content into five different cognitive worlds: the scientific, the practical, the object, the private, and the external. This paper investigated patterns of distribution in the texts of these cognitive worlds. A classification of the function in the textual structure of the cognitive worlds results in four different types: main world, secondary world, excursus, and supplement. This model makes it possible to describe content patterns at a macrolevel and also to correlate these patterns to various contextual factors, thereby making it possible to relate text and context. DESCRIPTORS- Content Analysis; Economics; Foreign Countries; \*Languages for Special Purposes; Semantics; Swedish; \*Text Structure; Uncommonly Taught Languages

IDENTIFIERS- Sweden

This paper addresses the microsemantic and macrothematic analyses of science and popular science texts from the fields of economics, medicine, and technology used in the "LSP Languages for Specific Purposes Texts in the 20th Century" project. Results show that the frequency of the relations is different within various parts of the texts. A clear difference between the (pure) identity and the partial identity relations is that the former are the most frequent in theme development, whereas the latter have their highest frequency in the discussion part of several of the text groups. Distribution of possessive relationships indicates that the personal element of the medical texts is concentrated within the introduction and discussion, whereas the various diseases are dealt with in the central theme development. children. The strongest and most interesting promise of the method--that learning ability increases over time as an effect of an adequate IEP intervention--is generally hindered by the short duration of the majority of the applications. Two related issues arise from the results of IEP intervention. First, the dilemma between short- and long-term effects might not be a real dilemma. A major strategic decision facing training planners concerns the choice of those means which simultaneously respond to short- and long-term goals, not a choice between the short and the long term. Second, the choice of training technologies necessarily reflects strategic decisions, so that improving the analytical quality of the decision rules used by training practitioners can be seen as a mirror image of the changing mood in the world of training. Hence, the human resource specialist must learn to think in action, to become a reflective practitioner. (Contains 14 references.) (YLB)

IDENTIFIERS- Florida

This packet contains a program guide and a Career Merit Achievement Plan (Career MAP) for the implementation of a home health aide program in Florida secondary and postsecondary schools. The program guide outlines the legal authority for the program, describes the program content and structure, provides a program description, and includes a curriculum framework and a set of student performance standards for home health aide courses. The curriculum framework outlines major concepts and content, laboratory activities, program specifics, and intended outcomes; the student performance standards guide lists each standard and the behaviors expected of the student to show mastery of each standard. The guide also provides information on the following topics: student organization participation, student admission and teacher standards, teacher certification, facility design for home health aide laboratories and classrooms, equipment, safety, and instructional resources (a listing of 19 audiovisuals and 6 sources for audiovisual materials, 14 print materials, and 11 professional organizations and support services). It includes a sample clinical observation agreement form. The Career MAP is a checklist, to be kept by both student and teacher, of student progress in the competencies required for entry into jobs in the home health field. (KC)

DESCRIPTORS- Competency Based Education; Corporate Support; \*Curriculum Development; Educational Cooperation; Job Analysis; \*Job Skills; Material Development; Postsecondary Education; \*Program Development; Program Implementation; \*School Business Relationship; Secondary Education; \*Task Analysis

IDENTIFIERS- \*DACUM Process; \*Tech Prep

One significant technique for initiating needed cooperation in tech prep is through use of the DACUM (Developing a Curriculum) job analysis process. Many program directors are asking educators to identify expert workers to serve on the panel. The next phase of serious linkage and partnering occurs when the panel comes together to interact and describe their jobs precisely. The process usually results in identification of 8 to 12 duties and 75 to 125 task statements that outline what a successful worker in a particular job or job cluster must be able to do. The DACUM process is quick and inexpensive and has public relations value. DACUM has seven procedural steps: committee orientation, review of occupation, identification of duties, identification of specific tasks performed, review and refinement of task and duty statements, sequencing of task and duty statements, and identification of related requirements. Verified tasks undergo a task analysis to determine specific steps, performance standards, tools, knowledge required, safety, attitudes, and decisions involved in performing each task. Information resulting from task analysis is then incorporated into modules, learning guides, and other instructional materials. The DACUM process enables educators to develop and revise curricula, involve business and industry, and develop accurate job requirement profiles; in their turn, business and industry can develop accurate descriptions of jobs and participate in development of educational programs. This report documents a project to provide technical assistance, coordination, training, and resources to programs implementing the Wisconsin Model for Sex Equity in Career and Vocational Education. It describes how technical assistance was provided to all school districts served through a consortium and three special projects. Other project activities are outlined: coordination of the training of the Wisconsin Vocational Equity Leadership Cadre, development of a resource center for use by cadre members and the districts they serve, publication of two issues of "Vocational Equity News," and dissemination of 2,500 copies of each. The eight-page report is followed by extensive appendixes, beginning with the 1992-93 cadre participant list. Other appendixes include cadre meeting agendas and evaluations, a partial listing of resources provided as handouts to each cadre member, and newsletters. The 3-year composite report summary is also provided. It summarizes data collected in the state of Wisconsin from 1989-92 from 72 schools working in the assessment phase and using the assessment instruments in the model. The summary's appendix contains overhead transparency masters depicting some data. The final two appendixes consist of 100 pages of 3-year composite report data tables and 53 pages of 1992-93 evaluation data. (YLB)

A research and development project focused on designing a basic English writing skills curriculum for adult basic education students and implementing that curriculum in a computer-assisted, audio-supported format. Materials were designed for MS-DOS computers and consumer grade audiotape players. The project involved developing 18 computer lessons on English grammar and mechanics, associated audiotapes, student activity sheets, and a user manual. These items were field tested with five students from the Community College of Denver (CCD) Developmental Studies Program and five clients of the Adult Learning Source (ALS), a community-based adult literacy program. The 18 lessons were then implemented at CCD with 42 students (23 completed), at ALS with 20 students (13 completed) and at the Family Literacy Center, an intergenerational literacy program in Denver, with 4 students. Pre- and posttest scores from CCD indicated that control group students (n=14)

Network, OTAN staff organized the Adult Learning Channel for the delivery of adult basic education (ABE) and English-as-a-Second-Language (ESL) teacher training. Thirteen sessions were developed and received at 30 different downlink sites. OTAN satellite-based staff development activities were continued, and several policy papers recommending options and strategies for ABE distance resources were published. Staff at OTAN resource centers organized 283 activities. The files of OTAN Online, the network's three-level system of storage, retrieval, and dissemination of adult education resources, were also expanded to more than 38 megabytes of useful information. Other OTAN activities during the third year included ongoing support for 11 libraries in the OTAN Resource Centers, expansion of its Adult Education Archives (including the Vocational ESL Workplace Clearinghouse), and restructuring of existing OTAN network communications. (Thirteen project-related exhibits, including tables detailing the activities of the various OTAN components, are appended.) (MN)

Youth apprenticeship programs differ from the registered apprenticeship that is regulated by federal and state governments. Defined as a "learning program for young people, age 16 and older, that integrates on-the-job training with school-based instruction, that bridges high school and postsecondary schooling, and that results in both academic credentials and certification of mastery of work skills," youth apprenticeship has gained attention as a policy strategy for improving the school-to-work transition of many youth. Many of the key components of the youth apprenticeship program concept are based on the design elements of European youth training systems. Despite its promise as a strategy for accomplishing many of the goals of the educational reform movement, youth apprenticeship has also remained controversial. The following have been cited as potential problems of youth apprenticeship programs: conflicts with labor unions; the need for schools to make significant changes in instructional methods, scheduling, and basic assumptions; the need for increased financial support from business; and the danger of tracking students at an early age. (An annotated bibliography of 15 print resources on youth apprenticeship programs is provided along with the names and addresses of four resource organizations concerned with youth apprenticeship programs.) IDENTIFIERS- \*Workplace Literacy

The experience of a number of specific local workplace programs indicates a definite connection between the provision of employee basic skills programs and increased worker productivity. One Tennessee company, for example, reports a 95 percent drop in costs resulting from worker mistakes and a doubling of worker productivity since the company adopted an aggressive education and training program. A study by the American Society for Training and Development found that over half the productivity increases occurring in the United States between 1929 and 1989 were due to learning on the job and that persons given formal workplace training have a 30 percent higher productivity rate. A report of the Bureau of Business Practice indicates that the Manufacturing Literacy Program and Motorola University training courses of Motorola, Inc., have resulted in a productivity rate equal to 500 percent of its original estimates, a 30:1 reduction in manufacturing cycle time, a 4:1 reduction in defects per unit, and a 2.5:1 reduction in inventory. (This brief contains extracts of nine documents detailing the specific effects of basic skills training on worker productivity along with information on the availability and cost of each publication.) IDENTIFIERS- \*Prison Literacy Project PA  
This handbook documents the Prison Literacy Project (PLP) in order to provide a model for other community groups to follow in developing their own literacy projects. The PLP worked to have prison residents learn to read or significantly raise their reading levels through an ongoing literacy tutoring program. All project participants were involved in community partnership and empowerment through their personal interactions. Since 1984, more than 350 students have been tutored and 150 tutors have been trained in the Laubach method, a tutor support network has been developed, and two other literacy tutoring projects have been developed based on the PLP model. The handbook provides a history and philosophy of the project, organizational structure and opportunities for participation, and project objectives, with specific emphasis on their development. This second edition of the handbook reflects accomplishments and provides updates on the projects since 1984. Five appendixes to the report describe the results achieved, project techniques, timelines, volunteer tutor jobs, and the project video documentary. (KC)

DESCRIPTORS- Adults; Blacks; Educational Attainment; \*Employed  
Women; \*Employment Level; \*Females; Hispanic Americans;  
\*Income; Labor Force Nonparticipants; Unemployment; Wages;  
Whites  
This bulletin summarizes some current information on working  
women into 20 short statements. Some of the highlights are the  
following: (1) about 58 percent of all women aged 16 and older  
(58 million) were labor force participants in 1992; (2) labor  
force participation for women was highest among those in the 35-  
44 age group---77 percent, with 73 percent of women aged 45-54  
and 47 percent of women aged 55-64 working; (3) only about half  
of teenage females aged 16-19 were employed; (4) the  
unemployment rate for all women in the labor force was 6.9  
percent in 1992; (5) 40 million women worked full time, and 14  
million worked part time--about two-thirds of part-time workers  
were women; (6) women have made substantial progress in  
obtaining jobs in all managerial and professional occupations,  
but women are still overrepresented in low-paying jobs; (7)  
fewer women than men were self-employed; (8) more women were in  
the military--an increase from 44,498 in 1972 to more than  
211,000 in 1992; (9) median earnings for female high school  
graduates working year round, full time were less than those of  
fully employed male high school dropouts; (10) 59 percent of  
wives in married-couple families participated in the labor  
force; and (11) 67 percent of women with children under age 18  
were labor force participants. (KC)

DESCRIPTORS- \*Adolescents; \*Counseling Techniques; \*Personal Narratives; \*Psychotherapy; \*Story Telling

Adolescents may be ambivalent about consulting with adults, especially when it seems likely that the adult will take a rigid stance on issues. The focus of this paper is the development of counseling styles that expand the adolescent's world to include understandings and options not previously available. It may be useful to approach counseling with adolescents as a collaborative venture in which new stories or narratives are developed. Narrative approaches to counseling help clients sort through their experiences and develop their own definitions of the meaning of experiences in their lives. This process provides validation to clients and a sense of being in control of their own lives. The primary task for counselors is to become skilled at facilitating therapeutic conversations. To help counselors accomplish this task, several guidelines have been developed. Counselors should strive to: (1) maintain the "not knowing stance"; (2) to be open to and help generate alternatives; (3) think in terms of both/and rather than either/or; (4) assume the adolescent has strengths and resources; (5) be aware of their own values and beliefs; (6) work with the person, not the label; (7) include others in the counseling; and (8) work toward understandings. By taking a narrative approach, counselors may enter into the world of their adolescent clients and facilitate the generation of alternative meanings and understandings within the framework of this world. The narrative approach tends to elicit cooperation and investment from the adolescent and circumvent the power struggles which may occur when working with adolescents. (NB)

DESCRIPTORS- \*Attitude Change; College Students; Higher Education; \*Sex Differences; \*Sex Role; \*Spouses; Student Attitudes; Trend Analysis

IDENTIFIERS- \*Role Shift

Attitudes toward family gender roles were examined using data collected in family courses since 1968. Data contributed by single men (N=803) and women (N=1,830) in response to a questionnaire were grouped into 2-year intervals. Factor analysis was used to produce gender role assessment scales, and gender differences were assessed using a t-test for separate groups. Gender differences in attitudes toward love also were examined. Some trends emerged that seemed to reflect broader changes in married gender role prescriptions and sexual attitudes. The most consistent change was reflected in gender roles providing less authority to males and greater latitude toward females in financial and other areas. In the areas of wife-husband economic control and decision making, changes seem to be consistent with the greater participation of married women in the paid labor force. Attitudes about love were less consistent although they did reflect gender differences in that men, of college age, tended to be more idealistic about romance and family relations and to hold a less realistic attitude toward motherhood than did women. Where gender differences occurred in attitudes toward premarital sex, males tended to be more accepting of premarital sexual behavior for both men and women than were females, and this was reflected in the males' sexual behavior as well. Findings suggest that attitudes are changing and that men and women continue to differ in their attitudes. (Contains 47 references.) (NB)

DESCRIPTORS- Elementary School Students; Grade 2; Parent Participation; Primary Education; Program Effectiveness; Program Implementation; Reading Achievement; \*Reading Aloud to Others; \*Reading Comprehension; \*Reading Improvement; Rural Schools; Socioeconomic Status; Vocabulary Development

IDENTIFIERS- Camden County School District GA

A program was designed to improve the reading achievement of second grade students in a rural Georgia school. An analysis of the problem indicated that: a higher percentage of second grade students from low socioeconomic conditions scored lower on standardized reading achievement tests than other second grade students; students who scored lower owned fewer books than those who scored higher; and those who scored lower did less recreational reading than those who scored higher.

Interventions included a program of daily oral reading in the classrooms by teachers and recruiting parents to enroll their children in the Woodbine (Elementary School) Read Aloud Club. Parents who enrolled their children in the club agreed to read aloud to their children on a daily basis and turn in simple reading logs to the teachers each month. As a reward for their parents' read aloud efforts, the children received free storybooks of their choice each month. The objectives were to improve the students' reading comprehension, word reading, and auditory vocabulary using the Stanford Diagnostic Reading Test to measure any changes in reading ability. Test results indicated a 38.5% increase in auditory vocabulary, a 46.4% increase in reading comprehension, and a 43.6% increase in word reading for the approximately 70 subjects. (Twenty-seven tables of data are included; 53 references, 2 appendixes of data, a list of educational objectives, the enrollment form, a reading log, 2 sample newsletters, 2 newspaper articles, and a site visitation team report are attached.) DESCRIPTORS- Elementary School Teachers; Grade 1; Phonics; Primary Education; Reading Attitudes; \*Reading Instruction; Reading Research; Reading Skills; \*Teacher Attitudes; \*Teacher Behavior; \*Theory Practice Relationship; Whole Language Approach

IDENTIFIERS- Descriptive Research

A descriptive study used survey methodology to determine first-grade teachers' theoretical orientations toward reading and students' attitudes toward reading, as well as structured classroom observations to describe teachers' reading instructional practices. Subjects, 259 of the 428 first-grade teachers (61%) in 94 elementary schools of a large mid-south metropolitan public school system returned usable survey data. A stratified sample of 15 teachers, 5 from each orientation (phonics, skills, and whole language), were randomly selected

\*Reader Response; Reading Writing Relationship; Teacher Role  
IDENTIFIERS- Composition Theory; Fort Hays State University KS;  
Text Factors

In a composition classroom with a multicultural emphasis, reader response techniques can give students the chance to consider their own positions in the dominant culture, to confront racist attitudes within themselves, and to try to empathize with minority views. These techniques lead to a more student-centered classroom where students not only read and discuss texts, but also create their own. Applying reader response criticism helps to refocus the activities of the classroom from the teacher and the text to the interaction of the text with the reader--and thus to encourage students to take a more active role in interpreting texts. Such techniques are adaptable to works that are not necessarily literary. One such text, "Rereading America: Cultural Contexts for Critical Thinking and Writing," which focuses on important cultural myths (i.e., success, progress, gender, the melting pot, the model family) suggests a range of reader response exercises students and teachers can use to investigate ideas about in-group and out-group identity. Reader response techniques can be a useful way to allow students a stronger voice in their own learning. (SAM)

PUB TYPE- Opinions/Personal Viewpoints/Position Papers/Essays (120), Speeches, Conference Papers, "Papers Presented at..." (150)

DESCRIPTORS- \*Feminism; Higher Education; Teacher Effectiveness; \*Teacher Role; Teacher Student Relationship; Writing (Composition)

IDENTIFIERS- Composition Theory; \*Feminist Pedagogy; \*hooks (bell); University of Arizona Tucson

The recent "feminization" of composition theory and pedagogy has replaced the classroom figure of the authoritative father with an image of a nurturing mother. But as bell hooks and others insist, the classroom is inherently a place of struggle and conflict and the "real world" is even more so. Hooks offers concrete alternatives to the usual feminist approach. First, she insists that feminist teachers recognize how their roles as teachers give them power over students. Instead of resisting that power for fear of exercising domination, hooks argues that feminist teachers can use that power in ways that enrich the learning process. Hooks also insists on a unity of theory and practice. Rather than assuming that her approach will speak for itself, she explains to students from day one what will be different (i.e., not politically neutral) about her class. She uses a confrontational classroom style that encourages students to "come to voice" in a risky environment. This contradicts the image of the female teacher as maternal authority figure. And because hooks aims at making education "more rather than less real," she encourages students to relate what they are learning in class to their changing personal identities and then to place their own ideas in a more critical framework. Other

are transformed by existing institutions, this book presents 14 essays that discuss network-based classrooms in which students use communications software on computer networks to converse in writing. The first part of the book discusses general themes and issues of the ENFI (Electronic Networks for Interaction) experiences. The second part presents ENFI theory and technology, and explores specific stories of how network-based classrooms developed in different settings. The third part of the book presents summative analyses of students' writing. Essays in the book are: "Innovation and Social Change" (Bertram C. Bruce); "A Situated Evaluation of ENFI" (Bertram C. Bruce and Joy Kreeft Peyton); "Understanding the Multiple Threads of Network-Based Classrooms" (Joy Kreeft Peyton and Bertram C. Bruce); "Pulling together the Threads: Themes and Issues in the Network-Based Classroom" (Joy Kreeft Peyton and Bertram C. Bruce); "The Origins of ENFI" (Trent Batson); "Student Authority and Teacher Freedom: ENFI at New York Institute of Technology" (Marshall Kremers); "Script Writing on a Computer Network: Quenching the Flames or Feeding the Fire?" (J. Douglas Miller); "Seeing Students as Writers" (Geoffrey Sirc and Thomas Reynolds); "The Origins of ENFI, Network Theory, and Computer-Based Collaborative Writing Instruction at the University of Texas" (Fred Kemp); "Why Write--Together--Concurrently on a Computer Network?" DESCRIPTORS- \*Adolescent Literature; Annotated Bibliographies;

Audience Awareness; \*Literary Devices; Literary Styles;

Literature Appreciation; Secondary Education

IDENTIFIERS- Text Factors; \*Voice (Rhetoric)

A stylistic device that has been used by many authors over the years is to alternate the point of view between two or more characters. Authors of young adult novels choose this technique of multiple narrative voices for a variety of reasons. Multiple voices offer a challenge to many young adult readers because the point of view is much more complex than what they see in most young adult novels. Inexperienced or reluctant readers may not enjoy such books, but for other readers the shifting perspective can quicken the pace of the novel. (An annotated bibliography of 15 young adult novels using multiple voices is included). (RS)

DESCRIPTORS- \*College Faculty; Faculty Development; Higher Education; Interdisciplinary Approach; \*Interprofessional Relationship; \*Writing Across the Curriculum; Writing Instruction

IDENTIFIERS- Educational Issues; Faculty Status

While the objectives of linking-across-the-curriculum may be laudable, the program as it has evolved only serves to perpetuate every existing stereotype about the place of composition in the curriculum and the role of the composition instructor in the academic setting. Instead of providing an arena in which students encounter shared knowledge between disciplines, it reinforces their perception that the so-called "content courses" are the "important" ones, and that composition is a necessary but tangential aspect of learning. It also puts the composition instructors back in their accustomed place: as Cinderellas who sit among the ashes while the content instructors go to the ball. Many content area instructors, unconsciously or consciously, encourage students in this attitude. They often view the composition teacher as a kind of superior copy editor, and the composition course as a dumping ground for whatever the content area instructors feel needs addressing. What needs to change is the mindset of the composition faculty as a whole. Composition faculty may be able to effect change simply by refusing to participate until the fundamental relationship between content and composition courses is restructured--either with real integration of two divergent disciplines, or by linking with their own content courses. (SR)

IDENTIFIERS- \*Communication Behavior; Research Suggestions

This paper addresses the question, "What teacher questioning behaviors influence student learning?" It synthesizes research findings, explicates their prescriptive implications, and presents behavioral guidelines for teachers who wish to make informed choices about improving classroom questioning behavior. The paper examines and synthesizes research findings that focus on the following questions: (1) Does question-asking improve student learning? (2) What types of questions are most effective in the classroom? (3) What questioning behaviors are related to increases in student learning? (4) What questioning behaviors interfere with student learning? The paper also offers a theoretically based questioning strategy designed to promote student learning and a discussion of future directions for research from a communication perspective. A figure for a questioning model is included; a 49-item bibliography is attached. (Author/SAM)

IDENTIFIERS- \*Media Education

The media workshop and the media laboratory can fit meaningfully into the reforms of mass communication education, but there are distinct differences in their roles. The media workshop is a place where students can serve on-campus apprenticeships with a traditional media organization. The media laboratory is a futuristic media facility that encourages students to try new forms of media expression without the constraints of traditional industry practices and standards. Campuses that lack financial or staffing resources to create both might want to capitalize on the best aspects of a workshop and a laboratory in one media facility. One university campus has developed its over-the-air radio station that allows such a hybrid of the workshop and laboratory. The radio station is operated as a co-curricular arm of the Department of Communication Arts and Sciences. Of the approximately 160 students involved, no more than half are communication majors. Program blocks are reserved during each day for what are called "specialty shows." Information programming also allows students substantial opportunity to express themselves on issues they find relevant and significant. Public service and public affairs programs are part of the programming. Multimedia opportunities are being developed on campus with the growth of

Hollywood's influence has functioned as a worm in the apple-- the fantasy myths in the movies analyzed closely parallel public perceptions. (Contains 54 references.) (RS)

IDENTIFIERS- \*Caring; \*Educational Restructuring; Teacher Leadership

Designed as a guide for practitioners, this book draws on over 600 sources to discuss school restructuring definitions, trends, and issues; achievements of a few select schools; and implementation techniques and strategies. Two overarching, indirectly stated issues pervading the reconceptualization of schooling are multiculturalism and a caring school staff. The book is organized into four parts. Part 1, Rationale and Context, presents a historical context for restructuring and a summary of the current motivations for, and implications of, educational restructuring. Part 2, Changing Roles and Responsibilities, examines the evolution of new roles for essentially all the groups that participate in public education. Part 3, Dimensions of Restructuring, explores the concepts of incremental and discontinuous change and extensively discusses current school restructuring activities along 12 dimensions: learner outcomes, curriculum, instruction, assessment, learning environment, technology, school-community relations, time schedules, governance, teacher leadership, personnel definitions and roles, and working relationships. Part 4, Process of Restructuring, captures the lessons being learned about the restructuring process and presents examples of strategies and techniques. (Contains over 600 references.) (MLH)

IDENTIFIERS- \*Australia

This paper presents findings of a study that examined the perceptions of educational stakeholders in two regions of the Victorian Ministry of Education toward effective-schools issues. Data were obtained from a survey mailed to a total of 1,060 principals, school councillors, teachers, parents, and students in 100 schools--50 schools each from the southern and northern metropolitan regions of Melbourne, Australia. A total of 583 questionnaires were received from 81 schools. Overall, respondents perceived no dominant role for an effective school, but rather, a wide range of academic, citizenship, and personal-development functions. Staff and schoolwide decision-making processes were viewed as more important in the development of an effective school than were the specifics of classroom activities or the overall organizational system. Finally, school personnel perceived their schools to be effective. Follow-up visits to five diverse schools from the survey confirmed the latter finding. School personnel said that the most important element of an effective school is a dedicated and cooperative staff that utilizes effective communication and teamwork. Two tables are included. Although considerable effort is being expended on school-based HIV prevention education, few data are available to suggest whether these programs are successful. Developed to help educators evaluate the quality of their HIV prevention programs, this handbook includes information on evaluation designs and measurement tools for collecting data on the basic program components of policy development, curriculum design, teacher training, and student outcomes. The handbook comprises eight interrelated booklets. The first booklet presents five key program-evaluation guidelines, while the second focuses on developing and revising HIV policies. The third and fourth booklets present guidelines for appraising HIV curricula and staff development programs, respectively. The fifth and sixth booklets describe assessment instruments for measuring student outcomes for grades 5-7 and 7-12, respectively, focusing on HIV-related knowledge, attitudes, and behaviors. The seventh booklet offers seven guidelines for selecting and working with an external evaluator to appraise an HIV education program. The last booklet presents five guidelines to assist in reporting results of evaluation studies related to HIV education. Three sample evaluation reports are included to illustrate use of the guidelines. (MLH)

DESCRIPTORS- \*Educational Assessment; \*Educational Improvement; \*Educational Objectives; Educational Policy; \*Educational Quality; Elementary Secondary Education; Excellence in Education; \*Outcomes of Education; Standards

IDENTIFIERS- \*National Education Goals 1990

The six national education goals designed to be achieved by the year 2000 address the following issues: (1) school readiness; (2) school completion; (3) student achievement; (4) U.S. mathematics and science performance compared to that in other countries; (5) adult literacy and lifelong learning; and (6) safe, disciplined, and drug-free schools. This report considers the status of the U.S. education system relative to these goals and analyzes the issues involved in assessing progress toward them. Available data relevant to each goal are presented. Findings include the following: (1) of all five-year-olds, six out of seven are enrolled in kindergarten or other preschool programs, as are nearly half of all four-year-olds; (2) only 7 out of 10 ninth-graders complete high school 4 years later; (3) a minority of elementary and secondary school students demonstrate competency in English, mathematics, and science; (4) math and science achievement scores for the U.S., in comparison to other developed countries, are often among the lowest; (5) one-eighth of American adults failed a literacy

DESCRIPTORS- \*Educational Change; Elementary Secondary Education;  
\*Learning Strategies; Learning Theories; \*Organizational  
Change; \*Organizational Development; Organizational Theories;  
\*School Restructuring

This paper examines the implications of the organizational-learning concept for policy and practice in school restructuring. The organizational-learning framework emphasizes the individual and collective cognitive and behavioral transformations that occur as part of the emergence of new organizational patterns. Various models for organizational change are discussed, with a focus on managed change. Implications of the organizational-learning framework for educational change are as follows: (1) school restructuring is an important precursor to real paradigmatic change; (2) schools have deeply embedded dysfunctional learning habits that must be attacked; (3) the organizational learning framework avoids placing blame for organizational problems; (4) teachers' and principals' expectations about the nature of leadership are inconsistent with that of the organizational-learning framework; and (5) the emerging paradigm will probably result in increased centralization in U.S. schools. The organizational-learning framework has elements of both managed change (structure and leadership) and anarchy (unpredictability). The application of organizational-learning theories helps to resolve some of these issues by identifying aspects of the change process that are more or less manageable and by suggesting ways in which the subjective aspects of change may be incorporated into more traditional change approaches, such as strategic planning. IDENTIFIERS- \*Florida

This practicum paper describes a training intervention project that was designed to improve classified employees' personnel selection and problem-solving skills. The project addressed the following personnel issues: legal issues of employment, critical thinking, job analysis, selection style, interviewing techniques, and employee induction. Fifteen head custodians from a Florida school district participated in a 6-week training program to decrease the probability of illegal hiring practices among entry-level managers. Methodology involved a needs assessment survey and pre- and post-test surveys. Upon completion of the program, participants demonstrated a strong growth in their knowledge of personnel selection and problem-solving, and a positive attitude toward the change in personnel-selection process and problem solving. The training program

Student Attitudes; Student Educational Objectives; Token  
Economy; Truancy

This practicum report describes a 12-week project to decrease truancy and improve motivation and academic performance of three students (ages 12 to 18) hospitalized with severe emotional disturbances. A visible and powerful reward system using a menu strategy was developed and implemented in which students participated daily in establishing goals and reinforcers while moving toward increasingly intrinsic motivation. The project also involved a whole language approach to reading, a critical thinking instructional program, and development of a therapeutic bond with at least one teacher. Measurement of reading skills, attendance records, and students' verbal reports were used to evaluate academic achievement, improved attendance, and changed attitudes and behavioral patterns. The constantly visible menu showed goals and rewards on a daily, weekly, and monthly basis. Additionally, each week focused on a different area, including assessment and orientation, goal setting, self motivation, frustration management, oral language, written expression, reading comprehension, reading for pleasure, self-expression, daily living skills, self-discovery, and evaluation/closure. All students increased attendance notably, improved their reading skills substantially, and appeared to improve their critical thinking skills and attitudes. (Contains 29 references.) (DB)

This paper, by a parent of a child with severe mental and physical disabilities, discusses why parent/professional teaming is important to maximize benefits for children and youth with severe disabilities. It recounts the family's experience with the impact of disability. Strategies for effective parent/professional teaming are outlined, stressing the importance of professionals understanding parents as individuals, and the value of empathy, respect, and efforts toward true collaboration. Specific suggestions cover inclusion of parents in team meetings, joint development of Individualized Education Programs, personal communication with parents, avoidance of jargon, use of round (rather than rectangular) tables in meetings, careful planning for meetings, inclusion of the student (and sometimes siblings) in meetings, encouraging parents to bring a relative or friend, use of a comfortable communication style, follow up of meetings with a thank you note, and involvement of parents at all levels of the education system. This document is intended to assist South Dakota schools in the development and implementation of Gifted Education Plans, and includes state laws and rules pertaining to gifted education, guidelines for reporting, and explanations of the necessary components of a district's written plan. A brief statement of philosophy addresses characteristics of gifted students and their need for appropriate educational programming. The relevant sections of South Dakota codified laws which address gifted education are briefly summarized. Administrative rules concerning gifted education are outlined, including definition, the written plan for the education of gifted students, program standards, identification of gifted students, the gifted review team, allowable costs, and appeal procedures. A checklist is presented for developing the written plan and documenting data collection and financial reporting. This is followed by the written plan, which provides greater detail. The plan addresses: philosophy of programming, statement of goals and objectives, program procedures, program services, general program management, the appeal process, and statements of compliance with relevant federal laws. An outline of data collection requirements is also provided. An appendix summarizes legal aspects and describes intra-classroom, extra-classroom, and acceleration options in types of educational services suitable for gifted students. Sample forms complete the document. The separately printed South Dakota Plan for Education of the Gifted, edited by Gail Widman and Doug Lampson provides a brief mission statement and an outline of goals and objectives presented in tabular form. IDENTIFIERS- \*South Dakota

This handbook is intended to assist South Dakota school districts in developing and implementing educational programs for gifted students. It is noted that state regulations provide a minimum standard for gifted programs, but do not limit services and leave room for flexibility in planning according to each district's needs. The first section briefly lists characteristics of gifted students and notes the state mandate to provide programming for these students. Requirements in program management are summarized, including responsibilities for program implementation, documentation, funding, staff development, and teacher certification. Guidelines for screening and identification are given next. Curriculum options are briefly addressed, including responsibility for curriculum determination by school districts and delivery models and

\*Special Education; State Legislation; Trend Analysis  
IDENTIFIERS- California

Under federal and California law, cost alone cannot be used as a defense for modifying or denying education and support services to a student with a disability. This has contributed to growth in special education spending. However, funding has not kept up with costs, forcing school administrators to "encroach" upon general education revenues to pay the costs of special education. Over a quarter of special education program expenditures in California, on average, are paid from a school district's general fund. Because most students with disabilities today spend the majority of the school day in regular classrooms, the actual cost of educating a child with a disability is higher than the program costs alone would imply. There is a need to re-examine special education spending. Reductions in costs could come about by implementing a reasonableness standard to protect schools from excessive costs, neutralizing adverse financial incentives, allowing more private sector participation, funding special education on a block grant basis, and relaxing some staffing requirements. Appendixes provide detailed statistical data from the study. (Contains 35 endnotes.) (JDD)

Discrimination; Human Services; Labeling (of Persons); \*Mental  
Retardation; \*Normalization (Handicapped); Personal Autonomy;  
\*Quality of Life; \*Social Attitudes; Social Bias; \*Social  
Change; Social Integration

This paper explores the detrimental effects that assumptions and labels have caused people with mental retardation and examines the concept of changing societal attitudes. The paper points out that: mental retardation has often been regarded not simply as one aspect of a person's life, but as engulfing the person's whole life and becoming that person's identity; normalization extends to people with disabilities the right to be involved in the same situations and circumstances as people without disabilities; people with and without mental retardation feel more satisfaction with their lives when they are able to make more of their own decisions about their lives; people with mental retardation need a system which will naturally support them in efforts to become autonomous; society often gives lip

# Structure; Written Language

The notion of "textual norms" refers to sociocultural conventions that define the "well-formedness" of a text. Because well-formedness in texts is characterized by convention, different conventions may exist in a community and lead to norm conflicts when used in actual text generation. In this article, two types of norm conflict are described. In the first, there is a lack of a conventionalized norm system that leads to change in the norm system by a functionality principle (i.e., the normal system is viewed as a means not an end). In the second conflict, the goal and communicative function can be interpreted in different ways, and the norm system can be changed only according to a regulativity principle (i.e., an act of authority). IDENTIFIERS- \*East Germany; Text Patterns; Text Types; United States; \*USSR; West Germany

This research originated with the idea that a relationship exists between the culture-specific way of thinking on the one hand and the use of language in special contexts on the other, affecting both meaning and text structure. The goal of the research is to create an interlingual text corpus representing a special type of text that appears in different languages and different cultures. The text corpus (television news from East Germany, West Germany, Soviet Union, and the United States) and the research methodology, which involved charting text patterns and their indicators, are described. Text type and text pattern are the basic theoretical concepts used in the classification of empirical data. (JP)

Considerations unique to classroom research and problem-solving where the teacher is English-dominant and many students speak English as a Second Language are examined, and advice is offered to teachers. The discussion reflects the specific concerns of a group of graduate students in teacher education. An approach is outlined, in a conversational format, for teachers planning their first effort at classroom research in this context. Suggestions are offered for recording instructional concerns and ideas, generating and selecting research questions, anticipating problems, and dealing with change that may result from research. The particular issues encountered by several of the graduate students, and their resolution, are described. Teacher projects discussed include research on: the value of writing collaboration in a linguistically diverse group; written vs. oral teacher response to student journal entries; obtaining assistance in maintenance of portfolios for a large group of students with four native languages represented; and providing students with personal, psychological support. Work from the portfolio of one student is appended. (MSE)

IDENTIFIERS- \*Content Area Teaching

The manual is addressed to teachers, administrators, and teacher trainers helping students learn through a non-native language by integrating language and content. This audience may include English-as-a-Second-Language, bilingual education, or content (e.g., science, math, social studies) teachers with limited-English-proficient students in elementary and secondary schools. The manual presents a whole-education approach involving: (1) incorporation of content material into language classes; and (2) accommodation of students' limited English proficiency in content classes. The first chapter gives an overview of the integrated language and content approach, and the second chapter outlines specific classroom strategies and techniques. Chapter 3 offers suggestions for adapting standard textbook and workbook materials, and chapter 4 gives assistance in developing lesson plans. A variety of student assessment methods are discussed in the fifth chapter, including performance-based assessment, portfolios, journals, language-related content assessment, and assessment across the curriculum. Key issues in curriculum implementation are then addressed, including teacher cooperation/collaboration,

IDENTIFIERS- Florida

This packet contains a program guide and a Career Merit Achievement Plan (Career MAP) for the implementation of a nursing assistant program in Florida postsecondary schools. The program guide describes the program content and structure, provides a program description, lists job titles under the program, and includes a curriculum framework and a set of student performance standards for nursing assistant courses. The curriculum framework outlines major concepts and content, laboratory activities, program specifics, and intended outcomes; the student performance standards guide lists each standard and the behavior the student is expected to be able to demonstrate in order to show mastery of each standard. The guide also provides information on the following topics: facilities, equipment, and supplies, and safety for nursing assistant education classrooms and laboratories; program implementation; teacher professional development, teacher certification, professional organizations and support services; and instructional resources (a list of 19 print materials and 15 audiovisual materials). Appended to the program guide is a sample student learning guide that includes program title, intended outcome, learning activities with resources, procedures, information sheets, self-check with answers, written test with answers, and performance test. The Career MAP is a checklist, to be kept by both student and teacher, of student progress in the competencies required for entry into jobs in the nursing assistant field. (KC)

IDENTIFIERS- \*Job Training for the Homeless Demonstration Prog; Stewart B McKinney Homeless Assistance Act 1987

An interim evaluation analyzed the first year of operation of the Job Training for the Homeless Demonstration Program (JTHDP). Data were collected from quarterly progress reports and evaluation reports submitted by 32 local JTHDP projects. The projects exceeded planned levels of clients served and achieved other positive outcomes, including average wage at placement higher than the minimum wage and upgraded housing; they served a diverse group of homeless persons including many with barriers to employment. Many local projects adopted service delivery models that differed from the traditional model-- direct employment, long-term support through sheltered/subsidized employment, and a recovery approach for those struggling with or recovering from alcohol or other drug dependency. Case management was a critical service and the service most frequently used by project participants. The projects varied considerably in the degree to which they used sophisticated assessment tools. Eleven projects used assessment methods that went beyond interviews by an intake worker or case manager through the use of standardized assessment tools; six others reported that staff made referrals to other agencies for sophisticated assessment. Job search assistance, job development and placement, and vocational/occupational skills training were the most popular employment and training services offered. Projects frequently offered remedial education, counseling, and subsidized employment services. Postplacement services were important. The projects worked with other community agencies to promote referral and other collaborative relationships. It has become increasingly evident that efforts to help the homeless demand coordination among employment and training program operators and education, welfare, and social service programs. The first year experience of the JTHDP also

Research Reports; \*Resource Materials; Secondary Education;

\*Sex Fairness; Trend Analysis; \*Vocational Education

Women now represent 45% of the work force, and 74% of all 25- to 54-year-old women now work. Despite these statistics, women are still clustered in 20 of 400 occupational categories, and 70% of female secondary vocational students are preparing for low-wage jobs. These statistics, coupled with the findings of research on self-esteem and identity formation, mandates included in the 1990 Carl Perkins Act, and growing recognition of the fact that gender equity is good business, have motivated renewed emphasis on the creation of an environment in which individuals consider career options and make career choices based on their abilities rather than on stereotypes and expectations. A new set of issues accompanies the renewed interest in gender equity. Included among these issues are attitudes and stereotypes, sexual harassment, equity and males, learning and communication styles, and accountability. The most important issue, however, remains that of how gender equity can be achieved. (An annotated bibliography of 15 print resources for vocational educators interested in accelerating gender equity in education and in work is provided along with the names and addresses of four resource organizations concerned with issues related to gender equity in vocational education.) IDENTIFIERS- \*Schenectady County Community College NY

This report is the self-study of the Associate in Occupational Studies (AOS) in Culinary Arts program offered by the Hotel, Culinary Arts, and Tourism Department at Schenectady County Community College (New York). The self-study was conducted to support the department's application for initial accreditation of the Culinary Arts program with the Standards Accrediting Commission of the American Culinary Federation Educational Institute (ACFEI). As suggested by the ACFEI, the format of this report is organized around the following seven sections of the commission's accrediting standards: philosophy and goals, organization and administration, faculty and staff, curriculum, facilities, student services, and summary. Three appendixes contain the department chairperson's letter to prospective students, an explanation of the work experience requirement, and an equipment inventory. Some of the identified strengths of the program are the following: (1) the program is offered by a stable institution and is accomplishing its mission; (2) the college is housed in a former hotel; and (3) the curriculum is based on practical and useful elements. Weaknesses are as follows: (1) lack of course work in sanitation and bar management; (2) ineffectiveness of the career placement office in helping graduates to get started in their careers; (3) lack of racial minority groups in the program; (4) dependence on many part-time faculty members; and (5) no elective courses. IDENTIFIERS- \*Goal Setting

This package includes a booklet of career planning activities for high school students and an accompanying facilitator's guide. The booklet contains 11 learning activities grouped in sections on self-assessment, career exploration, goal setting and planning, and the relationship between education and careers. The facilitator's manual consists of an introduction, companion sections for the four sections of the student activity booklet, and seven appendixes. The introduction includes an overview of the Pathways to Your Future career planning series, suggested implementation strategies, a listing of the objectives of the student activity booklet, and guidelines for using the facilitator's guide. Each companion section to the student activities includes some or all of the following: objective, list of required materials, suggested additional resources, introduction, suggested procedures for introducing and/or conducting each student activity, and notes warning of potential problems as negative reactions of students with low self-esteem to certain learning activities. Included in the appendixes are descriptions of various aptitudes, a list of selected occupations related to interests and abilities, definitions of the 12 career areas, examples of occupations by level of education, and a high school program of study planner. This report contains information obtained from approximately 7 hours of interviews conducted with 11 people who had worked with the school psychologist hired by the Lamoille South Supervisory Union Board of Directors (comprising school board members from the towns of Elmore, Morristown, and Stowe, Vermont) to address student problems. Student problems related to problems of family and peer relationships are considered, and the changing nature of parent-child relationships as more and more families include two employed parents is discussed. Changing family structures resulting from divorce and/or remarriage are examined. It is noted that the changes in family life have forced schools to take on a more parental role that they had in the past. The increasing demand for school

Among New Mexico's teenage women, birth rates are 31% higher than the national rate for the 15 to 17 age group and 30% higher for the 18 to 19 age group. The New Mexico Survivorship Study, a longitudinal investigation being conducted in an effort to reduce these figures, uses the technique of survivorship methodology from epidemiology. In biomedical investigations that use survival analysis, patients with a lethal disease are followed over time until they die. Factors associated with greater survival times are then used to design more effective treatments. In the New Mexico Survivorship Study, this technique is being adapted to study teenage pregnancy. Beginning in the fall of 1993, teenage women (N=1,894) will be tracked over a risk period (7th through 12th grade) for a designated outcome (pregnancy) and those variables related to survival time will be examined statistically. School nurses at study sites will interview students who became pregnant (nonsurvivors). Matched control students who do not become pregnant (survivors) also will be interviewed. As a preliminary step, records from the past 5 years were accessed to establish some approximation of baseline incidence. The New Mexico Survivorship Study hopes that, by drawing information on etiology directly from young women who become pregnant, prevention mechanisms can be designed that will reduce the state's ranking in teenage pregnancies. DESCRIPTORS- Adolescent Development; Adolescents; Child Development; Children; Daughters; \*Expectation; \*Fathers; Longitudinal Studies; \*Parent Child Relationship; \*Parent Role; \*Sex Differences; \*Sex Role; Sons; Young Adults

Data from the National Survey of Children (Waves 1 and 3), a longitudinal survey of 2,000 children who were between the ages of 7 and 11 during the first wave in 1976 and between the ages of 16 and 20 during the third wave in 1987, were analyzed to examine the impact of paternal involvement during childhood as well as the ongoing father-child relationship on sons' and daughters' gender role orientations and attitudes in young adulthood. The results indicated that, compared to females, males placed more importance on success at work and less importance on being a parent. Females, compared to males, were less likely to believe in traditional roles and more likely to believe that couples should share housework. While there were significant gender differences in role orientations and attitudes, there were no significant differences by father presence. Whether or not a father was present at time 1 and whether or not that presence changed over time had no significant relationship to the development of gender role orientations and attitudes. This finding supports the contention that research on the development of gender may need to pay less attention to father presence and focus more on the effects of the nature of fathering. Data analyses indicated that the ongoing father-child relationship was more important

that is administered to the parents of many thousands of children and adolescent annually in school systems and mental health agencies. It is a standardized instrument with age norms for males and females, on which parents rate their child's behavior. The CBCL consists of nine behavioral scales, but for boys and girls ages 4-5 and for girls ages 12-16, only eight scales are reported. This study was conducted to examine the relationship between the CBCL profiles and the Diagnostic and Statistical Manual of Mental Disorders, Third Edition-Revised, (DSM-III-R) diagnostic classification, and to test the relationship between the Global Assessment of Functioning (GAF) scores and the CBCL profiles. Findings based on data from 977 children and adolescents receiving treatment at one mental health center revealed no significant relationships between CBCL profiles and DSM-III-R diagnostic classifications or between the CBCL profiles and GAF scores. These findings suggest that, until further information is obtained, when the CBCL is used to make clinical judgment, it should be interpreted with caution. (NB)

DESCRIPTORS- \*Adolescents; Age Differences; \*Children; College Students; Death; Higher Education; Parent Child Relationship; \*Parent Role; Sex Differences; \*Student Attitudes; \*Suicide

IDENTIFIERS- \*Blame

Previous research has shown that parents of children who commit suicide receive reduced emotional support from their community. More research in the area of attitudes toward child suicide may aid professionals in helping grieving friends and families and help pinpoint areas where more education may be needed. This study examined the differences between male (N=52) and female (N=72) college students in their blaming of parents for a child's suicide. Ages of the victim were varied to see if the age of the victim would influence both blaming attitudes and attitudes toward the victim's mental health. Subjects completed a demographic questionnaire, read one of three scenarios on child suicide which varied by age of the child but not by sex (all victims were boys), and answered the Youth Suicide Scale (YSS). Results revealed men to be more blaming of parents of a child suicide than were women. There was no main effect for the age of the victim in the scenarios when using the total YSS score, but when using only question four, "To what degree do you blame parents for their child's death?", subjects blamed the parents of the 10-year-old more than they blamed parents of the 13-year-old or the 17-year-old. Student Attitudes; Teacher Attitudes; Teacher Behavior; \*Whole

Language Approach; Writing Attitudes; \*Writing Instruction

A study examined how teachers' attitudes and beliefs affect their enactment of literature-based curriculum materials, whether student attitudes differ in accordance with the teacher's orientation, and whether student achievement in reading and writing differ in whole language and traditional classrooms. Two "whole language" and two "traditional" teachers in four intact suburban fourth-grade classrooms in southern California were chosen. Teachers were observed for over 100 hours over 1 year. Pretest and posttest reading and writing attitude measures, and reading achievement tests were administered. Writing samples were taken at three points. Analysis of teacher, principal, and student interviews present the insider's view of the classroom. No statistically significant differences were found in reading. On attitude measures classes were split between one whole language and one traditional teacher. Students in the traditional teachers' classes significantly outscored those in whole language classes on writing measures. Results presented represent work in progress with full data analysis to be completed in June 1993. Analysis of qualitative data is incomplete. DESCRIPTORS- Audience Awareness; Higher Education; Interpersonal Relationship; \*Revision (Written Composition); \*Writing (Composition); Writing Research

IDENTIFIERS- Author Reader Relationship; Process Approach (Writing); Text Factors; \*Writing Contexts

A language-centered social interactionist approach toward writing and written communication involve writing and reading as acts of negotiation. Effective writing, which enables writers and readers to construct and share understanding, is a process of interpersonal contextualization. An analysis of the working drafts and revision of the introductory section of one student writer's text demonstrates how key textual features function reflexively to establish and sustain the rational grounds of writing and reading as sense-making social practices. An important pedagogical implication of this framework for understanding writing is that writer-reader classroom interactions need to be intensively text-centered, a concern too often neglected in current process-oriented instructional design. Developing writers need to witness the on-line effectiveness (or ineffectiveness) of their texts as rational accounts of the working contexts that enable readers to make sense of their efforts. DESCRIPTORS- Classroom Environment; Educational Philosophy;

\*Feminism; Higher Education; \*Language Role; \*Teacher Role; Teaching Methods; Writing Instruction

IDENTIFIERS- \*Composition Theory; Feminist Criticism; \*Feminist Pedagogy; Poststructuralism; Psychoanalytic Theory

Theories of phallic authority outlined by Jaques Lacan, Sigmund Freud, and Luce Irigaray suggest that one can effectively undo authority only from a position of authority, a position that traps feminists within the very phallic economy they hope to subvert. Attempting to avoid this trap, feminist pedagogues have made a distinction between "bad" authority and "good" authority by assuming the role of the "nurturing mother" rather than the "authoritative father." This brand of feminist pedagogy remains as much a function of the phallic phantasy as does traditional pedagogy. The job of the pedagogue is to bring and keep student language within the lines of legitimacy. What these feminist pedagogies offer is a simple reversal of privilege, from the Father to the Mother, which leads nowhere new. What is needed is a different game entirely, a way out of the old stories, out of Oedipal subjectivity, out of the binary system itself. A pedagogy of laughter could mimic phallic authority in the classroom in a way that would pervert its authenticity. Authority would then find itself enacted as a pedagogical performance--a parody or pastiche--informed by the notion that persons cannot be masters of a language that commands them. Authority would not be renounced, rather it would be enacted in a way that would expose its illusoriness. It would become laughable. (A 35-item bibliography is attached.) (SAM)

DESCRIPTORS- Classroom Communication; Cognitive Style; \*Feminism; Higher Education; Teacher Role; Theory Practice Relationship; Womens Studies; \*Writing (Composition); Writing Assignments; Writing Instruction

IDENTIFIERS- Gender (Language)

Breaking down gender barriers in composition and literature classrooms suggests that teachers rethink the forms of writing they demand of their students (e.g., argumentation and exposition) and that they encourage a wide range of approaches which account for gender-specific modes of writing and interpreting texts. Various writing assignments such as

therapy. Students, writing about their writing, indicate that they are opened to feeling and often surprised by insight. Occasionally they report being changed by their writing. Individuals must differentiate their own voices from the great cultural voice, and they need encouragement and practice to do that. Providing the means for telling and reflecting on these stories is what a writing teacher can do, even within the context of an institution of higher learning and of a discipline. (SR)

DESCRIPTORS- Elementary School Students; Grade 6; Haiku; Intermediate Grades; Lesson Plans; Literature Appreciation; Middle Schools; \*Poetry; Student Writing Models; \*Writing Instruction

IDENTIFIERS- \*Middle School Students

Pupils in the middle school can be motivated to enjoy and write haiku poetry. A student teacher taught two lessons to a sixth grade class in haiku writing. First, the student teacher read three haikus aloud to students. After discovering the characteristics of a haiku from two models, the class as a whole wrote a haiku based on slides from their social studies unit on the Middle East. Next, students wrote a haiku in large groups, and then with a peer. Students seemed thoroughly involved in their writing, and interest and frequency of participation were high. Finally, students wrote haikus as a homework challenge--and 22 of 25 students brought their poems to class the next day. Writing haikus can be one means of having learners develop their own ideas and put them into print. (SR)

IDENTIFIERS- Indiana University Bloomington; Indonesians; Malaysians

A case study examined the similarities and differences in the background characteristics, the nature and causes of the English language-based problems, and the coping strategies of two foreign students at Indiana University, Bloomington. Subjects were selected because they represented two different nationalities (Malaysian and Indonesian), genders, age groups, educational levels (graduate and undergraduate), fields of study, and colonial educational backgrounds. Data included responses to a questionnaire, personal interviews, classroom observation, and examination of student essays and lecture notes. Commonalities between the two cases were found in the following areas: speaking the Malay language which is the official language of both Indonesia and Malaysia; positive parental attitude and encouragement about learning English; the reasons for learning English; the nature and causes of English language-based problems; strategies used to overcome language problems and achieve academic success; perceived improvement in academic reading skills; and lack of perceived improvement in verbal and non-verbal communication. The two cases showed some major differences in their personal and academic backgrounds, reasons for learning English, and the amount of English instruction received. In spite of important differences, the language problems of the two cases did not significantly differ. (RS)

IDENTIFIERS- New York City Board of Education

Findings of a case study that examined professional accountability in an elementary classroom are presented in this paper. Classroom observation, document analysis, and postobservation conferences were used to examine the practices and beliefs of one female teacher of second and third graders at a multicultural public elementary school in New York City during the spring of 1991. The first section describes the explicit classroom interactions between the students and teacher, with a focus on the accountability process. The second section discusses the teacher's own cognitive frames regarding her practice and organizes them in light of issues of accountability and pedagogical decisions. Findings suggest that the teacher's essential cognitive frame reflects a "learner orientation," which implies that her special knowledge of each student and her knowledge of the classroom community are at the center of her pedagogical decisions. The teacher exhibited four dimensions of professional accountability: a defined professional role; a sense of community and understanding of diversity; work grounded in children's experiences; and use of multiple accountability mechanisms. Major U.S. corporations are committed to enlarging their investments in systematic educational reforms. This publication describes some innovative company policies and presents four case studies (Hewlett Packard, Eastman Kodak, Coopers & Lybrand, and Fannie Mae) to illustrate full corporate commitment, which means more than vast expenditures. True commitment requires mobilization of people toward meaningful, measurable, systemic change; direct involvement for chief executives; employee encouragement and empowerment; and dedication to the Business Roundtable's nine educational effectiveness components and the National Governors Association's six National Education Goals. The committed corporation has dedicated leadership, asserts its commitment at all organizational levels, creates an internal environment for facilitating employee involvement in education as a corporate priority, invests in systemic change, and leverages direct

and what's being done to improve it. Leaders reply that scores are lower because more students take the test than in states with higher scores. This report summarizes what can be learned from Indiana's average SAT scores and what cautions are necessary to reach meaningful conclusions about the educational performance of Indiana students. Indiana high school seniors' average verbal-math SAT scores have historically ranked in the bottom one-third of the states. Two sources of bias that distort and lower Indiana students' average SAT scores are described--the varying rates of SAT participation among states, and differences among states' educational resources. It is argued that SAT scores offer a limited measurement of college-bound high school seniors' verbal and mathematics achievement, and do not accurately represent the state's educational performance. In addition, the SAT is used as a measure of student achievement, although its purpose is to assist colleges in making admissions decisions. Three different ways of reporting SAT scores are explained. It is concluded that the relative performance of Indiana's college-bound high school seniors improves in comparison to other states, once corrections are made. An education-performance report card is needed to provide a comprehensive and informative view of Indiana education. (LMI)

DESCRIPTORS- \*Catholic Schools; Educational Administration; \*Educational Finance; \*Expenditures; \*High Schools; \*Operating Expenses; \*Parochial Schools; Private Education; Private Schools; Religious Education; Teacher Salaries; Tuition  
Demographic, organizational, and financial trends in Catholic high schools in the United States are described in this 1992 report. Data were obtained from a survey sent to a random stratified sample of 500 Catholic high schools in the United States, which yielded 278 usable returns. Information is presented on school administration, teachers, students, admission standards, facilities, parental involvement, finances, development programs, and governance and external relations. Findings indicate that the percentage of president-led Catholic high schools has risen to 20 percent. Teacher salaries and stipends have increased, and the gap between salaries in public and Catholic schools has narrowed slightly. Schools are working to balance necessary tuition increases with expanded financial aid programs, and are placing more emphasis on development efforts. Finally, the findings demonstrate strong support for the effectiveness and efficiency of Catholic schools. However, they face increasing financial strain that is balanced by committed principals, teachers, and parents. Thirty-five exhibits are included. Appendices contain average high school models; summary tables by governance, region, and enrollment; a list of represented schools; and the survey instrument. (LMI)

IDENTIFIERS- \*America 2000

America 2000, the national strategy proposed in 1991 by the Bush Administration to achieve six national education goals that were adopted in 1990 by President Bush and the Nation's Governors, consists of four broad components: the reform of current schools; the development of new school models; the enhancement of workers' skills; and the coalescing of communities behind the President's strategy. This report provides an overview of the strategy; describes the roles, as delineated in the strategy, to be played by different levels of government, the business community, and the public; presents a table showing the Administration's proposed fiscal year 1992 funding for initiatives related to the strategy; and concludes with an analysis of some issues relevant to federal policy making. The issues include the approach to reform, research and development, coverage of the goals, promotion of school choice, and development of new model schools. (LMI)

PUB TYPE- Opinions/Personal Viewpoints/Position Papers/Essays (120); Speeches, Conference Papers, "Papers Presented at..." (150)

DESCRIPTORS- \*Educational Improvement; \*Educational Theories; \*Effective Schools Research; Elementary Secondary Education; Foreign Countries; Models; \*School Effectiveness; Theory Practice Relationship

This paper outlines the reasons for the overall lack of synchronization between school-effectiveness knowledge and school-improvement practice at the international level. It surveys the two communities, attempts to understand the origins and distinctiveness of the two paradigms, and outlines what each community could gain from an appreciation of the other's knowledge base. It concludes with an outline of what changed practice within each of the communities could contribute to satisfaction of the other's knowledge needs. Examples of programs that integrate the two bodies of knowledge, creating a new paradigm, are described: (1) the "Improving the Quality of Education" project at the Cambridge Institute of Education; (2) the series of school-improvement programs run by the Halton Board of Education in Canada; and (3) school-improvement attempts at the University of Wales, College of Cardiff. One table is included. (Contains 42 references.) (LMI)

IDENTIFIERS- \*Fetal Drug Exposure; Phencyclidine

This book combines in a single volume the findings of basic research and clinical studies conducted on the effects of alcohol, tobacco, and other drugs on the fetus, the mother, and the baby after birth and through lactation. It first outlines changing perspectives on teratology (the study of causes for birth defects), as knowledge about the dangers of maternal alcohol and other drug use has increased, and notes limitations of teratogenic research. It reviews maternal factors that influence pregnancy outcomes. Characteristics of drugs and their risk to the fetus are discussed, focusing on genetic vulnerability of the fetus, timing of drug exposure, dosage and

process, particularly with regard to the development, implementation, and evaluation of communication intervention. First, the characteristics of transdisciplinary teams as they operate in more inclusive settings are described, followed by a categorization of team processes as either team "functions" or team "structures." Team functions include assessment, goal-setting, and service provision. Team structures refer to how teams are organized (e.g., who should be part of the team) and roles within teams (e.g., facilitator, observer, recorder) as well as the mechanisms team members use to arrive at a consensus in decision-making. The importance of the team in identifying both the vision that its members hope to realize and the goals of inclusion for each student is stressed. The paper concludes with recommendations for future efforts to enhance collaboration among team members working with this population. (Contains 41 references.) (DB)

Special Education Relationship; School Administration; School  
Districts; School Role; \*Special Education; Staff Development  
IDENTIFIERS- \*Baltimore City Public Schools MD

This report critically examines special education in Baltimore (Maryland) public schools and proposes major reform of Baltimore's special education system. Criticisms focus on: poor instructional quality (there is little "special" about special education); segregation of special education students from regular education; special education used as a dumping ground for slow learners and trouble makers; little attempt at early intervention; poor outcomes despite expensive programs; and an inefficient and ineffective bureaucratic system. A series of recommendations is preceded by a list of desired outcomes. These include higher self-esteem for special education students, early intervention to prevent unnecessary placement in special education, ending excessive bureaucracy and red tape, and raising graduation and attendance rates. Six initiatives are proposed: (1) creation of a mission statement; (2) taking responsibility to the schools; (3) creation of one system for all students; (4) staff development and support; (5) encouragement of family participation; and (6) improved management. A previous court-commissioned plan for reform is outlined and endorsed. Requirements of federal and state law as well as a 1984 consent decree are summarized. The report also offers recommendations to implement the six proposed initiatives. (Contains 35 references.) (DB)

service to a new plan for change but then has trouble when the time comes for actual change to occur; it is only when society changes its thinking about mental retardation that people with mental retardation will be accepted; each person must judge others according to their actions and not their labels; and diversity instead of conformity should be emphasized. When this happens, society will have truly banished the darkness it created and replaced it with the light of acceptance and recognition. (Contains 33 references.) (JDD)

IDENTIFIERS- \*Education of the Handicapped Act 1986 (Part H)

The Carolina Policy Studies Program (CPSP) was established in October 1987 to track the implementation of Public Law 99-457, Part H (the law is now known as IDEA--Individuals with Disabilities Education Act), which aids states in providing comprehensive services to infants and toddlers with disabilities and their families. Since its establishment, the CPSP has used telephone interviews, document analyses, surveys, focus groups, literature reviews, and case studies to investigate the states' responses to Part H, resulting in 85 reports, journal articles, and book chapters. This report synthesizes CPSP findings concerning progress in implementation of Part H, in the areas of eligibility policy, family policy, personnel preparation, finance, interagency coordination, health coordination, and data systems. The report concludes that states are making impressive efforts to implement the complex law. The reform requirements of interagency coordination and parent empowerment were well accepted. Unsolved problems that remain include defining the role of the service coordinator, the limited efforts toward developing interdisciplinary training programs, and a lack of clear vision on how the program will be financed. An appendix lists publications produced by CPSP, in reverse chronological order by year of publication. (Contains over 50 references.) (JDD)

press" is reviewed with special reference to the status and function assigned to the paratext. In the second part of the paper, an alternative theoretical framework is presented. The fundamental hypothesis of this theory is that the paratextual units of news texts constitute a coherent and relatively autonomous microsystem, despite certain structural and functional differences, and that this microsystem is placed as a text strategic field (threshold) between the sender and receiver of news text. Appended are samples of news text to illustrate the theory. (Author/JP)

DESCRIPTORS- \*Discourse Analysis; Foreign Countries; \*Linguistic Theory; Structural Analysis (Linguistics); Text Structure

IDENTIFIERS- \*Summarization

This paper presents some aspects of polyphonic theory, which contests the idea of the unique speaking subject and claims that several voices can be manifest in one utterance. The theory is related to the analysis of a coherent text consisting of several utterances. The notions of enunciator, speaker, enunciation, and utterance are defined in polyphonic terms. A polyphonic analysis of argumentative text tests the hypothesis that if there is one voice that is stronger than the others this voice can be characterized as the most important one and situated at the top of the information hierarchy. Results show the analysis to be legitimate in the study of structuring and hierarchical organization of information. (Author/JP)

PUB TYPE- Speeches, Conference Papers, "Papers Presented at..." (150), Reports - Research/Technical (143)

DESCRIPTORS- \*Coherence; \*Discourse Analysis; Foreign Countries; \*Reading Comprehension; Reading Skills; Rhetoric

IDENTIFIERS- \*Relational Propositions

Readers' ability to identify and accept relational propositions (RPs) in a text may influence their judgments of text coherence. Types of text comprehension were defined in two ways: (1) according to whether an RP was immediately identifiable, identifiable after further reading, or not identifiable; and (2) according to whether the proposition was judged to be acceptable. Using a sample text (an editorial) RPs were identified, articulated into statements, and inserted into the text. This showed that the sample text would probably manifest a high degree of coherence to its readers in that its dominant rhetorical relations would be relatively identifiable,

administrative support, classroom organization, scheduling, bridging, and mainstreaming. Implementation models are described in chapter 7: individualized instruction; sheltered classes; integrated language and content curricula; and a whole-school approach. Similarly, models for staff development programs are outlined in chapter 8. (Contains 47 references and 88 resources.) (MSE)

DESCRIPTORS- \*Distance Education; Educational Change; Educational Cooperation; Educational Strategies; Foreign Countries; \*Futures (of Society); Higher Education; \*Labor Force Development; \*Open Universities; \*Program Development; \*School Business Relationship

IDENTIFIERS- \*European Community

Europe's socioeconomic climate will undergo rapid change as the single market becomes a reality and technological change accelerates. With companies in some countries now spending more collectively on training than their governments spend on the higher education sector, it is essential to map out a new European strategy for training for the 1990s. This strategy should include the following key components: training information systems, interinstitutional networks, economic and social cohesion, individual achievements profiles, modular course construction, and distance learning. The absolute distinction between institutional and distance learning will likely disappear. The role, scope, and scale of open distance learning in the European Community will expand greatly in response to the general upgrading of skills and knowledge that will be required as economies become much more knowledge dependent. Another important factor is the demographic challenge posed by the overall aging of the population. The European Association of Distance Teaching Universities will play an important role in the expansion of open distance learning in Europe in promoting collaboration between open universities and traditional institutions and in serving as a permanent "lobbyist" for open distance learning at the European Community level. This competency-based instructional text focuses on preparing students for apparel industry positions at the career-sustaining and marketing specialist levels. It also includes materials to help students develop the competencies needed for entry-level and managerial positions. The text is divided into four units. Unit 1 contains a chapter providing an overview of the apparel and accessories industry and various related career options and a chapter explaining how marketing principles are applied within the industry. The two chapters of Unit 2 cover human relations and communications and the mathematics skills required for a career in apparel and accessories marketing. Unit 3 consists of chapters presenting product information on the following items: fabric, women's clothing, menswear, children's wear, shoes, and accessories. The six chapters included in Unit 4 cover marketing skills related to the following: buying and pricing, physical distribution, promotion, visual merchandising, selling, and management and administration. Each chapter begins with real-life examples and refers repeatedly to current industry trends and to the experiences of real apparel and accessories marketing businesses. Learning experiences are interspersed throughout each chapter, and each unit concludes with a project or case study designed to unify the various topics covered in that unit. (MN)

IDENTIFIERS- \*Scottish Wider Access Program

A study of the Scottish Wider Access Program (SWAP) surveyed 153 current access students in an initial interview and 131 in a follow-up interview; it also surveyed former access students who were in their first year of higher education (n=99 initially, n=76 follow-up). Students were interviewed by telephone near the beginning and the end of their courses. They were drawn from three broad categories of study: science and science-related courses; social science, humanities, and languages; and nursing courses. Findings indicated that both groups felt satisfied with their access courses, which they believed had prepared them well for higher education. Five aspects of SWAP courses were probed in detail: modules, assessment methods, teaching methods, tutor qualities, and study skills. Modules gave students confidence by taking a step-by-step approach, although students were concerned about fragmentation of knowledge and about some modules being too easy. Continuous assessment helped students learn and built confidence. Students reported a high degree of mismatch between teaching methods in SWAP and higher education courses. SWAP tutors were rated very highly by current and former students. Higher education tutors were less often described as knowledgeable, patient, and enthusiastic. Students were happiest finding their own study skills and overall strategy. Access students experienced problems of three main types: academic, personal, and financial. Over 43 percent of students in higher education reported academic difficulties. Among former SWAP students in higher education, there was a striking lack of knowledge about student support services. strong leadership from Connecticut Department of Education staff; and creation of a support system consisting of centralized staff development and technical assistance services. A private corporate evaluated the CAPP initiative from 1986 to 1992. The evaluation confirmed that the CAPP initiative has resulted in significant improvements in the management of Connecticut's adult education system, positive impacts on adult learners' mastery of basic skills and achievement of their educational goals, and overall strengthening of the delivery of adult basic education (especially in the areas of staff development, alignment of curriculum in adult education programs, standardization of local adult education program procedures, and formalization of strong collaborative networks within the adult education system and among education, job training, and welfare programs). The evaluation also resulted in recommendations regarding further refining the CAPP program in the areas of program management, program operation, and interagency cooperation. (The administrator, facilitator, and instructor surveys used in the evaluation are appended.) (MN)

Surveys; \*Student Attitudes; Tables (Data); \*Teacher Attitudes;  
Vocational Education

IDENTIFIERS- New Jersey

A study examined the relationship between selected demographic characteristics and attitude toward sexual harassment. The study population consisted of high school students and adults enrolled in traditional and nontraditional training programs and teachers in 12 New Jersey school districts. Sixty-three percent (638) of the 1,020 questionnaires originally mailed to gender equity project directors were returned with usable data. Study participants were asked if they considered 10 different behaviors to be sexual harassment. Female respondents were more likely to consider the behaviors to be sexual harassment than were male respondents; however, both males and females felt that forms of sexual harassment in which job security, compensation, or work assignments were conditional on sexual favors were most offensive. Respondents aged 16-18 were consistently less likely to perceive behaviors as sexual harassment than were individuals aged 13-15 or over 18. Race also influenced perceptions of sexual harassment. Caucasians and Hispanics were most sensitive to sexual harassment. Students enrolled in traditional career preparation programs were significantly more likely to be sensitive to sexual harassment than those enrolled in nontraditional programs. (The survey data are displayed in 13 tables and the survey instrument is appended. Contains 24 references.) (MN)

IDENTIFIERS- \*Workplace Literacy

The Continuing Education Institute's Workplace ESL (English-as-a-Second Language) and ABE (Adult Basic Education) programs improved the job experience for employees with language and literacy problems in Boston (Massachusetts) by teaching them language strategies that had direct application to their jobs. Health care administrators, supervisors, and employee participants provided the workplace details that became the core of a specialized curriculum. Participants read, talked, and wrote about their jobs. Classes met for 2 hours twice each week. In all there were 51 classes in 5 locations serving 141 employees from 6 health care organizations. The quality of care of the residents or patients entrusted to program participants was noticeably improved as a result of the project. Employees can now fill out patient forms correctly, inform residents and patients of what they are going to do to them as part of their care, and report problems. They have shown more initiative, have become more observant, and want to know more about illnesses and medicines. They also have become more positive and more self-confident. An outside evaluation by Marcus Lieberman, Ph.D., verified these positive outcomes. Five attachments containing statistical and other supplementary materials are provided, as is the text of the outside evaluation report. (KC)

IDENTIFIERS- \*Problem Based Learning; \*University of Newcastle (Australia)

Since 1991, the problem-based learning (PBL) approach has been incorporated into the distance education program culminating in a Bachelor of Building degree from the Faculty of Architecture at the University of Newcastle, Australia. The Newcastle conceptual PBL model for on-campus courses was adapted to the special needs of distance learners. The briefings and lectures that are typically part of the interactive learning process that takes place in on-campus PBL-based courses have been replaced by scenarios and learning units. Learning units, which

chosen programs are described. (The five components are as follows: assessment of individuals' vocational interests and abilities, financial support, family and parental involvement and support, notification of both students and parents regarding vocational opportunities, and follow-up of graduates and nongraduates.) The second section includes a description of the exemplary programs, emphasizing those components that reviewers rated highly and that were found to be innovative. The five exemplary programs are the following: (1) Comprehensive Bilingual Vocational Education for Refugee Youth, Catholic Charities of Richmond, Virginia; (2) General Trades/Vocational Experiences for Exceptional Persons, Portland Regional Vocational Technical Center, Maine; (3) Single Parent/Displaced Homemaker Program, Pinellas Technical Education Center, Florida; (4) Transitioning Vocational Services, Mt. Prospect, Illinois; and (5) The Vocational Education Resource System, Rohnert Park, California. An appendix includes guidelines that reviewers used for rating exemplary programs as well as a description of the 20 components that comprise the framework. (KC)

IDENTIFIERS- Florida

This program guide is intended for the implementation of a business ownership and entrepreneurship program in Florida secondary and postsecondary schools. The program guide describes the program content and structure, provides a program description, lists job titles under the program, and includes a curriculum framework and student performance standards for business ownership courses. The curriculum framework outlines major concepts and content, laboratory activities, program specifics, and intended outcomes; the student performance standards guide lists each standard and the behaviors expected to show mastery of each standard. The guide also provides information on the following: facilities, equipment and supplies, and safety; program implementation (student admission requirements, suggested teaching methods, evaluation criteria, certificate of completion, student learning guide, cooperative training, and student organizations); teacher professional development, teacher certification, professional organizations and support services; and instructional resources (a list of 47 references and resources). Appended to the program guide is a sample student learning guide that includes program title, intended outcome, learning activities with resources, procedures, information sheets, self-check with answers, and a written test with answers. PUB TYPE- Reports - Research/Technical (143), Speeches, Conference Papers, "Papers Presented at..." (150)

DESCRIPTORS- Acquired Immune Deficiency Syndrome; Elementary School Students; \*Grade 5; Information Seeking; Information Sources; Intermediate Grades; Knowledge Level; Parent Education; Preadolescents; \*Racial Differences; \*Self Esteem; \*Sex Differences; Sex Education; \*Sexuality; \*Student Attitudes  
This study examined selected characteristics and behaviors among fifth grade pupils who ranged in age from 11 to 12 years. The sample (N=975) constituted the entire fifth grade population of a moderate-sized city 45 miles from Atlanta, Georgia. The sample consisted of 160 black students and 815 white students, with 511 boys and 464 girls. A 12-item self-report questionnaire was completed by the students. The results revealed that black students more than whites (24% versus 12%) and boys more than girls (23% versus 3%) reported being sexually active. The group as a whole demonstrated a remarkable degree of knowledge about Acquired Immune Deficiency Syndrome, with 95% of all groups reporting some knowledge about this subject. The findings suggest that the best starting point for sex education is among 10- to 13-year-olds. Both white (71%) and black (68%) students reported that their parents or some other adult in their home had already discussed sexuality with them. They also reported that their parents assisted them in understanding issues that are important to them and that they were more likely to seek information of an important nature from their parents than from the school counselor or their teacher. Implications drawn from this finding strongly suggest the need for parent education on essential topics to enable parents to respond with accurate information to the complex issues of their children. IDENTIFIERS- \*Michigan

This 11-section report focuses on examples of community-based collaborative efforts in Michigan which address the needs of children and youth in the late 1980s and early 1990s. Section One provides an introduction to the report. Section Two looks at the status of Michigan's children, youth, and families, and includes a summary of sociodemographic trends. Section Three provides a framework for understanding and action, describing community collaborations as applications of ecological theory. This section also introduces a research project initiated in 1991 designed to find out to what extent communities might be applying this ecological model to address the needs of children, youth, and families. Section Four describes the method of analysis used in the project; Section Five presents an overview of 45 collaborative efforts in Michigan identified through the project's preliminary survey; and Section Six gives an in-depth view of 13 of these collaborations. Section Seven focuses on some of the challenges for collaborations identified by the project, Section Eight considers common elements among collaborations, and Section Nine looks at unique elements of the collaborations. Section Ten discusses implications for community collaborations and Section Eleven focuses on the current status and future outlook for collaborative efforts. Twelve figures and seven tables supplement the text. Contains 46 references. (NB)

Despite educational expansion, girls and women still face unequal educational and training opportunities. A fundamental cause is the perpetuation of assumptions, beliefs, and prejudices that ignore, belittle, and hinder the aspirations, needs, and capacities of girls and women. Since educational and vocational guidance can promote equal opportunity, the United Nations Educational, Scientific, and Cultural Organization (UNESCO) decided to produce the "Manual on Educational and Vocational Guidance for Girls and Women." The Manual seeks to help girls and women in their efforts toward self-fulfillment through education, training, and career-building. The volume includes five chapters entitled: (1) "Inequality of Opportunity"; (2) "Role and Function of Educational and Vocational Guidance"; (3) "Organizing and Operating a Guidance Program"; (4) Consequences of Effective Guidance Programs"; and (5) "Learning from the Experiences of Others." DESCRIPTORS- \*Cultural Pluralism; Feminism; Higher Education;  
Individual Development; Majority Attitudes; Minority Groups;  
Psychology; \*Sex Bias; Sex Differences; Sex Discrimination;  
\*Social Bias; \*Textbook Bias

This paper reports the results of a content-analysis for the treatment of gender and diversity in the 11 top-selling lifespan developmental textbooks. The purposes were to measure the amount of information provided on aspects of development specific to Caucasian females and females of Color and to evaluate qualitatively the incorporation of the new research and theory on gender through experts' review of sections on gender role development. Results indicated that the amount of information provided on events in girls and women uniquely encounter throughout the lifespan, such as menstruation, pregnancy, rape, etc., was minimal in all 11 textbooks. Experts' qualitative ratings of the texts' section on gender role development for their race and gender bias were also disappointingly poor. Further, the texts contained almost no material on women (or men) of Color. Unlike most previous analyses of texts, this research focused on error of omission, since the absence of information is difficult to detect and yet may be potentially more damaging. The findings suggest that lifespan texts are deficient in their treatment of gender and diversity. A secondary finding was that the more efficient qualitative assessment yielded essentially the same results as the quantitative procedure. (Author)

A Comparison of the Effectiveness of the Individualized Approach and the Traditional Approach to Teaching Spelling in the Fourth Grade.

Intermediate Grades; Reading Research; Sex Differences;  
\*Spelling; \*Spelling Instruction

IDENTIFIERS- California Test of Basic Skills

Two approaches to spelling instruction were compared by measuring which program was more successful. Thirty-two fourth-grade students participated; instructional intervention spanned 6 months. The control group used the materials and procedures of the Macmillian Basal Series. The experimental group used the Spelltex Individualized Spelling Kit. The results of each program were measured by using the California Test of Basic Skills, Level 1 spelling test for grade four. The means of the two groups were compared by using a "t" test. Results indicated: (1) no significant difference between the total group of students using the individualized approach and the total group of students using the basal series; (2) no significant difference between the girls in the control group and the girls in the experimental group; and (3) no significant difference in spelling abilities between the boys using the Macmillian Basal Series and the boys using the Spelltex Individualized Spelling Kit. (Eight tables of data and 38 footnotes are included; 38 references, a list of the steps in the individualized plan, the 5-day basal speller plan, and 6 tables of data are attached.) (RS)

IDENTIFIERS- Emergent Literacy

Based on years of classroom observation, this book presents the thesis that powerful, critical, active, productive literacy can be achieved systematically, and regularly, with large numbers of the school population, if the principles currently known as the whole language approach are applied. The book is based on the assumptions that learning to become literate ought to be as uncomplicated and barrier free as possible, and that once learned, the skills and knowledge that make literacy learning possible ought to endure beyond the classroom. Chapters in the book are: (1) What It's All About; (2) Portraits of Literacy Learning; (3) Prisoners of a Model of Learning?; (4) An Alternate View of Learning; (5) Theory into Practice I; (6)

anomaly of the text and the textbook; (2) the anomaly of the idolatry of naive readers whose heads have been "stuffed"; and (3) the anomalous role of the writer in literature and writing programs, the paper contends that these anomalies only serve to trivialize literature in schools. Exploring the nature of the "rules of the game" of school literature in the United States, the paper argues that school literature programs must treat literary texts as works of art and that literature programs need to be integrated into a broader context of the language arts. The paper questions the role of literature and literature education in American society and asserts that such a resource should serve as the cornerstone of education in a democratic society. The paper concludes that students must be helped to connect the way they read to the way they write, to develop a sense of pleasure in the medium of language and in the exploration of the culture of the writer and of the community of readers in the classroom. IDENTIFIERS- Elementary Secondary Education Act Title I

The lion's share of funding made available under Title I of the Elementary and Secondary Education Act (ESEA) was directed to schools that served large numbers of children from low-income families. In an attempt to quickly upgrade the quality of reading instruction in these schools, specialist teachers were hired to supplement the reading instruction offered in the regular classroom program (or the "first system" of education). The ESEA institutionalized compensatory education and fostered the emergence of the second system of education which now includes remedial programs in reading, writing, mathematics, special education programs for the "mildly handicapped," as well other programs for at-risk students. The second system is now so pervasive that every public school incorporates one or more of its programs. But the second system has largely failed to improve education for children who find learning to read difficult. Unless the fundamentally flawed second system is replaced by an enhanced first system of regular education, the educational prospects for children who find learning to read difficult will not improve. The introduction of an integrated language arts effort may serve as a catalyst for rethinking the conventional wisdom that currently fragments curriculum, instruction, and professional responsibility for developing literacy in at-risk students. \*Educational Environment; \*Family Environment; Higher

Education; \*Imagery; Literature Appreciation; Metaphors;

Student Experience; Writing Instruction

IDENTIFIERS- \*Writing Development

Often students are unable to draw upon their personal worlds and individual experiences to enrich their writing, suggesting a disparity between home and academic cultures. In light of this apparent disparity, teachers must try to bridge the gap, a task that is possible when the teacher focuses on the germinal, emotional, and unifying qualities of images. The testimonies of numerous writers point out the powerful influence that a single image can be capable of producing, often becoming the germ of a story or novel. Images also capture, convey, and communicate emotions. Beginning with images from their own experiences, students can become the receptive and diffusive centers of concentric, ever-widening circles of cultural awareness. Specific kinds of assignments can encourage students to evoke images from their own experiences. Students can be asked to understand how the images of a story express the writer's or the character's emotional state. Excerpts from student papers show that they respond readily when asked about a story's images. Students should be challenged to center an entire written piece around an image chosen by them. A central image of a literary text can be studied in its relation to the entire text. By asking students to evoke images as the origins and centers of writing ranging from personal experience to argument, they are inspired to cultivate their voice and originality. (HB)

DESCRIPTORS- \*Cooperative Learning; High Schools; High School Students; Instructional Effectiveness; Student Attitudes; Student Participation; Writing (Composition); \*Writing Improvement; \*Writing Instruction; \*Writing Workshops

IDENTIFIERS- High School Sophomores; Student Surveys; Teacher Surveys

The inability of students to become involved with writing assignments in two high-school sophomore honors classes was addressed at a writer's workshop by the implementation of collaborative learning, peer evaluation, conferencing, and broadened literature selection. Students responded to pre-workshop and post-workshop surveys to assess individual attitudes toward learning to write and writing abilities. Students were allowed to complete assignments in collaborative groups. Students were also allowed to choose the literature to be studied by the group. Results indicated increased interest in writing among the target group. Additionally, students in the target group demonstrated improved writing performance on the final writing project. Findings suggest that increased student participation in the selection of writing assignments and literature selections, along with interaction with peers on assignments, brought about improved performance on class writing assignments. IDENTIFIERS- \*Beginning Principals; Gwinnett County School System GA; University of Georgia

Findings of a study that examined the concerns and professional development of beginning principals who participated in an administrator-preparation program are presented in this paper. The Leadership Enhancement and Development program (LEAD) is collaboratively developed and delivered by the University of Georgia and Gwinnett County schools. Methodology involved a survey of 53 program participants from four cohorts (from 1988-1991) and interviews with the 16 fourth-year participants now in leadership positions. Findings indicate that the cohort-prepared principals shared typical concerns and related developmental stages, both influenced somewhat by the cohort and special selection nature of the experience. The professional focus of the new educational leaders moved from administrative and management problems to people and pathology-of-schools issues, and finally to instruction and planning issues. Their time expenditures and mental focus developed within 3 years in the following stages--survival, control, routinization, educational leadership, and professional actualization. Recommendations are made for administrator preparation programs to increase awareness of the early career-concern pattern, to include guided field experiences and mentorships between new and successful principals, and to structure programs that take advantage of professional linkages. Two figures are included. (Contains 18 references.) (LMI)

The School-Based Improvement Project (SBIP) is a joint venture of the Office of Community Education of the Massachusetts Department of Education and the Massachusetts Association of School Superintendents (MASS). SBIP is a multiyear professional-development initiative designed to help public school superintendents become effective leaders in promoting educational restructuring and school-based management in their schools. The project is composed of a colloquium series, support groups, peer coaching programs, and onsite leadership laboratories. This document highlights the presentations and workshops delivered during the 1990-91 colloquium series, in which participants engaged in small- and large-group sessions and roundtable discussions. The major themes of the colloquia included: (1) an introduction to restructuring and to the SBIP; (2) challenges to leadership in a changing world; (3) new models of leadership; (4) developing leadership in others; and (5) applications of superintendents' leadership. Appendices contain a list of the SBIP advisory committee members and their biographies. (LMI)

This report provides an overview and analysis of the Clinton Administration's school reform proposal, Goals 2000: Educate America Act, submitted to the 103d Congress on April 22, 1993. The proposal, which seeks to create a national structure for supporting school reform, addresses three primary topics: (1) education goals, standards, and assessments; (2) state and local educational reform; and (3) work force standards. Achievement of educational goals, standards, and assessments would involve the establishment in law of the National Education Goals Panel (NEGP) and the National Education Standards and Improvement Council (NESIC). The legislation would also authorize State and Local Education Systemic Improvement grants to support state and local education systemic improvement. Finally, it would establish a National Skill Standards Board (NSSB) to develop a national system of voluntary occupational standards and certification. Each of these facets of the proposed legislation is succinctly detailed in this report. (LMI)

IDENTIFIERS- \*Jefferson County School District CO

One of the most rapidly growing innovations in education in the United States is the adoption of year-round calendars. The largest year-round operation during the 1970's and a model for many districts was run by the Jefferson County, Colorado, School District. After 14 years of year-round schooling, the district returned to a modified 9-month calendar in 1988. This document discusses the reasons for the calendar change. Factors in the decision include the following: increased demand for schools in new neighborhoods; the Board of Education view of year-round education as a temporary housing measure; administrative factors (year-round schools create more work for administrators at the building level and at the central office,

patterns of consumption, and chemical properties of drugs. Hazards of prenatal exposure to specific drugs are then examined, including alcohol, tobacco, marijuana, cocaine, heroin and other opioids or synthetic narcotics, phencyclidine, and prescription medications. For each drug, information is provided on: suspected mechanisms for drug damage to the fetus, effects on fertility, effects during pregnancy and delivery, effects on the newborn, effects on breastfeeding, and effects on the growing child. Suggestions are then offered for counseling women about childbearing and childrearing risks of drug use. A section titled "For More Information" lists health information clearinghouses, compendiums of resources, publications and pamphlets, sources for treatment referrals, and additional readings. (Contains approximately 150 references.) (JDD)

IDENTIFIERS- \*New Jersey

This booklet on the rights of New Jersey's special needs students and their parents begins with general suggestions on learning about the child's condition and working with school personnel. The booklet outlines conditions that are defined as handicapping and then discusses such rights as the right to a free and appropriate public education, evaluation, classification, Individualized Education Program, placement in an appropriate environment, and re-evaluation. The booklet goes on to describe parents' rights to be informed and to have a mediation conference, a due process hearing, or other appeal. Special situations are considered, such as early intervention, preschool children with disabilities, children with mild speech problems or with temporary illness or injury, eligibility for day training, children in private schools, moving to a new school district, discipline of children with disabilities, and children whose parents cannot be located. An appendix discusses the legal background for these rights, further defines disabling conditions, lists important deadlines, offers sample letters, and provides addresses of relevant New Jersey state agencies. DESCRIPTORS- Aggression; Behavioral Science Research; \*Behavior Change; \*Behavior Modification; Behavior Patterns; \*Behavior Problems; \*Communication Skills; Elementary Secondary Education; Generalization; \*Intervention; Maintenance; Outcomes of Treatment; Self Destructive Behavior; Self Injurious Behavior; \*Severe Disabilities

This paper reviews evidence of the success of behavior intervention approaches which teach students with challenging behaviors alternative functional communication behaviors. Research supporting the view that challenging behavior is a form of nonverbal communication is reviewed, noting the importance of identifying what such individuals are "saying" with their behavior problems. Functional communication training is described as providing the consequences originally maintaining the target behavior with a new more appropriate behavior. Specific interventions which used functional communication to reduce such behavior problems as aggression, self-injurious behavior, and stereotyped or self-stimulatory behaviors are reviewed. Factors affecting the initial effectiveness of functional communication training include matching responses to functions of the challenging behavior and ensuring that the appropriate behavior is more response efficient than the inappropriate behavior. Factors affecting generalizability and maintenance include response acceptability, recognizability of the communicative response, and communicative context. Recommendations for implementation stress home-school collaboration, teamwork, and development of secondary prevention strategies. Other recommendations address development of a comprehensive model of behavior, development of assessment procedures, improved use of augmentative communication strategies, and primary prevention of serious behavior problems. Elementary School Students; Elementary Secondary Education;  
\*Gifted; Instructional Effectiveness; Leadership; National  
Surveys; Secondary School Students; Self Esteem; Surveys;  
\*Teacher Attitudes; Teacher Education

The study summarized in this report was designed to explore some questions concerning the application of cooperative learning for gifted students. A survey of 301 educators belonging to either gifted education or cooperative learning associations found that the two groups held strongly differing views.

Members of the gifted education group were more likely to feel that the curriculum used in cooperative learning is often not challenging enough for gifted students, that little evaluation of cooperative learning involving gifted students has been done, and that gifted students resent being placed in the role of "junior teacher." Members of the cooperative learning group were more likely to feel that gifted students develop critical social and leadership skills in cooperative learning environments, that gifted students develop higher self-esteem by being team leaders in cooperative learning groups, and that cooperative learning is a strategy which enables teachers to educate all students. Both groups agreed that teachers need more preparation in appropriate uses of cooperative learning with gifted students and that cooperative learning strategies might be used to eliminate ability grouping. Labeling (of Persons); \*Learning Disabilities; Mainstreaming;  
\*Mild Mental Retardation; Perception; \*Student Behavior;  
\*Teacher Attitudes; Teacher Behavior

Teachers' perceptions of student behaviors were examined to explain teachers' attitudes toward their students with and without learning handicaps. The study involved 44 intermediate-grade teachers who had students with learning handicaps and nonhandicapped students in their classrooms. Teachers' attitudes were measured with a four-question survey, and their perceptions of students' behavior, achievement, and personality were obtained through use of the Teachable Pupil Survey. Results indicated that students whom teachers perceived as exhibiting less ideal student behaviors were more likely to be rejected by teachers, without regard to disabilities. Findings

DESCRIPTORS- \*Change Strategies; \*Cultural Differences; Cultural Pluralism; \*Educational Needs; Elementary Secondary Education; Ethnic Groups; Futures (of Society); \*Language Handicaps; Limited English Speaking; Minority Groups; Poverty; \*Social Values; Special Needs Students

This document examines how to meet the educational needs of children and youth from diverse cultures. Selected data and vignettes are used to provide a context for the lives of children in America. Values that currently drive the educational enterprise are listed, accompanied by a list of reformed values that address the needs of students from diverse cultural and linguistic backgrounds. A vision of society, community, and education is then presented, calling for: a society free of prejudice and bias that embraces diversity and in which each individual has intrinsic worth that is acknowledged and respected; a community that strives to achieve basic goals of equity, representation, and opportunity, where there is caring and acceptance of all individuals; and an educational system that takes a holistic approach to nurturing all students and embraces individual and cultural differences. Strategies for achieving the three visions are presented for federal, state, and local levels, in seven areas: (1) administration and policy, (2) assessment, (3) curriculum and instruction, (4) funding, (5) parents and families, (6) society and community, and (7) training and personnel. Measures of progress in each area are also identified. A bibliography lists eight references and appendixes provide a list of over 40 human resources and a list of six suggested readings. (JDD)

DESCRIPTORS- \*Adverbs; Coherence; Foreign Countries; Structural Analysis (Linguistics); \*Time; Word Recognition

IDENTIFIERS- Linguistic Markers; Text Coherence

This paper discusses clause-initial adverbials of time functioning as signals of the temporal text strategy. A chain of such markers creates cohesion and coherence by forming continuity in the text and also signals textual boundaries that occur on different hierarchic levels. The temporal text strategy is closely associated with narrative text. Temporal adverbs in unitype text is discussed and their occurrence in a corpus containing heterogeneous texts of different types is described. It is obvious that the textual functions that a chain of clause-initial adverbials of time may have in creating cohesion and coherence and in segmenting the text have the discourse-pragmatic effect of facilitating text processing. Near-prototype narratives discussed at the beginning of the paper show clear and homogeneous tendencies. A less stereotyped narrative provides the text-receiver with less expected, and hence, informationally more weighty, solutions. (JP)

IDENTIFIERS- Germany

Developing a youth apprenticeship in the United States would boost productivity, improve the preparation of youths for the skill demands of a global economy, and simultaneously offer minority youth an avenue into the economic mainstream. Germany's "dual system" of youth apprenticeship could be adopted to form a national skill-building partnership between public schools and businesses in the United States that would expand the supply of skilled workers, narrow the earnings gap between college and noncollege youth, create new incentives for youths to stay in school, and offer disadvantaged youths a realistic alternative to early parenthood and crime. One vision of a youth apprenticeship system in the United States includes five steps: (1) changing school curricula to expose students in grades 8-10 to information about various occupations; (2) offering 10th graders a choice between pursuing an apprenticeship or remaining in a purely academic track; (3) creating a 3-year apprenticeship starting in grade 11; (4) giving apprentices a comprehensive test at the end of grade 12 to ensure both job and educational proficiency; and (5) spending at least 75 percent of the third year of apprenticeship on the job while spending the remainder in either a high school or a community college. In order to help students learn mathematics skills and how to apply them, a staff development workshop for vocational tutors was held at Calderdale College (England). The workshop focused on three objectives: to identify and raise awareness of students' needs, to identify barriers to learning, and to identify ways of supporting students. Four key areas of mathematics were stressed: money, measurement, data handling, and spatial relationship. In the first half of the session, the tutors were asked to carry out four tasks: (1) to write a log of the ways in which they have encountered or used numbers in

admissions criteria, cooperative education, and student organization participation. A list of suggested instructional resources is organized under each outcome shown in the curriculum framework. Other contents include the following: facility design recommendations; information on safety, maintenance, and liability; suggested equipment list with tools and items of equipment listed under each outcome corresponding to the curriculum framework; and information on professional development (teacher technical updating and teacher standards). A Career Merit Achievement Plan (Career MAP) displays the student performance standards required by the local education agency and documents students' level of achievement. (YLB)

IDENTIFIERS- Florida

This program guide identifies primary considerations in the organization, operation, and evaluation of a life management skills program. Program content is presented first. A curriculum framework specifies the exact course title, course number, levels of instruction, major course content, laboratory activities, special notes, major course concepts, and intended outcomes. Student performance standards are a resource list of job-specific competencies. The next section includes facility design criteria, suggested equipment and supplies, and information on safety. The section on implementation considers use of the student learning guide and student organization participation. A section on professional considerations lists certification coverage for life management skills, professional organizations, and organizations providing support services. The final section lists the following instructional resources: sources of print and audiovisual materials and software; state-adopted instructional materials, 1988-94; teacher-recommended materials; and Florida Educational Information Service services. A sample student learning guide is appended. A Career Merit Achievement Plan (Career MAP) displays the student performance standards required by the local education agency and documents students' level of achievement. (YLB)

IDENTIFIERS- \*Scottish Wider Access Program

The Scottish Wider Access Program (SWAP) was designed to encourage adults to participate in higher education. Students enrolled in SWAP in 1991-92 and former SWAP students in their first year of higher education in 1991-92 were interviewed twice by telephone, near the beginning and toward the end of their SWAP course or first year. (The number of current SWAP students initially interviewed was 153, reduced through attrition to 131 for the follow-up interview; for the former SWAP students, numbers were 99 initially, reduced to 76 at the follow-up). A majority of both groups felt satisfied with their preparation for higher education. SWAP modules gave confidence by taking a step-by-step approach, but students worried that knowledge was fragmented and some modules were too easy. Continuous assessment helped students learn and build confidence. Over two-thirds saw SWAP methods as good preparation for higher education. Students praised tutors as knowledgeable, patient, and enthusiastic and welcomed study skills courses at the beginning of their programs. Over 40 percent of students cited financial problems and competing demands on time. Over 43 percent of the higher education sample experienced difficulties in understanding the subject. Students were more likely to seek help with academic problems and "admissible" personal problems. Personal problems were more likely than financial problems to affect students' work adversely. Students who failed to complete SWAP courses reported a range and variety of problems in making the transition to higher education. Most students were attracted to SWAP by the offer of a guaranteed place in higher education. (Two appendices describe the sample.) (YLB)

Differences; \*Sexual Harassment; State Surveys; \*Student

Attitudes; Teacher Attitudes; Vocational Education

IDENTIFIERS- New Jersey

One of four research projects designed to examine barriers to the entrance of women into nontraditional careers, the study summarized here examined the attitudes held by 638 New Jersey high school students, teachers, and other professionals at comprehensive and vocational-technical high schools toward sexual harassment. Study participants were asked if they considered 10 different behaviors to be sexual harassment. Female respondents were more likely to consider the behaviors to be sexual harassment than were male respondents. Age was related to the perception of sexual harassment for all behaviors except for touching and gestures: respondents aged 16-18 were consistently less likely to perceive behaviors as sexual harassment than were individuals aged 13-15 or over 18. Caucasian respondents were more likely to perceive noises, work assignments, threats to job security, conditional pay, and work hours as sexual harassment. Jokes were found to be particularly offensive to Hispanic respondents, and Asian respondents were less likely to view noises as sexual harassment. Students enrolled in traditional career preparation programs were significantly more likely to be sensitive to sexual harassment than those enrolled in nontraditional programs. Females indicated they would be much more likely to report sexual harassment in settings with a clear policy regarding sexual harassment. (Contains 13 references.) (MN)

IDENTIFIERS- New Jersey; \*Single Parents

A study examined the relationship between math anxiety and selected demographic characteristics. Surveys were administered to 1,152 students in vocational-technical and comprehensive schools in 13 New Jersey school districts. The survey instrument included an attitude scale and a brief math test designed to evoke feelings of math anxiety in respondents. The responses of single parents and students enrolled in

are designed solely to impart knowledge, are perceived by students as an "informative voice." They are separated by "asides," which offer directions and considerations but do not provide data or technical information. The alternation of learning units and "asides" provides a conversational medium through which the student interacts indirectly. Student feedback regarding the technique of simulated conversational exchange has been extremely positive. Because the technique gives the perception of a plot unfolding, it gives students the sense of direction, purpose, and integration that can so often be lacking in topic-centered distance education courses and thus helps improve distance learners' motivation to complete the course. IDENTIFIERS- \*Adult Education for the Homeless Program

In 1991, the Adult Education for the Homeless (AEH) Program consisted of projects in 31 states; a total of \$7.4 million was available to these projects. The projects provided instruction in basic and life skills, further assisted homeless adults through counseling and life planning activities, and coordinated efforts with other homeless adult-serving programs. AEH served over 34,000 adult learners, a 10,000 participant (22 percent) increase over the previous year. Although service to male students was predominant in a number of states, almost half of the learners were women. The racial/ethnic makeup of participants remained fairly constant: the largest group of learners were White, 41 percent were African American, and 11 percent were Hispanic. Services to Native Americans increased. Among the 25 states reporting student ages, those aged 25-44 represented 60 percent of learners, the age 16-24 group 29 percent, and the 45-59 age range 10 percent. Approximately 1,000 learners achieved a high school diploma, almost 2,000 made the transition from basic skills instruction to higher education and occupational training, and over 3,000 found or improved employment. Improved quality of life was indicated by participants who found housing, were removed from public assistance, developed personal education goals, or improved parenting skills. The report concludes with recommendations to local programs, state projects, and the national program. (YLB)

IDENTIFIERS- Florida

This program guide is intended for the implementation of a criminal justice technology program in Florida secondary and postsecondary schools. The program guide describes the program content and structure, provides a program description, describes jobs under the program, and includes a curriculum framework and student performance standards for criminal justice technology courses. The curriculum framework outlines major concepts and content, laboratory activities, program specifics, and intended outcomes; the student performance standards guide lists each standard and the behaviors expected to show mastery of each standard. The guide also provides information on the following: facilities, equipment and supplies, and safety; program implementation (student admission requirements, suggested teaching methods, student learning guide, and student organizations); teacher professional development and professional organizations; and instructional resources (a list of 47 books, 11 journals, an annual report, and the services of the Florida Educational Information Service). Appended to the program guide is a sample student learning guide that includes program title, intended outcome, learning activities, information sheets, self-check with answers, and a written test with answers. Education; \*High School Graduates; \*High School Students; \*Planning; Postsecondary Education; \*Student Financial Aid

This guide was written to help high school students to plan for their lives after high school, regardless of whether their interests are directed toward the work place, vocational education, or institutions of higher education. The goal of the guide is to enable students to create and organize a plan tailored to their own needs and objectives. Following a brief introductory section, the guide is divided into three major sections. The first of these focuses on career planning and includes many short surveys on a variety of topics that, when completed, can provide students with an honest assessment of their strengths and weaknesses. A section on "Career Bubbles" gives students some ideas concerning what college majors or subject area interests can lead to in the area of careers. Tips are given for presenting oneself at a job or college interview and for preparing a resume. The next major section of the guide focuses on college admission. It provides information and timeliness to help college-bound students formulate their plans. The final section on financial aid discusses the financial aid form and describes programs for grants and loans. A financial aid checklist is provided and information is given on scholarships available to students in the Bridgeport, Connecticut area where the guide was developed. Other relevant materials are included in a "final words" section. (NB)

IDENTIFIERS- \*Missouri Comprehensive Guidance Program Model

This document presents a comprehensive guidance program based on the Missouri Comprehensive Guidance Program and designed for use in a school district that services kindergarten through 12th grade. It is divided into two major sections, structural and programmatic. The structural section of the document explains the philosophy, assumptions, facilities, advisory council, resources, and budget of the program. The programmatic section is subdivided into sections for elementary, middle school, and high school levels. For each of these levels, information is provided on the guidance curriculum itself, individual planning, responsive services, system support, job descriptions, and appendixes. The guidance curriculum subsection focuses on activities for grades K-5 (elementary level), 6-8 (middle school level), and 9-12 (high school level). The individual planning sections describe advisement, assessment, and placement and follow-up for each level. Responsive services concentrates on individual counseling, small group counseling, consultation, and referral at each level. At the middle school level, the counseling services

Services

IDENTIFIERS- \*Learning Earning and Parenting Program OH

This report presents an analysis of the effectiveness of Ohio's Learning, Earning, and Parenting (LEAP) Program in encouraging school attendance by pregnant and parenting teenagers on welfare. It describes LEAP as a statewide program that provides pregnant and parenting teenagers with financial incentives to go to school. The report's eight chapters are divided among three main parts: Introduction to LEAP and Its Evaluation; LEAP Program Operations; and LEAP Program Effects. Chapter 1 includes a brief description of the LEAP program model, a discussion of LEAP's policy significance and previous research in this area, and an explanation of the research design that underlies the evaluation of LEAP. Chapter 2 discusses the analysis plan and the study's data sources, and chapter 3 describes the sample. Chapter 4 provides an overview of program implementation between 1989 and 1992, and summarizes the lessons that can be drawn from this experience. Chapter 5 assesses the operation of LEAP and chapter 6 discusses the teenagers' perceptions of LEAP and its incentive structure, drawing on data from both surveys and focus group discussions. Chapter 7 considers the program's impact on school and adult education program enrollment, relying primarily on survey data. Chapter 8 examines effects on school attendance and provides early findings on school progress and completion, using both survey and school records data. Four appendices are included which provide further information and examine technical issues related to the data used in the analysis. (Numerous figures and tables supplement the text. Contains 40 references.) (Author/NB)

PUB TYPE- Reports - Evaluative/Feasibility (142)

DESCRIPTORS- \*Counseling Techniques; \*Elementary School Students; Grade 1; Grade 2; Primary Education; Program Evaluation; \*School Counseling; \*Self Esteem; \*Young Children

This study of a school-based counseling program for primary grade children marked the third and final component of a program evaluation for students in urban, Catholic, non-public schools in Philadelphia, Pennsylvania. The study was conducted to determine the efficacy of short-term school counseling on students (N=56) in the first and second grades in 17 schools. Students were identified by their teacher and/or their parent/guardian as having difficulty with academics and/or behaving inappropriately within the classroom. The findings revealed that the counseled students made significant gains in their self-perceptions of their cognitive and physical competence. In the areas of maternal and peer acceptance, the improvements were not statistically significant. The findings suggest that students referred for counseling at Chapter 1 schools, already at risk because of adverse socioeconomic factors, do not seem to derive as great a benefit from counseling as those students from non-Chapter 1 schools, as reflected by Chapter 1 students' lower perceptions of their cognitive competence after counseling. Since no control group was studied, it is difficult to definitely determine whether counseling was the reason for the students' improved self-

DESCRIPTORS- \*Adolescent Development; Adolescents; Elementary School Students; Elementary School Teachers; Family Relationship; Intermediate Grades; Peer Relationship; Preadolescents; Secondary Education; Secondary School Students; Secondary School Teachers; \*Teacher Attitudes

IDENTIFIERS- Morristown School District VT

This study was conducted to identify the kinds of student issues involving growing up and adolescent development that teachers deal with most often. A survey on adolescent development issues was administered to 37 school teachers, administrators and other personnel involved with students in grades 5 through 12 in the Morristown, Vermont school district. The findings suggest that family and peer relationships seem to be at the root of most of the challenges reported. It appears that problems and challenges ranked below family and peer issues (substance abuse, identity development, self-esteem) are linked to, if not the direct result of, one or both of those two primary concerns. Sixty-two percent of respondents reported that between 25% and 50% of their students experienced more stable environments at school than they did at home. Five open-ended questions on the school's role in responding to adolescent development issues were included in the survey. This report contains the transcribed answers to those questions as they were written on the surveys. (NB)

The purpose of this study was to identify the factors which may influence the decision to seek employment after retirement from one's primary occupation, and to determine if these factors are similar for males and females. Data were collected from 540 western land grant university employees from ages 40-65 who were employed in positions ranging from ground maintenance workers to upper administration. Cases containing missing data were deleted from the analysis which resulted in a sample size of 331 respondents; 217 males and 114 females. Median income range of the respondents was \$35,000-\$40,000. Respondents were asked about their attitude toward retirement, current health status, health status of spouse, number of children they were supporting, and number and sources of retirement income they expected. Stepwise regression analysis was done to select the set of variables that best predicted post-retirement

DESCRIPTORS- \*College Freshmen; Computer Assisted Instruction; Higher Education; Instructional Effectiveness; Program Effectiveness; \*Reading Comprehension; Reading Improvement; Reading Research; \*Remedial Reading; \*School Holding Power

IDENTIFIERS- \*Indiana Wesleyan University

A study investigated the growth in reading comprehension of students successfully completing a college developmental reading course, and the retention of students taking (and not taking) the reading course. Subjects, 197 first-time freshmen who entered Indiana Wesleyan University during 1989-90 and the 1990-91 school years, were divided into a treatment group of 88 students who were required to enroll in a developmental reading course (using computer-assisted instruction) based on their entrance scores on the Nelson-Denny Reading Test, and 109 students whose scores were slightly higher and who were not required to enroll in the course. Of 39 surveys sent to students who completed the course and were still on campus during the spring semester 1993, 38% were returned. Results indicated that: (1) the average growth in reading comprehension for students who completed the course in 1989-90 was 4 years and almost 3 years for students in 1990-91; (2) retention rates for students who completed the course in 1989-90 was 59%, while retention rates for students who did not take the course was 35%; (3) retention rates for students who completed the course in 1990-91 was 65%, while retention rates for students who did not take the course was 36%; and (4) the overwhelming majority of the students who completed the survey said the reading course gave adequate preparation for reading assignments in other courses. Findings suggest that reading comprehension of underprepared freshman can be increased, computer-assisted instruction is effective, and such instruction can aid in university retention. (Four tables of data and the survey instrument are included; a list of 5 computer software packages is attached.) (RS)

IDENTIFIERS- \*Professional Concerns; \*Syracuse University NY; Writing Contexts

This paper presents a proposal for "Perspectives on Professional Knowledge," a course designed to introduce junior-level Syracuse University students to rhetorical and linguistic concepts as tools for the examination of professional knowledge and professional education. The paper briefly describes the course and discusses the relationship of the proposed course to Syracuse's current junior- and senior-level writing courses. The paper then discusses the rationale for the course, noting that the new course will provide an opportunity to develop teaching methods that focus on the specialized problems of literacy in undergraduate professional education. The paper includes an example of a mechanical engineering student who demonstrates the need to read professional literature from a rhetorical perspective. The paper concludes with curricular design principles for the proposed course and a discussion of problems of implementation. (RS)

DESCRIPTORS- \*Budgets; College English; \*College Faculty; Educational Finance; \*English Departments; Higher Education; \*Retrenchment; \*Teaching Assistants; Writing Instruction

IDENTIFIERS- Faculty Attitudes; \*University of Georgia

When budget cuts affected the English department at the University of Georgia in 1991, the writing program was never cut sharply but did suffer in three important ways: class sizes in the freshman program went up, the department replaced full-time with part-time faculty, and a new assistant professor of rhetoric was not hired. Now most freshman courses in English are taught by teaching assistants and some part-time instructors. The junior-level and graduate level writing courses are stretched because of lack of adequate faculty. The biggest change due to the recession is that teachers now must have more students per class. Despite attempts by the administration to manipulate the given situations, class size in freshman English crept up from 17 to 18 to 19, ending finally at 22, although the Dean tried to push it to 25. The recession changed the way part-time faculty were hired and retained, and also caused the university to impose a hiring

DESCRIPTORS- Discovery Learning; Elementary Secondary Education; Fused Curriculum; Higher Education; \*Humanities Instruction; \*Integrated Activities; \*Interdisciplinary Approach; Language Arts; Language Role; \*Science Instruction; \*Writing Instruction

IDENTIFIERS- Knowledge Acquisition

This book probes the possibilities of interdisciplinary learning and integrated curriculum through the structuring and expressive powers of language. The 15 essays in the book explore the issues of bridging the gap between the two cultures of science and humanities, demystifying science for learners, teaching students to construct and explain their own knowledge, integrating science and humanities with society, and creating a language base for learning. After a prologue entitled "Little Children Lead the Way" (Adrian Peetoom), essays in the book are: "Making Things Visible" (Karen Gallas); "Integrating Language Arts and Math in the Primary Curriculum" (Jane Moore and others); "Talking about Babies and Ice Cubes: What Children and Teachers Do with Ideas and Language" (Mary H. Maguire and Lila F. Wolfe); "Creating Stories about Science through Art, Literature, and Drama" (Linda Prentice and Patricia Tefft Cousin); "When Decades Collide: An Interdisciplinary Approach to Research and Technology" (Kathy Mathers); "Students and Their Teachers Talking in the Middle School Science Classroom: What Does Their Discourse Mean?" (Pamela Sissi Carroll and Alejandro J. Gallard); "Science and Society: Escape to the Real World" (Betty Carvellas and others); "Bridging the Gap between 'The Two Cultures'" (Erica Jacobs); "From Tourist to Storyteller: Reading and Writing Science" (Dawn Abt-Perkins and Gian Pagnucci); "Teaching on the Frontier: Language and Science" (David E. Goodney and Carol S. Long); "Spiders, Fireflies, and the Glow of Popular Science" (Roy F. Fox); "When

College composition instructors have the opportunity to take a step toward meeting the needs of a pluralistic society by defining a developmental writing curriculum that incorporates the same strategies that characterize the mainstream writing classroom. The "cognitive deficiency model" that characterizes most instruction in developmental writing classrooms arose out of the experience of high attrition rates following the influx of unprepared minority students and working class students in the 1960s. Ironically, the model emerged not only as higher education was becoming more pluralistic but also as scholars were advocating a shift from a product-oriented, bottom-up model of composition instruction to a process-oriented, top-down model. Beginning in earnest in the mid 1970s, a wave of non-European immigration has increased markedly the number of nonnative English-speaking students in composition classes. Although their language skills are not equal to those of native speakers, most of these English-as-a-Second-Language (ESL) students cannot be classified as limited English proficient. Once in developmental writing classes, they face obstacles related to the cognitive deficiency model and a pedagogy that focuses on subskills rather than writing. Directors of composition programs must provide the stimulus to modify existing curricula and methods. Teachers need to devise and implement a standardized curriculum that is congruent with the theoretical approach the director sets for the program, a standardized curriculum that emphasizes the fundamental similarities among students striving to become better writers. IDENTIFIERS- Nonnative Speakers

When English-as-a-Second-Language (ESL) students were few and far between at college, they were absorbed into regular Freshman English courses designed for, and dominated by native speakers. However, it appears that ESL students are best served by placing them in classes specially designed for their needs, rather than mainstreaming them or placing them in basic writing classes. Despite more than a decade of research on ESL writing which points to the disadvantages of mainstreaming, it still appears to be the most common placement option. ESL and basic writers share certain characteristics; however, ESL writers often are fluent writers in their first languages and academically superior students. ESL students and basic writers also differ in their learning strategies. ESL students placed in basic writing courses might infer that they are being penalized for being culturally and/or linguistically different.

\*Language Aptitude; \*Language Research; \*Sex Differences; \*Sex Role; \*Sex Stereotypes; Total Communication  
IDENTIFIERS- Gender (Language)

To examine the link between deaf children's language abilities and their knowledge of, attitudes toward, and self-endorsements of cultural gender stereotypes, 46 deaf children between the ages of 5 and 12 years were given measures of gender-related attitudes, knowledge, and self-interests. Teachers were asked to rate children's ability with signed and oral communication and their relative reliance on the two systems. Results showed that deaf children are highly knowledgeable regarding cultural gender stereotypes from an early age and that this knowledge is independent of language ability. Findings also suggest that gender-related attitudes develop independently of language ability. Language ability is, however, related to deaf children's gender-related self-endorsements, in that those children rated as having lower language abilities were more likely to endorse masculine occupations and activities. Further research should explore the possibility that linguistic ability is important in the dissolution of stereotypes, and should consider the relative contributions of verbal and nonverbal sources to gender stereotypes. IDENTIFIERS- \*Austin Independent School District TX; \*Priority  
Schools

In spring 1987, the Austin School Board approved the current student assignment plan that returned most elementary students to neighborhood schools and created 16 predominantly minority schools with most students from low-income families. A 5-year plan implemented in each of the 16 schools contained the following components: full-day prekindergarten; a lowered pupil-teacher ratio at all grade levels; innovative funds; extra support staff; extra central-office support; and extensive first-year staff development. Findings indicate that the Priority Schools program created extensive changes in the 16 elementary schools. Each school has achieved success or is moving toward success in one or more areas. Although all schools demonstrated improvement, most have not demonstrated enough. None showed consistent achievement at the district average level. Thirteen schools utilized Chapter 1 improvement plans and five were unable to continue because their gains were not strong enough. The Priority Schools program is not a quick fix and is different for each school. Six figures and statistics summarizing priority schools' achievement are included. (LMI)

IDENTIFIERS- \*Austin Independent School District TX

This paper describes the first-year results of Distributive Information Systems for Campuses (DISC), a project implemented in the Austin Independent School District (Texas). The goal was to increase the data access and information-generating capabilities of campuses by decentralizing data manipulation functions, while maintaining centralized data processing of major applications. A second project goal was to redesign student, school, and district profiles by consolidating reports into a single, comprehensive report, creating a permanent, online data file. Major outcomes include: (1) design and creation of a new school profile; (2) resolution of a number of issues involving the creation of a large data file and printing a profile report; (3) implementation of an individual student

improve the leadership of superintendents who are engaged in school restructuring and school-based management efforts. SBIP has four major components: a colloquium series; support groups; peer coaching programs; and onsite leadership laboratories. This document highlights the presentations and workshops delivered during 1991-92 colloquium series, which engaged participants in large- and small-group sessions and roundtable interactions. Major themes of the colloquium included: (1) leadership and professionalism; (2) differentiating leadership and management; (3) self-management and leadership; and (4) curriculum reform and the implications for superintendents. The appendix lists advisory committee members. (LMI)

IDENTIFIERS- \*Texas

In 1981, Texas embarked on a 10-year period of educational reform. This report presents findings of a policy research project that documented and analyzed these reforms to serve as a guide for future policy developments. Following the introduction, chapter 2, entitled "Student Reforms," addresses issues of curriculum, assessment and dropout reduction. Chapter 3, on "Teacher Reforms," describes initiatives passed to improve teacher quality and to attract and retain good teachers. Topics discussed in the fourth chapter, concerning governance and accountability reforms, include decentralizing the decision making process, establishing statewide goals and standards, and accrediting school districts (with suitable awards and incentives). are discussed in the fourth chapter. The concluding chapter summarizes the school finance reforms of the past decade and considers the dilemma of how to improve financial equity. Four tables are included. The appendix contains a summary of state educational reform legislation. (Contains 117 notes.) (LMI)

IDENTIFIERS- \*Texas

In 1981, the Texas Legislature established a systematic structure for the development and implementation of a state curriculum for Texas public schools. This biennial report outlines the state's responses to curriculum-related legislation issues from fall 1990 to fall 1992. The introduction offers a historical review of state legislation that begins with House Bill 246 of the 67th Legislature and includes bills passed by the 72nd Legislature. The second section discusses activities related to the various components of the state curriculum during the years 1991 and 1992. Modifications in the required essential elements of instruction are explained as well as other changes to the State Board of Education rules. Also addressed are changes in the textbook-adoption process and the state's student assessment program. The concluding section makes the point that curriculum success depends on providing inservice teacher training and adequate textbook funding. A civil rights compliance statement is included. (LMI)

Practical information for parents of children with learning disabilities (LD) is presented in a workbook format. Guidelines for effective parenting of LD children are interspersed between checklists and other forms for record keeping, observations, and planning. After a chapter outlining the basic facts about learning disabilities, a chapter is devoted to coping techniques for parents, including discussion of support groups and advocacy. The next chapter is titled "Helping Your Child at Home" and covers self-esteem, extracurricular activities, family involvement, discipline, and interpersonal relationships. A chapter on the LD student at school discusses educational diagnosis, placement, special education and the parents' role. The last section focuses on long-term planning, including vocational guidance, higher education options, and social lives of young LD adults. Appendices list support groups, agencies and other resources, while also providing forms for use in Individualized, Education Program and due process planning. Several glossaries are included; contains 53 selected references. (PB)

DESCRIPTORS- \*Child Rearing; College Bound Students; College Preparation; \*Creative Development; Educational Practices; Elementary Secondary Education; Emotional Development; Higher Education; \*Interpersonal Competence; \*Learning Disabilities; Personal Narratives; \*Social Development; \*Student Development

This 1993 edition offers 23 papers on various aspects of learning disabilities, presented in four sections on: (1) social and emotional dimensions of learning disabilities, (2) creative environments for students with learning disabilities, (3) thoughts for parents, and (4) thinking about college. Articles include, among others: "Building Strength through Diversity: Success through Adversity" (Kristen Lidke Finn); "Living with a Learning Disability--Stress and the Learning Disabled" (Helen Ginandes Weiss and Martin S. Weiss); "Improving the Social Competence of Students with Learning Disabilities" (Pam Campbell and Gary N. Siperstein); "Learning Disabled Adolescents and Motivation" (Anthony K. Van Reusen); "School Lives--Social Lives: A School Counselor Speaks" (Mark Rappaport); "Project Apple: A Unique Collaboration Results in Teacher Training That Makes a Difference" (Lenox Reed); "The Inclusive Classroom: Making a Difference" (Michele C. Tamaren); "The Community Service Program at Windward School" (Joan Metsch); "The Dyslexic Learner" (Caroline Janover); "It Is Not a Miracle" (Miriam L. Gerstenblith); "My Brother, My Friend"

considered, followed by a discussion of general practices for communication intervention which stress a functional approach linking assessment and intervention and a multimodal delivery form. Means of facilitating communicative development include creating an optimal communication environment, using the team approach effectively, developing augmentative communication modes, and using compensatory teaching approaches and prompting techniques that bypass the sensory impairment. Recommendations address collaboration between organizations, increasing the number of potential communicative partners, early intervention, utilization of technological advances, and personnel preparation and inservice training. The paper concludes with a list of 52 references and related resources including 20 related articles, 5 assessment tools, 15 monographs and books, 9 video training tapes, 6 organizations, and 8 technological aids. IDENTIFIERS- Massachusetts (Boston)

This report summarizes the results of a 3-year project in the metropolitan Boston (Massachusetts) area designed to demonstrate job placement and support for individuals with multiple disabilities that include severe physical disabilities and mental retardation. The report summarizes project outcomes, the cost and range of supports that participants received, and issues in the design and implementation of supports for individuals with multiple disabilities. The project placed 11 individuals in 14 jobs, based on a model that emphasizes career planning, job creation, and a broad approach to job site training and support that includes job accommodation and flexible use of a variety of sources of support. The greatest limitation in project implementation was the ability to identify a sufficient number of jobs in a timely way. Appendixes comprise the bulk of the report and contain participant demographic and employment data, a 10-page vocational profile form, a procedure manual for job creation and job restructuring, and a procedure manual for placement planning. IDENTIFIERS- Nordwrite Project; Norway

This article presents two developmental studies of discourse patterns in student writing. Results from two projects are presented: (1) the NORDWRITE project (1986-1989; Norwegian argumentative material from grades eight and nine) and (2) a comparison of argumentative writing in grades eight and nine with foreign language argumentative writing at the same grade levels. Within a hierarchical discourse framework, it is argued that the theory of grounding may be used to develop functional interpretations of formal developments. The two studies suggest that the essential writing development at secondary educational levels may be characterized by emerging discourse structures at low superstructural levels. Findings also suggest that patterns of development are similar in first- and foreign-language writing. (Author/JP)

IDENTIFIERS- \*Referential Communication; \*Referents (Linguistics)

This article discusses the system of reference as one of the linguistic systems operating in English texts. It introduces reference systems as systems that code cohesive dependency relationships between entities in texts. References in texts are treated as ways of introducing and keeping track of text participants. The cohesive operation of referential systems and their realizations are exemplified in academic texts. Native writers rarely have difficulties in realizing referential choices, but non-native learners of English often do not fully comprehend the functions of reference items in texts; their use of such reference items as articles is not systematic and may lead to misunderstandings and obscure the intended meanings. The article offers some explanations of the problems

IDENTIFIERS- Audiographics; \*Australia (Victoria)

A study examined flexible delivery modes that could be used to provide adult literacy and basic education (ALBE) to students in rural areas of Victoria, Australia. Telephone interviews were conducted with 29 students and 20 tutors and administrators involved in community-based programs, the 3CCC Airwaves Learning radio program, and off-campus tutoring arrangements. Factors identified as barriers to delivery of ALBE to students in rural areas included the following: limited program funding, lack of infrastructure to support innovative provision, difficulty of predicting student numbers in advance, and lack of advocacy from ALBE students. Flexible modes of delivery, especially audioconferencing (teleconferencing) and audiographics, were deemed effective in ensuring equal access to group provision and its benefits for students isolated due to distance or social/economic factors. A cost analysis established that audioconferencing programs giving students access to group tuition are a costly program delivery mode; however, the alternative is the absence of group provision. Minimizing the number of delivery sites and increasing the number of students at each site were recommended as strategies for reducing costs. The student and tutor interview questions are appended along with 1991 ALBE statistics and a case study of an ALBE audiographic conferencing numeracy class. Contains 20 references. (MN)

This nine-chapter monograph deals with the purpose and context of basic education, starting with the basic learning needs that education must meet. Chapter 1 focuses on the rationale for education for all. Chapter 2 explores the interplay between the educational process and culture, including the complex issues associated with language. Chapter 3 considers the implications of new and broader concepts of literacy in designing strategies to reach adult learners. The impact of scientific discovery and technological change on learning needs and on the content and processes of basic education to meet those needs are examined in Chapter 4. Chapter 5 takes a closer look at the relationship of education and training to economic and social development including the world of work. Chapters 6, 7, and 8 focus on three major educational components that can affect the quality of life and that deserve space in basic education programs: environmental education, population education, and health education. The final chapter draws attention to some of the main questions that will have to be addressed in the areas of cultural maintenance and development, language policy, achieving adult literacy, preparation for life in an increasingly technological world, and quality of life. The World Declaration on Education for All is appended. (YLB)

This seven-chapter monograph elaborates on five components of an expanded vision of basic education. It presents material that deals with aspects of these components: universalizing access and promoting equity, focusing on learning, broadening the means and scope of basic education, enhancing the environment for learning, and strengthening partnerships. Chapter 1 gives an overview of the expanded vision. Chapter 2 focuses on four areas concerning the education of women and girls: advantages of ensuring that they do receive their fair share of education; the gender gap and the reasons why it exists; gender, literacy, and cultural differences; and efforts to overcome the problems. Chapter 3 deals with two interrelated means of enhancing the environment for learning: early childhood care and education and health and nutrition in education. Chapter 4 presents strategies and measures to improve the quality of primary education and enhance learning achievement of pupils. Chapter 5 discusses two other delivery systems: nonformal education and distance education. Chapter 6 focuses on participation and communication at grassroots level as well as the potential role

nontraditional career preparation programs were compared to those of childless students enrolled in comprehensive high schools. The single parents and students enrolled in nontraditional programs expressed higher levels of math anxiety than did their childless counterparts enrolled in traditional career preparation programs. Level of math anxiety was significantly related to the following variables: age, parental status, marital status, race, income level, mother's occupation, and previous mathematics courses taken. Female students did not have higher levels of math anxiety than males until the late junior high school/early high school period, at which time females begin exhibiting more math anxiety than their male counterparts. Students whose mothers were not employed outside the home exhibited the lowest levels of math anxiety, thus confirming the importance of home participation and support to success in mathematics. (Twelve tables and the survey questionnaire are included. Contains 11 references.) (MN)

IDENTIFIERS- New Jersey

One of four research projects designed to examine barriers to the entrance of women into the workforce, the study described in this bulletin examined the feelings of math in students in single parent and nontraditional career preparation programs in relation to selected demographic characteristics. Survey instruments consisting of a brief math test (to evoke feelings of math anxiety in students prone to them) and an attitude scale were administered to 1,152 students in vocational-technical and comprehensive schools in 12 New Jersey school districts. At age 12, males felt slightly more math anxiety than females did. By age 14, however, females were more anxious about math than males were. The feelings of math anxiety expressed by females were consistently higher than those of males until age 19. As they aged, students of both sexes became significantly less anxious about their math abilities. Males in the African-American, Hispanic, Asian, and Native American groups exhibited high levels of math anxiety, as did females in the African-American and Hispanic groups. Math anxiety was significantly lower among students of both sexes who had completed college preparatory mathematics, algebra (I and II), and geometry. Actions recommended for confronting math anxiety included asking math instructors to conduct a self-assessment of gender and ethnicity disparities in the classroom, starting a math club for females, and learning the visualization technique of anchoring. IDENTIFIERS- \*Adult Education for the Homeless Program

As in the first year of the Adult Education for the Homeless (AEH) Program, a majority of second- and third-year projects tended to focus on either delivery of services in urban areas or on a statewide approach. A few states continued an approach that resulted in service primarily to women. The number of homeless adults served in year 2 increased 60 percent over year 1 but then declined in year 3 for two reasons: some "high number" states did not receive year 3 funds and projects using year 3 funds placed priority on program quality over numbers served. The largest number served were between the ages of 25-44 and were males, although females predominated in eight states in the third year. The single largest population served continued to be white. Of a total staff of 2,000 in year 2, 50 percent were volunteers. For year 3, 57 percent of the total staff of 1,370 were volunteers. Barriers to success in both years included the following: participants who left a shelter or moved away from the program area, shelter limitations, existential factors, and program limitations. Program elements that promoted success were additional funding sources, coordinated services, and program locations. Instructional elements that promoted success included life planning, family literacy, stress management, and mastery of instruction in small, self-contained units. Recommendations were made for improvement in the areas of instructional program, staff training, evaluation, and program support. (YLB)

IDENTIFIERS- Congress 103rd; \*Veterans Outreach Education Program

This document records the oral and written testimony of representatives of veterans' groups and of the Department of Veterans Affairs at a congressional hearing on H.R. 996, the Veterans Education Outreach Program. That bill would continue funding for the program, which helps recruit veterans to receive the college education to which they are entitled and pays colleges \$100 for each eligible veteran that the colleges recruit. The testimony was highly supportive of the program and favored increasing the number of colleges that have recruiting offices for veterans, funded through this program. The document also contains the text of the bill, statements from the Paralyzed Veterans of America and the Blinded Veterans Association, and questions and answers of witnesses. (KC)

This program guide is intended for the implementation of a dental assisting program in Florida secondary and postsecondary schools. The program guide describes the program content and structure, provides a program description, describes jobs under the program, and includes a curriculum framework and student performance standards for dental assisting courses. The curriculum framework outlines major concepts and content, laboratory activities, program specifics, and intended outcomes; the student performance standards guide lists each standard and the behaviors expected to show mastery of each standard. The guide also provides a test item bank and information on the following: facilities, equipment and supplies, and safety; program implementation (accreditation, student admission requirements, student learning guide, and student organizations) teacher professional development and professional organizations; and instructional resources (a list of 20 print materials, 20 reports in the ERIC database, 9 audiovisual aids, 2 journals, 10 publishers, and the Florida Educational Information Service with a list of its services). Appended to the program guide is a sample student learning guide that includes program title, intended outcome, learning activities, information sheets, self-check with answers, written test with answers, and a performance test. IDENTIFIERS- Florida

This program guide is intended for the implementation of a dental hygiene program in Florida secondary and postsecondary schools.

The program guide describes the program content and structure,

provides a program description, describes jobs under the

program, and includes a curriculum framework and student

performance standards for dental hygienist courses. The

curriculum framework outlines major concepts and content,

laboratory activities, program specifics, and intended

outcomes; the student performance standards guide lists each

standard and the behaviors expected to show mastery of each

standard. The guide also provides a test item bank and

information on the following: facilities, equipment and

supplies, and safety; program implementation (accreditation,

student admission requirements, student learning guide, and

student organizations); teacher professional development and

professional organizations; and instructional resources (a list

of 150 print materials, 7 reports in the ERIC database, 5

audiovisual aids, 7 journal articles, and the Florida

Educational Information Service with a list of its services.)

Appended to the program guide is a sample student learning

center on issues of suicide and tragic events. At the high school level, a section on crisis counseling is added, along with a section on information. The system support sections focus on management activities, consultation, community outreach, and public relations. The job description sections provide a job outline and evaluations. Each school level section concludes with appended materials appropriate for that section. (NB)

While most of the existing literature on attribution retraining focuses on children's attributions for academic or achievement related tasks, teachers' attribution styles also are an important target for modification. This study was conducted to investigate the effectiveness of a 1-day training workshop designed to significantly alter teachers' attribution styles toward greater optimistic patterns. Fifty-two teachers participated in the 1-day attribution retraining workshops. Retraining methods were lecture, modeling, and role play. Attribution styles were assessed with pretest and posttest administrations of the Attribution Style Questionnaire (ASQ) and the Teacher Attributions for Academic Performance Scale (TAAPS). Following workshop participation, ASQ composite negative scores were significantly decreased and positive scores were significantly increased ( $p .005$  and  $p .01$ , respectively). These changes reflected increased levels of optimism on the part of workshop participants. No meaningful changes in scores were observed on the TAAPS. Weak, but statistically significant correlations ( $p .05$ ) were found for posttest composite ASQ scores with TAAPS composite internal scores. The changes in ASQ scores were in the hypothesized direction and reflected enhancement of attribution styles thought to facilitate student motivation and achievement. (Author/NB)

IDENTIFIERS- \*Rhode Island

This document presents a training manual to help caregivers who provide care to older family members and friends at home. The program, which offers a practical approach to caregiving and a realistic view of the aging process, is intended to clarify the problems confronting caregivers of older people, serve as a basic source manual for training current and future caregivers of older people, and provide resource information that can be continually changed and updated to meet the needs of caregivers throughout Rhode Island. Designed to be used as part of a group teaching format, this manual is divided into five parts which can be presented in five 4-hour sessions. Included is the basic information needed to conduct each session, as well as group exercises and questions for discussion. Part I provides an introduction to aging and caregiving. Part II focuses on communication. Part III looks at the emotional and psychological aspects of aging and caring, including reactions to change and loss, and talking about death. Part IV discusses physical and medical concerns, normal aging, how an older person should be evaluated, functional abilities, and common medical problems (memory loss/confusion, falls, incontinence, and managing medications). Part V suggests techniques for coping with caregiving. A personal care guide and a variety of handouts for caregivers are appended. (NB)

IDENTIFIERS- Alternative Assessment

Intended for teachers from kindergarten through adult education and for administrators, this book demonstrates how teachers have created environments that facilitate whole language evaluation. Articles in the book discuss strategies used in evaluating students' growth across many curricular areas, including reading, writing, and second language growth, and suggest alternatives to standardized tests in mainstream, resource, and special education programs. Articles in the book are: "Evaluation of Students: Evaluation of Teachers" (Yetta M. Goodman); "The Art of Teaching: Evaluation and Revision" (Lois Bridges Bird); "'If the Teacher Comes Over, Pretend It's a Telescope!'" (Wendy J. Hood); "Evaluation in a Classroom Environment Designed for Whole Language" (Robert Wortman and Myna Matlin Haussler) "'Asi No Se Pone Si' (That's Not How You Write 'Si')" (Rene Galindo); "Whole Language, Texas Style"

freeze. This freeze caused the English department, which lost 8 professors out of 47 due to professors retiring or taking jobs elsewhere, to be hard hit. While that situation has seen some improvement, class sizes and fewer part-time instructors are difficult problems that are not going away, since it may be 3 more years before funding returns to pre-recession levels. IDENTIFIERS- \*Des Moines Public Schools IA

The Language Arts Supervisor of the Des Moines, Iowa Independent Community School District is responsible for supervising and coordinating all aspects of the middle and high school language arts program. Aspects of the program include curriculum development, instructional material selection and implementation, staff development, evaluation, and human resources. The primary budget expense is \$5,880,574 for the salaries and benefits of 143 language arts teachers. The major influence of technology in language arts is in how the word processor can be used to better teach the writing process and in how computers have revolutionized high school journalism. Language arts is taught to all students in a variety of ways so that all of these students are expected to learn and can learn. Increasing numbers of students are doing well on the district objectives-based tests, the composition tests, and the national tests. A community survey conducted in 1990 continues to show the importance the community places upon language arts. The number of students winning awards in language arts--English, drama, forensics, journalism, and speech--continues to grow. The need for computer stations in the classrooms remains the top priority for the future. "Vision 2005" offers Des Moines the challenge of becoming a nationally recognized 21st century school district. (Numerous tables and graphs of data are included.) (Author/RS)

DESCRIPTORS- \*English Instruction; Higher Education; High Schools; Literature Appreciation; \*Reader Response; Student Reaction; Student Writing Models; Writing Research

IDENTIFIERS- Aesthetic Reading; English Teachers; Student Empowerment

Using an approach developed and refined over a combined 44 years of teaching, this book encourages literature teachers at the high school and college levels to empower their students as readers--and meaning-makers--of literature. The book presents results of a research study in which 288 students, ranging from junior high school to graduate school, responded in writing to the same 18-line poem. After an introductory section, the second section of the book presents in full the writings on the poem prepared by a dozen of these students and then examines the students' different approaches to accounting for the general situation of the poem, the particular situation, and the various voices that the students heard in the poem. The third section discusses what disempowers meaning making, what empowers meaning making and how teachers might empower readers in their classrooms. A concluding section presents continuing reflections. (RS)

DESCRIPTORS- Adolescents; Children; Elementary Secondary Education; Interviews; \*Personal Narratives; \*Poetry; \*Poets; Reader Text Relationship; Writing (Composition); \*Writing Processes

IDENTIFIERS- Author Reader Relationship; Author Text Relationship; \*Writing for Children

Presenting informal interviews, this book opens a window into the writing processes, influences, work habits, and personal backgrounds of 16 poets who write for children and young adults. The interviews in the book provide not only critical discussions of poetry but also ideas about how teachers can help children understand poetry and enjoy writing their own. The poets interviewed in the book share the common belief that poetry for children should be fun, exciting, magical--and the poets disclose widely varied means of achieving this end. Poets interviewed in the book are: Arnold Adoff, Lilian Moore, Mel

Special classes for ESL students are offered at many larger campuses, but there are a number of reasons for not having such classes: (1) lack of sufficient ESL students to justify special classes; (2) special classes may be seen as remedial; (3) special classes could be seen as a form of segregation; and (4) problems in creating a new program. With the help of ESL specialists, English departments should be able to begin special classes for ESL students. Research of the effect of special ESL classes indicates that teachers and students were enthusiastic about the classes. Special classes in Freshman English will provide a sheltered environment for ESL students, allowing them to develop a sense of community with their peers. (Contains 16 references.) (RS)

IDENTIFIERS- \*Austin Independent School District TX

Findings of a study that examined the relationship between school climate and student persistence are presented in this paper. Two surveys were administered to teachers and students at 10 Austin, Texas, high schools. Three factors of school climate were investigated--teachers as professionals, goals for student learning, and school discipline and management. Findings indicate that schools with positive climates had higher achievement and lower dropout rates. The school climate variables most significantly related to student achievement were teacher expectations for student success and teachers' instructional goals. The findings support the idea that school climate is an important variable in school improvement. Two tables and five figures are included. The appendix contains school-climate survey items by factor. Five figures and two tables are included. (LMI)

priority areas set forth in the provincial action plan, "Vision for the Nineties," is described. The ratings were based on the collective judgment of senior Alberta education managers. Information is presented on curriculum; student persistence; education for immigrant, Native children, and disabled children; science achievement; excellence in teaching and schools; equal opportunity; and educational partnerships. Findings indicate that Alberta has a solid education system, but that it can and must be improved. Overall, the system receives a B-, the same rating it received in 1991. Progress is demonstrated by improved student persistence, improved science programs and science achievement, and the growth of partnerships. On the less positive side, Alberta schools have experienced increasing inequities among school jurisdictions, a slight decline in students' basic skills, and concern over mathematics achievement. A contact list for additional information, 22 tables, and 52 figures are included. (Contains 40 references.) (LMI)

DESCRIPTORS- Administrator Effectiveness; Administrator Responsibility; \*Administrator Role; Elementary Secondary Education; \*Leadership; \*School Based Management; \*School Restructuring; \*Superintendents

IDENTIFIERS- \*Massachusetts

This booklet documents the 1990 colloquium for Massachusetts superintendents, Leading the Way. The colloquium program is one of several initiatives of the School-Based Improvement Project (SBIP), which is a partnership between the Massachusetts Association of School Superintendents and the Office of Community Education of the Massachusetts Department of Education. The project seeks to build a professional-development support network among central-office administrators who are involved in school-based management. In the keynote address, "The Paradoxes of Decentralization," Jerome Murphy suggests that we need new images of leadership, that superintendents should promote the common good and utilize management by exception, and that the central office should play a supportive role. The four colloquia sessions address the following issues--communication, decision making, finances, and accountability. Discussion at each colloquium affirmed the centrality of superintendents' leadership in setting the tone for restructuring, providing support for increased creativity and responsibility, and ensuring educational improvement at the school building level. A list of presenters is included. (LMI)

\*Educational Assessment; Educational Improvement; \*Educational Objectives; Educational Policy; Elementary Secondary Education; Federal Regulation; Minimum Competencies; \*Performance; \*Standards

Issues in the debate over national education standards for content and performance are examined in this journal issue. Interviews with three individuals in different areas of education were held, and each is described in narrative style by Anne Turnbaugh Lockridge. The first is with Linda Darling-Hammond, director of the National Center for Restructuring Education, Schools, and Training. She points to other initiatives for improving student achievement, such as equalized school financing and the provision of resources for teacher recruitment and education. In the second interview, Deborah Meier, the principal and co-founder of the Central Park Elementary Schools in New York City, expresses opposition to the standardization of standards. She argues for the "habits of mind" as developed in her schools, and draws from her own years in public education to illustrate her points. The third interview is with William Fernekes, a teacher and department chair at a Flemington, New Jersey, high school, who is currently involved in writing standards for the social studies. He distinguishes his viewpoint on national standards from that of the National Council for the Social Studies (NCSS) and identifies future implementation problems and necessary resources. Finally, a commentary by retiring National Center for Effective Schools (NCES) Director Richard A. Rossmiller points to the importance of effective money management and equity for effective schools. DESCRIPTORS- Academic Persistence; \*Academic Standards; \*At Risk Persons; \*Dropout Rate; Educational Change; Educational Policy; Graduation Requirements; \*High Risk Students; High Schools; High School Students; \*State Standards

IDENTIFIERS- \*Texas

This report presents findings from the 3rd year of a 4-year study of the impact of educational reform on at-risk students in Texas. Specifically, the study examined the effect of four reforms on at-risk students--the attendance policy, the no pass/no play rule, the driver's license law, and the TEAMS/TAAS (Texas Educational Assessment of Minimum Skills/Texas Assessment of Academic Skills) exit-level examination. Methodology involved three components: a longitudinal study of 9th- and 10th-grade at-risk students in 50 school districts; a case study of 8 high schools; and a statewide survey of all high school principals, which elicited an 81 percent return rate. Findings suggest that the four policies do not increase academic achievement or graduation rates, which are the two purposes for implementing the reforms. First, the policies fail to touch many of the students defined as at risk using TEA criteria; and second, they do not influence many unidentified at-risk students who experienced difficulties. Specific policies are perceived to have little impact on regular students, but are viewed as having a neutral or negative impact

projects for 1993. Based on self-reports, programs identified their strengths, some of which include effective student learning components, individualized volunteer service, community involvement, volunteer empowerment, staff commitment, and public recognition. Improvement is needed in the following areas: use of advisory committees; volunteer recruitment; staff reflection; staff/volunteer training; and interagency coordination. It is recommended that evaluators develop clear, operational definitions of terms and work more closely with programs in refining their service learning elements. Two tables and two figures are included. Appendices contain program descriptions, evaluation directions and forms, and demographic data. (Contains 30 references.) (LMI)

DESCRIPTORS- Accountability; Educational Innovation; Elementary

Secondary Education; Governance; \*Nontraditional Education;

\*School Choice; \*School Restructuring; \*State Action; State

Legislation

IDENTIFIERS- California; \*Charter Schools; Minnesota

To date, only two states (Minnesota and California) have passed charter-school legislation. This report presents details from these two states regarding charter-school formation, including roles played by teachers and organizers, by local school boards as sponsors, and by county or state officials in providing an appeals process and technical assistance. Statutory requirements, legal responsibilities, funding mechanisms, and employment issues (hiring and dismissal, collective bargaining, and job security) are also detailed. The report offers recommendations to policymakers considering potential charter-school legislation and analyzes the following questions: Who should sponsor? Which state laws/rules should remain?; What about the mechanics of funding? Who should govern? How can resistance be overcome? What about private school inclusion? Do charter schools conflict with consolidation efforts? What role should the state play? and Will charter schools cost more? A conclusion is that charter schools appear to be a viable reform initiative, especially for states considering school choice, decentralization, and/or more innovative accountability systems. Findings suggest that benefits outweigh the impending policy battles. Appendices contain a comparison of Minnesota and California charter-school laws and copies of Minnesota's outcome-based school legislation (1991) and California's charter-school legislation (1992). Education; \*Early Intervention; Educational Needs; Incidence;  
Learning Problems; \*Prenatal Influences; Profiles; Program  
Effectiveness; Trend Analysis

IDENTIFIERS- \*Fetal Drug Exposure

This report presents findings of an inquiry into the educational needs of children prenatally exposed to drugs and covers: (1) the extent of the problem, (2) negative effects of prenatal drug exposure on a child's educational potential, (3) typical behaviors and learning deficits of such children, and (4) characteristics of successful early childhood programs for this population. The report also contains profiles of eight programs specifically designed to educate children prenatally exposed to drugs or experiencing psychosocial traumas. Programs are located in the District of Columbia, Los Angeles (California), St. Petersburg (Florida), Tampa (Florida), New York City, Chicago (Illinois) and Palo Alto (California). Highlights of the review of the four study questions include: the number of children prenatally exposed to illicit drugs is increasing; the prevalent use of alcohol and cigarettes poses a greater prenatal threat to a larger number of babies than does any illicit drug; 30-40 percent of prenatally drug exposed children display developmental delays in the absence of effective early intervention; there is no profile of behavior and learning typical of drug-exposed children; educators should focus on identifying and addressing the problem behaviors, not on the causes; and successful programs use developmentally appropriate practice standards and not new instructional methodology especially for drug-exposed children. Recommendations, a list of 32 programmatic or organizational resources, and a glossary complete the report. (Contains approximately 152 references.) (DB)

IDENTIFIERS- \*Augmentative Alternative Communication

This paper examines issues in establishing an initial social/communicative repertoire with individuals who have severe to profound disabilities, with emphasis on intervention involving the most severely affected. The paper stresses the importance of beginning intervention efforts even before learners show intentional behavior and discrimination of environmental stimuli, and examines the importance of focusing on pragmatics and the interaction process. Increased availability of augmentative and alternative communicative options is seen as increasing the potential for full inclusion of people with severe disabilities in the mainstream. The paper also discusses: communication as social behavior, intentional communicative behavior, evaluating the efficiency of various communicative forms, full utilization of naturally occurring interactive contexts, teaching communicative forms and functions, modification of elements of environments to ensure communicative attempts, collaborative service delivery, and addressing the differences and similarities between home and school. An appendix compares taxonomies describing instrumental communicative intents. Attached are lists of 72 references, 13 books and monographs, 6 products, 8 journals/newsletters, 6 organizations, and 47 federally funded projects. (DB)

This paper presents a functional approach to assessment and associated program development for individuals with severe disabilities, with emphasis on informal strategies that target beginning communicative levels. In the first section, form, function, and context (three components of any communicative act) are defined and described. Three assessment strategies which scrutinize each of these components are then surveyed--these include interviews, observations, and analogues (in which

This paper examines the current status of U.S. children's mental health and its impact on children's ability to learn. It notes the incidence of mental disorders in children, risk factors predisposing children to mental disorders, and symptoms of children with serious emotional disturbances. It explores the school-based and community-based services available to address children's mental health needs and suggests policy and action steps to improve the provision, availability, and accessibility of these services. The paper describes several models of collaboration among schools, community agencies, professionals, and parents. These models work to both treat and prevent mental health problems. Recommendations are offered in the areas of training, staffing, legislation, advocacy, and coalitions. The paper concludes with an annotated list of four organizational resources. DESCRIPTORS- At Risk Persons; \*Child Abuse; Child Neglect; Children; \*Child Welfare; Chronic Illness; Community Programs; Crisis Intervention; Day Care; Demonstration Programs; \*Disabilities; Federal Programs; Government Role; Intervention; Models; \*Respite Care; Young Children

IDENTIFIERS- \*Crisis Child Care

This document consists of a combination of two separately published fact sheets, one on crisis nursery care for children at risk of abuse or neglect and one on respite care for families of children with disabilities or chronic illness. The fact sheet on crisis nursery care presents background information on the federal role in developing crisis nursery programs; a definition of crisis nursery care; and descriptions of a crisis nursery facility, a day care facility, a crisis shelter, multiple community sites, and in-home programs. Three references and names and addresses of two resource organizations are provided. The fact sheet on respite care begins with an outline of federal funding for respite care demonstration projects, and then offers a definition of respite care and descriptions of seven program models: in-home respite model, host family model, facility-based model, residential respite model, respite house model, parent cooperative model, and "respi-tality" model. The fact sheet concludes with three references and names of two resource centers. (JDD)

DESCRIPTORS- Academic Achievement; Educational Change; Elementary Secondary Education; Interpersonal Competence; \*Mainstreaming; Program Development; \*Program Evaluation; \*Program Implementation; Program Validation; Qualitative Research; School Restructuring; School Role; \*Severe Disabilities; \*Social Integration

The Regular Class Participation System (RCPS) project attempted to develop, implement, and validate a system for placing and maintaining students with severe disabilities in general education classrooms, with a particular emphasis on achieving both social and learning outcomes for students. A teacher-based planning strategy was developed and shared with teacher participants in the project. RCPS sought to relocate preferred educational practices from self-contained to general education settings. Teachers and students from nine elementary, five middle, and three high schools participated in a quantitative study, a qualitative study, or both. Analysis of the quantitative data on both social and learning components showed no results of the intervention, but did show a strong school effect. Analysis of the qualitative data helped explain this strong school effect as themes emerged related to differences in teachers' purposes for "doing integration." The study concluded that integration doesn't work, but it can be a "step on the way" to inclusion. Inclusion does work, but only in the context of reinvented schools. Attachments to the report include observation procedures, definitions of terms, and statistical data from the study. (Contains 31 references.) (JDD)

IDENTIFIERS- \*Referential Communication; \*Referents (Linguistics)

Academic rhetoric is manifested at all levels of language, and its aim is to increase the credibility of the writer's message in the reader's mind. However, cultural variation in rhetorical values and conventions may undermine the writer's efforts to impress the reader. The use of reference in scientific texts by Finnish and native English writers was studied as a reflection of underlying rhetorical strategies. Both similarities and differences between the two groups of writers were found in the use of certain reference items as well as in making references to central referents in the text. Writers with different cultural backgrounds thus produced different rhetorical effects through their use of reference and exhibited different rhetorical strategies. (Author)

IDENTIFIERS- \*Academic Discourse

This paper discusses aspects of signaling structure by means of textual organizers in Finnish and French academic discourse. The assumption that there exist culture-bound conventions for marking textual organization by either explicit or implicit linguistic means was explored. Observations are offered of French and Finnish articles and summaries of Finnish master's degree theses dealing with language and translation. Discussion focuses on (1) markers of linear integration in discourse, and (2) the paragraph as a textual organizer. (JB)

This eight-chapter monograph deals with the requirements for providing education for all. Four interrelated themes are examined: developing a supporting policy context, mobilizing resources, building national technical capacity, and strengthening international solidarity. The first chapter gives an overview of these themes. Chapter 2 considers how institutions and resources must be mobilized for empowerment. The status and roles of teachers in education for all is the focus of chapter 3. In chapter 4, participation of nongovernmental organizations, communities, parents, and learners is addressed, including participation in early childhood care, primary schooling, and literacy programs. Chapter 5 examines the economics and politics of the production of textbooks and instructional materials. The role of assessment in improving learning is the subject of chapter 6. Chapter 7 considers the issue of financing education for all, through reducing the unit costs of education, restructuring education systems, redistributing expenditures, and raising additional resources. The final chapter summarizes the issues and their implications for future efforts. (YLB)

Questionnaires; Secondary Education; Secondary School Students;

Sex Fairness; State Surveys; \*Student Attitudes; \*Work Attitudes

IDENTIFIERS- New Jersey

A study examined the relationship between knowledge of nontraditional careers and attitudes toward them. The questionnaire administered to 1,755 students from 13 New Jersey school districts was designed to identify the relationship among knowledge of nontraditional careers, attitudes toward females in nontraditional careers, and the following demographic variables: gender, age, race, family income, school type, marital status, parental status, career option, mother's occupation, and father's occupation. Males and females expressed similar attitudes toward nontraditional careers until the age of 16 years, after which males expressed significantly more traditional attitudes than females did. Parents' educational level was also significantly related to attitude toward females in nontraditional careers. Students with parents in professional or self-employed positions were most likely to have positive attitudes about females in nontraditional careers. Most students had moderate to moderately high levels of knowledge about nontraditional careers. Level of knowledge increased with age. Male attitudes regarding females in nontraditional careers became more positive as their level of knowledge about the type of training and salaries associated with nontraditional careers increased, thus confirming the importance of gender equity programs. (The survey questionnaire is included. Contains 11 references.) (MN)

IDENTIFIERS- \*Health Care Reform

Nursing educators have the opportunity to advance nursing's agenda for health care reform to ensure effective health care for all members of society. They have a key role in fostering the political involvement of student nurses and nurses who have returned to school for baccalaureate or graduate education. Role modeling is critical to increasing their visibility as political activists. Structured activities within the curriculum are an important vehicle for enhancing political or professional activity. Another major means of advancing nursing's agenda for health care reform is the development of professional nurse behaviors that are essential for functioning in new or radically altered health delivery systems. Students must be empowered so that they can assume a leadership role in whatever setting they choose to practice. Key to empowerment is the provision of clinical experiences that foster independence and the leadership skills necessary for case management, managed care, and negotiating in the complex health care environment. The empowerment of the individual that comes from success is enhanced in an environment that empowers the nursing community. Educational institutions can forge partnerships with community agencies to facilitate change and growth. Nurse educators should also provide for enhancement of nurses' understanding of ethical issues in a climate of shrinking health care resources. (YLB)

IDENTIFIERS- Florida

This program guide is intended for the implementation of a floriculture program in Florida secondary and postsecondary schools. The program guide describes the program content and structure, provides a program description, describes jobs under the program, and includes a curriculum framework and student performance standards for floriculture courses. The curriculum framework outlines major concepts and content, laboratory activities, program specifics, and intended outcomes; the student performance standards guide lists each standard and the behaviors expected to show mastery of each standard. The guide also provides a test item bank and information on the following: facilities, equipment, and supplies; program implementation (student admission requirements, safety and maintenance, student learning guide, cooperative training, and student organizations); teacher professional development and professional organizations; and instructional resources (a list of 81 print materials, 12 audiovisual aids, 2 computer programs, 26 sources for print materials, 18 sources for audiovisual materials, and the Florida Educational Information Service with a list of its services). Appended to the program guide is a sample student learning guide that includes program title, intended outcome, learning activities, information sheets, self-check with answers, written test with answers, and a performance test. DESCRIPTORS- \*College Graduates; \*Dual Career Family; \*Employed Parents; \*Family Life; \*Sex Differences; \*Sex Role; Spouses

IDENTIFIERS- \*Single Earner Family

The relationship between family employment status and attitudes toward gender roles in the family was examined for 295 married college graduates. The hypothesis that individuals in dual earner families will be more supportive of nontraditional family gender roles compared to those in single earner families was tested. Attitudinal differences between women and men also were examined, as well as the effects of selected demographic factors (age, individual earnings, educational attainment) and family background variables (mother's employment status, if one's spouse attended college, parenthood status) on gender role attitudes. Attitudes toward gender roles in the family were assessed using a nine-item scale. Multiple regression analyses were used to analyze the data. The results indicated that individuals in dual earner families, women, and people with employed mothers expressed greater support for nontraditional gender roles, while parents were less supportive of nontraditional roles. It appears that, even among a sample of college-educated individuals, variation in gender role attitudes exists, with attitudes most strongly influenced by family employment status. The gender attitudes of both women and men appear to be consistent with the personal choices they make about work and family arrangements. Furthermore, these attitudes seem to be reflective of ideological stances that enhance and protect one's dual or single earner arrangement. The findings suggest an important link between work experiences, lifestyle choices, and gender role attitudes for women and men. (NB)

This paper presents a guide for persons interested in conducting a workshop designed to introduce a process or strategy to help adolescents self-generate strokes to foster positive self-esteem. The steps in the process include: (1) introduction to the notion that each person has the power to take control of and direct his or her own life; (2) an understanding of the importance of self-awareness; (3) acknowledgment of one or more personal strengths; (4) recognition of the difference between bragging and self-praise; (5) a values clarification exercise; and (6) realization of the relationship between behavior based on one's values and one's subsequent level of self-esteem. The workshop is presented in an informal style and requires that the workshop leader rephrase passages into his or her own words. Scripts are included throughout the paper (designated by two asterisks and quotation marks) for participants to read which present scenarios illustrating the ideas being taught in

IDENTIFIERS- National Institute on Drug Abuse

The National Institute on Drug Abuse (NIDA) has developed training and technical assistance services to train indigenous outreach workers hired by NIDA's national Acquired Immune Deficiency Syndrome (AIDS) outreach demonstration research projects. The NIDA community outreach demonstration research projects for AIDS are the first large-scale, nationwide AIDS outreach efforts targeted specifically to intravenous drug users and their sexual partners. One of the first activities of this training and technical assistance effort involved convening two program development meetings (held in 1989 in Rockville, Maryland and Millbrae, California) to assess training needs and assist in the development of appropriate modules for use in the field. This summary of information presented by the projects participating in these meetings was developed to disseminate the information from the meetings. It presents issues, technical approaches, and alternative action plans for a variety of AIDS outreach project operations in the hope that the dissemination of this information will allow all AIDS community outreach and demonstration research projects to benefit from the experience of their colleagues. The summary is intended to encourage ongoing communication and consultation among outreach projects across the country. The report's six chapters provide an introduction to outreach work and describe, respectively, the background of the NIDA AIDS Community Outreach and Demonstration Research Projects, the hiring of outreach workers, outreach strategies, staff operations and supervision, and outreach workers' training. The AIDS Policy and Procedure Problem Resolution Model, the Workshop Problem Analysis and Resolution Instrument, and the NIDA Directory of Outreach and Demonstration Research Projects by state and city with names of contact persons are appended. IDENTIFIERS- \*Family Work Relationship  
In recent years the study of work and family issues has expanded from a focus on men's unemployment, women's employment, and two-career couples to more complex issues of economics, structural and psychological characteristics of work, enactment of multiple roles, the work/family cycle, combined effects of

Employer Employee Relationship; \*Organizational Communication; Performance Factors; Psychological Studies; Social Influences  
Researchers interested in social power in organizational contexts have focused on investigating whether situational factors affect people's preferences for types of influence tactics. The persuade package is defined as a small standard set of methods (influence tactics) that leads to a particular goal (persuade the target to do something). The hypothesis is that the preference order for types of influence tactics is invariant across situations (Schank & Abelson, 1977; Rule, Bisanz, & Kohn, 1985) was examined in the context of downward influence by systematically varying (1) the type of job described, (2) the role identities of the actors, and (3) the goal of the actor attempting to influence the target. Also, a taxonomy of influence tactics other than the one generated by Rule et al. (1985) was used. Subjects, 154 undergraduate students, were given a questionnaire in mass testing sessions. Confirmatory factor analysis (LISREL VII) was utilized to examine whether different situations had an impact on the choice among four influence tactics (rationality, ingratiation, assertiveness, and exchange). As predicted, the likelihood and relative degree to which the four tactics would be used were similar across scenarios regardless of the specific features of the situation, providing further supportive evidence for the schema-based notion of a "persuade package." PUB TYPE- Reports - Evaluative/Feasibility (142); Speeches, Conference Papers, "Papers Presented at..." (150)

DESCRIPTORS- \*Battered Women; Family Problems; \*Family Violence; Marital Instability; Marriage; \*Social Attitudes; Social Problems; Sociocultural Patterns; Spouses

IDENTIFIERS- \*Battered Men

A number of factors came together in the 1970s to create a social problem called "battered wives". Then, beginning in 1977, there was an attempt to create a social problem called "battered husbands." So far, such attempts have been unsuccessful. This analysis compares the issue of battered husbands and battered wives to determine why one was successfully constructed as a social problem while the other was not. The development of the two issues is delineated, and then compared. The results of the comparison show that the factors that were present in the construction of battered wives as a social problem--a social movement, professional and mass media attention, and appropriate gender images--were not present for battered husbands. The existence of the feminist movement and the battered women's movement helped establish battered wives as a social problem while gender images supported the notion of women as appropriate and acceptable victims of violence by their husbands. These findings suggest that a climate that supported the existence and maintenance of one of these social problems could not, and has not, supported the institutionalization of the other. DESCRIPTORS- \*Classroom Environment; Early Childhood Education; Elementary Secondary Education; English (Second Language); Higher Education; Poetry; Special Education; \*Teacher Behavior; Teacher Student Relationship; Theory Practice Relationship; \*Whole Language Approach

IDENTIFIERS- Emergent Literacy; Reflective Teaching

Highlighting typical days in a variety of whole-language classrooms, this book describes learners of all ages, beginning with a home day-care setting through preschool programs and elementary classrooms to a junior high and high school. The book also describes a special education site and an English-as-a-Second Language classroom, and concludes in a laboratory school staffed by graduate students in a university reading methods course. Teachers' descriptions of typical classrooms and their personal reflections presented in the book encourage readers to take a reflective stance and consider the beliefs that underpin their practice. Chapters in the book are: (1) "Literacy Learning in a Home Day-Care Setting" (David J. Whitin and Phyllis E. Whitin); (2) "A Natural Curriculum" (Jean Ann Clyde); (3) "Teachers and Children: Partners in Learning" (Heidi Mills); (4) "A Day with Dinosaurs" (Timothy O'Keefe); (5) "Supporting Literacy Development: On the First Day in First Grade and throughout the Year" (Vera E. Short); (7) "Mind Games: Discovering Poetry through Art" (Margaret Grant); (8) "Making Learning Real for Intermediate Kids" (Eric Stone); (9) "Units of Study in an Intermediate-Grade Classroom" (Thom Wendt); (10)

Thematic Approach  
IDENTIFIERS- \*Colorado School of Mines

The "HumEn" (Humanities/Engineering Integration) program developed at the Colorado School of Mines integrates humanities and engineering through reading and writing. Through integrative reading and writing engineering students are led to make appropriate connections between the humanities and their technical work, connections that will carry over into their professional lives. A thematic approach links an introductory chemical engineering course with a humanities course and examines such issues as: the methods used by scientists, engineers and humanists; the world view necessary to produce science and technology; the value trade-offs inherent in a technological society; and the technical questions faced by engineering professionals. The course emphasizes class discussion, open-ended design projects, teamwork, and a variety of writing assignments, including a semester-long journal. Students involved in HumEn courses find the experience both rewarding and broadening, based on data collected over 5 years. Engineering students are interested in the questions raised by the humanities and they particularly appreciate an opportunity to read and write about literature, history, philosophy, and drama in the context of their engineering discourse community. (The HumEn Integrated Course syllabus and four figures of data are included.) (RS)

IDENTIFIERS- \*Lecturers; \*University of Nevada Reno

While tenure-track faculty begin their careers with some sense of what they will teach, what they will earn, and how they will be promoted, lecturers are not allowed such assurances. In the early days, lecturers in the English Department at the University of Nevada Reno (UNR) taught basic composition courses, four per semester unless they were doing something else in the way of service. Now the teaching load varies. Many faculty members, ignoring the fact that most lecturers have gotten good at teaching writing, expect them to jump at a chance to teach literature. Whereas lecturers used to be evaluated primarily in teaching, now they are expected to publish. Lecturers' lack of certainty about their positions is exacerbated by promises of more equitable pay (current average is 20K a year), but as yet the money has not arrived. This uncertainty and inequity could be eliminated by development of a tenure procedure for lecturers. Tenure would not preclude the stipulation that a lecturer's primary task is teaching, not research. It would change nothing but the unfairness of the present system. (SAM)

DESCRIPTORS- Class Activities; Communication Skills; Creative Writing; Educational Games; Elementary School Students; Elementary Secondary Education; \*English Instruction; \*Language Arts; \*Language Usage; \*Learning Activities; \*Literature Appreciation; Secondary School Students; Student Motivation; Teaching Methods; Writing Exercises; Writing Improvement; \*Writing Instruction; Writing Processes

Contributed by English teachers across the United States, the activities contained in this booklet are intended to promote the effective teaching of literature and writing. Teaching strategies offered in the first section of the booklet are designed to stimulate language exploration and include activities in which students choose their favorite trite expressions in poems by Coleridge and Shakespeare and then write ballad stanzas to illustrate those clichés; imagine that they are famous artists and write self-portraits; keep music journals; and make speeches on topics taken from recent magazines and newspapers. Activities in the second section, which are designed to stimulate an appreciation and understanding of literature, require students to write their own versions of Swift's "A Modest Proposal"; create a literary poster that illustrates a passage the class has studied; give a five to seven minute talk in which they pretend to be movie directors describing how they would cast and shoot scenes in a given novel; engage in "inner and outer circle" discussions that allow only students from the outer circle to ask questions that those in the inner circle must answer. Teaching ideas in the third section provide various strategies for teaching different stages of the writing process. These include activities in which students pretend they are on vacation and write three humorous postcards; write romantic short stories; create a pre-writing "memory chain" about persons from their pasts; and keep a class journal in which everyone makes entries. DESCRIPTORS- College Mathematics; \*Content Area Writing; Higher Education; \*Mathematics Instruction; Student Writing Models; Writing Assignments

IDENTIFIERS- Writing Contexts; \*Writing Development; Writing to Learn

Mathematics faculty around the United States are using writing assignments in a variety of ways. A mathematics teacher at Alma College, Michigan, has students write mathematical autobiographies, keep a reading logbook, and write letters to other students about the course, letters to instructors about the topics, or about what they do not understand. Senior seminars at other institutions focus on famous equations, oral and written analyses of primary texts, or analysis of secondary texts. Calculus and pre-calculus lecturers also have found the usefulness of incorporating writing projects into their curricula. The writing assignments of a lecturer at Cornell University influence the structure of the dialogue he sets up with his students in a course entitled "From Space to Geometry." Serious mathematical and philosophical questions arise for the use of a seemingly trivial writing assignment--measure the height of a building and write the results as if a lab experiment were being explained. Discussions after completing the assignment usually lead to the realization that "mathematical methods" (such as Pythagorean Theorem) really do not work on a sphere such as the earth. Samples of students' writing throughout the course of the semester show how students can move from halting attempts to skillful use of language to explain mathematical concepts. Examples of other students' writing show the frustration that they can feel as they try to understand such concepts as a projection map. (RS)

DESCRIPTORS- Attention Deficit Disorders; \*Basic Writing; Higher Education; Hyperactivity; Learning Disabilities; Undergraduate Students; Writing Achievement; Writing Attitudes; \*Writing Difficulties; Writing Skills

IDENTIFIERS- \*Basic Writers; \*Shaughnessy (Mina)

Although Mina Shaughnessy remains influential in the basic writing field, her answers to the vital questions of who basic writers are and why they underachieve as writers are changing. Whether she intended to or not, Shaughnessy's book "Errors and Expectations" (published in 1977) was a major force in forming an image of basic writers as urban and of lower socio-economic status--aliens in academe, whose writing skills were weak and who were represented by a high percentage of minorities. She stressed their inexperience with standard English, with writing in general, with academic writing in particular. In the 1990s, the term "basic writer" is far more inclusive. Basic writers are described as diverse--different only from each other and coming from a variety of backgrounds. Four often interrelated reasons for writing underachievement are now stressed: (1) a

Writing for Publication

IDENTIFIERS- Professional Concerns; Professional Meetings;  
\*Research Suggestions; Scholarly Writing

The dual purpose of researching what an individual academic loves and using it for career advancement is a created possibility, not an organic outcome. Such possibilities can be created by using the following approaches: (1) research a subject of interest to yourself and then submit it to a population that is interested in the same material; (2) remember that a good research project is worthy of the highest form of recycling--reuse; (3) present a paper at one of the Speech Communication Association meetings and submit it to ERIC; (4) know who the audience might be for each type of research project; and (5) put a slant on the research (not the results) with the "spin" in vogue. Conducting research for publication is a joy and a delight when a person investigates a topic about which he or she is immensely curious. (A sample questionnaire about college speech communication programs is attached.) (SAM)

An assignment that has proven successful in teaching "Communication Theories" (a senior-level capstone course at Northern Kentucky University) is "The Application Folder." The goal of the assignment is for students to apply concepts from the course in their everyday life. Students monitor and analyze what they watch, read, and hear, looking for opportunities to use course concepts to interpret the world. For each entry in the folder, students provide a copy or account of the item/event and an analysis of the item in terms of text and/or lecture concepts. Students are expected to pursue the project all term long. Grading is based on quantity, quality, and presentation. (Three examples designed by the instructor and offered to students with the assignment, and five sample student entries related to the issue of rhetorical sensitivity and based on newspaper cartoons are attached.) IDENTIFIERS- \*Carrollton Farmers Branch Independent Sch Dist TX

This paper describes the design and implementation of a staff-development program at Vivian Field Junior High School in Carrollton, Texas. The school is a member of the Texas Partnership School Initiative, which was created to give schools latitude in raising student achievement. The goal of the staff-development program was to identify gains in student achievement and to close the performance gap among student ethnic and socioeconomic populations. The primary focus was on schoolwide implementation of cooperative-learning strategies, followed by three collegial-coaching sessions. This paper describes the implementation process, which involved teacher-training sessions, administration of a pre- and post-survey, teacher self-evaluations, and five classroom observations. A conclusion is that, as a partnership school, the staff of Vivian Field Junior High School is committed to achieving the partnership's goal through cooperative learning and collegial coaching. Appendices contain the Texas Assessment of Academic Skills (TAAS) summary reports for Vivian Field Junior High, copies of the two surveys, teacher comments, brief descriptions of three cooperative-learning models, and a staff-development evaluation report. (Contains 45 references.) (LMI)

DESCRIPTORS- Change Strategies; Elementary Secondary Education; \*Organizational Change; \*Power Structure; \*Program Implementation; Public Schools; School Districts; \*State Departments of Education; State Legislation; \*State School District Relationship; Superintendents

IDENTIFIERS- \*Ohio

Findings of a study that examined superintendents' perceptions of the methods used by the Ohio State Department of Education to implement legislative mandates are presented in this paper. Etzioni's compliance theory is used as a framework to understand superintendents' perceptions about the state's use of power. A survey of 205 Ohio public school superintendents produced 158 responses, a 77 percent response rate. Overall, superintendents viewed expert power and information power as highly utilized methods of power. Rural superintendents relied more heavily on information power than did their urban counterparts. Urban respondents saw greater evidence of the use of reward power, although both urban and rural superintendents perceived it as a secondary method. Finally, the state Department of Education used each of the three types of power methods--normative, remunerative, and coercive. However, the use of coercive power is incongruous with the needs of normative organizations. It is recommended that the state department act as advocate for the individual school districts

on at-risk students. Effective policy implementation must take local variability into account, be ongoing, utilize locally existing networks, and promote cooperation among all levels. General policy recommendations are included at the end of the report. (LMI)

DESCRIPTORS- \*Academic Achievement; Accountability; Decentralization; Elementary Secondary Education; \*Public Education; \*School Based Management; State Legislation; \*State School District Relationship; \*State Standards

IDENTIFIERS- \*Texas; \*Waivers

This report contains a synopsis of all public education waivers to improve student achievement granted to Texas school districts during the period from September 1, 1991 through August 31, 1992. The purpose of the waivers is to set aside a requirement or prohibition imposed by state law that inhibits student achievement. The state's educational governance philosophy is to allow districts maximum flexibility to develop processes and programs to achieve state standards for student achievement and to hold districts accountable. Following the introduction, the first section describes Texas Partnership Schools and how the waiver process applies to them. Subsequent sections offer descriptions and lists of waivers granted to school districts regarding staff development, course requirements, final examinations, certification, the Texas Teacher Appraisal System, textbooks, and other general waivers. The most prevalent waiver involved staff development, which allows a district or campus to conduct one or more days of staff development in lieu of student instruction. Numerous waivers were also granted in the areas of final examinations and course requirements. An index to waivers by district and a list of exceptions to maximum class size limitations are included. IDENTIFIERS- \*Arizona

In 1990, the Arizona legislature initiated the Arizona School Restructuring Pilot Project. This report identifies local- and state-level barriers encountered in the first 2 years. Outcomes are presented for the 15 pilot schools--11 elementary and 4 high schools--that were selected in a competitive grant process. Data were collected through school self-evaluation surveys, telephone interviews with key participants, and onsite observations. The following local-level barriers are identified: lack of training/inservicing for key stakeholders; lack of knowledge concerning state laws, school board rules, and available resources; district actions to maintain uniformity; limited discretionary monies allocated to the school-level; and the impact of district-negotiated teacher contracts. State-level barriers included: restrictive certification requirements; numerous state-mandated instructional topics without adequate financing and support; excessive and redundant reporting requirements; an inequitable finance formula and budgetary restrictions; and restrictive teacher-dismissal laws with prolonged timelines. Given the resistance to state-mandated restructuring, it is suggested that state-level policymakers focus instead on empowering school-based personnel through information, training, and support. Recommendations are made for developing such an infrastructure of support. Nine figures are included. The appendix contains a list of participating schools and a funding summary for the pilot project. (LMI)

IDENTIFIERS- \*Augmentative Alternative Communication

This paper addresses the involvement of students with severe communication disorders in school curricula. First, current best practices regarding eligibility for augmentative and alternative communication (AAC) services are addressed. This is followed by a discussion of whether students who use AAC systems should be educated in regular or special classrooms and the types of curricula that should be used with them. Finally, delivery issues and strategies for enhancing student involvement in regular curricula are detailed. Eight major recommendations are made which address the following areas: (1) eligibility of all students with severe communication disorders for AAC intervention; (2) full integration in the regular classroom as a constant goal; (3) use of the regular education curriculum for goal setting and longitudinal planning; (4) individualization of communication goals based on functional assessment; (5) systematic efforts to increase opportunities for the child to interact with nondisabled people; (6) provision of communication instruction by a variety of personnel in classroom and community settings; (7) determination of communication goals by consensus of parents, student, and professionals; and (8) development of innovative and individualized interventions when students fail to participate in and benefit from the regular curriculum. (Includes lists of 36 references and 56 additional resources.) (Author/DB)

IDENTIFIERS- \*Child Care and Development Block Grants

This fact sheet examines the Child Care and Development Block  
Grant (CCDBG) program established by the U.S. Congress in 1990  
to support families by increasing the availability,  
affordability, and quality of child care. It outlines the  
program's funding level, eligible grantees of CCDBG funds,  
regulatory requirements, family eligibility, and payment of  
funds. The fact sheet emphasizes the possibility of  
collaboration between crisis nursery and respite care programs  
and CCDBG grantees, in order to ensure that families are  
supported as effectively as possible. It identifies eight  
potential areas of collaboration. Contains three references.

Intervention; Day Care; Family Problems; \*Human Services;  
\*Parent Attitudes; Parent Counseling; Parent Responsibility;  
\*Parent Role; \*Prevention; Program Development

IDENTIFIERS- \*Crisis Child Care

Crisis nursery programs were developed to offer temporary relief  
from child care responsibilities for parents experiencing a  
crisis or extreme stress. While the programs focus on being  
helpful and supportive, they may seem threatening to some  
parents. Service providers need to understand parents' fears  
and concerns about using crisis nurseries and to offer services  
that are sensitive to parental needs and responsibilities.  
Parents' concerns include: their roles and responsibilities  
while using crisis nursery services; separation from their  
children; the child's safety; worry that the child may not want  
to return home; confidentiality of family information; and  
worry that they are giving up their rights to their child.  
Successful crisis nursery services are those that build trust,  
provide support, build communication, and are family focused.

\*Talent; Talent Identification

IDENTIFIERS- Javits Gifted and Talented Students Act

This report on the educational needs of American gifted and talented students identifies indicators of an educational crisis, describes the current status of education for these students, and presents recommendations to meet the educational needs of these students. Indicators demonstrating the need for change include the relatively poor performance by American students on international tests and the small number of students performing at the highest levels on National Assessment of Educational Progress tests. Recent studies have shown that gifted and talented elementary school students have mastered 35-40% of the curriculum in five basic subjects before they begin the school year; most regular classroom teachers make few, if any, provisions for talented students; highest achieving students study less than an hour a day; and only 2 cents out of every \$100 spent on K-12 education supports special opportunities for talented students. A review describes how gifted and talented students are currently identified, the number of students served, the kind of support available, the kind of education most gifted and talented students receive, and characteristics of effective programs for these students. Seven recommendations are offered: (1) set challenging curricular standards; (2) establish high-level learning opportunities; (3) ensure access to early childhood education; (4) increase learning opportunities for disadvantaged and minority children with outstanding talents; (5) broaden the definition of gifted (a broadened definition based on the federal Javits Gifted and Talented Education Act is offered); (6) encourage appropriate teacher training and technical assistance; and (7) match world performance. \*Word Processing; \*Writing (Composition); \*Writing Processes  
IDENTIFIERS- \*Work Habits

This study investigated the writing habits of seven professionals who regularly use word processing to compose texts at work. The aim of the investigation was to get some idea of the variation to be found in how these writers use word processing to compose longer texts (four pages or more). Subjects noted advantages of word processing, such as the ability to work on a text for short periods of time and the ability to compose text in a nonlinear fashion. Implications for the writing process of computer-adapted composing strategies include a decrease in planning activities associated with writing and changes in the process of achieving text coherence. DESCRIPTORS- Case Studies; Cognitive Processes; Foreign Countries; Language Research; Language Styles; Structural Analysis (Linguistics); Text Structure; \*Word Processing; Writing (Composition); \*Writing Processes

Word processors have been shown to favor a local perspective over a global perspective on the text during writing. Recently, advanced outline processors or "idea processors" have appeared that allow the writer to represent and handle structural aspects of a text so that the writer may compose the text within an outline and experiment with different organizations of the ideas during the process. Data are presented from case studies of writers who used an idea processor for writing long, complex texts. Results suggest that the use of an idea processor may encourage writers to focus early on global properties of the text. Specific properties of the idea-processing program that may affect the writing process are discussed, as well as the compatibility of idea processors with different writing tasks and writer styles. IDENTIFIERS- \*Amigos Program MA; Cambridge Public Schools MA; \*Two Way Bilingual Education

The progress report on the Amigos two-way bilingual education program in the Cambridge (Massachusetts) public schools describes: research on the achievement in mathematics, Spanish, and English of Amigos students and students in control/comparison groups; data gathered on students' and parents' attitudes toward bilingualism and biculturalism; student's self-assessments of academic competence and self-esteem; teachers' judgments of students' academic competence and self-esteem; and social-interactional patterns among Amigos students from different ethnic backgrounds. Features and policies of the program are described in a discussion of the results. It was concluded that Spanish and English language skills had improved steadily in participants of the Amigos, transitional bilingual, and standard English-only programs, but that Amigos students had not suffered any academic loss in mathematics or English despite having only half their instruction in English. By grade 3, Amigos students developed classroom friendships independent of race or ethnicity. While English-Amigos and English controls had favorable views of bilingualism, the Spanish-Amigos were most favorable. Spanish-Amigos also rated themselves highest in personal satisfaction. A tabulation of survey responses and a brief bibliography are appended. (MSE)

IDENTIFIERS- \*Canada; Workplace Literacy

This study examined current initiatives related to adult literacy in Canada. A literature search, interviews with government personnel, telephone surveys, faxed questionnaires, and interviews with key individuals were used to assess four kinds of initiatives (teaching/learning opportunities, support to programs, policy development, and advocacy/public education) directed at four target groups: basic illiterates, illiterates in the workforce, immigrants, and aboriginal groups. The unmet needs and issues of concern to Canada's literacy education community were identified, and 12 recommendations were developed from the perspective of adult literacy stakeholders. The overview and needs assessment confirmed that Canada's adult literacy problem is a national, expensive, long-term, and complicated problem requiring national leadership and coordination to support and increase the involvement of the literacy community, researchers, policymakers, and advocates in the development and implementation of a national policy on adult literacy and basic education that incorporates the complex nature of literacy as an educational, social, economic, and political issue. Appendixes include details of the data-gathering methodology, an inventory of research in Canada, a sampling of Canadian literacy resources, a 31-item annotated bibliography, the faxed literacy community survey, and guidelines for creating an adult literacy policy. (Contains 118 references.) (MN)

This program guide identifies primary considerations in the organization, operation, and evaluation of a patient care assistant program. An occupational description and program content are presented. A curriculum framework specifies the exact course title, course number, levels of instruction, major course content, laboratory activities, special notes, major course concepts, and intended outcomes. Student performance standards are a resource list of job-specific competencies. The next section includes facility design criteria, information on safety, and suggested equipment and supplies. The section on implementation considers student learning guides, student organization participation, and a sample student code of ethics statement. A section on professional considerations lists certification coverage for patient care assistant and professional organizations and support services. The final section lists the following instructional resources: information on a test item bank, sources of print and audiovisual materials and software, instructor-recommended materials, and Florida Educational Information Service services. A sample student learning guide is appended. A Career Merit Achievement Plan (Career MAP) displays the student performance standards required by the local education agency and documents students' level of achievement. (YLB)

Curriculum; \*Vocational Education

The traditional sharp distinction between vocational and academic education has come under increasing criticism for a number of reasons, including growing recognition of the failure of conventional curriculum and modes of instruction to respond to the ways in which students actually learn and increased awareness of the social, economic, and political consequences of a differentiated and hierarchically organized curriculum. Response to the criticism has been generally consistent with greater integration of vocational and academic education and has included academic "intensification" of vocational course offerings, transformations in the teaching of academic subjects, and reforms in the social organization of schooling. Vocational education has itself contributed the following to the reform of secondary education: broadened definitions of work education, instructional practices that bridge theory and application, practices of authentic assessment, and a history of engaging disengaged students. The following questions must be answered before the subject organization of high schools can be revamped and work education can be transformed: Which activities and topics of high school education are essential? Which elements of the academic curriculum "count" as work education? How are the goals of vocational and academic education in competition and conflict with one another? (Contains 88 references.) IDENTIFIERS- \*Japan; \*Texas

The divergent cultural patterns, philosophies of education, and basic structures of government in Japan and the United States have resulted in distinct differences between the educational systems of the two countries. The national government strictly regulates all aspects of Japanese education (including student achievement levels and the competencies taught in training programs), whereas education in the United States is characterized by relatively low levels of federal intervention. About 50 percent of the material covered by Japanese vocational students is on general academic subjects; vocational programs in the United States focus largely on specific technical skills. The Japanese government provides financial assistance directly to educational institutions, which in turn require lower tuition rates from students than those required in the United States. Unlike Japan, the United States supplies significant amounts of educational assistance through

of the respondents had a moderately low to low level of knowledge about such careers. Students with higher levels of career knowledge were more likely to have positive attitudes toward nontraditional careers. Older students, students enrolled in vocational-technical schools, unmarried childless students, and Caucasian and African-American students were most knowledgeable about nontraditional careers. Males, older students, and students enrolled in comprehensive schools were less likely to be accepting in their attitudes toward females in nontraditional roles. Unmarried and Caucasian respondents were more likely to be accepting toward nontraditional careers. Activities such as nontraditional career bulletin boards, role model panels, field trips, and information sessions for guidance counselors were recommended as ways of increasing students' knowledge and acceptance of nontraditional careers for females. college. Section I is a model of how to integrate health and safety into a vocational-technical curriculum. Based on the Outcomes-Based Guidelines developed by the Kansas State Board of Education, this section outlines a mechanism for curriculum development in the classroom. Four chapters cover the following subjects: the curriculum planning process, outcomes of integrated school health and safety programs, implementation of the health and safety education curriculum plan, and evaluation. Section II describes a pilot project for an automotive technology course. It presents curricula and lesson plans using the methods and materials identified in the model in Section I. They are: a course syllabus (description, specifications, topical outline, objectives, task list, and lesson plan) for shop safety and hand tools; suggested topics for a series of seminars on health and safety; and a welding lesson plan (objectives, task list, topical outline, and test). Section III provides guidance for establishing two laboratory-based activities: developing a health and safety program in the laboratory of the relevant technology and establishing a health and safety committee, both for the school and the laboratory. Section IV discusses how individuals learn and lists materials purchased for the project. Section V lists nine resources for automotive technology and contains an eight-item bibliography, surveys, and the Kansas guidelines. (YLB)

DESCRIPTORS- \*Audio Equipment; Community Colleges; \*Education Work Relationship; \*Employer Attitudes; Employment Potential; \*Employment Practices; \*Employment Qualifications; \*Entry Workers; Higher Education; Job Skills; Labor Needs; Two Year Colleges

IDENTIFIERS- Lansing Community College MI

A community college conducted a study to determine how employers perceived formal education for audio professionals--both baccalaureate and associate degrees from community colleges, employers' training needs, how they judged entry-level employees' qualifications, and the availability of internships and entry-level employment. The study surveyed 564 audio professionals in an 8-state region, with 154 (27 percent) responses. The survey found that most employers (recording studios) were very small (three or fewer full-time employees with about the same number of part-time and contract employees). A predominant finding is that industry practitioners want the schools to form attitudes as well as technical skills. Respondents cited the need for "people skills" above technical skills; thinking skills were also requested. Most wanted applicants to have a bachelor's degree or at least 2 years experience past a two-year degree. Employers also tended to emphasize the traditional studio gear, indicating that these smaller studios have not been able to upgrade to the technological advances in the industry. The outlook for entry-level jobs was not good, and employers also did not like to use interns. Four conclusions were reached: the

Entry Workers; Food Service; \*Hospitality Occupations; Job Skills; Postsecondary Education; Program Guides; \*Program Implementation; Secondary Education; State Standards; Student Evaluation; Teaching Methods

IDENTIFIERS- Florida

This program guide is intended for the implementation of a hospitality management program in Florida secondary and postsecondary schools. The program guide describes the program content and structure, provides a program description, describes jobs under the program, and includes a curriculum framework and student performance standards for hospitality management courses. The curriculum framework outlines major concepts and content, laboratory activities, program specifics, and intended outcomes; the student performance standards guide lists each standard and the behaviors expected to show mastery of each standard. The guide also provides information on the following: facilities, equipment and supplies, and safety; program implementation (student admission requirements, instructional approach, evaluation criteria, certificate of completion, student learning guide, cooperative training, and student organizations); teacher professional development and professional organizations; and instructional resources (a listing of 48 resources and references, and the Florida Educational Information Service with a list of its services). Appended to the program guide is a sample student learning guide that includes program title, intended outcome, learning activities, information sheets, self-check with answers, and a written test with answers. PUB TYPE- Books (010)

DESCRIPTORS- \*Adult Education; Adult Learning; Adult Students; Classroom Techniques; Educational Research; Learner Controlled Instruction; \*Lifelong Learning; \*Personal Autonomy; \*Self Determination; Teaching Methods

This book provides a comprehensive synthesis of major developments, trends, issues, and practices relative to self-direction and adult education and offers strategies that have direct application to practice. Its intended audiences are practitioners and professors, students, and researchers in adult education. Part I is an introduction. Chapter 1 presents scenarios for three types of learners to illustrate that self-direction is a way of life and discusses popular myths that have helped to create confusion about self-direction and its potential for adult learners. Chapter 2 defines self-direction and offers a model to clarify the concept. Three chapters in Part II examine critically the research literature on self-direction. The two chapters in Part III are intended to bridge theory and practice. They present strategies for facilitating self-directed learning as an instructional method and for enhancing learner self-direction as an aspect of adult personality. Four chapters in Part IV address major issues for practice: self-direction in institutionally based adult education programs, policy issues, international perspectives on self-direction, and ethical issues. The two chapters in Part

the workshop. (Author/NB)

PUB TYPE- Reports - Research/Technical (143), Speeches, Conference  
Papers, "Papers Presented at..." (150)

DESCRIPTORS- \*Acquired Immune Deficiency Syndrome; \*Anxiety;  
Higher Education; Homophobia; \*Homosexuality; Negative  
Attitudes; \*Religious Differences; Sex Differences; \*Sexuality;  
Student Attitudes; Undergraduate Students

Homophobia is a term used to describe irrational fears about,  
prejudice, and discrimination against homosexuals. Past  
research has shown that religious people were more homophobic  
than nonreligious ones and that these same individuals were  
more likely to have a high level of sex anxiety. In recent  
research, it has been found that with the onset of Acquired  
Immune Deficiency Syndrome (AIDS) in the gay community,  
negative attitudes against homosexuals have increased. This  
study examined the relationship between homophobia, AIDS  
attitudes, sexual anxiety, religion, and gender. Undergraduate  
students (N=144) completed a demographic questionnaire and the  
Attitudes Toward Lesbians and Gay Men Scale, the Religious  
Attitude Scale, the Sex Anxiety Inventory, and a modified  
version of Diclemente's AIDS knowledge and attitude scale.  
Findings revealed main effects for religiosity, sex anxiety,  
and AIDS attitudes. Subjects who described themselves as  
religious were more homophobic than nonreligious subjects;  
subjects who scored high on sexual anxiety were more homophobic  
than ones scoring low on sexual anxiety; and subjects with  
negative attitudes about AIDS were more homophobic than those  
with positive attitudes. The hypothesis that heterosexual men  
would be more homophobic than heterosexual women was not  
supported. (NB)

Chronic Illness; College Students; \*Depression (Psychology);  
Higher Education; \*Schizophrenia; Sex Differences; \*Student  
Attitudes; \*Suicide; Terminal Illness

IDENTIFIERS- \*Suicide Ideation

This study was conducted to investigate attitudes that people  
hold about a hypothetical suicide victim in different  
situations. These situations depicted the victim in a scenario  
as either having cancer, Acquired Immune Deficiency Syndrome

partners' work role characteristics, and family-oriented personnel policies. This study was conducted to clarify links between job conditions, work/family interferences (conceptualized as a multidimensional phenomenon which has both structural and psychological components), and family outcomes, and to identify those aspects of the work environment that are most highly associated with work/family interferences. The Work and Family Questionnaire was administered to 120 women and 93 men employed as clerical staff, managers, and scientists in an industrial firm employing 2,500 workers. The findings suggest a significant relationship between supervisor sensitivity and work/family interferences. Job characteristics were found to affect psychological spillover, parenting, and job interference. The data revealed no significant main effects for work/family interference variables by gender and parental status after controlling for age, personal and family income, education, job position, and spouse work hours. Neither sex nor parental status were significantly associated with reports of personal interference, job interference, marital interference, or psychological spillover. (Contains 37 references.) DESCRIPTORS- Administrator Attitudes; Counselor Attitudes; Counselor Educators; \*Counselor Role; \*High Schools; Parent Attitudes; \*Role Perception; \*School Counselors; Student Attitudes; Teacher Attitudes

This study was conducted to investigate the perspectives of the various populations served by the secondary school counselor concerning the roles and functions of that counselor. The Counselor Roles and Functions Questionnaire was administered to 9 counselors, 8 administrators, 56 teachers, 14 counselor educators, 178 students, 26 parents, 14 businesses, and 4 school board members. The scores for the six subscales (Counseling; Consulting; Development/Career Guidance; Evaluation and Assessment; Guidance Program Development, Coordination, and Management; and Administrative and Clerical) and the Total score were employed as dependent variables. The findings suggest that counselors and counselor educators rated the roles and functions of Counseling higher than did school board members. Counselors and counselor educators also rated the roles and functions of Consulting higher than did administrators. Counselors rated the roles and functions of Developmental/Career Guidance higher than did administrators and teachers. School board members rated the roles and functions of Guidance Program Development, Coordination, and Management higher than did students and businesses, and counselors and counselor educators rated these roles and functions higher than did businesses. Students rated the roles and functions of Administrative and Clerical higher than did counselors and counselor educators, and counselors rated these roles and functions higher than did counselor educators. Counselors and counselor educators rated the roles and functions of Consulting higher than did administrators and teachers. (NB)

DESCRIPTORS- \*Art Activities; Art Education; Books; Class Activities; Creative Expression; \*Language Arts; Reading Instruction; Visual Arts; Visual Learning; Written Language

IDENTIFIERS- \*Bookmaking; Literacy as a Social Process; Origami

This book, a guide for adults to help children create their own original and creative books, demonstrates how constructing (writing and editing) their own books can be an engaging and highly educational experience for children. The book uses simple, easy-to-follow instructions to demonstrate how scores of different book forms can be made from a single sheet of paper, using only pens and a pair of scissors. The original children's books reproduced in the book serve as frozen episodes in each child author and illustrator's evolving experience of communicating. Chapters included in the book are: (1) The Book Puzzle; (2) The Two Literacies; (3) The Psychology of the Fold; (4) The Concertina Explicated; (5) The Concertina Expanded; (6) The Extended Concertina; (7) The Origami Continuum; (8) Origami Themes and Variations; (9) Origami Pop-Up Book; and (10) Making Books Work (subtopics include Using Art Materials; The Book Arts and the Computer Sciences; and Evaluating Book Art Projects). Numerous illustrations are included. (SAM)

DESCRIPTORS- \*Childrens Literature; Elementary Education;

Elementary School Students; Elementary School Teachers; Grade 1; Grade 4; Metaphors; Robotics; \*Thematic Approach; Theory Practice Relationship; Units of Study; Weather; \*Whole Language Approach

IDENTIFIERS- Emergent Literacy

This book, presented as a conversation among its three authors, offers strategies for theme exploration in whole language classrooms and focuses on the first and fourth grades. The book asserts that exploring a theme with students is the epitome of whole language teaching because students develop language and literacy best when they use language to gain understanding of a wide range of topics, themes, and concepts. The book's first section describes how a unit on robots became a journey of theme exploration; offers a definition of whole language principles and goals; and describes one teacher's journey from a basal to a whole language approach. The following section

"Learning together in the Resource Room" (Patricia Tefft Cousin and Alane Lancaster); (11) "Whole Language and the ESL Classroom" (Lia Ridley); (12) "Language Learning through Family History" (Phyllis E. Whitin); (13) "Learning on the Job: Whole Language in a Middle School Remedial Program" (Betty Ann Slesinger); (14) "'I Have Never Read Five Books before in My Life': Reading and Writing Naturally in High School" (Donelle Blubaugh); (15) "We Call It Good Teaching" (Diane Stephens and others); and (16) "Whole Language: Starting New Conversations" (John McInerney and Jerome C. Harste). (RS)

Reader Response; Reader Text Relationship; \*Reading; Reading

Research

IDENTIFIERS- \*Bakhtin (Mikhail); \*Reading Theories

This paper examines the work of Russian literary critic M. M. Bakhtin as a theory of reading. Focusing on two critical essays, "Discourse in the Novel" and "The Problem of Speech Genres," the paper demonstrates how Bakhtin addresses the three elements of a reading theory--language, representation, and interpretation. Next, the paper compares Bakhtin's theory of reading to those theories of reading put forth by four prominent reader-response critics, Louise Rosenblatt, Stanley Fish, John Swales, and Mary Louise Pratt. The paper concludes with a discussion of the directions in which this analysis of Bakhtin's ideas might lead in reformulating current thinking about reading. (Contains 16 references.) (Author/RS)

IDENTIFIERS- English Teachers; Research Synthesis

Focusing on work of interest to college English teachers and researchers, this book offers an annual classified listing of scholarship on written English at the college level. The book cites 1,925 articles, books, dissertations, and papers that, with few exceptions, were published during the 1991 calendar year. The bibliography lists each work only once, but it descriptively annotates all citations, cross-references them when appropriate, and indexes all authors and editors. It includes works that treat written communication, the processes whereby human beings compose and understand written messages, and methods of teaching people to communicate effectively. Listings are in five categories: bibliographies and checklists; theory and research; teacher education, administration, and social roles; curriculum; and testing, measurement, and evaluation. A subject index and name index conclude the volume. (RS)

DESCRIPTORS- Evaluation Problems; \*Freshman Composition; Higher Education; Reader Response; \*Sex Bias; \*Student Evaluation; Teacher Expectations of Students; Teacher Response; \*Writing Evaluation; Writing Teachers

IDENTIFIERS- \*Gender Issues; Reader Writer Relationship; Reading Behavior

Demonstrating that gender perceptions and expectations can influence assessment decisions that seem neutral on the surface, this book examines the responses of 31 freshman composition teachers to student writing. The book shows the negative effects of gender biases on assessment. For writing instructors to increase their sensitivity to gender issues in assessment, the book recommends that they self-consciously engage in "responsive reading" that occurs when the teacher reads with an eye toward providing supportive feedback and dialectic exchange. Chapters in the book are: (1) Gender and Reading: Theoretical Indications; (2) Gender Patterns: Reading Student Texts; (3) Gender and Writing Teachers: The Maternal Paradigm; and (4) Gender and Teaching Writing: Conclusions, Implications, and Guidelines. A brief discussion of reader response theorists, seven student essays, and oral responses are attached. (RS)

Colleges; Writing Research  
IDENTIFIERS- Criminal Justice; Westmoreland County Community College PA; Writing Contexts

A study identified and compared writing needs of graduates of Criminal Justice and Drafting and Design programs at Westmoreland County, Pennsylvania, Community College (WCCC). Subjects, 115 graduates of the programs from 1972 through 1990, completed surveys. A total of 310 questionnaires were sent, for a return rate of 37%. Results indicated that: (1) writing is important to graduates of both programs, but significantly more (95%) WCCC criminal justice (CRJ) graduates than drafting and design graduates (40.9%) rated writing very important; (2) 95% of the CRJ graduates reported writing on the job every day compared to 63.6% of drafting graduates; (3) a significantly larger proportion of CRJ graduates reported preparing narratives, formal reports, and letters; (4) a significantly larger proportion of drafting graduates reported preparing instructions; (5) a significantly larger proportion of CRJ graduates than drafting graduates reported writing for readers inside their organizations; (6) 89% of graduates of both programs rated accuracy, clarity, and organization as very important; and (7) 90% of the CRJ graduates compared to 45.5% of drafting graduates recommended a second-level college writing course specifically targeted at their field. Findings suggest that writing is an important and frequent on-the-job activity of both groups. Recommendations include implementation of a writing course designed specifically for criminal justice majors and placement of more emphasis upon the importance of writing to all graduates of technical programs. (Twelve tables and 9 figures of data are included; 20 references, the pre-contact letter, the cover letter and questionnaire, and the follow-up postcard are attached.) (RS)

DESCRIPTORS- \*Class Activities; College Students; \*Cooperative Learning; Documentation; Higher Education; Hypermedia; Information Sources; \*Online Systems; Task Analysis; \*Technical Writing; Technological Advancement

IDENTIFIERS- Clip Art; Team Learning Methods; Writing Contexts

This paper discusses obstacles to teaching online documentation and shares a collaborative approach to overcoming these obstacles. The paper describes three obstacles: (1) students have had limited access to online documents and hypertext systems; (2) standards and principles of effective design for online documents are not clearly established; and (3) developing online documents requires the complex integration of writing, analytical, and graphic design skills. The paper proposes a collaborative task oriented approach which draws on the variety of skills and interests of students working on various team projects. Elements of the collaborative approach described in the paper include: interaction with existing models; discovery of criteria for comparing online documents; a simple "clipart" group project; introduction to screen design; scripting hypermedia for ideal user interaction; and user testing for orientation and navigation. Trait Scale

A study created and examined a new communication trait--the willingness to collaborate. The Willingness to Collaborate Trait Scale was created. Scale reliability was demonstrated through analysis of internal consistency of the 13-item scale. A communication trait model predictive of trait willingness to collaborate was tested using 401 questionnaires completed by 201 communication students (each of whom recruited one other respondent) at a midwestern state university. A positive relationship was found for five communication traits: argumentativeness, interpersonal communication competency, attentiveness, willingness to communicate, and a relaxed style. A negative relationship was found for verbal aggressiveness. (Three tables of data are included; 61 references are attached.) (RS)

DESCRIPTORS- College Students; Communication Research; Higher

Education; \*Persuasive Discourse; Sex Differences; Student

Reaction

IDENTIFIERS- \*Debate Tournaments; Impromptu Speeches;

Intercollegiate Debate Topic; Student Surveys

A study examined forensic competitor preference in choosing quotations for analysis in the event of impromptu speaking. Subjects were 62 competitors in one year and 59 competitors in the next year at an invitational tournament at a large midwestern university. The quotations for the tournament were divided into two groups. The first year, subjects chose quotations from "cynical" or "non-cynical" groups of quotations, and the second year, subjects chose from "humorous" or "non-humorous" groups of quotations. Results indicated that: (1) students had a preference in the types of quotations they chose to analyze; (2) topic choice was an indicator of advancement to the final round the first year but not the second year; and (3) no significant differences were found when gender difference was considered a variable for topic choice. Findings suggest that tournament directors should be concerned with the choice of quotations they offer to students. Future research should consider whether quotation length may affect choice. (Ten tables of data are included; 15 references are attached.) (RS)

EDRS Price- MF01 Plus Postage. PC Not Available from EDRS.

PUB TYPE- Books (010), Guides/Methods/Techniques (For  
Practitioners) - Non-Classroom Use (For Administrative and  
Support Staff, and for Teachers, Parents, Clergy, etc. in Non-  
Classroom situations) (055)

DESCRIPTORS- Change Strategies; \*Educational Improvement;  
\*Educational Planning; \*Educational Quality; Elementary  
Secondary Education; Models; \*Organizational Development;  
Organizational Theories; \*Program Implementation; School  
Effectiveness

IDENTIFIERS- \*Total Quality Management

This book applies quality management, an organizational theory  
that has been successful in business and industry, to  
education. Chapter 1 describes the basic elements of quality  
management (QM)--continuous improvement, client satisfaction,  
positive return on investment, and doing it right the first and  
every time. Ways to implement Deming's 14 points are presented.  
Chapter 2 describes the building blocks of QM; the three levels  
of educational results (mega, macro, and micro) and how to  
apply Deming's principles to education. A strategy for  
implementing QM in a school or district is explained in the  
third chapter. Chapter 4 goes beyond conventional QM models and  
adds the goal of creating a better world through continuous  
improvement (QM). Guidelines for collecting and analyzing high  
quality data for decision making in a QM and QM school are  
outlined in the fifth chapter. Ways to cope with breakdowns and

and encourage local school personnel to work cooperatively toward statewide goals; and that the chief state school officer and governor achieve a unified stance. Ten tables are included. (LMI)

DESCRIPTORS- \*Educational Change; \*Educational Development;  
\*Educational History; \*Educational Objectives; Educational  
Opportunities; Elementary Secondary Education; \*Equal  
Education; Multicultural Education; School Restructuring

This document contains 14 individual papers by prominent scholars who provide a historical perspective on current educational reforms. The three essays in part 1 examine some of the major changes in educational development and reform. These include: (1) "Antiquarianism and American Education: Assimilation, Adjustment, Access" (Patricia Graham); (2) "Recent History of U.S. Governance" (Michael Kirst); and (3) "Historical Perspectives on School-based Social Services in the United States" (Michael Sedlak). The three essays in the second part examine the controversies surrounding questions of equity and multiculturalism in American education. These include: (4) "The Educational Equities in Historical Perspective" (David Kirp); (5) "The Construction of Ethnic Diversity and National Identity in the Public Schools" (Reed Ueda); and (6) "Multiculturalism and History: Historical Perspectives and Present Prospects" (Gary Nash). Some of the current major reform efforts are addressed in three essays in part 3. These include: (7) "Standards in American Educational History" (Diane Ravitch); (8) "Reinventing Schooling: Utopian Impulses and Historical Scoreboard" (David Tyack); and (9) "A History of the Choice Debate in American Education" (Paul Peterson). The five essays in part 4 examine the six national education goals from a historical perspective. These are: (10) "School Readiness and Early Childhood Education: Some Historical Perspectives" (Maris Vinovskis); (11) "Dead End or Detour? School Leaving in Historical Perspective" (Joseph Kett); (12) "Rhetoric and Reform: The American High School Curriculum 1945-1990" (David Angus and Jeffrey Mirel); (13) "Literate America: High-Level Adult Literacy as a National Goal" (Carl Kaestle); and (14) "From 'Reefer Madness' to 'A Clockwork Orange'?" (William Reese). References accompany each article. (LMI)

premises of the curriculum-management audit and the ideas of the quality movement align themselves. Compared with Downey's framework and Deming's areas of profound knowledge, findings demonstrate a strong alignment in the areas of purpose and structure, but little in the area of relationships. Compared with Deming's areas of profound knowledge and 14 points, there is considerable overlap of Deming's principles and the curriculum-audit standards. If the audit is used as a vehicle to transform a school system into a quality school system, top-level management should: (1) drive out fear; (2) break down barriers between staff areas; (3) eliminate slogans, exhortations, and targets for the work force; and (4) eliminate numerical quotas for the work force and numerical goals for management. In summary, although there is significant overlap between the curriculum-audit and quality-management principles in some areas, other areas are implicitly addressed in the context of the audit. Seven tables are included. (Contains 22 references.) (LMI)

DESCRIPTORS- \*Decentralization; \*Educational Change; \*Educational Environment; Educational Equity (Finance); Elementary Secondary Education; \*School District Autonomy; \*School Districts; State School District Relationship

IDENTIFIERS- \*California; \*Florida

This paper examines systematic ways in which school districts differ and the implications of these differences for how schools work and for the implementation of reform proposals. Data from the California State Department of Education and Florida State Department of Education were analyzed to examine the effect of organizational and resource variables on decentralization in school districts. Findings suggest that there is wide diversity among school districts with regard to autonomy and resources. District patterns of organizational structure are, to some extent, endogenous. In particular, school organizations facing different external political pressures adopt different structures, with consequent differences in patterns of influence. Districts in politically intense communities are likely to have lower returns on decentralization reforms. The degree of decentralization should be viewed in part as having evolved to respond to differences in the environment, including the political environment. These differences are likely to affect both the resistance to and the effectiveness of decentralization. Effective decentralization requires adaptation of its form and structure to reflect differences among districts. Five tables are included. (Contains 12 references.) (LMI)

DESCRIPTORS- Decision Making; Elementary Secondary Education; \*Organizational Change; Organizational Climate; \*Organizational Development; \*Organizational Theories; \*Participative Decision Making; \*Resistance to Change; Teamwork

IDENTIFIERS- \*Total Quality Management

This paper addresses issues and the viability of applying participatory management (PM) to education, with focus on Total Quality Management (TQM). Following a description of PM techniques with an TQM focus and a historical overview of Deming's management theory, four stages of team growth experienced during the implementation process are described--forming, storming, norming, and performing. Thirteen barriers to the institutionalization of PM practices are identified, some of which include: employees' fear of changes in the organization of work; adversarial management-employee relations; a view of PM as a quick fix; lack of commitment and leadership; and lack of team member training. Solutions are offered to each of the barriers, some of which include: establish a clear policy; use trained facilitators; provide training and inservicing of administrators and employees; emphasize the process as well as the product; and provide team rewards. In conclusion, PM and TQM are viable alternatives to current western management practices in corporations and schools. One table is included. (LMI)

DESCRIPTORS- Adjustment (to Environment); Adolescents; Children; Elementary Secondary Education; Emotional Adjustment; \*Learning Disabilities; Self Concept; Self Control; \*Self Esteem; \*Self Evaluation (Individuals); \*Self Management; Study Skills; Young Adults

Intended for children, adolescents, or young adults with learning disabilities, this booklet stresses understanding the disability and building self esteem. The booklet begins with brief vignettes of famous people who had trouble learning then goes on to specify what a learning disability is and is not with emphasis on learning to understand one's feelings and controlling feelings by changing thoughts. The third section focuses on individual differences while the fourth section looks at possible causes of learning problems. The fifth section lists 10 specific suggestions including using several senses together, reading aloud, using a computer, working behind a screen, and studying spelling in a different way. The following two sections look at how parents and siblings feel about a family member with a learning disability and views of young adults with learning disabilities. The final section provides a summary and reemphasizes the importance of thinking positively. A list of 17 recommended resources completes the booklet. (DB)

DESCRIPTORS- \*Communication Disorders; Communication Skills; Educational History; Educational Objectives; \*Interpersonal Communication; Intervention; Normalization (Handicapped); \*Quality of Life; \*Severe Disabilities; Social Influences; \*Social Integration; Trend Analysis

This paper presents a brief history of communication intervention and describes recent developments which have brought about shifts in intervention focus, perspectives, and strategies, especially with people having severe disabilities. In examining how communication is important to a good quality of life, the paper points out that the real point of communication is membership in society. The concept of membership is explored, including the ways in which individuals construct stories that make the communication acts of individuals with severe disabilities commonplace and socially valuable. The paper concludes that efforts to foster communication should shift to making sure that these efforts actually result in individuals achieving social membership. IDENTIFIERS- \*Minnesota

This policy research summary outlines the paradigms and processes used in recent research and evaluation studies conducted on supported employment and rehabilitation programs in Minnesota. First, the paper reviews evaluation strategies and models for assessing the individual and societal efficacy of supported employment. It identifies key effectiveness evaluation activities such as identifying outcomes, developing a conceptual framework, specifying comparisons, and specifying outcomes and indicators. Principles of efficiency evaluation are also addressed. Second, the paper presents a case study and methodology for evaluating supported employment costs and benefits. The case study sample included 11 agencies at 13 sites in Minnesota, with 41 program options. Results are reported in terms of: consumer demographic characteristics and work activity, agency and program costs, and benefit-cost estimates. Third, the paper offers recommendations for strengthening current evaluation methods and practices as a means of improving the quality, effectiveness, and efficiency of supported employment programs. Recommendations focus on: the importance of reaching professional consensus on desired goals and outcomes; the need for improved conceptual frameworks; and

DESCRIPTORS- \*Class Activities; \*Classroom Techniques; \*English (Second Language); \*Instructional Materials; \*Introductory Courses; \*Literacy Education; Second Language Instruction

This strategy notebook is designed as a resource for teachers of English as a Second Language (ESL) and literacy education. It consists of a series of class activities and recommendations for instructional materials contributed to the International Catholic Migration Commission (ICMC) by experienced ESL and literacy teachers. The first section describes instructional activities, subdivided into general and topical strategies. The general strategies are useful for teaching any content, and make use of stories, pictures, and elements of the arts: drama, poetry, music, and drawing. Some are intended to be integrated into the curriculum as regular features of instruction or to take an entire instructional cycle to carry out, and still others focus on classroom management issues as opportunities for learning. The topical strategies are sample curriculum units using some of the general strategies outlined previously. The second section of the notebook contains teacher-designed instructional materials, including story books and class exercises, copies of some appropriate materials located in the ICMC learning resource center, and annotated listings of photos, slides, and videos from the learning resource center. DESCRIPTORS- \*Grammar; \*Igbo; \*Language Patterns; Language Research; \*Linguistic Theory; Phonology; \*Syntax; \*Tone Languages; Uncommonly Taught Languages; Verbs

IDENTIFIERS- Pitch (Language)

An analysis of tone in language begins with the observation that the structural approach taken in segmental phonology, analyzing complex tones in terms of sequences of level tones, is not necessarily appropriate with tone languages. A different approach is proposed, a "dynamic-tone" theory that represents tone contours entirely in terms of two "tone markers" representing rising and falling pitch. This theory is offered as a universal theory of tone. The first three chapters outline the way in which the theory accounts for a wide variety of tonal phenomena, including pitch-accent language, tone languages, and phrasal tone. The fourth chapter, concerned with the nature of and constraints on tone rules, describes how tone rules may be confined to three processes: insertion, movement, and deletion of a tone marker. Chapter 5 addresses a number of issues, including tonal stability and the theory of gliding

IDENTIFIERS- Cyprus

A strategy for English second language instruction in the Greek schools of Cyprus at the elementary and secondary level is described. Central to the strategy is assignment of student projects, either individual or small-group, integrating independent language learning and use of research and planning skills. An introductory section presents the instructional rationale for such an assignment. Methodology is then outlined in six steps: preliminary idea-gathering and consideration of potential subjects; planning of the project's structure; research; analysis of data and drawing of conclusions; presentation in the form of an oral and/or written report; and evaluation. A number of related issues are discussed separately, including time factors and motivation in project planning and completion, selection of appropriate topics, the teacher's role in the project phases and aspects, the corresponding role of the student, and special considerations in small group work. A sample project evaluation form is included. (MSE)

DESCRIPTORS- \*Bias; \*Bilingual Education; \*Educational Attitudes;  
Elementary Secondary Education; Program Development; Program  
Implementation; \*Public Opinion; Public Policy; Research  
Methodology; \*Research Problems; Statistical Analysis; \*Surveys

Considerations in conducting attitude surveys concerning bilingual education are discussed. An introductory section examines briefly the history of the controversy over bilingual education, legislative initiatives, and some previous opinion research. Specific kinds of information needs relating to public opinion are then noted and problems arising in such research are described. Two central issues examined are: (1) the need for comparable data that reflects opinions of local subpopulations as well as those of the larger population, and (2) elimination of bias in presentation of results, including accurate representation of their statistical significance. It is concluded that reliable information about community opinions, especially as to where and how much they differ from official, internal school district policy, is essential for successful program planning, development, and implementation. Definitions of common terms in bilingual education are appended, and a 54-item bibliography is included. (MSE)

current and projected uses of the ACTFL OPI by college foreign language departments; and (3) implications for teaching, testing, and curriculum development. Data for the first question were obtained from a national survey of certified OPI testers. Results showed the average rating to be advanced (2 on the ACTFL rating scale). Data for the second research issue were taken from the same survey, and revealed that the most common uses for the OPI were as a departmental requirement or an option for undergraduate language majors. In addition, in some departments specific OPI ratings are required for undergraduates, graduate students, and teaching majors. Additional uses of the test were for teaching assistant training, setting curricular objectives, goal-setting for majors, ongoing progress assessment, departmental evaluation of instructional success, faculty research, training faculty to assess oral proficiency, and incorporation of test elements into instruction. Respondents felt demand for the OPI has increased in recent years. Over half had future plans for OPI use. In regard to the third issue, the results of this study indicated that departments can set realistic curricular goals for undergraduate and graduate majors, and state departments of education may develop oral proficiency requirements for teachers seeking certification in FLs. However, research documents the critical need for effective language teacher education that takes teachers' belief systems into consideration and ends confusion over what constitutes communicative language teaching. Recommendations for instructional development are offered. (MSE)

DESCRIPTORS- Black Dialects; \*Communication Disorders; \*Cultural Awareness; Dialects; Elementary School Students; Interdisciplinary Approach; Intermediate Grades; \*Language Research; \*Language Variation; Linguistic Theory; Professional Education; Sociolinguistics; \*Speech Pathology

A discussion of the role of sociolinguistics in the treatment of communication disorders focuses on issues related to dialect and language variation. It begins with an examination of linguistic diversity and dynamic description of language, reporting on a study of speech and language pathologists' judgments of sentences in African American Vernacular English. The sociolinguistic model of systematic variation within a single language is outlined, and related research is reviewed. Three trends in the field of communication disorders that reflect an underlying sociolinguistic perspective are examined: (1) concern over remediation models that fragment language behaviors in a way that does not reflect real language usage; (2) focus on language function rather than form; and (3) concern for generalization of therapy-based learning to real-world usage. A rationale for sociolinguistic education for specialists in communication disorders is presented. An

Organizations; \*Organizational Change; \*Organizational Development; \*Professional Associations; Regional Programs IDENTIFIERS- \*National Business Education Association

The 12 chapters of this book trace the history of the National Business Education Association (NBEA) and outline the development of its related regional and international affiliates. Chapter 1 sketches the evolution of the National Business Education Association. In Chapter 2, the major activities of the NBEA during the period from 1946 to 1991 are detailed year by year. The presidents of the NBEA and its headquarters staff are discussed in Chapter 3. Chapters 4 and 5 cover the early years of the Future Business Leaders of America and the NBEA's move to a permanent home in 1982. The history of the International Society for Business Education is presented in Chapter 6. The next five chapters discuss the development of the various regional affiliates of the NBEA: Southern Business Education Association, Western Business Education Association, North-Central Business Education Association, and Eastern Business Education Association. Finally, chapter 12 deals with the history of the National Association for Business Teacher Education. (MN)

IDENTIFIERS- Business Law

This handbook contains computer-related, classroom-tested ideas that were contributed by business education teachers and administrators to fuse computer information into computer and noncomputer courses. An alphabetical listing of contributors identifies the category/categories in which their enrichment idea can be found. The contributions are grouped into 17 subject matter categories: basic skills, business English/communications, accounting/bookkeeping/recordkeeping, consumer economics/personal finance/business math, keyboarding/typewriting, office procedures/office management/records management, general business/basic business/introduction to business, shorthand/machine transcription, business law, marketing/business management, computer literacy/computer awareness/introduction to computers, microcomputer applications/information processing (word processing, spreadsheets, database, graphics, integrated software, desktop publishing), networking, telecommunications/electronic mail, computer languages, general computer usage, and teaching techniques/classroom management. Each contribution is presented in this format: title;

community college needs to do public relations work within the audio community to raise the perception of the abilities of students with two-year degrees; attitudes should be taught in a formal setting; internship opportunities should be pursued by the college; and follow-up research of the college's graduates should be undertaken. (Nineteen appendixes contain the questionnaire, cover letter, explanations for the study, and detailed analysis of responses to questions. A bibliography lists 29 references; 29 tables are included in the report.) (KC)

IDENTIFIERS- \*Guam Community College

A follow-up survey of high school and postsecondary vocational and technical graduates and the employers of those graduates was conducted to identify the jobs, starting salaries, and adequacy of the programs preparing those graduates in Guam. Information was gathered through survey forms mailed to 461 graduates and/or from the programs from which they had graduated, and from a mailed survey of 161 employers of four groups of graduates: the Apprenticeship Training Group; the Postsecondary Certificate and Associate Degree group; the Police and Fire Cycle graduates; and the Secondary program group. Return rate was 55% (Secondary employers); 75% (Apprenticeship employers); 76% and 57% for Associate Degree and Postsecondary certificate employers respectively, and 83% for Police and Fire Cycle employers. Results were reported by program area, by gender, by wages earned, and in various other configurations in the 45 tables of the report. Highlights of the results included the following: (1) 83 percent of the secondary graduate respondents were employed full or part time with a mean hourly wage of \$5.83 for male and \$5.09 for female graduates working full time in areas for which they were trained; (2) all the apprenticeship respondents were employed full time in their trades, earning an average of \$10.68 per hour; (3) 87 percent of the postsecondary graduates were employed full or part time; (4) graduates employed full time in jobs related to their training averaged \$12.47 per hour; (5) most postsecondary graduates expressed positive perceptions of their training programs; (6) 66 percent of adult high school diploma graduates were employed full time at an average wage of \$5.09; (7) a majority of employers rated the graduates "very good" or "good" on the technical knowledge necessary for their job; and (8) employers thought the graduates had proper work attitudes and performed quality work. (The survey forms are appended to the report.) (KC)

This teaching guide was developed to help technical education teachers present courses on computer-assisted drafting (CAD). The guide is aimed at helping students learn to use computers and work with disk operating systems and files at a faster pace. The eight units of instruction include some or all of the following basic components of a unit of instruction: objective sheet, suggested activities for the teacher, answers to assignment sheets, answers to written test, written test, unit evaluation form, teacher supplements, transparency masters, information sheet, assignment sheets, student supplements, and job sheets. Other contents are as follows: information on use of the publication, a competency profile, an instructional review and task analysis, a list of related academic and workplace skills, a list of tools, equipment and materials, and a list of 14 references. The following topics are covered: CAD terms, CAD hardware, parts of a CAD system, disk operating systems, CAD software, types of files, setup, and basic geometric constructions. (KC)

(AIDS), schizophrenia, or a depressive disorder. An analysis was made to discern whether there were differences in the attitudes of suicidal ideators and non-ideators toward the suicide victims in each of the different scenarios. Subjects were 228 college students who completed a demographic questionnaire, a suicide questionnaire, one of four scenarios, and a perception rating scale. The suicide questionnaire distinguished ideators from non-ideators. Subjects perceived the victim in the schizophrenia scenario as the most mentally unhealthy. The victims in the cancer and AIDS scenarios were viewed as the most physically unhealthy and the most justified in committing suicide. Subjects believed they were more likely to have a friend who was depressed or who had cancer than one who had AIDS or schizophrenia. There were no significant gender differences in the number of men and women ideators, and in how they perceived the victims in the scenarios. Ideators scored higher on the perception rating questionnaire and saw people as more justified in committing suicide than did non-ideators. (Author/NB)

DESCRIPTORS- \*Academic Achievement; \*Classroom Techniques;

\*Counseling Techniques; \*Elementary School Students; \*Grade 5; Intermediate Grades; School Psychologists; \*Underachievement

Underachievement in the classroom is a problem which confronts educators and national initiatives such as America 2000. Little field research exists to evaluate the effectiveness of classroom interventions on improving academic performance of the underachiever. A field study was designed and implemented by school psychologists which focused on intervening with the underachieving student in the elementary school classroom. The subjects for the study consisted of the fifth grade population (N=119) of one elementary school. Targeted underachievers were identified by six classroom teachers. School psychologists used a consultation model to train teachers in group (group contingencies, study skills, verbal reprimands, public posting) and individual (self-recording, behavior contracts, home-school notes) interventions for improving students' academic performance. The use of selected interventions was monitored by the school psychologists on a weekly basis. Evaluation of student progress was measured by process, single case, and group analyses. Two rating scales were developed for identification of the underachiever (one for parents and teachers, one student self-report form). At the conclusion of the study, positive changes were demonstrated in the underachieving students. Substantial increases were noted in the percent of science assignments turned in during baseline phase to the intervention phase. Single case and group data analyses indicated significant increases in academic achievement on adults' ratings of student achievement. Other data suggest general trends of improved performance for all targeted underachieving students. (NB)

DESCRIPTORS- \*Employee Attitudes; \*Human Services; Interpersonal

Communication; \*Job Satisfaction; Morale; \*Rehabilitation;

\*Work Attitudes; Work Environment

This study was conducted to investigate job satisfaction among human services employees (N=114) who worked for a rehabilitation facility in Kansas with divisions in three different geographical locations. Subjects completed a demographic questionnaire and an agency personnel instrument which measured job satisfaction. Independent variables were the division in which the employee worked, employment status, job description, and wages. Dependent variables were the scores from the agency personnel instrument (Morale, Communication, Compensation, Workplace, and Total Score). The findings revealed that employees in two geographical divisions reported greater job satisfaction (Morale) than did those from the third division. Full-time employees reported more job satisfaction (Compensation and Total Score) than did part-time employees. Employees who provided indirect services reported greater job satisfaction (Compensation) than did those who provided direct services. In addition, the findings revealed significant interactions between employment status and job description for the dependent variable of Morale, between division and job description for dependent variables of Communication, between employment status and job description for the dependent variable of Compensation, between employment status and job description for the total job satisfaction score, and between division and wages for the dependent variable of Communication. constructs for 17-year-olds. Path analyses were performed to describe the relationships of these constructs to amount of students' reading activity. The resulting path models for the three age groups had goodness of fit indices of 0.98 or higher. For 9-year-olds, amount of reading was associated with levels of social interaction surrounding reading, cognitive strategies for reading, and teacher-directed instruction. The path model of reading for 13- and 17-year-olds was generally similar to that for 9-year-olds. For 17-year-olds, the construct of reading activity subdivided into fiction, nonfiction, and news, and student-centered instruction entered as a predictive factor. Findings suggest that an instructional framework that supports the social and cognitive needs of students from a wide range of home backgrounds accounts for the amount and breadth of students' reading. (Five tables of data and four figures representing path models are included.) Contains 40 references. (RS)

\*Cultural Context; Discourse Analysis; \*Literary Criticism;  
Literary Genres; Theories

IDENTIFIERS- Artistic Style; \*Cultural Studies; Multimedia  
Performances; \*Postmodernism (Literature)

Hypothesizing that the tendency to define postmodern culture negatively derives from overliteral and undercritical responses to European theorists, this book of essays identifies the wide parameters of postmodernism. The book demonstrates that the literary and artistic temper of the postmodern condition in Europe and America cannot adequately be understood unless the negative generalizations are complemented with the more positive implications of the innovative creative practices characterizing the multimedia experiments of composer John Cage and other avant-garde artists. Some of the 75 footnoted essays in the book are: "Anti-Art or Ante-Art?"; "Deploing/Exploring Hyperspace: Jameson and Cage"; "Beckett, Brecht, and the Groan of the Text"; "Cage and Consumption"; "Postmodernism's Purist Aesthetic"; "Rainer and the Re-turn to Identity"; "Cage, Wolf, and the Re-turn of the Third Alternative"; "Independent Internationalism: Finlay and Lax"; and "Burt, Wendt, and the Positive Parameters of Postmodernism." The essays are meant to encourage the reader/student to consider present practices in a more critical and discriminating manner--postmodern culture requires empirical analysis. (RS)

DESCRIPTORS- Classroom Environment; English Curriculum; Higher Education; Literature Appreciation; Reader Response; \*Student Attitudes; Undergraduate Students; \*World Literature

IDENTIFIERS- \*Aesthetic Reading; Bloom (Allan); \*Classics (Literature); Hirsch (E D)

Teaching a world literature class at a public college presented an opportunity to test Allan Bloom's and E. D. Hirsch, Jr.'s charges that today's college students are not only ignorant of great literature, but also ill-equipped to seriously consider such works. Beginning with a class survey of reading tastes and experiences, it was discovered that students shared an enthusiasm for reading but felt apprehension about demanding texts. Using a journey motif as a unifying theme allowed for misstarts and misinterpretations as students learned their way around classic texts. Student presentations established a pattern that was later used on midterm and final exams: students measured their values against those in the literary classic. In contradiction to Bloom's assumptions, students did profitably measure their own values against those expressed in the great book. Drawing on personal experience allows a measure for assessing great literature that should not be overlooked. Bloom and Hirsch notwithstanding, the contemporary student is open to the enrichment and illumination great literature offers. (SAM)

A "second-tier" solution was implemented in 1981, and in 1993 the department consisted of 20 tenure-track faculty and a second tier of 9 lecturers. The department also has a fairly stable group of part-time instructors, hired

Fathers; Literature Appreciation; Novels; Parent Role;  
Secondary Education  
IDENTIFIERS- \*African Americans; \*Myers (Walter Dean)  
Walter Dean Myers has gained distinction as an insightful and entertaining writer of imaginative adolescent literature that breaks stereotypes, tells stories of Blacks as people with complex dimension, and redefines the images of African Americans. Myers has written historical works, biography, novels for adolescents, plays, historical fiction, and mystery adventure. He is noted for: the emphasis he places on positive characters while overlooking neither negative ones nor reality; the range of dialects in his dialog; the different aspects of "coming of age" he addresses; and the manner in which he presents characters making choices. In contrast to stereotypical images of inner city African-American males, Myers presents a number of fathers who are positive role models. He is important not so much for the range of his writing as for presenting the story of African Americans in realistic but hopeful ways. Myers' message to young adults seems to be: discover your strengths, be proud of who you are and be responsible for your actions. (RS)

\*Cultural Context; \*Drama; Mass Media Role; Media Research;

\*Periodicals; \*Popular Culture; \*Radio; Story Telling

IDENTIFIERS- Historical Background; \*Media History; \*Radio Plays

To gain insight into how critical standards for broadcast drama evolved with time, this paper examines the critical response to the development of broadcast drama in the first two decades of radio (1920-1940), as reported in the periodical press. The paper is based on two underlying assumptions: (1) that the stories a society tells are indicative of that society's character and, therefore, worthy of examination; and (2) that criticism is worthy of consideration because it is part of the negotiation process that creates the broadcast stories and storytelling techniques. The sources examined included general circulation and specialty magazines, but excluded daily newspapers. The paper reports that, after radio's first decade, specialized publications, such as "Broadcasting" and "Billboard," began to pay serious business-oriented attention to radio, in addition to the radio drama reviews that appeared in general interest magazines. The paper notes that American academics always tended to consider electronic communication more significant as a commercial enterprise than as an artistic endeavor. The paper relates that critics agreed, however, that radio--like other fictional forms--should not merely entertain, but should add some new dimension to the listener's body of knowledge, and that these notions of cultural uplift competed with concerns for socialization and education in that respect. The result was, according to the paper, that although the very idea of radio drama as an art was at issue with virtually all

 IDENTIFIERS- Speech Communication Education  
 An instructional approach to reasoning and critical thinking which fulfills behavioral objectives and retains a general educational perspective for the development of student knowledge and skills is the "micro inductive reasoning unit." In this approach neither subject matter nor propositions are prescribed. The teacher acts as facilitator in the implementation of the methods in the unit. The class begins the unit by trying to isolate problems which are relevant and immediate for class members. The class is divided into small groups of four to six students. Each group takes a topic from those that evolved and the members decide the best way to phrase a question that can be analyzed according to causes and solutions. Groups exchange questions and go through the process of problem-solution discussion. Students record consensus on the nature of the problem, causes, possible solutions, and advantages and disadvantages of each solution. The statement of the best solution becomes the proposition for debate. Each group divides into two groups of two or three members. One group now becomes the advocate of the proposition and argues for its adoption. The inductive reasoning unit in the basic speech course enables the fulfillment of legitimate behavioral and competitive argument. (Diagrams illustrating the micro-inductive approach and a chart describing parts of the unit are included.) (RS)

Proceedings of a workshop held at the University of Stirling, Scotland, to critically examine issues in quality assurance (QA) in education are provided in this document. QA is the generic title for a series of business-management models that have been applied to educational contexts to describe and promote school effectiveness. Five papers and their subsequent discussions are presented: (1) "Quality Assurance and School Development Planning" (David Hopkins); (2) "Quality Assurance: The Perspective from Fife" (Alex McKay); (3) "A Business Perspective on Quality Management" (George Elliot); (4) "Quality Assurance in Strathclyde" (Phil Drake); and (5) "Changing School Change Strategies" (David Reynolds). A concluding section attempts to find common ground among participants and outlines the elements of a QA practice: linking diagnosis with development; defining indicators and acknowledging values; developing new research approaches; designing organizations; proving the effectiveness of quality management; eliminating the negative; and using ocular images. References accompany each section. Ten figures are included. (LMI)

The following areas are highlighted: school-effectiveness research findings; developments in Scotland to improved educational quality; internal and external evaluation

(150), Reports - Research/Technical (143)  
DESCRIPTORS- \*Administrator Effectiveness; Administrator Responsibility; Administrator Role; \*Collegiality; Educational Cooperation; Elementary Education; \*Instructional Leadership; \*Leadership; Principals; \*Teacher Administrator Relationship  
Findings of a study that examined the key elements necessary for administrative instructional leadership in elementary schools are presented in this paper, with a focus on the conflict between the use of power and collaboration. Interviews were conducted with 8 elementary school principals (3 men and 5 women) who were identified as exemplary instructional leaders and with 16 teachers, all from one midwestern state. Observation and document analysis were also conducted. Findings suggest that the key elements for successful instructional leadership include visioning, supervising and evaluating, forming close personal relationships, communicating, conducting meetings, initiating programs, and soliciting parent involvement. Principals identified teacher mind sets, state department mandates, time constraints, and parent opposition as barriers to instructional leadership. The main problem lies in power inequities between the principal and teachers, between teachers, and between the school and community. A framework for instructional leadership, based on collaborative power theory, is presented, in which power inequities are filtered through a gate of action/interaction strategies. The strategies include trust, collegiality, empowerment, diplomacy, and visioning. Collaborative power can be used by administrators to create a quality school where the focus is on teacher collaboration and child development. One table and one figure are included. DESCRIPTORS- Access to Education; \*Educational Equity (Finance); \*Educational Finance; Educational Opportunities; \*Educational Vouchers; Elementary Secondary Education; Equal Education; Open Enrollment; \*School Choice; Social Stratification; State Church Separation; \*Tax Credits; \*Tuition

This paper describes the use of tuition tax credits and vouchers as political alternatives of choice and competition in a progressive society. School and public administration theorists identify two distinct finance models: the rational and the political. The first part of this paper examines and describes these two models. The next part highlights characteristics and possible outcomes of tuition tax credits and vouchers. Finally, the impact of parental choice and competition on three American values--social cohesion, separation of church and state, and equity--are discussed. A conclusion is that tuition tax credits and vouchers may encourage social stratification, cause new problems in church/state separation, and segregate the schools along racial lines. Two figures are included. (Contains 18 references.) (LMI)

DESCRIPTORS- \*Citizens Councils; Cultural Differences; Decision Making; Elementary Secondary Education; \*Group Dynamics; Organizational Communication; \*Participative Decision Making; \*School Based Management

IDENTIFIERS- \*Diversity (Groups); \*Los Angeles Unified School District CA

This study explores the relationship between demographic diversity among members of school leadership councils and the nature and quality of their decision-making processes. A survey was mailed to all members of the leadership councils at 156 Los Angeles (California) Unified School District schools--of which 78 were involved in the shared decision-making (SDM) phase and 78 were involved in school-based management (SBM) phase. Fifty-seven schools, with a total of 682 surveys, qualified for inclusion in the study. Dependent variables included characteristics of the councils' functioning, and independent variables included aspects of the members' diversity. Findings indicate that differences in the amount of individual council experience negatively impacted group process. Greater role diversity had a positive effect on the level and quality of participation and on decision-making effectiveness. Gender and ethnic diversity had a minimal impact on the measured facets of council functioning--decision-making effectiveness, problem-solving effectiveness, noneducator involvement, and council effectiveness. Overall, demographic diversity among council members did not have an overwhelming impact on the nature of councils' operations. The findings indicate that, on the whole, council members do not perceive such negative consequences as, for example, that diversity makes the decision-making process more problematic. One table is included. The appendix contains dependent variable scales and items. (Contains 15 references.) (LMI)

Findings of a study that examined how information is used in

ensures mastery of the basic skills necessary for success in higher grades, and motivates students. However, others argue that retention is associated with subsequent poor academic achievement, low self-esteem, negative attitudes toward school, and high dropout rates. Overall, research findings demonstrate that retention has no significant, positive, longterm effect on academic achievement. Alternatives to retention are programs that give students individualized time and attention, such as the Arizona At-Risk Pilot Project. Since 1987, the 42 K-3 demonstration sites have experienced decreased dropout rates, improved achievement scores, and reduced absenteeism. However, pilot districts in general lacked specific retention policies, definitions, and criteria. A conclusion is that alternative programs are more cost effective than retention in terms of economic and personal costs. Seven recommendations for policy and practice regarding student retention are presented. Two tables are included. (LMI)

DESCRIPTORS- Cross Cultural Studies; \*Cultural Context; \*Culture; \*Curriculum Development; \*Educational Theories; Elementary Secondary Education; Multicultural Education; Politics of Education

This paper discusses the relationship between culture and curriculum, examining the ways in which school constituencies seek to manifest some aspect of culture in the school curriculum. These individuals and groups operate formally and informally to have schools become fitting means to some valued ends. The relationship between schools and their constituencies occurs in a complex cultural context, wherein individuals and groups are "agents" of a particular orientation that schools should reflect. At any given point in time, schools are the focus of a multitude of competing orientations directed to making schools fitting places, from some specified point of view. Macro- and micro-level theories are presented, which describe the divergent purposes of education--for assimilation, ethnic or community maintenance, economic competitiveness, status maintenance or reversal, and citizenship. Contains 189 references. (LMI)

IDENTIFIERS- \*Longview Community College MO

This paper describes Project ABLE (Academic Bridges to Learning Effectiveness), a program of the Longview Community College in Kansas City, Missouri, to provide college students with learning disabilities or brain injuries with the skills needed to succeed in college and the workplace. Each student in the program takes a basic core of classes covering personal awareness, assertiveness skills, college survival skills, study skills, and career education. Additional specially designed courses are available for help in basic reading, writing, mathematics, and keyboarding. Students may also be provided with special support services while attending general education classes. Project ABLE students also meet weekly with a support group (different groups for students with head injuries and learning disabilities) facilitated by a psychologist. A monthly support group is provided for family members. Program students pay a differential tuition fee to offset extra costs. Students remain in Project ABLE for an average of three semesters. Evaluation indicates that 71 percent of ABLE students continued to be enrolled in some educational or training program, with 31 percent in regular programs, and that program students develop in the direction of an internal locus of control, higher self esteem, and better critical thinking skills. Community support for the program has been demonstrated. (DB)

PUB TYPE- Opinions/Personal Viewpoints/Position Papers/Essays (120), Reports - Descriptive (Program/Project Descriptions) (141)

DESCRIPTORS- Accessibility (for Disabled); \*Blindness; \*Braille; Computer Software; Elementary Secondary Education; Instructional Materials; \*Publishing Industry; State Programs; \*Textbook Publication; Textbooks; \*Visual Impairments

IDENTIFIERS- \*Texas

This report describes activities and recommendations of the Texas Commission on Braille Textbook Production, which monitors the acquisition Commission on Braille Textbook Production. The primary purpose of the commission is to monitor the expeditious acquisition of publisher computerized files in the form of textbook diskettes which are needed for more timely production of braille textbooks through the use of braille translation software. This charge has been interpreted by the commission as the responsibility for assuring the timely delivery of braille textbooks to Texas public school students who are blind or visually impaired. The Commission found that Texas has the most technologically advanced and efficient braille textbook production system in the United States. Findings and recommendations address: the definition of literary textbooks, optional computerized file formatting standards for textbooks, funding for the preparation of computerized textbook files, mandatory dates for delivery of diskettes and corrections to textbooks, promoting timely delivery of braille textbooks, transmission of computerized textbook files, cooperation with national efforts, workbooks and supplementary materials, interlining for grades 3 and below, graphics, music textbooks, typing textbooks, electronic instructional media systems, braille producer and consumer communication, braille producer and publisher communication, the Commission's resolution on braille, adoptions of state textbooks, and continuation of the Commission. Two legislative recommendations urge modifying the Texas Education Code to require publishers to provide computerized textbook files and authorizing the State Board of Education to acquire, purchase, and contract for free ancillary and supplementary instructional materials (such as workbooks) for braille-reading students when available.  A way in which second language teachers can use analysis of student discourse to understand how small group interaction defines students' roles relative to each other is demonstrated in a case study. The study compared the participant role of a 21-year-old Japanese male student in an intensive English second language program in two different student pairs. In one pair, the subject did not participate fully, showed frustration, and allowed the other participant to determine the dynamics of the interaction. In the second pair, the subject negotiated turn-taking with his partner and began to perceive himself as a legitimate participant in the classroom culture. It is concluded that the interaction between students can either limit or enhance students' opportunities to participate and negotiate meaning, and the teacher is in a position to intervene to change the limiting organization of the pair or group. In addition, it is proposed that when the teacher can identify strategies that students are using to successfully negotiate meaning, she or he can help all students develop such strategies by making them explicit. (MSE)

DESCRIPTORS- \*Black Dialects; \*Dialects; Grammar; \*Language Patterns; \*Language Variation; Phrase Structure; Sentence Structure; \*Sociocultural Patterns; Sociolinguistics; Structural Analysis (Linguistics)

IDENTIFIERS- \*African Americans

A construction occurring in African American Vernacular English (AAVE) is examined: NP i "call" NP i V"-ing", as in "the woman call herself working." First, a number of reasons that such a form might be overlooked or dismissed as an AAVE dialect form are outlined. Then the sociolinguistic method is applied to the construction to analyze its syntactic context and distribution, semantic-pragmatic function, and status as a form AAVE. It is concluded that the construction is a camouflaged form somewhat different from classic cases of camouflaging, and that its syntactic similarity disguises its semantic uniqueness. Lack of stigmatization is also seen as contributing to the camouflaging. A 23-item bibliography and the questionnaire used to elicit information on the construction's use are appended. (MSE)

This program guide identifies primary considerations in the organization, operation, and evaluation of a work experience program designed for the potential school leaver. The program philosophy is set forth. Program content is then presented. A curriculum framework specifies the exact course title, course number, levels of instruction, major course content, laboratory activities, special notes, major course concepts, and intended outcomes. Student performance standards are a resource list of job-specific competencies. The next section includes facility design criteria, suggested equipment and supplies, and safety information. The section on implementation considers student learning guides and employer relations. A section on professional considerations addresses certification coverage and lists professional organizations and support services. The final section lists instructional resources: sources of print materials and audiovisual materials and software, teacher-recommended materials, and Florida Educational Information Service services. A sample student learning guide, samples of forms mentioned in the curriculum framework, and additional sample forms are appended. A Career Merit Achievement Plan (Career MAP) displays the student performance standards required by the local education agency and documents students' level of achievement. (YLB)

IDENTIFIERS- \*Great Britain

Race and ethnicity can be forces for change. Increased attention to ethnicity issues in continuing and higher education in Great Britain would lead to changes in the structure and content of continuing education. Continuing education itself would then serve as a change agent across the university system by providing an antiracist model for other university departments. The beginnings of this trend toward continuing education departments serving as catalysts for change throughout the entire university system are evident in an analysis of the antiracist developments that have taken place since the 1988 University Council for Adult and Continuing Education (UCACE) survey of existing provisions for minority ethnic communities by university continuing education departments. The following issues must be taken into consideration in attempts to transform continuing and higher education into antiracist institutions: provision of better access for mature students, including blacks; improved access through antiracist outreach and recruitment; access and maintenance of academic standards; and the nature of an antiracist and lifelong continuing education system. (Appended are an annotated bibliography of 34 resources pertaining to antiracist work in continuing and higher education, UCACE recommendations for achieving antiracism, and an antiracist higher education questionnaire. The bibliography lists 110 references.) (MN)

IDENTIFIERS- Business Law; Business Mathematics

This book contains 172 creative teaching ideas pertaining to various subject areas and aspects of business education. Most of the ideas included are intended for use in secondary and postsecondary classrooms; however, a few are applicable at all grade levels. The teaching ideas are organized according to the following subject areas/topics: accounting (beginning, intermediate, and advanced accounting); administrative management systems (administrative office procedures and dictation/transcription); banking; basic business; business communications; business law; business math; computer technology (database, desktop publishing, electronic mail, information/word processing, spreadsheets, telecommunications, and general); critical thinking skills; economics; entrepreneurship; ergonomics; evaluation; human relations (interviewing and interpersonal skills/relationships); imports/exports; insurance; international business; keyboarding; marketing business education (placement and recruitment and retention); miscellaneous; and professional development (dress, ethics, etiquette, personal finance, professional growth, work attitudes). Each idea is presented on a separate information sheet. Each information sheet contains the following: subject area, grade level, title, objective, step-by-step procedure, and contributor's name and school. A list of contributors is included. (MN)

IDENTIFIERS- \*Guam

To remain current and provide support for vocational programs, Guam's State Director of Vocational and Adult Education worked closely with mainland agencies and organizations in 1991-92. A committee of practitioners developed a statewide system of core performance measures and standards. Leadership training kept program administrators up-to-date. Special training requested by government agencies and private enterprises was conducted at the worksite. Seventeen craft committees were active. Transportation was provided to vocational high school students who needed access to special facilities, equipment, and instructors. Career guidance and counseling activities included computerized career information, evaluation of incarcerated adults, development of a wellness training program, and a career resource center. Vocational programs provided for academic integration with strong emphasis on basic communications and for academic assistance. Tourism and marketing were the most popular secondary programs. Special postsecondary activities focused on construction and tourism, the major economic forces on Guam. On- and off-island professional development activities were available. Special programs were provided for handicapped individuals, persons with limited English proficiency, incarcerated adults, single parents, and displaced homemakers. (Appendixes include 1992 enrollment table, System of Performance Measures and Standards, program agreement and closeout report for an academic learning laboratory, and financial reports.) (YLB)

The 1992 activities in support of the goals described in the Guam State Plan for Adult Education focused on curriculum development and evaluation. Three major programs offered 48 daytime and 101 evening classes for students at 6 sites. The

basic components of a unit of instruction: objective sheet, suggested activities for the teacher, answers to assignment sheets, answers to written test, written test, unit evaluation form, teacher supplements, transparency masters, information sheet, assignment sheets, student supplements, and job sheets. Information included only in the teacher's edition includes information on use of the publication, a competency profile, an instructional review and task analysis, a list of related academic and workplace skills, a list of tools, equipment and materials, and a list of eight references. Topics covered in the units are as follows: orientation, nonservo robot operations, servo robot operations, sensors, end-of-arm tooling, and flexible manufacturing. (KC)

IDENTIFIERS- Congress 102nd

This document reports the written and oral testimony given at two congressional hearings investigating the possibilities and methods for having degrees granted at military intermediate service schools and master's degrees granted at the National War College and the Industrial College of the Armed Forces. Officials testifying included high-ranking military officers, educational officials, and officials of accreditation organizations. Witnesses stated the advantages of degree-granting authority and pressed for Congress to authorize that facility, as one step in the accreditation process. Those who testified noted earlier efforts at accreditation for other military institutions and stressed that Congress had to grant degree-granting authority before the accrediting organizations would rule on standards for accreditation. Most of the testimony stressed the high quality of the military institutions and argued for passage of degree-granting authority for them. (KC)

IDENTIFIERS- \*West Virginia

Since schools are community institutions that have the most  
extensive and sustained contact with children, they have  
potential to serve as community centers for providing  
comprehensive and integrated social services. Schools are  
initiating programs that deal with children's needs beyond the  
academic realm, schools are calling on agencies and  
organizations to assist in providing services, and interagency  
collaboration is bringing together educators and service  
providers to develop programs that address social problems.  
This report resulted from the efforts of a study group of two  
teachers, a principal, an assistant principal, and a  
school/community relations director who explored  
school/community social-service partnerships in West Virginia.  
Forty school/community social-service programs in West Virginia  
are profiled. In addition to program descriptions, this  
document offers recommendations for planning and funding  
school/community social-service programs. A list of national  
organizations and West Virginia resources provides further  
information on available children's services, technical  
assistance for school-linked services, and research on  
children's issues. Programs described in the document deal with  
a variety of issues, including academically at-risk students,  
after school needs, child abuse and neglect, counseling needs,  
dropout prevention, family support, health and basic needs,  
life skills, parenting skills, parent and adult education,  
preschool needs, self-esteem, substance abuse prevention and  
recovery, and teenage pregnancy and parenting. (NB)

DESCRIPTORS- Career Development; \*College Faculty; Higher  
Education; \*Individual Characteristics; \*Mentors; \*Personality  
Traits; \*Sex Differences

This exploratory study attempted to assess the effects of the  
personal characteristics of career stage, job involvement,  
having been previously mentored, and sex on whether or not  
individuals act as mentors themselves and the type of mentoring

network. All respondents were involved in assessment to some degree. The educational level of directors varied by size of school. Generally, the greater the size, the greater the educational level of the director. The average number of workshops given per year ranged from 24 to 118. Main topics of workshops included resume writing, interviewing skills, and job search strategies. Overall, the number of recruiters dropped by 940 between 1990-1991 and 1991-1992. The major portion of this report consists of 36 data tables. Data are organized collectively and grouped according to institutional size. (NB)

DESCRIPTORS- Adolescents; Age Differences; \*Child Development;  
Children; Elementary Secondary Education; \*Hawaiians; \*Moral  
Development; \*Psychological Characteristics; \*Self Esteem; Sex  
Differences

This study was conducted to learn more about the moral development of Hawaiian children and adolescents and to assess if grade level (grade 5, 7, 9, or 11) or gender were related to the children's reported level of self-esteem. Eighty Hawaiian children and adolescents from low-to middle-income families were interviewed individually, asked to solve a moral dilemma, and administered the Culture-Free Self-Esteem Inventory (SEI). The data did not support Gilligan's theory of moral development when used to explore this group of Hawaiian students, suggesting that Hawaiian children and youth are more similar than dissimilar in terms of their moral reasoning perspectives. Subjects did not manifest a global dichotomy in the way males and females conceptualized solutions to the ethical dilemma presented to them. Consistent with other research, there was a decrease in self-esteem scores among the seventh graders. In contrast to other research showing that females generally experienced a greater reduction in self-esteem than males and that the diminishment in their sense of self-esteem persisted throughout intermediate and secondary school years, the lower self-esteem scores reported by seventh-grade Hawaiian students in this study were not found to be gender-related (Contains 38 references.) IDENTIFIERS- Des Moines Public Schools IA

The responsibility of the reading/language arts program is to provide quality instruction, materials, and assessment practices to a diverse community of students. The responsibility of the Supervisor of Reading/Language Arts is to provide leadership toward integrating all communication skills with focus on increased student learning. There is no separate district budget for the reading/language arts program. The program utilizes funds from the Textbook Budget and the Curriculum Development/Materials Selection Budget. The district improvement plan contains two goals that directly relate to the reading/language arts program: to integrate technology into the delivery of instruction throughout the district, and to examine and promote alternative forms of student assessment. The reading/language arts program has contributed to the accomplishment of the district mission in several ways. Reading placement tests results indicate that elementary students are progressing at their appropriate instructional levels. The following needs, listed in order of priority, will guide the direction of the reading/language arts program: (1) enhance instruction of emerging and developing readers and writers; (2) differentiate instruction for developing and independent readers and writers; (3) expand the use of performance assessment tools; and (4) make technology accessible to teachers and students as a tool for instruction and learning. (Numerous tables of data are included.) (RS)

IDENTIFIERS- \*Collaborative Learning; Family Literacy; Florida (North)

The improvement of reading comprehension skills in a target group of at-risk students in the second grade of a North Florida school was achieved through the implementation strategies of parental involvement and collaborative learning. At-home parent-child literacy interactions increased and parents became active role models in a Parent as Readers In School Program. Students engaged in collaborative listening, speaking, writing, reading and thinking activities. Positive cognitive growth was indicated by data comparison of two pre- and posttests: the Hunter-Grundin Reading for Meaning Test, Level Two, and the comprehension skills sub-tests in the unit tests of the county adopted basal reading series. Data provided by parent surveys and the tabulation of weekly at-home reading time sheets indicated a substantial improvement in parent-child literacy interactions. The strategies, methods, and results were shared with the faculty of the target school and local community educators via a workshop. (Eleven figures of data are included; 23 references, survey instruments, self-esteem measures, a reading time sheet, and letters to parents are attached.) (Author/RS)

IDENTIFIERS- \*Emergent Literacy; \*Family Literacy; Indiana

Stressing the need for activities that are amusing, useful, and fun, this paper outlines a family literacy project that provides parents preparing for the General Education Development (GED) test with literacy activities they can do with their children at home. The paper explains that the project was developed for participants of the Indiana Manpower Placement and Comprehensive Training (IMPACT) Program of the State of Indiana. The paper notes that the focus of the program is on the parent as a companion rather than as a tutor (parent and child share and discuss mutual books, interact, listen, and respond to each other). After an introductory section, the paper describes the purpose, assumptions, curriculum, recruitment, resources, and evaluation of the program. The paper presents 17 sample lessons (each about two pages long and focusing on a single book) for use in Adult Basic Education classes. Twenty-eight references, a formative evaluation questionnaire, and a summative evaluation questionnaire are attached. (RS)

DESCRIPTORS- Elementary School Students; Primary Education; Program Effectiveness; Student Attitudes; \*Student Motivation; \*Teacher Attitudes; Thinking Skills; \*Writing Attitudes; Writing for Publication; \*Writing Instruction

IDENTIFIERS- Childrens Writing; \*Process Approach (Writing); Student Surveys

A practicum was designed to motivate primary students to increase the quantity and improve the quality of their writing.

Publication of student works was the prime motivating factor. Other objectives were to develop in students a more positive attitude toward writing and gain the agreement of teachers that the publishing of their students' written work would enhance their classroom writing programs. After 12 weeks of the implementation of the publishing center, the quantity and quality of writing increased. Also, student surveys indicated a more positive attitude toward writing, and teachers agreed that the publication of students' works enhanced their writing programs. The publishing center will continue to operate in future years and will be expanded to include kindergarten and grades four and five. (One table of data is included; 28 references, an attitude survey for teachers, a writing attitude scale for students, a sign-up sheet for the publishing center, and a writing process handbook for teachers are attached.) on a semester basis. The lecturers have 3-year wrap around contract, benefits, and voting rights of regular faculty members except those regarding tenure issues. As the lecturers participate in department and university governance, they find themselves frustratingly both inside and outside the system: they are told that they have all the rights of faculty members, yet everyone knows that they belong to a group which is at a distinct disadvantage. Recently, lecturers were told that there was no money for mandatory raises, the State Board of Regents announced its intention to eliminate multiple-year contracts, and department needs dictate that they teach only literature courses. Situations such as that at UNR should not be accepted as alternative models but as temporary, transitional arrangements. The solution lies in replacing the single model of the research professor with various models based on the needs of the university in the 1990s. (RS)

DESCRIPTORS- \*Childrens Television; \*Commercial Television; \*Federal Regulation; Government Role; Media Research; \*Programming (Broadcast); \*Television Commercials

IDENTIFIERS- \*Educational Issues; Federal Communications Commission; Hot Wheels Cars (Game); Media Government Relationship; \*Program Length Commercials

From 1969 to 1993 the definition of program length commercials has not been consistent. The FCC's first involvement with program length commercials was in 1969 when "Hot Wheels," a cartoon based on Mattel Corporation's Hot Wheels cars, was alleged to be nothing more than a 30 minute commercial. The FCC made no formal ruling but did develop a vague definition of a program length commercial. In 1971, the FCC issued its first Notice of Inquiry and Notice of Proposed Rule Making regarding commercial content in children's programming. Response was tremendous, and the FCC concluded that broadcasters have a special obligation to serve the unique needs of children. No formal rulings were made by the FCC, who wanted the broadcast industry to regulate itself. A 1978 Notice of Inquiry only restated previous guidelines. In 1983, the FCC wanted to deregulate children's television, while Congress started a major effort to adopt legislation. The "Children's Television Education Act of 1983" was the first action taken by Congress. The ban on program length commercials was officially removed in 1984 and coincided with an increased number of program length commercials. With the passage of the "Children's Television Education Act of 1990" Congress attempted to force the Federal Communications Commission (FCC) to clarify their regulatory position. Less than 2 years after passage of the "Children's Television Act of 1990," the FCC is disregarding the definitions that it established. PUB TYPE- Speeches, Conference Papers, "Papers Presented at..."

The use of video images, tempered with good judgment and some restraint, can serve a stage play as opposed to stealing its thunder. An experienced director of university theater productions decided to try to incorporate video images into his production of "Joseph and the Amazing Technicolor Dreamcoat." The production drew from the works of Josef Svoboda, a Czechoslovakian scenic designer who spliced large format visual images into his stage productions. A liquid crystal display rear-screen projector was employed in "Joseph," and a later production of "Godspell" used a video wall, a stack of 16 monitors that could be used independently or in various configurations. A list of issues that can guide efforts to include video in stage plays include: whether the video technology will complement or compete with the script; whether the images can be created given technology, time constraints, and budget; the impact of the video images on the actors; the effect on the orchestra's execution of the score in the case of a musical production; and whether the audience will view the production as glorified television or a night at the movie theater. Using video technology is also a way to fully involve more individuals (students) in a production, as the demands for support staff are generally high. (RS)

PUB TYPE- Speeches, Conference Papers, "Papers Presented at..." (150); Reports - Research/Technical (143)

DESCRIPTORS- Communication Research; Content Analysis; Higher Education; High Schools; High School Students; Media Research; \*Persuasive Discourse; Student Attitudes; \*Student Recruitment; \*Videotape Recordings

IDENTIFIERS- Message Responses; Rhetorical Strategies

Faced with a smaller pool of qualified high school graduates, American colleges and universities have been forced to adopt aggressive marketing and recruitment processes. One of the most often applied communication techniques is the production and distribution of image or recruitment videotapes, or video brochures. A study applied a content analysis and survey research to three collegiate recruitment videos to determine the overriding visual content and structure of the videos and attempted to test for their overall effectiveness in visual rhetorical power and message retention. Results indicated that the videos tended to follow a similar content and sequential pattern. Results also indicated that the visual messages presented toward the beginning of the video have the highest level of student message retention and play the largest role in influencing a student's choice of college. (Three tables of data are included; 24 references, a list of videos available, categories for content analysis, a survey instrument, four graphs of data, and four tables of data are attached.) (RS)

IDENTIFIERS- \*Florida

Florida's School Improvement and Educational Accountability program is described in this guidebook. Part 1 explains the what, why, and how of the plan, which seeks to improve student performance by defining expectations and outcomes. Chapters provide information on the following: social and demographic changes in the state; the Education Commissioner's vision for change; a summary of the plan's key points; the history of the accountability movement; elements of the school-improvement process; an overview of Florida education legislation; a comparison of national, state, and regional education goals, and a timetable for implementation. Part 2 presents stakeholders' guides, which list benefits for each stakeholder and describe ways to become involved. Guides are provided for teachers, parents, students, principals, school and district support staff, school board members, superintendents, business people, postsecondary educators, the health and social-service community, the law-enforcement community, city and county government leaders, community leaders, and Department of Education staff. A glossary and 17 annotated references are included. (LMI)

DESCRIPTORS- Educational Change; \*Educational Objectives;

\*Educational Policy; Elementary Secondary Education;

Governance; \*Instructional Improvement; \*Policy Formation;

Politics of Education; \*Public Education; Standards

This book examines issues in designing coherent education policy for public elementary and secondary schools. It seeks to expand the policy discussion by refining the definition of coherence and considering a number of complex questions raised by the notion of coherent policy. The book offers an in-depth look at systemic school reform and offers a variety of ideas as to how educators at the district, state, and federal levels may coordinate the various elements of policy infrastructure around a new set of ambitious, common goals for student achievement. Chapters include the following: (1) "The Politics of Coherence" (Susan H. Fuhrman); (2) "Policy and Practice: The Relations between Governance and Instruction" (David K. Cohen and James P. Spillane); (3) "The Role of Local School Districts in Instructional Improvement" (Richard F. Elmore); (4) "Systemic Educational Policy: A Conceptual Framework" (William H. Clune); (5) "Student Incentives and Academic Standards: Independent Schools as a Coherent System" (Arthur G. Powell); (6) "New Directions for Early Childhood Care and Education Policy" (W. Steven Barnett); (7) "How the World of Students and Teachers Challenges Policy Coherence" (Milbrey W. McLaughlin and Joan E. Talbert); (8) "Systemic Reform and Educational Opportunity" (Jennifer A. O'Day and Marshall S. Smith); and (9) "Conclusion: Can Policy Lead the Way?" (Susan H. Fuhrman.) References accompany each chapter. (LMI)

DESCRIPTORS- \*Decentralization; \*Educational Improvement; Elementary Secondary Education; \*Governance; Politics of Education; \*Power Structure; \*School Based Management; School Restructuring

In this book, eight contributors examine issues related to the

schools that have adopted shared decision-making practices are presented in this paper. The study focused on how first- and second-year principals access, use, and value various kinds of information. A total of 24 out of 29 Louisiana LEAD schools responded to a questionnaire, an approximate 83 percent return rate. Respondents included 22 principals and 134 teachers from 12 elementary schools, 4 middle schools, and 8 high schools. Findings demonstrate empirical support for a positive relationship between shared decision making and the valuing of information. In schools where teachers reported high levels of involvement, shared decision making involved greater use of external information. Teachers who did not report high levels of involvement perceived the shared decision-making process as time-consuming and tended to rely on group experiences for decision-making information. It is suggested that beginning principals utilize university facilitators, acquire training in the use of informed decision-making processes, and act as information providers. Two figures and four tables are included. (Contains 15 references.) (LMI)

Responsibility; \*Administrator Role; \*Educational Change;  
Elementary Secondary Education; Instructional Leadership;  
Leadership; \*Leadership Styles; Participative Decision Making;  
\*Principals; \*School Based Management; \*School Restructuring  
American policymakers have come to view principals as linchpins  
in plans for educational change. Findings of a study that  
examined how the principal's role changes in a school that is  
engaged in fundamental restructuring are presented in this  
paper. Data for the longitudinal case study of a suburban-urban  
school district in the northeastern United States were  
collected from 1988 to 1993. This paper focuses on the  
implementation processes of school-based management and shared  
decision making in two elementary schools. Methodology involved  
document analysis and interviews with central office  
administrators, members of the school leadership councils, and  
the two principals. Findings indicate that structural changes  
in the school increase the potential for conflict because  
principals must negotiate higher stakes decisions with parents  
and staff, yet remain accountable to the central office. For  
the most part, the principals were unable to successfully adapt  
to the demands of the district context. Successful leadership  
in a participative decision-making context requires congruence  
of personal values with organizational goals, preparation in  
group process skills, instructional leadership abilities, and  
clear lines of authority and domains of responsibility.

DESCRIPTORS- \*Academic Achievement; Administrator Effectiveness; Administrator Role; Correlation; \*Educational Environment; Elementary Education; Elementary School Teachers; Institutional Environment; \*Instructional Leadership; Junior High Schools; \*Leadership; Middle Schools; \*Organizational Climate; Secondary School Teachers

IDENTIFIERS- Illinois (Chicago Metropolitan Area)

Findings of a study that examined how effectively instructional leadership and instructional climate predict student learning outcomes are presented in this paper. Surveys to determine principals' self-perceptions and teachers' perceptions of instructional climate were completed by 72 principals and 1,523 teachers. Achievement results for 9,415 students, taken from the Illinois statewide student-assessment program, were available at the third-grade level (56 schools), sixth-grade level (41 schools), and eighth-grade level (15 schools). The dimensions of instructional leadership included: defining mission; managing curriculum and instruction; supervising and supporting teaching; monitoring student progress; and promoting instructional climate. Measured dimensions of instructional climate included accomplishment, recognition, power, and affiliation. Findings demonstrated a significantly positive correlation between principals' self-ratings of instructional leadership and student achievement. The correlations were strongest for academic satisfaction, recognition, accomplishment, and commitment. No significant relationships were found between teacher ratings of instructional leadership and student achievement, though they were generally positive. In conclusion, the findings provide empirical evidence for a strong relationship between instructional leadership and student learning outcomes. (Contains 26 references.) (LMI)

IDENTIFIERS- Middle School Students

This paper describes the implementation of a reform program in a middle school located in a relatively large school district in southeastern Michigan. First, an integrative theory is presented as a promising framework for reforming middle-grade schools. The theory was developed within a social-cognitive framework that emphasizes the importance of students' interpretation of the goals that are dominant in an achievement setting. School policies and practices influence whether task-focused and/or ability-focused goals are perceived by students. A task focus is associated with optimal motivation and use of effective learning strategies. Unfortunately, a task focus becomes less common, and a focus on relative ability becomes more common when students move to middle-grade schools. To illustrate how this theory can be used in restructuring efforts, experiences of working with a team of leaders in a

**IDENTIFIERS- Individuals with Disabilities Education Act**

This monograph attempts to provide an overview of current educational issues that affect brain-injured students with special emphasis on the assessment process. An introduction notes recognition of traumatic brain injury (TBI) and its definition under the Individuals with Disabilities Education Act of 1990 as well as the increasing numbers of such students in the schools (as their survival rate increases). Typical causes and consequences of TBI at different age levels as well as categories of severity are considered in the next section. A typical recovery sequence following TBI is then discussed as are differences between TBI students and other students with disabilities. The following section stresses the importance of the school's role and educational interventions in helping such children gain reassurance that achievement is again possible. The major section on assessment addresses the following aspects: early intervention/coordination, nature of the assessment, the neuropsychological evaluation, neuropsychological assessment instruments, test observations, informal assessments/observations, assessment timing, other factors relating to assessment, and financial responsibilities. The final two sections look at implications for the recovering student and implications for school responses to recovering students. (Contains 23 references.) (DB)

IDENTIFIERS- \*SKI HI Program

This monograph reports achievements of the SKI\*HI project, a 3-year outreach project to improve access and development of services to presently unserved or underserved infants and young children with hearing impairments as well as to provide leadership and technical assistance to agencies implementing the SKI\*HI model. The project provided direct training in 15 locations to 297 new parent advisors (resulting in services to approximately 717 families) as well as training of 24 SKI\*HI trainers and dissemination activities with 13 states. Key tenets of the SKI\*HI model include: (1) early identification and intervention; (2) the home as an early intervention setting; (3) assistance to family members who are facilitators of language development; (4) early fitting of amplification; and (5) psycho-emotional support for families. The model consists of three major components: administrative, supportive services, and direct services to families. The key professional, the parent advisor, makes weekly home visits. Results of two studies on program effectiveness demonstrated that SKI\*HI children made significant gains in language and

DESCRIPTORS- Accountability; \*Delivery Systems; \*Disabilities; \*Educational Change; Elementary School Students; Elementary Secondary Education; Eligibility; Government Role; \*Mainstreaming; \*Regular and Special Education Relationship; Secondary School Students; \*Special Needs Students; Student Evaluation

This chapter considers the situation of special needs children who are seen as wrongly segregated due to federal, state, and local regulations, and identifies needed reforms and changes to remedy the problem. Presented from a social work perspective, the paper notes the trend toward mainstreaming of children with disabilities, children in Chapter 1 programs (low-achieving children in poor areas), and children performing at a marginal level. School social workers are urged to help parents and educators coordinate their efforts. Especially criticized are "disjointed incrementalism" (when a series of narrowly framed programs is independently developed and implemented) and "proceduralism" (when excessive resources go into determination of eligibility). Other problems documented include the lack of consistency in defining categories of children and special services needed for students with learning disabilities or emotional disturbances. Integration of this "second system" into regular education is urged, with four steps: (1) summarization of the available literature to create a standard of accountability; (2) leadership by federal and state authorities in encouraging coordinated programs at all levels; (3) revisions in policies, legislation, and funding based on data from experimental programs; and (4) linking of second system programs to school reform and local school control. This paper describes the application of local area network (LAN) technology, especially electronic mail (E-mail), to develop the written communication skills of 10 deaf students in two pre-high school science classes at a school for the deaf. Students used E-mail for such activities as answering questions, keeping a log, communicating with an adult via a dialogue journal, and writing reports. Writing samples were collected at the beginning and end of the school year. In one classroom the network was used consistently throughout the school year in all areas of the curriculum, and students produced a great deal of writing on the network. In the second classroom, network activities remained separate from the curriculum and were only used during two intervals, one in the fall and one in the spring. Students in the high-use classroom demonstrated

DESCRIPTORS- Accessibility (for Disabled); \*Design Preferences; Design Requirements; \*Disabilities; \*Equipment; Guidelines; Park Design; \*Physical Disabilities; Physical Mobility; Planning; \*Playgrounds; Specifications; \*Structural Elements (Construction)

IDENTIFIERS- \*Universal Playgrounds

This publication presents principles of universal playgrounds, designed to maximize accessibility for all children, with and without disabilities. First, the rationale for the universal playground is given including the importance of play and the value of integration. Next current guidelines for playground design are discussed including safety, accessibility, developmental issues, social/emotional development, intellectual development, sensory development, perceptual-motor development, physical development, and age factors. Playground adaptations to improve accessibility are considered for site development, parking and curbs, walkways, and surface treatments. Playground layout is then considered in some detail including standards for equipment clearance, traffic patterns, practical aesthetics, maintenance, and possible equipment. A table lists 36 equipment items, their goals and benefits, description, and possible modifications. Source information (addresses and telephone numbers) for 56 manufacturers and distributors of playground equipment are provided, as are 16 sources of playground surface materials. Sample layouts, a planning survey form, a universal playground action plan checklist, and a list of 10 additional resources complete the publication. (DB)

IDENTIFIERS- \*Northeastern Local School District OH

This study surveyed 7 special education teachers, 30 regular education teachers (a 46% response), and 32 parents of special education students (also a 46% response) in a rural Ohio school district about their attitudes towards experimental models for special education service delivery. The school district serves 1,232 students, with approximately 9% in special programs for students with developmental or learning disabilities.

Introductory material defines the various models. Results of each of the seven survey questions are then individually analyzed for each of the three groups, with graphs supplementing the text. Two of the three groups preferred a flexible model in which special educators serve students where needed. Greatest needs were seen for service delivery through modified self-contained classrooms, resource rooms, and tutoring. Regular educators identified training needs in the areas of developing interventions, curriculum-based

DESCRIPTORS- \*Communication Skills; Cultural Context; \*Discourse Analysis; Foreign Countries; Grammar; \*Grammatical Acceptability; \*Language Skills; \*Language Usage; Oral Language; \*Speech Acts

Concepts that deal with various aspects of communicative success, or "success concepts," include grammaticality, acceptability, appropriateness, and interpretability. Because different grammarians espouse different ideas of correctness, grammaticality, defined as the relation between an utterance and a grammatical description of its language, must be supplemented with "real life" concepts. Acceptability is the relation between an expression and a set of judgments produced by a group of informants. The question is posed whether acceptability can be measured without attention to the type of person who makes the judgments or the situation in which judgments are made. Appropriateness is situational or contextualized acceptability and is a matter of style. A piece of discourse is interpretable to those who can, under the circumstances, build around that discourse a world in which the discourse make sense. Applied linguists are urged to encourage interpretability as the most basic of the success concepts. (JP)

IDENTIFIERS- \*Parsing

This paper explores the problem of reconciling general psychological processing constraints with linguistic constraints on discourse structure. Two types of psychological constraints, the 'immediacy constraint' and the 'limited focusing constraint' are shown to combine with linguistic constraints to determine the pattern of eye movements during reading in two case studies. Data suggest that (1) there is a role for both immediacy and limited focusing in parsing, and (2) lexical priming was evident, but could not account for subtler effects of contextual restriction that only appear when processing definite noun-phrases. Psychological and linguistic determinates of processing may interact in much more complicated ways than has been assumed. (Author/JP)

DESCRIPTORS- \*Cultural Awareness; Cultural Differences; \*Cultural Traits; \*Culture Conflict; \*Generalization; \*Intercultural Communication; Interviews; Sociolinguistics; \*Stereotypes; Videotape Recordings

IDENTIFIERS- \*Japanese People

This study investigated how the relationship between "individual" and "institution" is constructed in people's perceptions about other cultures, and manifested in conversation. The potential for inappropriate generalization and misunderstanding of situations and cultures was examined. A videotape recording of a Japanese family and two guests, one American and one Japanese, was analyzed, focusing on one awkward conversational exchange involving racially discriminatory remarks. Analysis included review of the videotape with the American guest, mother, daughter, four Japanese graduate students, and four American graduate students. Subsequently, interviews were conducted with the American guest and an American college student with experience in Japanese culture. Interview emphasis was on how experiences in Japan affected perceptions of Japan, with particular attention paid during analysis to use of personal pronouns as a measure of the speaker's identification with the world. Analysis identified some cultural differences in behavior that could lead to misunderstanding and some commonalities (e.g., in gestures) that led to common interpretation. Dynamics of co-membership or identification with the culture during the conversation were also examined. It is concluded that generalizations in speech can create misunderstanding, and that "hedges" such as "I think," "it seems," "it might," etc., although considered sociolinguistically powerless in the United States, may help prevent conflict. Each listing includes addresses and telephone numbers, prices if applicable, and a brief description of the resource or materials. The materials listed are mostly reports of workplace literacy projects in small businesses and training manuals for conducting such programs. The report also contains a summary of the state of basic skills instruction in small businesses today. Copies of articles: "The Large Matter of Small Business" (BCEL Newsletter, July 1990) and "The Missing Link: Workplace Education in Small Business (BCEL Newsletter, July 1992) are attached. (KC)

DESCRIPTORS- \*Adult Basic Education; \*Adult Learning; Adult Literacy; Classroom Techniques; Evaluation Methods; Informal Assessment; \*Literacy Education; Portfolios (Background Materials); Program Development; Program Evaluation; Program Implementation; \*Student Evaluation; Student Records; Teaching Methods

IDENTIFIERS- \*Portfolio Approach

This guide is designed to introduce adult literacy educators to the concept of portfolio assessment and to provide some guidance about how to incorporate portfolio assessment into adult literacy education work. An introduction describes what a portfolio is and provides an overview of the four major areas of reflection and decision making that make up the portfolio assessment process. The teacher must: (1) decide whether portfolio assessment is consistent with his or her own individual approach to instruction and assessment; (2) plan portfolio assessment; (3) implement portfolio assessment; and (4) evaluate the process and revise it for future use. The next section focuses on the process of clarifying the philosophy and approach to instruction and deciding if portfolio assessment is consistent with the instructional program. The next two sections look at the processes of planning and implementing portfolio assessment, highlighting adult literacy educators' and students' experience. This is followed by a discussion of impacts, administrative issues, and recommendations for the field, including national and local support mechanisms, training for trainers in portfolio assessment, incorporation of portfolio assessment into the indicators of program quality, and improved professional support and working conditions. Appendixes include sample forms and tools that programs and educators have created for portfolio assessment, and a 22-item selected annotated bibliography. Contains 46 references. (YLB)

DESCRIPTORS- \*Adult Literacy; \*Communication Problems; Foreign  
Countries; Opinion Papers; \*Readability; \*Reader Text  
Relationship; \*Reading Writing Relationship; \*Teacher Role  
IDENTIFIERS- Australia; \*Plain English Movement

It is productive to think about literacy in ecological terms inasmuch as the literacy problem is a system of interdependent components. Illiteracy must be a concern of writers of the myriad of forms on which both the private and public sectors rely to function in this information-intensive society. In addition to helping readers, adult literacy practitioners must also work to help business and government organizations write and design documents that are potentially readable. Writers must try to put themselves in the position of their intended audiences to ensure that their writing is comprehensible. A few simple tests, such as the "museum" test, the post factum test, and the complexity test, can ensure this. Writers must consider two units of analysis: the author-text relationship and the reader-text relationship. The failures of the Plain English Movement are evidence of the consequences of concentrating solely on the message or text and completely ignoring the reader. Individuals interested in improving literacy must also fight to improve the communicative environment and must pressure business and government to improve the texts they generate. (MN)

Study; Higher Education; Postsecondary Education; Program Administration; \*Program Development; Program Evaluation; Program Implementation; Secondary Education; Standards; \*Teacher Education

The standards described in this document cover the critical aspects of business teacher education at the collegiate level. The standards are organized into two parts. Part 1, which deals with basic programs ordinarily leading to initial teacher preparation and a baccalaureate degree, outlines standards pertaining to the following aspects of business teacher education: governance, purpose, general studies, foundational and specialized business studies, professional studies, administrative policies and practices, research, faculty, admission to business teacher education, retention of students, counseling and advising, library, institutional facilities, community resources and facilities, cooperation with local school districts, evaluation and program development, and long-range planning. Part 2 outlines standards for advanced degree programs beyond the baccalaureate level. The following areas are addressed: governance, purpose, content, student participation in evaluation and development, individualization of programs of study, quality control, residence requirements, graduate assistantships and fellowships, composition of faculty, faculty load and responsibility, faculty development, long-range planning, admission and retention, supervision of student programs, library, institutional facilities, research and development, and evaluation. A lead-in statement or rationale is provided for each standard, and questions designed to obtain evidence in support of the standard are provided. (MN)

primary components of the adult education instructional programs were adult high school, General Educational Development (GED) preparation and testing, and adult basic education. Ten classes in GED preparation or from the adult high school program were offered within the Adult Correctional Facility. Survival skills and basic literacy formed the core of services provided for the Mental Health Facility and Goodwill Industries. A Work Place Literacy Program at a hotel concluded. The Job Opportunities and Basic Skills Program provided child care assistance and tuition for welfare recipients. The needs of adult immigrants centered on English as a Second Language (ESL). A third-party evaluation of the entire adult education program was completed; the final report commended the reliable self-evaluations. Cooperative agreements with government agencies and community-based organizations provided adult basic, literacy, ESL, GED, and adult high school opportunities for their clients. (Eight statistical tables illustrate enrollment profiles, functioning levels, reasons for separation, status upon entry, participant achievement, time and locations of classes, and personnel. Two financial reports are provided.) (YLB)

IDENTIFIERS- Carl D Perkins Voc and Appl Techn Educ Act 1990; \*Guam

This document presents the Guam Adult Education Quality Performance Indicators to enable Guam Community College to promote program improvements in the adult education programs it offers to Guam's educationally disadvantaged adult learners. Definitions are provided of these terms: quality performance indicator, performance measure, and performance standard. Four major components make up the quality performance indicators: educational gains, curriculum review, student recruitment, and student retention. Each component consists of an indicator, discussion, performance measures, performance standards, and reporting process. A glossary and a chart illustrating performance levels for English as a second language are appended. (YLE)

\*Coordination; \*Employment Programs; \*Federal Programs; Futures (of Society); Job Placement; \*Job Training; Postsecondary Education; \*Program Improvement; State Programs

There are currently more than 150 different federal programs providing some form of employment training assistance. The fragmented system of federal programs creates a variety of problems that hamper attempts to help workers obtain training and find jobs: duplication of services, lack of information on access, multiple administrative entities, and lack of an integrated client tracking system. To address the problems, some states have made efforts to reorganize their service delivery systems to better coordinate services at the local level. Their efforts are hampered, however, by differences in program requirements and reluctance of competing program staffs to share information with competing program staffs. In order to ameliorate the situation, local, state, and federal leaders need to work together to establish common goals for employment training programs and yet allow communities the flexibility to develop service delivery systems tailored to local needs. The proposed fiscal year 1994 appropriations include \$150 million for "one-stop career centers"; such centers could be an important step toward a rational employment training strategy. It is critical that these centers work through existing programs rather than establish another program that competes with those that already exist. (KC)

DESCRIPTORS- Behavioral Objectives; \*Career Development; \*Career Exploration; Classroom Techniques; Competence; \*Competency Based Education; Educational Resources; Equipment; Junior High Schools; \*Learning Activities; Middle Schools; \*Teaching Methods; Test Items; Units of Study

This curriculum guide helps teachers to lead students in grades 6-8 to investigate themselves and the world of work as a basis for career planning. It is planned for a semester course, but may be modified by local planners utilizing any or a combination of complete course units. Each of the four units of instruction contains the following: a competency and competency number, objectives and objective numbers, time needed, strategies, learning activities, handouts, suggestions for instruction, and tests with answer keys. The units cover the following topics: self-awareness, workplace awareness, career exploration, and educational planning. A list of 8 textbooks, 41 other print resources, 7 videotapes, 7 computer programs, 10 software packages, 6 suppliers, and an equipment maker, and a list of equipment needed are included in the guide. (KC)

support (career or psychosocial) provided to mentees. Data were collected from 140 university faculty members through the use of a questionnaire. The results of the analyses revealed a significant difference in mentoring by career stage: only 24% of respondents in the early career stage were mentors, whereas 68% of those in the mid-career stage and 52% of those in the late career stage were mentors. It was found that mentors in the early career stage provided more psychosocial support than career support, whereas mentors in the mid-career stage provided both career and psychosocial mentoring. The difference between mentoring activities by high job involved individuals and low job involved individuals was not significant. It appeared that the type of support (career or psychosocial) mentors would offer to their mentees was related to the type of support they received from their own mentors. There was no significant difference in frequency of becoming mentors by gender. These findings suggest that mentoring activities of faculty members vary by career stage but not by gender, level of job involvement, or by the presence or absence of a past mentor. Results also showed that more psychosocial support is provided to mentees than career support. (NB)

DESCRIPTORS- Adolescents; Client Characteristics (Human Services); \*Economically Disadvantaged; \*Group Homes; \*Migrant Youth; \*Quality of Life; \*Urban Youth; Youth Clubs; \*Youth Programs

IDENTIFIERS- \*4 H Programs; Indiana

Indiana 4-H Youth Programs are being used to enhance the quality of life for troubled adolescents in residential group homes and economically disadvantaged urban areas and to provide summer-school programs for children of migrant farm workers. Four basic types of program delivery modes exist in Indiana: clubs, junior leader program activities, educational trips and summer programs, and school enrichment educational units. All of these program modes work because they correspond to the developmental needs of the youth participants. However, this program has been perceived as strictly rural and related to agriculture. Even for troubled rural youth dealing with abuse, domestic violence, etc., 4-H offers a safety net for caring adults to interact with youth. (NB)

parental conflict (legal conflict, interpersonal conflict, and specific conflict tactics) and children's divorce adjustment. Subjects were members of 120 mother-custody families, recruited through a search of public divorce dockets, with at least one child between the ages of 6 and 12 and in which parental separation had occurred within the past 6 months. Subjects were seen once between 6 and 8 months after the separation and again one year later. Conflict variables from multiple sources, including interviews, questionnaires, and court records, were correlated with children's adjustment variables, which also were assessed using multiple sources (self-report, mother report, and teacher report). Relationships between the different types of parental conflict and children's adjustment were examined within each time period and over time. Results suggest that different types of conflict are related to children's adjustment early and later in the divorce adjustment process. Age, sex, and legal status of the parents' divorce moderated relationships between parental conflict and children's adjustment. The divorce settlement may mark a transition for children, lessening the impact of parental conflict. (NB)

LSAT. Parents completed a parent involvement questionnaire, and two key informants were interviewed. The study, conducted with 22 second-grade students and their parents in rural southeastern Ohio, concluded that no positive significant correlation exists between parents' involvement and students' reading achievement nor do students with higher IQ scores necessarily have parents who are more involved in their education. The study further concluded that students with higher IQ scores tend to score higher on reading achievement. (Six tables of data are included. A questionnaire and interview questions, as well as an 11-item bibliography are attached.) (SAM)

(141), Guides/Methods/Techniques (For Practitioners) - Classroom Use - Teaching Guides (For Teacher) (052)

DESCRIPTORS- \*Change Strategies; Curriculum Development; Elementary School Students; Instructional Innovation; Integrated Activities; Intermediate Grades; \*Language Arts; Portfolios (Background Materials); \*Reading Instruction; \*Student Evaluation; Teacher Behavior; \*Writing Instruction

IDENTIFIERS- Alternative Assessment; Portfolio Approach

A fifth-grade teacher researched the experts, observed master teachers, and experimented to find out what worked best for her and her students as she made the transition from the basal to the process approach to teaching the language arts. Taking courses and meeting with others helped support her decision to change. During the process of change, the teacher realized that the basal can be utilized in a whole language way, heavily supplemented with real books, self-selected reading of all types, and oral and written responses. Using the reading/writing process, the teacher tried to incorporate the literary genres her students were studying by integrating all the areas of the language arts. Portfolios were kept as students finished each genre. Developing the skills of cooperative learning enabled students to become listeners, supporters, and active learners. The teacher selected books based on the students' varied interests and abilities. When students chose the books they were about to read, they followed guidelines from the reading consultant. The teacher readily shared classroom experiences with parents, teachers, principals, board members, and others through frequent communication in newspaper form or invitations to visit the classroom. Performance assessments in language arts included: writing, oral discussions, exhibitions, and portfolios. The teacher constantly observed and evaluated herself and her students. The teacher observed the emergence of active readers, writers, listeners, and speakers--active involvement, active learners, and teacher and students as learners. (RS)

#### IDENTIFIERS- Computer Mediated Communication

The electronic classroom proved particularly effective in dealing with racism, sexism, and homophobia in an honors English class, in part because it facilitates teaching by modeling rather than by dominating. Synchronous software facilitates diversity better than the usual collaborative learning group whose goal of tailoring discussions to reach a consensus has been criticized as suppressing difference and enforcing conformity. Locating authority in individual readers enables self-disclosure that emphasizes differences. Focusing on emotional literacy, especially anger, reveals conflicts rather than agreement. As individuals generate their dissensus and focus on their emotions, they discover powerful emotional bonds which emphasize both their differences and their similarity. (Sample questions from and responses to an electronically administered course evaluation are included.) (SAM)

related language areas that help educators to understand how writing is socially based. The purpose of the paper is to cast classroom practice in the variously dim and gleaming lights of research and theory, linking practice, research, and theory by looking with a close-up lens at the ways in which writing and other language experiences inside and outside of school have been studied and explained. Using this lens, the paper first presents some theoretical perspectives on written language acquisition and development. Next, the paper reviews studies that investigate social contexts for writing development both in school and out. The paper then looks at studies of instructional practices in writing that are, from lesser to greater degrees, socially based. The paper concludes with a presentation of some "core concepts" which capture the ways in which some of the most promising instructional practices in writing are linked to social theories. Ten notes are included; 213 references are attached. (Author/RS)

(150), Guides/Methods/Techniques (For Practitioners) - Classroom Use - Teaching Guides (For Teacher) (052), Opinions/Personal Viewpoints/Position Papers/Essays (120)

DESCRIPTORS- Business Administration Education; Higher Education; \*Management Systems; \*Organizational Communication; Problem Solving; Skill Development; \*Teamwork; Work Environment  
IDENTIFIERS- Communication Behavior; \*Communication Strategies; \*Total Quality Management

Many of the theories about communicating effectively in corporate structures as well as the accompanying pedagogy do not pertain to changes in corporate structure and communication brought about by Total Quality Management (TQM). TQM creates a work environment in which employees need problem-solving skills and interpersonal skills that allow them to work well as part of a team. Team building enables employees to communicate, and "cross training" is a means of educating employees to provide varying levels of flexibility in the work environment. One way for students to understand teams is to consider the team processes of team charter, team functions, and team improvement. Students working together on classroom projects should use a charter to express in writing their core purpose and secondary purposes. Students need to discuss behavior standards that facilitate effective team functioning. Team improvement is a result of training, education, and development. Including "individual development plans" (a set of goals derived from job task requirements) as part of collaborative projects is a way to make sure that students participate in cross training and thus improve themselves and the functioning of the team. Learning about team building and cross training prepares students for the corporate environments they will encounter upon graduation. (Fifteen references, a list of the criteria for the Malcolm Baldrige National Quality award, a team master profile spider diagram, and a figure illustrating team processes are attached. (Contains 15 references.)) (RS)

Humor as an Instructional Practice: A Longitudinal Content  
Analysis of Humor Use in the Classroom.

PUB DATE- Apr 93

NOTE- 23p.; Paper presented at the Annual Meeting of the Eastern  
Communication Association (New Haven, CT, April 28-May 2, 1993).

PUB TYPE- Speeches, Conference Papers, "Papers Presented at..."  
(150), Reports - Evaluative/Feasibility (142)

DESCRIPTORS- Audience Awareness; \*Classroom Environment;  
Classroom Research; Communication Research; Content Analysis;  
Elementary Secondary Education; Higher Education; \*Humor;  
Instructional Effectiveness; Longitudinal Studies; \*Teacher  
Behavior; Teacher Improvement; Teacher Student Relationship

IDENTIFIERS- \*Communication Strategies

A study analyzed the strengths and weaknesses of the use of humor  
in the classroom. A longitudinal content analysis of  
presentational and classroom studies from 1941 to 1991 was  
conducted. Earlier studies were included if they had been cited  
five or more times within articles on humor in the classroom.  
Scholars have argued that humor is a powerful tool in the  
creation of a classroom communication climate; reduces  
fears/anxieties of students; increases student interaction and  
participation; and makes the learning environment more  
enjoyable. Misuses of humor in the classroom may be more  
devastating than the advantages gained by creating an open  
environment. Damaging humor can occur even after an open  
climate has been created through the use of humor. Guidelines  
for the use of humor in the classroom include: (1) consider the  
teacher's presentational skills when planning the use of humor;  
(2) consider the audience; (3) consider the course material  
when planning to use humor; and (4) practice the humor on  
colleagues or family members. These are the primary concerns  
that the ethical teacher should consider when using humor in  
the classroom. (Contains 38 references.) (RS)

1991-92 education goals, reports on standardized test results, and summarizes comments on schools' performance, parent involvement, and other indicators of school performance. It also reports each of the 54 districts' annual change in enrollment, transiency rate, attendance rate, and percent of students promoted to the next grade from first through eighth grade. A statewide summary of the districts' education plans for 1992-93 is provided, including district goals for improving education, plans for achieving goals, and the means by which educational stakeholders participate. Appendices contain a description of the statewide testing program, a list of district test coordinators, and a list of public district superintendents. (LMI)

likely effects of the decentralization of school governance on educational practice. Two major themes emerge in the book. The first (chapters 1 through 4) is that governance reforms in education may have little to do with what actually happens in schools, but have much to do with external policy conditions. The second theme (chapters 5 through 8) is that decentralized decision making may indeed have important effects on schools, as its defenders have argued, but that standard theoretical arguments are not very helpful in explaining why. The chapters include the following: (1) "School Governance in the United States: Historical Puzzles and Anomalies" (David Tyack); (2) "School Decentralization: Who Gains? Who Loses?" (Richard F. Elmore); (3) "Control Versus Legitimation: The Politics of Ambivalence" (Hans N. Weiler); (4) "Deinstitutionalization and School Decentralization: Making the Same Mistake Twice" (Dan A. Lewis); (5) "Fiscal Decentralization and Accountability in Education: Experiences in Four Countries" (Donald R. Winkler); (6) "Decentralization in Two School Districts: Challenging the Standard Paradigm" (Jane Hannaway); (7) "School Improvement: Is Privatization the Answer?" (Martin Carnoy); (8) "Employee Involvement in Industrial Decision Making: Lessons for Public Schools" (Clair Brown); and (9) "Epilogue: Reframing the Debate" (Jane Hannaway and Martin Carnoy). A conclusion is that decentralization reforms cannot be understood in isolation; they must be seen within the context of society's educational standards. Seven tables and eight figures are included. References accompany each chapter. (LMI)

DESCRIPTORS- \*Cooperative Programs; \*Corporate Support; Elementary Secondary Education; Group Dynamics; Organizational Theories; \*Participative Decision Making; Politics of Education; \*School Based Management; School Business Relationship; \*Urban Education

IDENTIFIERS- \*New York City Board of Education

This paper documents the study of three schools participating in a school-improvement initiative carried out by the Board of Education of the City of New York, the Fund for New York City Public Education (the Fund), and the International Business Machines Corporation (IBM) during the 1990-91 school year. The project, the IBM/Fund Project for School Improvement, involved 25 New York City public schools that accepted the assistance of IBM manager trainers in the supervision of their School-Based Management/Shared Decision Making (SBM/SDM) teams. Methodology involved observation, document analysis, and interviews with key participants--IBM managers, school administrators, and team members. Follow-up interviews and observations were conducted one year later in the spring of 1992. Using Bolman and Deal's framework for structural and political approaches to decision making, the findings suggest that controversy and factionalism among team members, who viewed their concerns from the political perspective, was the greatest barrier to the implementation of IBM's structural methods. None of the three schools attempted to retain IBM facilitation in the following year. An implication is that the structural approach of the business community must be merged with the more political process of the school community. Recommendations are made for SBM/SDM teams and business-education cooperation. True bottom-up reform requires strategies developed within the context of school life. One table is included. (LMI)

middle school are described. The school leadership team examined and changed school policies and practices, which promoted a school focus on learning and task mastery, rather than on performance and relative ability. Three tables are included. (Contains 83 references.) (LMI)

DESCRIPTORS- \*Administrator Effectiveness; Administrator Responsibility; \*Administrator Role; Cultural Context; Culture; \*Educational Environment; Elementary Secondary Education; Interaction; \*Organizational Climate; Organizational Communication; \*Principals; \*School Orientation

IDENTIFIERS- \*New Principals

Recognition of the school as a cultural phenomenon has implications for the way in which the new principal enters a fully operational school, defines a role, and attempts to exercise influence. This paper outlines a three-part general strategy whereby the new principal can become a participant in the ongoing negotiation of the school culture. First, the new principal must discover the culture of the school by learning how to read the competing sets of cognitions held by school participants. Second, through communication with school participants, the principal helps to shape the context and meanings that influence behavior. Third, the principal legitimizes meanings and reaffirms key values of the school culture. In the micropolitics of the school, the credibility of the new principal depends upon his or her capacity to manage the culture of the school. (Contains 45 references.) (LMI)

IDENTIFIERS- Project INSITE (Deaf Blind)

This final report describes activities of Project INSITE, a 3-year home intervention program delivering services to infants, toddlers, and preschoolers with deaf blindness or other multidisability sensory impairments. The family centered model features the use of early intervention professionals known as parent advisors who visit homes weekly to work with families and function as team members in preparing for transition to school programs and the development of Individualized Family Service Plans and Individualized Education Programs. Additional program features include material development, provision of follow-up and technical assistance, training of trainers, and systematic evaluation. The Project has adapted to changing trends by providing statewide coordinators of implementation plans for low incidence handicapping conditions with capacity building technical assistance. Project INSITE has provided direct services to 880 families, training to 440 professionals in 12 states, and technical assistance to more than 180 agencies. The Project has also developed several resource manuals for families as well as training materials and videotapes. Appendices include evaluation summaries, INSITE national data report for 1991-92, title pages of products, the training format, and a list of 19 references. (DB)

IDENTIFIERS- \*Curriculum Compacting

This literature review describes and evaluates five accelerative methods for teaching intellectually gifted students at the secondary level. The review stresses the importance of matching student characteristics and instructional type, citing research demonstrating that intellectually gifted students achieve at higher levels when their educational needs are assessed on an individual basis. The five programming options include: (1) curriculum compacting, (2) subject acceleration, (3) mentorships, (4) dual enrollment (in both high school and college), and (5) early admission to college. Discussion of each option contains a description, lists of advantages and disadvantages, and conclusions. A final discussion offers guidelines for matching student characteristics with each of the programming options. Appendices provide materials from the mentoring program of one school district. (Contains 40 references.) (DB)

measurement, data collection, and collaboration. Special educators desired further training in collaboration and developing interventions. Most special educators and half the regular educators were willing to participate in an experimental model. Regular educators were most willing to collaborate with the special education teacher and utilize volunteers. They were least willing to modify course requirements, testing procedures, and daily work. Parents indicated that they desired teachers to make accommodations to meet individual needs, and 31 percent stated they were willing to volunteer. (DB)

IDENTIFIERS- Illinois

This study surveyed 300 Illinois special education teachers concerning their views on effective practices for intervention with students having attention deficit disorder (ADD) and their suggestions for regular classroom teachers with such students. Introductory material defines the problem and terminology and identifies assumptions and limitations of the study. A review of the literature examines what ADD is, the causes of ADD, diagnosis of ADD, consequences of ADD behavior, and interventions with ADD children (medication, treatment alternatives, and classroom intervention). Among study findings based on a 61% response rate (N=183) were: 68 percent favored seating the ADD student near the teacher; 66 percent favored a special education setting for ADD students; over 70 percent recommended that a student's work be divided into small pieces; 90 percent preferred to provide nonverbal feedback; and 88 percent taught their students self-monitoring techniques. Tables detail the survey findings, and 10 appendices include letters, the questionnaire, teacher comments, general suggestions for regular education teachers, and general comments regarding ADD. (Contains 54 references.) (DB)

(Linguistics); \*Written Language

IDENTIFIERS- Lappish; Textual Analysis

A serious study of discourse particles (DIPs) must be founded on the analysis of orality in its two main dimensions: oral communication in its ordinary functioning (i.e., discourse, conversation, enunciation), but also in expression ritualized by the oral tradition of cultures that do not have a writing system. The association of the two dimensions emphasizes the importance of a solid theory and methodology within discourse analysis. To assume as a prerequisite a distinction between morphosyntactic and enunciative levels makes it possible to observe the role played by DIPs in the process of discourse structuring. Examples from Finno-Ugric languages with an oral tradition (the Sami language) and Indo-European languages with a long standing written tradition are examined. A dichotomic classification between particles proper (DIPs "in their own right") and particles "by extension" proves to be operational for a comparison in external contrastivity as well as internal contrastivity. (Author/JP)

for developing sociolinguistic competence in nonnative speakers (NNS) through classroom instruction. Subjects were six college students of English as a Second Language, divided into treatment and control groups. The treatment group was provided instruction on sociolinguistic variables important in refusing in American English. The control group participated in a class on how to make small talk with Americans. Pre- and post-test questionnaires designed to elicit refusals in English were administered. In addition, 2 weeks after instruction, participants were telephoned by a researcher requesting that they perform a burdensome activity at a time known to conflict with their schedules. Questionnaire results indicate that the instruction in refusals had little effect. Data from the telephone interview reveal no effect. Patterns of response found in certain questionnaire situations, and the large disparity between written and spoken refusal strategies, were found to be of special interest and have implications for further research. The questionnaire and a participant profile are appended. (MSE)

States History  
IDENTIFIERS- \*Hawaii

A study examined the experiences of 60 Japanese immigrants to Hawaii (Niseis), aged 61-80, who attended Japanese-language schools as children. Using a case study oral history approach, the study gathered oral testimonies through semi-structured interviews. Historical documents were also used as primary sources of information about the schools. Based on analysis of the responses and related data, it is concluded that the Japanese-language schools aided rather than hindered Americanization of this group, by providing a safe haven for instruction in areas not provided by the public schools. In addition to language instruction, students were exposed to character education that stressed values consistent with American norms while positively influencing ethnic identity and self-esteem. The schools also helped Niseis act as translators and transmitters of American culture to their parents, alleviating parent-child and parent-public misunderstandings common in immigration situations. It was discovered that public school authorities did not share in the public distrust of Japanese-language schools, and that the public opinion of the schools was unwarranted. It is proposed that the educational utility of the participants' experiences is illustrated in the high performance of Japanese-American combat units in World War II. (MSE)

IDENTIFIERS- \*Wh Questions

A group of studies on child language development between ages 2 and 3 is presented. The studies, originally published between 1970 and 1989, are the result of a longitudinal research program. An introductory section describes the contents, offers background information on several different perspectives (developmental, learnability, cross-cultural) in language acquisition research, and outlines some conceptual themes (meaning in child language, context and child language, cognition and child language, individual differences, centrality of verbs) appearing in the studies. The first group of papers consists of studies of simple sentences and includes the acquisition of constituent structure and meaning relations and three kinds of complexity in simple sentences: negation, verb inflection, and wh- questions. The second section consists of the studies of complex sentences, including acquisition of syntactic connectives and clausal meaning relations, complementation, and complex sentences that express causality. The two papers in the third section pertain to process and interaction in language development. One is a study of role imitation in learning words and constituent structure; the other is a study of contingency in discourse. Four of the children studied appear in all the studies, and six others appear in one or two studies. (MSE)

IDENTIFIERS- Chicago Heights School District IL; Family Literacy; Illinois (Chicago Heights)

The Family Literacy Project at the Dr. Charles E. Gavin School in Chicago Heights, Illinois, brings together a community college adult education program, an early childhood program, and a local school district. This report of the Prairie State College Family Literacy Project assesses the needs for family literacy among the families in the Gavin School neighborhood. Goals were to document the nature of the community, determine the interests and perceived needs of adult family members, empower the community members, and raise awareness in the community of the program and recruit participants. Emphasis was on data collection and this report reflects that focus. The majority of families in the area were found to be African American and Hispanic, to have high rates of high school dropout parents and teenage mothers, to have lived in the area an average of 12 years, and to have relatively low levels of parent involvement in the schools. Parents and teachers differed on types of activities perceived to be needed for parents, with teachers ranking the need for parenting skills highest. Additional demographic data are reported and the survey form and responses are appended. (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

Evaluative information is provided on 18 completed workplace  
literacy classes conducted in the Seattle-King County,  
Washington, area for 218 limited English proficient workers.  
The programs were operated by the Employment Opportunities  
Center and the Refugee Service Federation. Participants were  
members of the following ethnic groups: Vietnamese, Chinese,  
Cambodian, Lao, Japanese, Korean, Filipino, Thai,  
Ethiopian/Eritrean, Mexican, Central American, South American,  
Eastern European, and Soviet/Russian. Training sites were:  
Avtech Corporation, Eldec Corporation, Paine Corporation, and  
Pacific Circuits (electronics); Burien Terrace and Pinehurst  
Park (nursing homes); HFI Foods and Oberto Sausage (food  
processing); and the Sheraton and Westin Hotels. Factors  
affecting performance outcomes included workforce reductions  
due to the 1991 recession, variables in forming classes,  
pressure from supervisors and/or co-workers, overtime and work  
schedules, and limitation on the number of sites. Gains in pre-  
to-post program test scores, documented attainment of  
competencies, post-program assessments by supervisors, and  
continued employment at follow-up indicate that the majority of  
the participants have made progress in specific job-related  
language skills. In addition, demographic data indicate that  
the 18 classes have served people in need of specialized  
workplace literacy training. Many of the people served work in  
production-oriented, mostly technical jobs, and most have  
stayed with the same employer for a considerable time. A brief  
profile of each of the 18 classes is appended. (Adjunct ERIC

\*Declining Enrollment; \*Educational Planning; Financial  
Exigency; Higher Education; \*Long Range Planning; Models;  
Prediction; Resource Allocation; Retrenchment; \*Strategic  
Planning; \*Universities

This paper addresses the problem of shaping new strategies in the face of current enrollment declines at many colleges and universities. It describes an approach that applies a long term planning model that can incorporate the short-term realities of lower enrollments and budget constraints with projections for new strategic initiatives. The paper notes that too often the immediate budget pressures pushes creative strategic planning aside, therefore, it is necessary to have some sort of linkage in the planning process between long range strategic alternatives and the immediate market demands and budgetary realities. This article describes an approach to linkage that focuses on attaching numbers to strategic ideas. The paper argues that ideas are empty if not grounded in a pragmatic context where enrollment and financial projections can be intermingled with strategic factors to simulate a variety of future scenarios. The planning model presented assists a dean in anticipating the college's future while forcing a disciplined and comprehensive perspective of strategic alternatives. A sample simulation is provided following discussions of the model's construction, usage, and outcomes. (GLR)

DESCRIPTORS- \*Academic Achievement; Chemistry; Comparative Analysis; \*Cooperative Learning; Higher Education; Research; Science Instruction; \*Sex Differences; \*Student Attitudes; \*Student Reaction; Undergraduate Students; Undergraduate Study

This report examines an attempt to use cooperative learning in two sections of a college chemistry course and focuses specifically on male and female student attitudes and achievement in the course. A total of 46 students participated. One lab section used cooperative structures throughout an entire 16-week semester while the other section used independent lab structures until week 8 at which time cooperative learning was employed. While cooperative learning did not produce differences in achievement along gender lines, there were discernible differences in male and female attitudes toward cooperative learning and in the effects that cooperative learning might have on attitudes and beliefs toward chemistry. Cooperative learning reduced the negative slide on self-perception of ability, interest, and effort among females. Furthermore, the preference for this mode of learning was heightened among females. A major adverse effect was that females expressed a disproportionate feeling that their individual performance might have negative effects on others in such practices as group grading and jig sawing information for student presentation. The survey form is appended. (GLR)

IDENTIFIERS- \*Iterative Methods

Higher education institutions and systems must change to respond to the demands of a more complex era. Increased demand for education, continuing decreases in available funds to support institutions, rising costs, and questions about the quality of higher education suggest that the current system is inadequate. Much of the shape of higher education evolved in response to past needs of the nation's higher education sector. The current era places more complex demands on higher education and yet resources remained fixed or are decreasing. These changes define a new environment that requires resource reallocation. Yet the governance system appears incapable of reallocating funds due to the complexity of the sector, inadequate information, unclear priorities, and dispersed power. A new system must be a more participatory process and must be iterative: central administrators must reallocate resources, but departments must be centrally involved. Matching resources to goals requires criteria such as: quality, centrality, demand and workload, cost effectiveness, comparative advantage. The process of making allocation decisions is central and should not involve closed groups of administrators or faculty task forces which set priorities, should require public preliminary recommendations, and academic units should put forward ambitious plans while identifying their low priorities. DESCRIPTORS- \*Career Choice; Comparative Analysis; \*Females; Followup Studies; Higher Education; High School Graduates; High Schools; \*Outcomes of Education; Professional Occupations; Research; \*Single Sex Schools; Vocational Followup

This study compared the careers of women who graduated from all-girls independent secondary schools to the careers of those who graduated from comparable coeducational schools, in order to determine if there are differences between the career choices of these two groups. Comparisons were made of the number of women in each of 10 traditionally-male fields: medicine; law; engineering; dentistry; veterinary medicine; finance; computers; scientific research; architecture; and psychology. A total of 12,651 alumnae records were screened covering the periods from 1960 to 1985. Results showed that there were very few differences between the careers of graduates of girls' schools and those women graduating from coeducational secondary schools. In those cases where differences did occur, they all favored the coeducational schools. In none of the 10 fields did the graduates of the girls' schools have a proportionately larger number of women, which contradicts other research showing positive effects of girls' schools. Careful consideration of these conclusions is made in light of findings from other studies. Contains 19 references. (GLR)

IDENTIFIERS- \*Reform Efforts

Without a deliberate emphasis on designing and using technology to improve the organization of schooling, even the best learning technologies will have limited long-term impact on our educational system. Research has identified two key conditions of good schooling: students can learn well when they are actively engaged with multiple resources and people, and they can learn well in environments where they are personally well known. Technology can be the key to realizing these conditions. The most powerful way to integrate technologies into the schools is in concert with organizational change. Planning for reform must deliberately consider the contributions of technology to reorganizing schools. Examples drawn from the Dalton School (New York City), the Charlotte Middle School in Rochester (New York), and the Brooklyn Technical High School (New York City) illustrate the effective use of technology in schools to broaden resources open to both teachers and students. Reorganizing schools for thoughtfulness is neither short term nor simple. The process is enhanced by using technology as a resource for school reorganization. (Contains 22 references.) (SLD)

DESCRIPTORS- \*Childrens Literature; Elementary Education; Foreign Countries; Preschool Education; Psycholinguistics; \*Reading Instruction; Reading Material Selection; \*Reading Programs; Reading Teachers; \*Whole Language Approach

IDENTIFIERS- Goodman (Kenneth); United Kingdom

This article traces the development in Britain of the 'real' book approach to children learning to read. It begins with reference to Kenneth Goodman's seminal work in psycholinguistics published in the late 1960s. It goes on to draw on the work of Margaret Meek at the London Institute of Education and Liz Waterland, a teacher in an English primary school. Margaret Meek, the acknowledged doyenne of reading teachers, demonstrates the use and the place of quality fiction for children learning to read. While Margaret Meek concentrates on the value of quality children's literature, Liz Waterland writes from the point of view of the classroom teacher. She describes how adopting the 'real' book approach was a 'Damascus Road' conversion for her and one she could never go back on. An article by Colin Mills is discussed for the way it points out how the common language of education, derived from the behaviorist tradition, acts as a hindrance when applied to the 'real' book approach. Finally, an article by Henrietta Dombey offers readers a practical illustration of how one teacher helps pre-school children relate to the books read at story time. (Contains 12 references.) (KRN)

IDENTIFIERS- Cobb County Public Schools GA; Information Skills;

\*Librarian Teacher Cooperation; Teacher Surveys

To determine if cooperative planning between the library media specialist (LMS) and the classroom teacher affects the integration of information access skills into the curriculum, classroom teachers in grades 1 through 5 were surveyed in 10 randomly selected schools in Cobb County (Georgia). Of the 183 teachers surveyed, 131 returned questionnaires, a response rate of 72 percent. Classroom teachers (60.3 percent) stated that the LMS influenced their teaching of information access skills by providing resources either through classroom visitations or in planning sessions. Classroom teachers reported that topics of instruction during cooperative planning were discussion of useful materials and the examination of materials. Through cooperative planning, teachers stated, the introduction of information sources by the LMS helped them teach information access skills. Discussing and previewing resource materials and defining objectives appeared to be the primary areas of school LMS influence. Eleven tables present study data, and appendixes contain the cover letter and the 16-item survey questionnaire. (Contains 16 references.) (SLD)

IDENTIFIERS- \*California Community Colleges; Cross Angelo  
Classroom Assessment Model  
This manual offers practical guidelines, based on the work of K.  
P. Cross (1988) and T. A. Angelo (1991), on implementing a  
Classroom Assessment Training Project (CATP) at a high school  
or college. The manual contains information on planning,  
budgeting, training, and content. The Cross/Angelo Classroom  
Assessment Model relies on quick, anonymous written feedback  
from students about their understanding of course content and  
their reactions to instruction. Unlike tests and quizzes,  
Classroom Assessment Techniques are ungraded, allowing  
instructors to adjust instruction rather than assess  
achievement. Chapter 1 of the manual provides an overview of  
the Classroom Assessment Model, defining terminology, reviewing  
the model's philosophical and historical background, and  
outlining related research. Chapter 2 details the steps to  
implementing a CATP, covering administrative support, fiscal  
requirements, training of faculty leaders, reassignment of  
coordinators, compensation for faculty participants, clerical  
support, purchase of textbooks, sources of funding, budget  
breakdown for sample college, factors to ensure program  
success, selecting and training a leader/trainer, timeline for  
implementation, recruitment of faculty, and length and mix of  
training. Chapter 3 describes the faculty training sessions,  
providing information on planning, the content of the first  
training session, follow-up workshops, encouragement of teacher  
participation, and responses to problematic feedback. Finally,  
chapter 4 provides supplementary materials, including samples  
of a faculty leader contract, participant contract, and agenda  
and handouts for the first training session; the names, phone  
numbers, and disciplines of California community colleges  
faculty who have been trained in the techniques; and 18  
references. (PAA)

IDENTIFIERS- \*Student Assessment and Response System

In 1984, the Student Assessment and Response System (STARS) was developed by the Florida Junior College at Jacksonville (FJCJ) to establish a proactive student assessment system that translates data collection on student needs into counseling action. As part of the registration process, students may complete a STARS survey form, which lists available student services related to academic skills, educational planning, career development/job placement, personal/social development, and other areas, and asks students to mark areas in which they would like assistance. This information is then scanned into FJCJ's mainframe computer, which generates a STARS response sheet designed to provide general information on the specific services available, campus-specific information when available, and the name, office number, and telephone number of a campus resource person. In addition, the computer generates a list of students desiring assistance for each service and transmits them to the FJCJ staff designated as contacts for the services, who then provide the students with detailed service information. Feedback surveys are also provided to students completing STARS surveys to evaluate user satisfaction and to gather information on user characteristics. During its first term of college-wide implementation, over 1,600 students completed STARS surveys, generating about 5,000 mailers. A flow chart of STARS operation and the STARS survey instrument are included. (MAB)

Prepared pursuant to new Maryland accountability requirements, this report offers information on access and equity; student goal achievement; transfer preparation; employment and economic development; and student involvement, community involvement, and cultural activities at Charles County Community College (CCCC). The report's preface provides background on the accountability requirements, CCCC's mission, and the use of faculty and staff focus groups to explore the college's mission and outcomes. The accountability focus group calendar and questions are included. The next section presents data on CCCC's provision of educational access and equity, focusing on such indicators as the enrollment of minority, at-risk, and economically disadvantaged students; staff and faculty diversity; and nontraditional instructional offerings and enrollment. Next, CCCC's long-range objectives with respect to student goal achievement are outlined, and information is provided on graduate characteristics, graduation rates, graduates' ratings of the college, employment and transfer rates, and dropouts' reasons for not returning. Next, indicators of CCCC's success in preparing students to transfer are presented and analyzed, including transfer rates, relationship of CCCC and transfer majors, and student satisfaction. The next section focuses on CCCC's contributions to regional employment and economic development, including information program completers who passed the required licensure exams in nursing, enrollments in certification programs, program completers' satisfaction with their preparation for employment, and business contracts. The final section enumerates the college's goals with respect to student involvement, community involvement, and cultural activities; and lists indicators to be measured and sources of information. IDENTIFIERS- \*Education Consolidation Improvement Act Chapter 1; \*Ohio; Parent Advisory Councils

This report summarizes recent activities provided in Ohio through Chapter 1 of the Elementary and Secondary Education Act. Statistics for the 1991-92 school year and the summer that followed are presented, along with information on participation trends, instructional impact, expenditure and staffing patterns, parent involvement, and 5-year trends. The first section of the report explains the basic Chapter 1 services provided by Ohio's public school districts, including information on: (1) student participation; (2) instructional areas; (3) the impact of reading instruction; (4) the impact of mathematics instruction; (5) expenditure patterns; (6) staff positions; (7) inservice education; (8) parent involvement; and (9) parent advisory councils. The section concludes with a list of program successes, indicating that 610 of Ohio's 612 school districts conducted Chapter 1 programs, receiving a total of just under \$200 million in Chapter 1 funds to provide extra instruction for 146,606 educationally disadvantaged children. The next section describes special Chapter 1 services provided for the children of migratory agricultural workers and handicapped, neglected, or delinquent children being educated in state agency schools. The report concludes with a brief description of state leadership in implementing Chapter 1 and tables that provide a 5-year summary of grant awards and students served. The text is supplemented with 33 tables. (AC)

This document responds to issues raised in a Schools Council discussion paper analyzing the first years of schooling in Australia. The document is divided into nine chapters covering the following topics: (1) the national and historical context in which early childhood programs currently operate; (2) conditions that foster teachers' ability to work effectively with 5- to 8-year-old children in the schools, such as knowledge of children's characteristics, the use of developmentally appropriate practices, and appropriate staffing levels and class sizes; (3) school entry and transition issues; (4) parents and the community; (5) the accountability of school programs and school-based evaluation; (6) the role of schools in the context of social issues; (7) appropriate preparation for teachers working with 5- to 8-year-old children in schools; (8) methods of inducting teachers into the workplace, inservice training, and wider concerns of the child care industry; and (9) implications of the issues raised in this paper for education systems. A reference list of more than 130 items, a glossary of early childhood terms, and a brief description of early childhood systems in each Australian state are included. (MM)

PUB TYPE- Reports - Research/Technical (143), Speeches, Conference Papers, "Papers Presented at..." (150)

DESCRIPTORS- Child Development; Comparative Analysis;

\*Correlation; Foreign Countries; \*Intelligence; Intelligence

Tests; \*Interpersonal Competence; \*Maturity (Individuals);

\*Preschool Children; Preschool Education; Rating Scales; Scores

IDENTIFIERS- India

Social-emotional competence (SEC) is considered a measure of an individual's total effectiveness in dealing with the environment. To verify empirically whether SEC depends on the intelligence and social maturity of young children, a study of 40 preschool children was undertaken in India. A standardized intelligence test was administered to the children; to assess SEC and social maturity, children were observed in school and during home activities. Based on test and observation results, children were categorized into groups of high and low intelligence and into groups of high and low social maturity. Scores for the groups were compared with respect to four aspects of SEC: (1) self-confidence; (2) autonomy-dependence; (3) quality of social interactions; and (4) coping techniques. Data indicated that children categorized in the high intelligence group scored significantly higher than children in the low intelligence group on all four aspects of SEC. Similarly, children categorized as high in social maturity scored significantly better than children categorized as low in social maturity on the four aspects of SEC. From these findings it was concluded that a child's level of intelligence and maturity contributes significantly to social and emotional competency. (BCY)

Descriptions; Social Integration; \*Teacher Student Relationship

IDENTIFIERS- ERIC Trends Issues Papers; Ruhr Valley; \*Turks

This document presents three papers on multicultural education in  
early childhood, followed by a selected ERIC bibliography on  
the same subject. The first paper, "Multicultural Approaches in  
Education: A German Experience," by Carmen Treppte, describes  
the development of Turkish Children and Mothers, a project  
designed to help preschoolers in the Ruhr Valley of Germany  
develop linguistic, motor, cognitive, and social abilities. The  
paper also describes various aspects of the project, including  
those that relate to maternal involvement, educational  
facilities, the needs of project participants, and cultural  
factors that should be considered when serving the ethnic  
Turkish minority that is adapting to German culture. In the  
second paper, "Culture, Schooling, and Education in a  
Democracy," Victoria R. Fu defines multiculturalism, draws  
distinctions between education and schooling, proposes a  
conceptual framework for implementing multicultural education,  
and examines Bronfenbrenner's and Vygotsky's concepts of  
development. The third paper, "Responsive Teaching: A  
Culturally Appropriate Approach," by Andrew J. Stremmel,  
explains responsive teaching, which involves the construction  
and negotiation of shared meaning or perspectives during  
interactions, and suggests ways to help early childhood  
teachers become more responsive in their interactions with  
children of various backgrounds. A reference list is provided  
with each paper. The bibliography that follows the papers  
contains 34 documents and 36 journal articles on  
multiculturalism in early childhood programs selected from a  
search of the ERIC database. Each item in the bibliography  
contains bibliographic information and an abstract of the  
document or article. (BC)

IDENTIFIERS- Kentucky; \*Kentucky Education Reform Act 1990

This document consists of the first five issues of "Notes from the Field," a serial documenting a 5-year study of the implementation of the Kentucky Education Reform Act (KERA) of 1990 in four rural Kentucky school districts. The first issue provides a brief overview of KERA policies and the status of their implementation in the study districts. It covers: (1) school-based decision making; (2) preschool education; (3) family resource centers and youth services centers; (4) extended school services; (5) political measures; (6) superintendent selection process; (7) termination of teacher contracts; and (8) finance. The second issue focuses on school-based decision making and reports that all study districts are implementing this component on schedule. Differences exist among the districts, however, in their aggressiveness of implementation and their interpretation of the law. A survey of staff in two districts shows general support for school-based decision making. The third issue reports on the establishment of family resource centers (elementary schools) and youth services centers (secondary schools), based on visits to four centers. All centers visited were fully operational and appeared to be successfully coordinating community services. The three family resource centers were focusing on health services and parent and child education, while the youth service center was providing all six services listed in KERA. The fourth issue features KERA finance measures and analyzes how these measures have affected the study districts. The analysis reveals that education funding increased substantially in the four rural districts since the passage of KERA. Most of the new funding went to salary increases, instructional and library supplies, and programs to help at-risk students. Although it is not possible to study the equalization effects of KERA with such a small sample, per pupil revenue appeared to become more equal among three of the four districts. The fifth issue summarizes teacher focus-group discussions in each of the four school districts. The teachers were largely supportive of the basic philosophy and programs of KERA and hopeful that the legislature would stick with the law long enough for it to work. They were frustrated, anxious, and fatigued, however, from trying to make massive changes in a relatively short period of time. While some of their anxiety may be seen as a natural part of the change process, it is clear that teachers need more time, assistance, and resources if they are to keep up the present level of implementation. DESCRIPTORS- Ancillary School Services; Coordination; \*Identification; \*Migrant Children; Migrant Education; \*Migrant Programs; National Surveys; Preschool Children; \*Preschool Education; Social Services; \*State Programs; Training

In spring 1991, the National Preschool Coordination Project sent a questionnaire regarding preschool services to all state migrant education programs. Over half of the states responded. Findings indicated that: (1) there is a need for improved identification and recruitment of migrant children aged 3-5 years; (2) the majority of jurisdictions offer needs assessment, emergency health, and social service referrals; (3) two in three jurisdictions offer parent training; (4) nearly one in two respondents thinks that less than half of identified children are currently receiving services; (5) current information and resources available to staff are judged to be somewhat or very inadequate by over 60 percent of respondents; (6) most states perceive a need for enhanced interstate coordination; and (7) the majority of respondents lack resources to facilitate interagency and interstate coordination and also lack curriculum in Spanish and other home languages. The report provides detailed findings for each survey question. (KS)

IDENTIFIERS- \*National Science Foundation

The data presented in this report represent all categories of direct Federal support to institutions of higher education in the United States. The data were provided by the 15 federal agencies that account for virtually all support for science and engineering (S&E) research and development (R&D) at universities, colleges, and nonprofit institutions. The data presented are collected annually through the National Science Foundation's Survey of Federal Support to Universities, Colleges, and Nonprofit Institutions, which originated in 1965. The survey collects information on: (1) total program support in thousands of dollars (encompassing both S&E and non-S&E activities) to academic institutions; (2) total S&E support to federally funded research and development centers (FFRDCs) administered by academic institutions; and (3) R&D and R&D plant support to nonprofit institutions and associated FFRDCs. (Data on FFRDCs have not been published in this report.) The report begins with general notes on the survey and a section of technical notes explaining the scope of the survey and the organization of the report and giving definitions of the terms used. The detailed statistical tables that follow the technical notes constitute the bulk of the report and cover trends and total obligations, geographic distribution, institutions ranked in order of amount received, historically black colleges, institutional listings by state, and systems of universities and colleges. Reasoning Strategies of Students in Solving Chemistry Problems as a Function of Developmental Level, Functional M-Capacity and Disembedding Ability.

PUB DATE- Apr 93

NOTE- 36p.; Paper presented at the Annual Meeting of the National Association for Research in Science Teaching (Atlanta, GA, April, 1993).

LANGUAGE- English

EDRS Price- MF01/PC02 Plus Postage.

PUB TYPE- Reports - Research/Technical (143), Speeches, Conference Papers, "Papers Presented at..." (150)

DESCRIPTORS- Academic Achievement; Chemistry; Cognitive Processes; \*College Freshmen; \*College Science; Concept Formation; \*Formal Operations; Higher Education; \*Problem Solving; \*Science Education; Scientific Concepts; \*Thinking Skills

Achievement in science depends among other factors on hypothetico-deductive reasoning ability; that is, on the developmental level of the students. Recent research indicates that developmental level of the students should be studied along with individual difference variables such as Pascual-Leone's M-capacity (information processing) and Witkin's Cognitive Style (disembedding ability). The purpose of this study was to investigate reasoning strategies of students in solving chemistry problems as a function of developmental level, functional M-capacity, and disembedding ability. A sample of freshman students (n=109) were administered tests of formal operational reasoning, functional M-capacity, disembedding ability, and chemistry problems (limiting reagent, mole, and gas laws). Results show that students who scored higher on cognitive predictor variables not only have a better chance of solving chemistry problems but also demonstrated greater understanding and used reasoning strategies indicative of explicit problem solving procedures based on the hypothetico-deductive method, manipulation of essential information and sensitivity to misleading information. It was also observed that students who score higher on cognitive predictor variables tend to anticipate important aspects of the problem situation by constructing general figurative and operative models leading to a greater understanding. Students scoring low on cognitive predictor variables tended to circumvent cognitively more demanding strategies and adopt others that helped them to overcome the constraints of formal reasoning, information processing, and disembedding ability. IDENTIFIERS- \*Militarism

World political changes since 1988 have ended the Cold War era of constant threats of confrontation and nuclear annihilation. The culture of militarism that influenced business, industry, and education served a purpose by dividing the world into good and evil. The changes that have removed the threat of militarism require a redefinition of the peace movement. The greatest task for teachers is the conversion of the war structure into a peace structure by converting the association of peace in the context of a nuclear catastrophe to the idea of peace as man's humanity to man. Educators must be ready to eradicate physical, economic, psychological, and ecological violence. In order to promote peace education, teachers must define global, national, and personal goals that are comprehensive enough to include many aspects of peace. These include personal relationships, economic equality, the value of human rights, and the elimination of violence toward the environment. U.S. and Russian teachers should (1) define common goals of peace education for children, (2) strive to make experiences in peace education a mandatory part of the curriculum in both countries, (3) organize a course focusing on common teaching objectives, (4) develop instructional materials on peace in a multicultural mode, and (5) develop a common teacher training program. IDENTIFIERS- ERIC Digests; National Education Goals 1990

Recent state-level curriculum frameworks have emphasized geography and history as core subjects of the social studies sequence of courses, from kindergarten through the twelfth grade. This Digest presents a rationale for the connection between geography and history, presents ideas for developing this connection within the curriculum, and highlights exemplary instructional materials. It is contended that key concepts of geography, such as location, place, and region are tied inseparably to major ideas of history, such as time, period, and events. Geography and history in tandem enable learners to understand how events and places have affected each other across time, and how people have influenced and have been influenced by their environments in different periods of the past. Curriculum developers and teachers interested in connecting geography with history in the curriculum might begin with the five geographic themes: location, place, relationships within places, movement, and region. The Agency for Instructional Technology (AIT) has produced 10 video programs, "Geography in U.S. History," that connect the five geographic themes to key events in U.S. history. These 10 programs as well as other teaching tools are described in the Digest. A list of 17 references is included. (DB)

IDENTIFIERS- Canada; Francophone Education (Canada); French (Canadian); \*Manitoba; Manitoba Department of Education

This document is the second of two reports of the findings of the 1991 "Sciences...humaines" Assessment for grades 8 and 10 conducted in Franco-Manitoban schools and in French immersion programs in Manitoba, Canada. The report on the French immersion course is presented in parallel French and English versions, and a separate report, in French only, is provided for the Franco-Manitoba schools assessment, which differs from the other assessment only in its statistical data. It contains a description of the study along with conclusions and recommendations. The assessment consisted of student tests and a teacher survey. The student tests measured knowledge skills, thinking and research skills, attitudes and values, and social participation, with subtests measuring these skills and knowledge of different historical periods. The teacher questionnaire reveals that teachers like the general history course for grade eight, find it appropriate for the grade level, but agree that the program is overloaded. Preferred teaching methods are discussion and presentation. Assessment is by classroom test. The teachers indicated a need for more and better didactic material and professional development opportunities. Recommendations include revision of the grade 8 curriculum and the updating of the Canadian geography bibliography in grade 10. The report suggests that greater emphasis be placed on developing higher order thinking skills and enabling students to form opinions. Provincial inservice sessions on the philosophy of the curriculum, its content, cooperative learning strategies, didactic material, evaluation and integration of subject matter should be provided for teachers. Alternative methods of instruction should be encouraged. Networking should be used for sharing of information, classroom observation, and shared planning activities. Teacher skills and library resources should be increased for social studies. (DK)

Vocational Education; \*Vocational English (Second Language)

IDENTIFIERS- \*Workplace Literacy

A 16-week, 600-hour Office Skills Training curriculum for limited English proficient (LEP) adults is presented. The course is divided equally between the vocational training component and the language component. It is recommended that students have an intermediate level of English language proficiency, but no experience in typing or filing is required. The curriculum provides a competency-based approach that identifies minimum performance criteria needed to function in a given situation. Lists of vocational competencies and language competencies are included in this text. An English-speaking aide is recommended for both the vocational and vocational English-as-a-Second-Language (VESL) component. The office skills component focuses on the following four units: keyboarding, filing, using calculators, and using a copier and facsimile machine. The VESL component includes such topics as: introductions and greetings, asking and answering questions, grammar, pronunciation, telephone skills, and safety in the workplace. A resource bibliography for both VESL and office skills is included. Appended are a vocabulary list for office skills, and keyboarding, filing, calculator, and communications handouts. IDENTIFIERS- Family English Literacy; Washington (Seattle)

The Refugee Women's Alliance (ReWA) is a nonprofit, mutual assistance association located in Seattle, Washington, with the mission of helping refugee women achieve self-sufficiency in the United States. This partially annotated bibliography contains 117 items dated primarily from 1983 to 1991. Most entries are drawn from the resources used by the staff, board and volunteers at ReWA. The bibliography focuses on practical and accessible resources that complement many standard comprehensive bibliographies on refugee services and theory. The bibliography contains eight sections, of which the first six include resources that are helpful in designing, setting up, and evaluating mental health, family literacy, domestic violence, health care, and employment programs. The last two sections include resources that provide background information on the refugee peoples served by ReWA and the theoretical and policy contexts within which academic research on refugee peoples is placed. background for a study design workshop held in November 1991, 45 reviews of the papers, and the proceedings of the study design workshop, "National Assessment of College Student Learning: Issues and Concerns." Chapter 1 addresses what it means to undertake a national assessment of college student learning and raises issues inherent in such a national assessment. Chapter 2 considers what specific skills should be assessed (critical thinking skills, assessment in the workplace, assessment in the colleges--basic skills and general intellectual skills, literacy and writing assessments, and necessary research). Chapter 3 raises six standards and other measurement issues: (1) relationship of standards to the task of defining a national assessment of college student learning; (2) historical context for standards; (3) relationship of standards of National Assessment of College Student Learning to the overall charge of Goal 5; (4) the testing of subject-specific content domains; (5) reasonableness of a single set of standards; (6) and the debate over portfolio assessment and its relationship to standards and values issues. PUB TYPE- Reports - Evaluative/Feasibility (142)

DESCRIPTORS- Abstract Reasoning; Cognitive Development; \*College Faculty; College Students; Higher Education; Interdisciplinary Approach; Learning Strategies; Private Colleges; \*Program Descriptions; Program Evaluation; Staff Development; Thinking Skills; \*Undergraduate Study

IDENTIFIERS- Bethany College WV; \*East Central College Consortium; Heidelberg College OH; Hiram College OH; Marietta College OH; Mount Union College OH; Muskingum College OH; Otterbein College OH; \*Thinking Across the Curriculum; Westminster College PA

Between 1985 and 1988 eight colleges implemented a "Thinking Across the Curriculum" program and a procedure for assessing the impact of the program on the cognitive development and thinking skills of students. One hundred and twenty faculty members participated in the project and approximately 1,800 students studied in courses developed as part of the program. The project's two goals were to help faculty improve and enhance their ability to teach thinking in traditional content based courses already part of the school curricula and to enable students to improve and enhance their thinking and reasoning skills by concentrating on the thought processes required of them in a variety of courses. Central program components were faculty development in student cognitive development, teaching and learning styles, and strategies for teaching thought in specific disciplines. A study of the program's impact included looking at student and faculty perceptions in a random selection of 26 courses and 506 students. The results suggested that courses with class sizes as large as 30 to 40 can be effectively revised to encourage vigorous thinking. Results also suggested that all fields of study can use a cross-curriculum program in teaching thinking.

tracked faculty (N=185). Questionnaires were returned by 100 faculty in the second cohort, and by 19 of 23 faculty in the first cohort; 20 of the first cohort faculty were also interviewed. Findings showed that from optimistic and enthusiastic beginnings, work stress increased and job satisfaction deteriorated over time. Budget restrictions and less resource availability were seen as being detrimental to career development. New faculty desired more assistance than they received in adjusting to their new setting and in establishing themselves as researchers and teachers, a condition particularly strong in female faculty. Finally, 82 percent of faculty, after their first year, indicated a likelihood of seeking jobs with other universities within the next year. These results suggest a greater need to provide social, intellectual, and physical support in attracting, developing, and retaining new and junior faculty, and recommendations for this are provided. Contains 10 references and 10 tables. (GLR)

IDENTIFIERS- \*Alabama; \*Florida

This report presents the evaluation results gathered from a 2-year study of a drug prevention program involving a consortia of nine colleges and universities located in Alabama and Florida. The consortia effort was intended to: (1) strengthen their respective drug prevention activities; (2) develop policies governing alcohol and drugs; (3) implement institution-wide drug education and prevention programs; and (4) establish a network of prevention specialists on each campus with plans for continuity. Although many of the goals were achieved, formal institutionalization of the consortia remains doubtful, and cessation of federal funding has caused organizational leadership to become questionable. Several of the consortia institutions have demonstrated significant staff reassignments and turnover during the grant period. While a support network of contacts has been provided to the consortia members, the lack of consistent support and commitment makes it unlikely that staff will be able to firmly establish strong consortia leadership. projected that UMES students in 1990 spent over \$7 million on goods and services unrelated to educational expenses. The 1990 after-tax purchasing power of all Princess Anne residents was approximately \$10.3 million. Thus student purchasing power appears to nearly double the potential market for goods and services in Princess Anne. However, the bulk of the estimated \$4 million spent on recreation, clothing, and automobiles is not spent in Princess Anne. Less than one-third of the estimated \$600,000 off-campus student housing market is captured by Princess Anne. UMES impacts only slightly on municipal finances with no direct effect on municipal revenues or expenses though it employs an estimated one-fifth of the town's labor force. Results suggest that the economic health of Princess Anne is closely associated with UMES operations and that the town's master plan should incorporate a vision of itself as a university town and articulate a detailed response to the local effects of campus operations. Appendixes list town businesses with telephone numbers, provide projected enrollment figures, and list 19 references. (JB)

DESCRIPTORS- Administrator Attitudes; \*Curriculum Design; Educational Philosophy; Higher Education; Interviews; \*Medical Education; \*Medical Schools; \*Models; Nontraditional Education; Teacher Attitudes

IDENTIFIERS- \*Biomedical Model; \*Psychosocial Factors

A study was done to broaden the understanding of how medical school programs can integrate the biomedical and psychosocial domains and to gather information for curriculum and program development and evaluation. The study used an exploratory, qualitative research approach and collected data through interviews with 22 expert medical faculty and administrators and through document reviews. The respondents described an integrated model that is broad in scope and that incorporates both a wider scientific theory and a more inclusive approach to medical practice than is offered by the current biomedical model. The integrated model embraces characteristics of a classic biopsychosocial model in its focus on the individual patient and the systems in which the patient is embedded and it also looks beyond to embrace a broader agenda for the community or population level. Findings also suggest that for a medical school to help students learn an integrated approach the curriculum should be patient-centered, integrated, developmental, and population-based. Ideal curricula would reflect all four characteristics throughout the curriculum resulting in programs that are in concert with principles of adult education and with the emerging health care needs of the population. Such curricula could be organized around the problems of practice and would support the creation of reflective practicums. (Contains 28 references.) (JB)

IDENTIFIERS- African Americans

This paper examines, via an exploratory approach, the factors in doctoral programs that may potentially guide, motivate, and influence African American doctoral students to pursue careers in higher education. Interviews with 42 participants, 23 current students and 19 former doctorate recipients, were conducted, placing emphasis on interviewing more respondents from the education field, the field of study of the majority of African Americans. Five types of relationships that African American doctoral students have with their major advisors were identified: (1) formal academic advisement; (2) academic guidance; (3) quasi-apprenticeship; (4) academic mentoring; and (5) career mentoring. These relationships were found to differ with respect to the character of involvement between major advisors and these doctoral students. The findings of the study indicated that African American doctoral students have a variety of relationships and involvements with their major faculty advisors. Of these relationships, the student-advisor relationship was identified by respondents as being the most nonsatisfying of the various involvements. Of the five relationships studied, quasi-apprenticeship, academic mentoring, and career mentoring had the most significant impact on African American doctoral students seeking careers in higher education. IDENTIFIERS- Digital Data

Hypermedia applications have presented information through a variety of visual media, but the aural channel for information delivery has not been well developed. To reduce the likelihood of overloading the visual channel of communication in a program that presents a great deal of information through graphic illustration and animation, the hypermedia program "Field Kit Workshop" (FKW) uses speech as the primary means of delivering verbal information. FKW is an interactive simulation that introduces students to operating features of professional video production equipment. A formative evaluation was conducted with 13 volunteer students of video or audio production to explore user response to speech as used in FKW, and to help guide implementation of speech in the program's final design. Results suggest that speech was accepted by users within a program that is well-designed overall, and in which the design takes into account the special strengths and weaknesses of speech as a medium for delivery. Sixteen figures illustrate the discussion, and an appendix presents an excerpt of a program script for FKW. (Contains 8 references.) (SLD)

DESCRIPTORS- \*Databases; Evaluation Methods; Financial Support; Health Personnel; Information Dissemination; Library Networks; \*Library Services; \*Medical Libraries; Needs Assessment; Online Searching; \*Online Systems; \*Outreach Programs; \*Physicians; Program Evaluation; Rural Areas; Urban Areas; Users (Information); Use Studies

IDENTIFIERS- Medical Information Systems; MEDLINE; Texas (South)

This project examined the impact of the University of Texas Health Science Center's Circuit Library Health Information Network (CLHIN) on availability and usage of medical information to health professionals and the effect of the promotion of online services, GRATEFUL MED and MEDLINE (flat rate). The project included a survey of physicians, analysis of use statistics of CLHIN services, and analysis of flat-rate password purchasers and use. Findings showed that differences in user profiles did not affect information usage; differences in information use between physicians in urban and rural areas are related to the use of MEDLINE and libraries; physicians did not search MEDLINE by themselves; the program has succeeded in providing information to an underserved area; CLHIN's impact in developing GRATEFUL MED users is not measurable; the generalizability of the CLHIN model of circuit librarianship is unclear; an effective circuit librarian and institutional liaison are critical to success; the project was successful in introducing users to online services; perceived value for price and convenience motivated purchase of the flat-rate password; the median reasonable flat-rate charge recommended by participants was \$150; use of the flat-rate password varied by professional training and academic affiliation. Also included are 37 statistical tables, a report on medical information and availability, physician information needs surveys, a description of promotional and training activities, and a survey of flat-rate MEDLINE password holders. (Contains 39 references.) (KRN)

Phillips, Judith  
Social Issues in Australian Children's Literature.

preservation of film materials pursuant to proposed amendments to federal legislation regarding copyrights included in House Bill 2372. Fair use provisions spell out some exceptions to statutorily defined rights of copyright holders. It is sometimes in the public interest to provide limited free use of protected materials, and the fair use of unpublished material has been of interest in recent court decisions. Whether legislation is needed to further define fair use is the subject of the first days of hearings. Also considered in this series of hearings are questions relating to amendments of copyright renewal conditions and terms, and the reauthorization of the National Film Registry of the Library of Congress. Proposed legislation would advance the goals of the 1988 legislation establishing the registry. Testimony from 23 witnesses was received in relation to these issues; and letters, statements, and the prepared testimony of the witnesses are included. Twenty-five appendixes provide supplemental information. The text of the bill precedes the hearing transcripts. (SLD)

IDENTIFIERS- \*California Community Colleges; \*Cross Angelo Classroom Assessment Model

In 1992, eight two-year colleges in Northern California were chosen to participate in a quantitative study of the relationship between student outcomes and the use of instructional methods recommended in the Cross/Angelo Classroom Assessment Model. The model supports the modification of instruction based on frequent, quick, and anonymous written feedback from students about their understanding of course content and their reactions to instruction. The study compared retention, grade distribution, and classroom environment data for classes in which Classroom Assessment techniques were used and those in which they were not employed. Outcomes comparisons were also made by gender and ethnicity. A first research design compared student retention for the same instructor before and after the instructor received training in and implemented Classroom Assessment techniques. In a second design, trained instructors either utilized or withheld Classroom Assessment techniques with different sections of the same course. Pilot studies were first conducted in summer 1992, with larger studies conducted in fall 1992 and spring 1993. Study findings included the following: (1) retention rates for women in Classroom Assessment classes were higher than in control classes, though retention did not change for men; (2) grade point averages in Classroom Assessment classes were not significantly higher than in control classes, though there were a higher percentage of "A's" among Classroom Assessment students; and (3) minority students felt more positive about the classroom environment in Classroom Assessment classes than in control classes. A literature review; results of student and instructor surveys; recommendations; study letters and survey instruments; and a 52-item bibliography are included. (PAA)

Jacksonville (FCCJ) placed on academic warning, probation, or suspension, the seven sections of this booklet provide a self-directed approach for identifying some of the factors contributing to students' academic difficulties, and describe resources available to students at the college. The first section reviews FCCJ's Standards for Student Success, describing the college's minimum expectations of reasonable academic progress for credit and non-credit students; the conditions warranting academic warning, probation, suspension, and reinstatement; and suggested activities for returning to satisfactory academic standing. The next section presents a self-evaluation exercise for identifying personal and social strengths and liabilities related to academic success, while the following section provides an academic check-up for students to assess their goals and motivation; academic skills; time management; memory; note-taking; and test-taking. This section also lists print and computer resources to address each of these areas. A description of academic services follows, including FCCJ's counseling and advising services, learning assistance centers, enrollment services, and other specialized services. Next, a list of key factors covered during an appointment with an academic counselor or advisor are presented. The next-to-last section describes 18 common sense things students can do to increase their chances of success (e.g., developing a clear goal, registering early, talking to instructors), and the last section, called "Taking Action" presents a worksheet for students asking them (1) to identify three of the most important things they can do to pave the way for a positive change in their academic progress; and (2) to sign a pledge of commitment to those objectives. IDENTIFIERS- \*Academic Alert System; \*Florida Community College at Jacksonville

Florida Community College at Jacksonville's (FCCJ's) "A Learning Enhancement and Retention Tracking" (ALERT) system is a computerized retention program which collects and utilizes a range of retention-related information to help students achieve their goals. Upon application for admission, students complete an ALERT Advising and Retention Information (ARI) sheet, which collects data on goals, employment plans, enrollment intent, and learning preferences. ARI data is used with the student record and test scores to generate an ALERT orientation profile that counselors can use to advise students on course selection and recommend intervention activities. Faculty are provided with a student profile for each course, listing enrollees,

School Surveys; \*Student Attitudes; Student Behavior; Two Year Colleges; \*Two Year College Students

IDENTIFIERS- \*Charles County Community College MD

In spring 1993, Charles County Community College (CCCC) in Maryland conducted a telephone survey of students who had been enrolled at the college the previous fall but did not return for the spring semester. A total of 1,655 students were identified as non-returning by the third week of classes in spring 1993, representing 29% of the fall 1992 student population. Of these students, half were randomly selected to be surveyed. Study findings, based on 283 usable responses, included the following: (1) 31.3% of the respondents cited "job demands" as a major reason for not returning, while 19.8% cited "insufficient time," and 14.1% indicated that they had "achieved educational goal"; (2) 9% of the respondents indicated that the college could have helped them to return to college; (3) 58% of the respondents indicated plans to return to CCCC; and (4) extrapolations of survey results suggested that CCCC could possibly have influenced 358 non-returning students to enroll in spring 1993. For comparative purposes, an survey was conducted of all 118 recent high school graduates enrolled at CCCC in fall 1992 who did not return in spring 1993. Among the 111 respondents, 47% cited "job demands" as a major reasons for not returning to CCCC, while 26% stated they had "transferred," and 24% reported having "moved from area." In addition, 10% reported that the college could have helped them return in spring 1993, and 32% cited plans to return to CCCC. Comparisons with results of the spring 1992 non-returning student survey; copies of the survey instruments; data tables; and respondents' narrative comments are included. (PAA)

IDENTIFIERS- \*Alliance for Excellence VA

In an effort to increase opportunities for minorities in higher education in the face of rising costs and decreasing funding, the Alliance for Excellence (AFE) was formed in 1986 in Roanoke, Virginia as a partnership between black churches and community colleges. The partnership seeks to combine the local resources of the colleges with the community-based leadership of black congregations to increase the enrollment of black students at area community colleges to reflect the percentage of the black population in each college area. Moreover, AFE focuses on increasing retention, graduation, and transfer rates

Behavior; \*Infants; Naturalistic Observation; Pain  
IDENTIFIERS- Emotional Distress; Emotions; \*Emotion Theory;  
\*Negative Affect; Sadness; Surprise

To make the point that infant emotions are more dynamic than suggested by Differential Emotions Theory, which maintains that infants show the same prototypical facial expressions for emotions as adults do, this paper explores two questions: (1) when infants experience an emotion, do they always show the corresponding prototypical facial expression?; and (2) do the facial configurations of the AFFEX coding system (described by Izard, Dougherty, and Hembree) for anger, sadness, and pain really express discrete emotions? To support the argument, the results of laboratory studies and naturalistic observations are cited. Several studies of babies' facial expressions have shown that babies do not always produce expressions of fear or surprise in situations that normally induce those emotions. The lack of situational specificity (the expression of an emotion in a situation in which the emotion is assumed to be present, and the lack of its expression in other situations) for anger, sadness, and pain found by some studies suggests that the expressions may reflect a general form of negative affect. Studies that involved observer judgments of infant facial expressions found that judgments were less accurate than expected. The report concludes that the AFFEX configurations are probably not expressions of discrete anger, sadness, and pain, and offers three possible explanations of the relationship between infants' emotion and expression: (1) infants have discrete emotions of pain, anger, and sadness and emotion-specific facial expressions, although researchers have not yet discovered what those expressions are; (2) infants show the same expressions for anger, sadness, and pain; and (3) infants do not have discrete negative emotions, but do have a less differentiated state of distress. IDENTIFIERS- \*Mixed Age Groups; Teacher Surveys; Virginia

This study examined the perceptions of teachers experienced in working with mixed-age groups in child care settings for children from birth through age 12. A mixed-age group was defined as one with children having at least a two-year range in age. Questionnaires were mailed to 92 licensed family child care and school-age child care providers in Virginia, with a 27 percent response rate. Teachers responded to open-ended questions regarding the benefits and disadvantages of working with mixed-age groups. Results showed that providers agreed that both older and younger children more readily learn sharing, new skills, and new roles. Older children learn patience, nurturing, family roles, and leadership; younger children more rapidly learn sharing, new skills, and language. Providers perceived very few adverse affects to managing a mixed-age group of children. The primary concern was with

with the political, economic, and social policies of Australian society. Antagonists and protagonists of child care have put forth arguments against and for child care, respectively, over the past two decades. Supporters of child care have variously viewed child care as a needs-based welfare service, as an integral part of a systemic approach to family support, and as a children's service. The government has attempted to support child care by providing fee relief subsidies to users of commercial child care. As a result, users of commercial child care are entitled to more fee relief than users of community-based centers, and fees have increased in the private sector. Attempts have been made to address issues of award restructuring, accreditation of services and personnel, and work-related child care. Policies that have involved recognition of prior learning and reorganization of existing courses into modules have sought to address problems in the training of child care workers. A further important but complicating factor in attempts to improve the education of child care workers is the need to rationalize the two opposing viewpoints of child care as a profession and as an industry. IDENTIFIERS- Australia; \*Caregiver Attitudes; \*Teacher Problems; Teacher Surveys

This study examined the needs of beginning early childhood teachers in their first year of work in primary schools, kindergartens, or child care centers in Australia. The study surveyed teachers in 1988, 1989, and 1990; this paper discusses the results from the 1990 survey. Subjects were 31 teachers who responded to a questionnaire that concerned their perceptions of professional life. Teachers were also administered Fuller's Teacher Concerns Survey, which consists of an open-ended question about teachers' professional concerns. The questionnaire yielded responses which indicated that beginning teachers had a positive attitude toward their jobs, the children they taught, and their colleagues. Responses to the Teacher Concerns Survey indicated that the majority of respondents wanted to do their best, but above all, to survive in their jobs. (MM)

University students enrolled in a teacher's aide seminar were trained as volunteer tutors. Training focused on gross and fine motor skills, social skills, language development, and cognitive development. In addition, parents were trained in the use of materials and techniques to improve their children's social, physical, cognitive, and language skills, and were provided with relevant instructional materials for home use. For the project's first year, pre- and posttests were administered to tutors, parents, and children to measure changes in attitudes and skills. Tutors' responses revealed an increased understanding of the children and satisfaction with their own tutoring abilities, while parents reported improved skills in their children, including increased politeness, and increased willingness to take turns and to exert effort. Finally, test data for 55 of the 104 Head Start children who began the project indicated gains in all skill areas, with the highest gains registered in fine motor and self-help skills. By the end of 1993 the program is expected to involve over 20 college students and provide tutoring for over 200 four-year-old children. (BCY)

Legislation; \*Student Transportation

IDENTIFIERS- \*New York (Westchester County)

Based on countywide interviews with transportation and child care personnel in Westchester County, New York, this report describes current practices, legislation, and issues related to the transportation of elementary school children to and from child care providers. Following a brief introduction, the report discusses various regulated and nonregulated child care options in the county and summarizes the provisions of the 1990 state transportation bill that made child care transportation optional for each district. The report goes on to review current practices in the 40 county school districts, indicating that, as of November, 1990: (1) 46% of the districts transported students to both regulated and nonregulated arrangements districtwide; (2) 12.5% transported children to both types of arrangements within school attendance zones, but only to state regulated programs districtwide; (3) 7.5% were developing transportation policies; (4) 20% had transportation systems in place for schools, but did not transport children to child care programs; and (5) 12.5% had no transportation at the elementary school level. Issues influencing district policies, including transportation costs, the size and density of the district, existing practices of busing children districtwide or via neighborhoods, and the availability of child care programs are discussed next. Finally, the report presents recommendations to establish consistent policies, enact minimum participation requirements, extend time limits, and reduce district mileage limits. District maps are included. (BCY)

IDENTIFIERS- Educational Issues; ERIC Trends Issues Papers; Habits

This monograph consists of a paper that examines the construct "disposition," and explores its relevance to curriculum and teaching practices in early childhood education, and a selected ERIC bibliography relating to this subject. The paper is organized in two parts. Part 1 provides a definition of disposition and definitions of the related terms "inclination," "cognitive style," and "learning style." The definition of disposition can be clarified by comparing the construct of disposition to other personal characteristics, namely: (1) traits, which are sometimes not distinguished from dispositions; (2) thought processes; (3) skills, which may exist without the disposition to use them; (4) attitudes, which are enduring organizations of beliefs; (5) habits, which are actions that are not the consequence of reflection; (6) the work inhibition of children who do not do work required of them despite their capability to do so; and (7) motives, which are considered to be more general than dispositions. Part 2 suggests seven reasons why the development of desirable dispositions should be included among the goals of early childhood education. The most important of these reasons is that the acquisition of knowledge and skills alone does not guarantee that children will use the knowledge and skills. A list of 47 references is provided. The bibliography that follows consists of 13 documents and 38 journal articles on dispositions, motivation, and praise that were selected from a search of the ERIC database. Each item in the bibliography contains bibliographic information and an abstract of the document or article. (BC)

Research; Theories

IDENTIFIERS- Chicanos

This book contains 14 research papers and reviews on the development of ethnic identity in childhood and adolescence and the transmission of ethnic identity within families and across family generations. The research focuses on Hispanic-Americans, particularly Mexican-Americans; some studies include Blacks, American Indians, Asian-Americans, and Whites (Anglos). Part I discusses the childhood development of ethnic identity in relation to the development of gender and racial identity, an instrument for the assessment of ethnic identity in Mexican-American children, the relationship of ethnic identity development to cognitive development, a model of adolescent ethnic identity development based on ego identity theory, and the relationship of adolescent ethnic identity and biculturalism to school environment. Part II examines the ethnic socialization of minority group children through parental teaching about ethnicity and culture; identification issues related to the census and other demographic research; and the effects of recency of parental immigration, parental ethnic identity, ethnic intermarriage, and family acculturation on children's ethnic identity. Part III presents a model of ethnic socialization in minority children based on social learning and cognitive development theories, and discusses psychoanalytic and Piagetian perspectives on ethnic identity development. Part IV explores possible adaptive ethnic-group responses to government policies that value or devalue cultural differences, and the effects of assimilationist public policy on social research design and results. This book contains author profiles and indexes by author and subject. (SV)

IDENTIFIERS- Australia; \*Showmens Guild (Australasia)

Children of families in the Showmen's Guild of Australasia have traveled throughout Australia for generations as their families followed show circuits. Educational provision for these children has varied enormously in the past. In 1992, the Queensland Department of Education assigned three teachers at the School of Distance Education (Brisbane) to meet the needs of this group through use of existing distance education materials and newly developed, individualized strategies and materials. The program also supplied teachers in 18 schools attended by show children during show weeks. Interviews with parents and students sought to develop an understanding of practices and issues in the provision of education to this educationally disadvantaged group; to determine the degree of family satisfaction with present provisions; and to assess the potential of such programs for other groups of itinerant students. Data collected included children's mobility patterns, educational histories, achievement and ability levels, educational and occupational aspirations, factors affecting educational progress, perceived needs, and desired improvements to the current program. Findings reveal the social structure, expectations, and values of Showmen's Guild members and how these factors influence the provision of education to their children. Research problems related to sampling, interviewing techniques, and ethical considerations are discussed. (LP)

the science, citizen action, and research issues that are part of the acid rain problem. The guide is designed for students in grades 4-8 and their teachers. Following an introduction, the first seven sections are informative in nature. They include: (1) "Observations about Acidity"; (2) "Defining Acid Rain"; (3) "Effects of Acid Rain on Forests"; (4) "Effects of Acid Rain on Water"; (5) "Effects of Acid Rain on Human-Made Materials"; (6) "Effects of Acid Rain on People"; and (7) "What Can Be Done." The last two sections "Experiments" and "Activities," provide the students with hands-on experience of the instructional content. The nine experiments emphasize measuring and testing pH content in various substances and observing the impact of acid rain on plants and metals. The 11 activities which may be carried out by the class as a whole or by small groups, or by individuals, include field trips, role-playing exercises, individual research projects, and planning and discussing ideas for scientific projects. A bibliography of 13 readings and 11 audio-visuals is provided; a glossary of terms concludes the guide. (PR)

DESCRIPTORS- \*Conservation (Environment); Elementary Secondary Education; \*Environmental Education; Pollution; \*Recycling; \*Science Education; \*Solid Wastes

IDENTIFIERS- \*Composting; \*Consumer Information; Consumers

This profusely illustrated and informally written booklet describes how people can help solve a growing problem--garbage. The following 12 tips are presented: (1) Reduce the amount of unnecessary packaging; (2) Adopt practices that reduce waste toxicity; (3) Consider reusable products; (4) Maintain and repair durable products; (5) Reuse bags, containers, and other items; (6) Borrow, rent, or share items used infrequently; (7) Sell or donate goods instead of throwing them out; (8) Choose recyclable products and containers and recycle them; (9) Select products made from recycled materials; (10) Compost yard trimmings and some food scraps; (11) Educate others on source reduction and recycling practices and make your preferences known to manufacturers, merchants, and community leaders; (12) Be creative--find new ways to reduce waste quantity and toxicity. Appendix A contains source reduction alternatives for around the home, Appendix B defines reusable vocabulary, and Appendix C contains a list of Environmental Protection Agency resources. Brightly colored drawings accompany almost every page of the text. (PR)

DESCRIPTORS- Community Involvement; Educational Change; Elementary Education; \*Elementary School Science; Elementary School Teachers; \*Partnerships in Education; \*School Business Relationship; \*Science Instruction; Science Teachers; \*Volunteers

This paper describes the development of a partnership project in New Castle County, Delaware, which teams scientists and other technical specialists with elementary teachers to enrich science activities in the teachers' classrooms. Interest in the project has evolved from a small, structured pilot program with 12 volunteers to a wide ranging project with approximately 150 volunteers in 14 schools. Activities of the volunteers include teaching of single classes or units and serving as resources outside the classroom. Problems encountered include not enough volunteers, teachers not utilizing the volunteers for help, poor communication among program participants, and incomplete record keeping about the program. Appendixes provide examples of partnership activities, evaluation forms, and a chart listing project challenges and the solutions found so far. (Contains 15 references.) (PR)

IDENTIFIERS- Botswana; Canada; Costa Rica; France; Germany; Great Britain; National Service; Nigeria; Trinidad and Tobago; Zimbabwe

This report summarizes the national service programs and proposals discussed at the first global conference on national service held in June of 1992. Current programs include those in France and Germany where civilian service may be performed as an alternative to mandatory military service. In Nigeria university graduates perform a year of civilian service after completion of their education, while in Botswana, national service comes before attendance at a university. In Costa Rica all university students perform community service through a university program. A proposed system of national service in India would require service from government employees and college students as two groups who benefit the most from the country's resources. The goals of the conference were for those attending to become acquainted, to learn about programs in other countries, and to plan ways to stay in touch in the future. In reality, the participants were able to identify areas of general agreement and areas of difference in youth service. Several conferees presented evidence of outcomes of national service that benefited those who are served, those who serve, and society at large. Questions of responsibility for national service, the basic concept of service, and future research needs were addressed. The participants of the conference recommended international exchange and sharing of ideas and experiences as well as working together toward the development of a global youth service program that takes account of the need to implement sustainable development strategies. PUB TYPE- Collected Works - General (020)

In February 1990, the President and state governors proclaimed a set of six national education goals to prompt profound improvements in schools and student achievement by the year 2000. These six goals reflect widely held concerns that most Americans have not been receiving the kind of education they need to meet the challenges of twenty-first century life. This Digest addresses Goal Three of the six national goals: "By the year 2000, American students will leave grades four, eight, and twelve having demonstrated competency in challenging subject matter including English, mathematics, science, history, and geography; and every school in America will ensure that all students learn to use their minds well, so that they may be prepared for responsible citizenship, further learning, and productive employment in our modern economy." The Digest discusses summaries of student achievement in core subjects, measured by the National Assessment of Educational Progress (NAEP), which reveal that current levels of student achievement fall far short of the standard implied by National Education Goal Three. The Digest presents ideas for schools and parents to help improve student achievement in core subjects. For example, schools can increase the quantity and the quality of challenging subject matter that all students are required to study in elementary and secondary schools, and encourage more students to pursue advanced coursework in the core subjects. It is suggested that parents, for example, should encourage school teachers and administrators to establish clear and challenging standards about what all students should know and be able to do in all core subjects of the school curriculum. Education; \*Social Influences; Social Studies

IDENTIFIERS- \*Bill of Rights; Canada; Japan; Mexico; Nigeria

The role of the U.S. Constitution as a model for an influence on the establishment of governments in other nations offers an effective vehicle for expanding education about this nation's civic values, rights, and responsibilities. By studying how the ideas and principles of the U.S. Constitution and the Bill of Rights have been adopted, adapted, and integrated into the political and social systems of other nations, under what circumstances these ideas have been transported and adopted successfully, and under what circumstances they have failed, students can gain insight into the Constitution and Bill of Rights, thereby developing a fuller appreciation of their own democratic tradition, and of the rights and responsibilities of U.S. citizenship. This work consists of a series of 31 lesson plans with handouts. The section dealing with Canada focuses not on the obvious similarities between Canada and the United States, but with the differences. The section on Mexico emphasizes that an important part of cross cultural understanding is recognizing the differing perceptions of the role of law in society. The similarity of the U.S. and Mexican constitutions is compared to the enormous differences in history and culture. The section on Japan seeks to provide a historical context for analyzing the Meiji and Showa constitutions and to help students recognize the importance of culture in shaping both the description and actual practice of government. The section on Nigeria provides a background in the ways some traditional cultures of Nigeria viewed the concept of rights. (DK)

IDENTIFIERS- Content Area Teaching; Diversity (Student);  
Sheltered English; Total Physical Response

A group of instructional strategies for monolingual teachers to use with elementary and secondary school students with limited English skills are described. The strategies are drawn from a teacher education curriculum focusing on this issue. All are based on the notion that monolingual and bilingual teachers can team teach to break down linguistic and cultural barriers in the classroom. All were also experienced by monolingual and bilingual teaching credential students in the course of a demonstration. They include the Total Physical Response technique, sheltered subject matter teaching, use of comprehensible input, efforts to lower the affective filter of students, use of realia, dramatization of a story, and monolingual-bilingual team teaching for primary language instruction. Some useful student reading materials and teacher resources are noted. Contains 20 references. (MSE)

DESCRIPTORS- Adult Students; Case Studies; \*English (Second Language); Error Analysis (Language); Females; \*Language Patterns; Language Research; \*Linguistic Theory; \*Morphology (Languages); \*Pragmatics; Second Language Learning; \*Syntax; Task Analysis

According to the linguistic theory of "natural order," eight English morphemes have been ranked in an invariant order of difficulty for learners of English as a Second Language (ESL). Pedagogical implications of this theory have led to the "natural approach" as a comprehensive second language teaching methodology. A case study that suggests the natural order theory has limited predictiveness, because it does not consider the pragmatic salience of these morphemes in different discourse contexts, is presented. Subjects were five native Arabic-speaking adult women at an intermediate level of ESL study. In a speaking task involving extended turns, the subjects' patterns of error for the eight were analyzed. Results indicate an order of relative morpheme difficulty suggesting that pragmatic salience comprises a balance of at least four features: frequency; form-function transparency; conspicuousness; and usefulness. The implication for ESL instruction is that to make teaching effective, language instructors must consider the specific, different learning tasks involved in the different kinds of discourse to which the student is exposed. IDENTIFIERS- Empowerment; \*South Africa; University of Natal (South Africa); Zulu

Five brief articles from a journal published by the Public Affairs Department of the University of Natal, South Africa, discuss issues related to empowering adults through literacy education in that country. "Meeting Needs" (Gwyneth van Heerden) describes the extent and nature of adult illiteracy in South Africa and the activities of the literacy support service of the Center for Adult Education at the University of Natal. "Read for Life" (Tania Spencer) describes a course aimed at teaching adults how to read and write in Zulu using the learning/experience method. "A Leg to Stand On" (Vis Naidoo) presents the Learn with Echo project, which provides distance basic adult educational material for a black undereducated readership. "Meeting Needs" (Vis Naidoo) describes the goals and philosophy of the Center for Adult Education's Community Development Education and Training Programme. "Off the Shelf" (Tania Spencer) describes a special library established by the University of Natal's Department of Information Studies and Natal Society Library, which is designed to facilitate community and individual empowerment. IDENTIFIERS- Washington (Seattle)

Geared to refugee women, the storytelling project developed by the Refugee Women's Alliance (formerly the South East Asian Women's Alliance) in Seattle, Washington, combines language, cross-cultural, and family skills. The project included development of the storytelling curriculum for English-as-a-Second-Language students, training instructors, collecting stories and illustrations, and printing the stories. The curriculum was divided into two parts: collecting and sharing the stories, and follow-up ESL activities. Bilingual aides help collect stories from beginning pre-literate students. Folktales representing five ethnic groups (Cambodian, Eritrean, ethnic Chinese, Lao, and Soviet Ukrainian) are compiled in this document, which also suggests techniques for sharing and polishing stories. Some beginning storytelling resources are provided. The follow-up ESL activities described include anticipation (pre-story) activities, comprehension checks, oral and written language experience activities, and cross-cultural exercises. Specific ESL activities are geared to one Lao folktale. (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

IDENTIFIERS- \*Engineering Curriculum; Germany; Technical Language; \*University of Rhode Island

During a 4-year period, the University of Rhode Island (Kingston) developed the International Engineering Program, a German-language focused model for undergraduate education in international engineering. The faculty in the College of Engineering and the German Section of the Department of Languages cooperated to develop the program. By expanding the undergraduate engineering experience to 5 years, students earned a Bachelor of Arts degree in German and a Bachelor of Science in one of the engineering disciplines. Students in the program took specialized technical German language courses as well as traditional courses in the German major, spent 6 months of the fourth year in a professional internship with an engineering firm in Germany, and took a capstone interdisciplinary engineering course offered in German by bilingual engineering faculty. Program organizers faced the challenges of recruiting and retaining students for the program, developing specialized German language courses with technical content, recruiting and training language faculty for teaching these language courses, and arranging internships abroad with engineering firms. The program brought prestige to the university and led to positive interaction with international firms in the region. The program graduated seven students in 1991. Appendixes contain two journal articles and notices describing the program. (JB)

DESCRIPTORS- \*Academic Achievement; Age Differences; College Juniors; College Seniors; Comparative Analysis; Higher Education; \*Performance Factors; Productivity; Research; Secondary Education; Self Efficacy; Student Development; \*Student Motivation; Teacher Education; \*Test Results; Undergraduate Study

This study was aimed at extending previous correlational findings on the motivational components of test performance, studied among seventh graders by Pintrich and De Groot, to college students and to sequential task performance, including a voluntarily performed task. Performance was also examined under different experimental conditions of incentive value. A total of 125 junior and senior class college students preparing to become teachers participated in the study's two parts. In the correlational part, a factor structure somewhat similar to that of Pintrich and De Groot was found with a self or attitude factor (reflecting different measures of self-efficacy), an ability/achievement or intellectual factor (reflecting test score performance), and an incentive or emotional factor (reflecting the value of choosing to perform). In the experimental part, incentive value was also found to relate to voluntary or self-motivated performance. The greater importance of incentive value as a motivator in this study, in comparison to the earlier study of seventh graders, was surmised to be a function of the importance of grades in the college setting. Working Hours; Higher Education; \*Job Satisfaction; \*Nurses;  
Nursing Education; Outcomes of Education; Quality of Working  
Life; Surveys; Work Environment

IDENTIFIERS- Nurse Associates

A study was done to learn about relative job satisfaction among nurses with baccalaureate degrees compared to nurses with associate nursing degrees. A job satisfaction survey was mailed in the summer of 1988 to a selected sample of 480 nursing graduates of a regional southeastern university. Seventy-two baccalaureate and 50 associate degree nurses responded. Each group had average work experience of about 8 years. Baccalaureate nurses gave significantly higher satisfaction ratings for 8 of the 20 job aspects studied, including job security, fringe benefits, hours that fit with lifestyle, interaction with supervisor, respect among ranks, status, self-esteem from job, and help and supplies. When these respondents were subdivided into smaller groups based on work setting, job responsibility, hours worked, work experience, and graduation year, the higher satisfaction ratings of baccalaureate nurses persisted. The results also showed work-related differences between groups: a much higher proportion of the associates group was working in hospitals, 84 percent compared with 66 percent. More of the baccalaureate nurses were not primarily responsible for direct patient care, 40 percent versus 22 percent. On average, baccalaureate nurses working full-time earned about \$4,000 more than associates. The findings of higher salaries and greater job satisfaction for the baccalaureate group supports the economic concept of investment in human capital. Contains 19 references. (JB)

IDENTIFIERS- \*Army Reserve; Computer Mediated Communications

The purpose of this handbook is to provide background and guidelines for course designers and instructional developers who will be developing Reserve Component training for the United States military using asynchronous computer conferencing techniques. The recommendations in this report are based on an international review of the literature in distance education and experience gained from developing and conducting Reserve Component training. The handbook is based on a model of remotely conducted, distributed training called the System for Managing Asynchronous Remote Training (SMART). The cornerstones of the SMART model are that training is asynchronous in time, computer mediated, and distributed to soldiers' homes through telephone communications systems. The guidelines are intended to supplement the Systems Approach to Training process, emphasizing the steps course designers must implement or adapt to accommodate conferencing for distributed training. Specific guidelines are given for the Analysis, Design and Development phases; examples and blank worksheets are also included. Sample hardware assembly instructions are appended. (DB)

Technology; \*Educational Television; Futures (of Society); High Schools; \*High School Students; Integrated Activities; \*Interactive Video; Mathematics Instruction; Models; School Districts; \*Secondary School Teachers; Teaching Methods; Technological Advancement  
IDENTIFIERS- State University of New York; \*Syracuse City Schools NY

The State University of New York and Instructional Systems, Inc., (ISI) developed a project to combine computer assisted instruction (CAI) and live, interactive videoconferencing with a television teacher, conducted via cable. The project is being pursued by the Syracuse (New York) City School District in conjunction with the State University of New York, Onondaga County Community College (New York), ISI, and Aldelphia Cable. A teacher from the Syracuse district has been aired once a week for one hour to focus on mathematics content areas in which high school students are having difficulties. The television teacher works in a team with the classroom teachers using the system in school settings and secures their input about the content of the live shows. The model of extended learning is one that can be applied to a number of other areas in elementary and secondary school education, higher education, the workplace, community organizations, and correctional settings. A scenario of CAI use in the future presents the promise of the integration of real-time interactive video, voice, and data to enhance learning and improve learning environments. Two figures illustrate mean gains in achievement in two CAI distance learning classes. (SLD)

PUB TYPE- Reports - Evaluative/Feasibility (142)  
DESCRIPTORS- \*Acoustics; \*Audio Equipment; Educational Technology; \*Films; \*Interactive Video; \*Technological Advancement

IDENTIFIERS- Analog Transmission Systems; Digital Data Signals  
Digital audio sampling is explained, and some of its implications in digital sound applications are discussed. Digital sound equipment is rapidly replacing analog recording devices as the state-of-the-art in audio technology. The philosophy of digital recording involves doing away with the continuously variable analog waveforms and turning the patterns into numbers. A digital recording device rapidly samples the incoming sounds, quantifying the signal into a series of numerical values (binary codes). Although digital sound eliminates many of the traditional analog problems, digital signal processing presents key problems in sampling rates and synchronization. Careful control is necessary to check signals through each step in the audio chain. The advantages of digital audio processing include increased signal-to-noise ratio, no flutter, transparent generation of copies, and sound manipulation. These benefits come with increased quality control requirements. One chart illustrates sampling formats. (SLD)

IDENTIFIERS- \*Australia; \*Political Correctness

This paper examines recent Australian children's literature. It focuses on the prevailing social attitudes in Australia towards gender, environment, and multiculturalism and how these social issues are treated in the fiction books written for Australian children. The paper also examines the implications for children's literature of the expectations for authors to present a correct ideological stance towards these issues and if these expectations can be construed as a "new censorship." Through their leadership school librarians can encourage children to read widely and to discuss and question the social issues which are raised. (KRN)

IDENTIFIERS- \*American Memory Project (Library of Congress); Congress 102nd; \*Library Funding; North Carolina; Testimony

To learn first hand how the libraries of North Carolina, especially public libraries, function in spite of budget cuts, a hearing was held in Lumberton (North Carolina) to hear the testimony of interested parties from the state and national levels and specifically from the congressional district of southeastern North Carolina. While library budgets are being drastically cut, costs continue to rise, as the witnesses attest. At this hearing, the Library of Congress introduced "American Memory," a project that will use compact discs and laser video disks to make important collections from the Library of Congress available to researchers, teachers, students, and the public at local libraries and schools. American Memory, which will eventually exist as an online resource, is the library of the future. A demonstration of the technology and search strategies of American Memory was presented. Twenty-three other witnesses addressed the hearing, including representatives of the American Library Association; representatives of state, academic, public, and depository libraries; and patrons and users of the local county library. Additional submissions for the record include letters. (SLD)

Day Students; \*Educational Facilities; \*Enrollment Influences; Evening Students; Institutional Research; Institutional Role; \*Multicampus Colleges; \*Research Methodology; \*Research Utilization; Two Year Colleges; Two Year College Students IDENTIFIERS- AIR Forum; Community College of Philadelphia PA

This paper describes some of the research and planning methodologies employed by Community College of Philadelphia (CCP) to support faculty and programmatic decision making required by a 60% increase in full-time equivalent students within a 5-year period. Following a brief introduction, the paper describes the research questions considered. The next section describes the model of student decision making that served as the conceptual basis for CCP's research, as well as four research stages: understanding participation patterns in higher education, both nationally and within CCP's service area; understanding why potential students choose CCP over another institution; comparing students who enroll on-campus with those who enroll off-campus; and establishing the types of programs, academic support, and student support services that should be offered off-campus. The next sections provide methodological information and study results for the following CCP investigations: (1) environment scanning of the underlying external forces acting on students; (2) enrollment forecasting; (3) an institutional choice survey of main and off-campus students; (4) a survey of off-campus students' educational objectives, programmatic interests, and support needs; (5) a comparison of day and evening off-campus students; (6) a comparison of off-campus students who would and would not enroll on the main campus; (7) database tracking of on- and off-campus student mobility patterns; and (8) faculty and staff evaluations of academic programs and support services available off-campus. The final sections discuss the findings and describe the influence of the research on institutional policy and planning considerations. (MAB)

IDENTIFIERS- \*California Community Colleges

California's community colleges face tremendous challenges, from diminishing fiscal resources to increasing student diversity. To meet these challenges, community colleges may have to transform how they think about themselves. Organizational restructuring in two-year colleges requires the adoption of a new paradigm about the nature of community colleges. The key assumption in the existing paradigm is that the purpose of community colleges is "to provide instruction." The proposed new paradigm is based on the declaration that "to produce

their goals, employment, and program of study. By the fifth week of classes, faculty are required to complete progress report scansheets for each student evaluating academic progress. Scansheet data are used to generate reports summarizing students' initial academic progress, and are presented to students directing them to recommended intervention resources. Specific ALERT intervention strategies include learning labs for students with academic skills deficiencies, study skills instruction, education/career planning, and withdrawal intervention. The handbook includes a copy of the ARI questionnaire, sample orientation profiles and student profiles, copies of the student progress report scansheet and a sample student report, a calendar of ALERT activities during the 1990 pilot project, a list of retention and intervention strategies, and a list of faculty who participated in the pilot project. IDENTIFIERS- \*Florida Community College at Jacksonville

Designed as a self-directed career planning resource for students at Florida Community College at Jacksonville (FCCJ), this booklet is comprised of four modules providing students with step-by-step career exploration activities and information. The first module, Introduction to Career Planning, discusses the effect of career choice on students' lives and the reasons why people choose particular careers; reviews the nature of changing career goals and the basic principles of the career planning process; and encourages students to make a commitment to actively explore their career options. The second module, Self Assessment, includes a list of 46 sample occupational interests; a skills evaluation exercise; a values evaluation exercise; a career exploration chart for summarizing information gathered about interests, skills, and values in six career option clusters; a four-step guide to interpreting results; and a list of on-campus services and available career survey instruments. Module 3, Career Exploration, is designed to help students translate the career groups identified in Module 2 into specific occupations to consider. Included in Module 3 are a list of information resources, specific career development actions (e.g., coming to campus, using the occupational index), sample blank career information sheets, and a description of FCCJ's computerized career exploration system and career planning course. The final module, Transition to Academic Planning, discusses possible programs of study, status sheets to keep program and graduating students aware of their progress, preparation for counseling appointments, and FCCJ's student success course. A booklet evaluation form is included. (PAA)

of black students. Programs begin with motivational seminars for young children and their families to promote a positive idea of college education. Other AFE efforts include an annual "Black Issues in Focus" program, essay contests for young people on the value of a college education, programs to recognize student achievement at college and past contributions of community members, speakers on special issues in minority education, scholarships, textbook subsidies, minority employment and business fairs, and black church history classes. Between 1984 and 1991, total black student enrollment in the AFE program area increased by 57.7% and black enrollment relative to the general student population increased by 20.8%. Nationally, these figures were 4.1% and -4.8% respectively for the same period. Includes lists of AFE board members and project coordinators and brief descriptions of efforts at Danville Community College and Virginia Western Community College. (PAA)

IDENTIFIERS- \*Central Florida Community College

The planning and evaluation process at Central Florida Community College (CFCC) is based on the identification of demonstrable outcomes measures, referred to as indicators of excellence (IE's). The indicators were developed during a 4-year long, institution-wide effort in which every employee had the opportunity to comment on proposed indicators. This report provides 1991-92 data on IE's related to transfer programs; career preparation programs; basic skills and developmental education programs; community education and community service programs; college access; educational outcomes related to instructional missions; student satisfaction; and progress in faculty improvement and the provision of financial and physical support to the instructional programs. Reported outcomes include the following: (1) university grade point averages (GPA's) of CFCC graduates appear to be rising, with a "B" average the norm; (2) 88% of vocational-technical programs, just under the IE goal of 90%, had at least a 70% job placement rate; (3) average grades for college preparatory students in their first college-level courses decreased for English but increased for mathematics; (4) community service programs reached a total of 2.1% of the service population; (5) compared to proportions in the service area, Black students were underrepresented at CFCC while Hispanic students were overrepresented; (6) 100% of the full-time faculty held teaching credentials, while 97% of the part-time faculty held credentials; and (7) during the fiscal year 1992, CFCC budgeted

IDENTIFIERS- Houston Independent School District TX; \*Mixed Age Groups

This study evaluated the Primary Learning Communities (PLC) program, a non-graded kindergarten through second-grade alternative curriculum piloted in three Houston, Texas, elementary schools. The curriculum allows a multi-age mixing of students with ages between five and seven years in the same classroom. Approximately 600 students and 27 teachers participated in the evaluation. PLC and non-PLC teachers were surveyed, and a random sample of PLC classrooms were visited to collect observational data. Survey data were analyzed with descriptive and qualitative procedures. Results indicated that the program's content, flexibility, and underpinning philosophy met the varied instructional needs of students through student activities which enhance each student's strengths, interests, successes, and motivation. PLC curriculum rated as more effective than the traditional curriculum in the development of math and reading skills, self-esteem, social skills, positive attitude toward school, and self-discipline. The study concluded with many recommendations proposed by the program staff for enhancing the effectiveness of the PLC program. (MM)

IDENTIFIERS- Australia; New Zealand; \*Transition to School  
Child care in New Zealand and Australia has become a crucial part of the child-rearing system, and most preschool children spend a prolonged period in at least one away-from-home environment for a substantial part of the day. Because so many preschool children are exposed to a child care environment before entering school, the transition from child care to primary school is interesting to consider. In numerous studies teachers report that day care graduates are more aggressive in their first year of school than home-reared children. However, teachers often fail to discriminate between assertive and aggressive behavior, and this distinction for child care graduates is important. Children in child care tend to have infrequent contact and short interactions with caregivers, causing them to be more skilled in areas of social competence, including assertion skills. Child care graduates may also experience more anxiety when interacting with strange adults than with strange peers, and some teachers may misinterpret this anxiety as communicative incompetence. For a smooth transition from child care to school, beginning grades need to provide a child-centered environment and beginning grades teachers need to ensure that children are offered adult interaction which stimulates an atmosphere of cooperation, coordination, and continuity. Contains 25 references. (MM)

IDENTIFIERS- Alberta (Calgary); False Beliefs; Internalization; \*Intersubjectivity; Theory of Mind; \*Vygotsky (Lev S); Zone of Proximal Development

Some studies of young children's understanding of false belief have generated controversy, even to the extent that others' failure to replicate these studies was viewed as problematic. A Vygotskian perspective on internalization enables researchers to reverse the classic developmental competence-performance distinction, and to argue that the current concern with criteria for competence in terms of a functional theory of mind might be replaced with a concern with those aspects of such tasks that make "successful" performances possible. An acknowledgement of the essential nature of intersubjectivity is a necessary prerequisite to sorting out this theoretical and empirical debate. To support these views, this paper reports a

IDENTIFIERS- Congress

To provide information for federal deliberations on the reauthorization of more than 50 elementary and secondary education programs, this report describes efforts by states to improve schools, examines trends and conditions in primary and secondary education, and analyzes options for changing the federal role in education. Following an overview of education and the federal government, chapter 1 of the report describes the purposes of federal support for educational programs and discusses the educational reform movement that began in the early 1980s. Chapter 2 profiles elementary and secondary education nationwide, focusing on trends in educational outcomes, school resources, and student and family characteristics, while chapter 3 addresses issues of the relative priority that should be given to equity and excellence in education, and the level of control the government should exercise over education. Chapter 4 describes options for reducing the federal role in education through the use of block grants that define funding purposes but do not specify states' implementation procedures, and chapter 5 discusses options for refining the current federal role through fully funding current programs, eliminating programs not directed to special populations, and focusing on early education. Finally, chapter 6 reviews approaches to promoting educational reform, including national curriculum and national assessment efforts, school-based reform, and modification of key elements of the educational system as a whole. IDENTIFIERS- Cultural Relevance; \*Medicine Circle; \*Paradigm Shifts

People generally learn best when information is presented to them in a culturally and socially relevant context or framework. This issue is addressed by the Science of Alcohol Curriculum for American Indians through the use of the Medicine Circle, a model that represents the concepts of wholeness, interconnectedness, and balance in a manner consistent with most Native traditional ideals. Also congruent with most American Indian cultures, the "new science paradigm" emphasizes: the observer as a subjective part of the observed universe; the dynamic nature of the universe; and nature as a network rather than a hierarchy. Intended for teachers and other educational personnel involved with American Indians, this unit studies the science of alcohol through the Medicine Circle's integration of physical, spiritual, mental, and emotional perspectives in conjunction with the values of the new paradigm. Upon completion of this unit, participants will have examined: (1) their own attitudes about alcohol and abuse; (2) Medicine Circle concepts; (3) typical roles assumed by children of alcoholics as coping mechanisms; (4) personal and cultural differences in perception; (5) the effects on American Indian students of culture-based learning experiences; (6) Indian students' unique reactions to a science lesson; and (7) paradigms and paradigm shifts, limitations of the current science paradigm, and similarities of the Medicine Circle and the new science paradigm. This unit contains a participant handbook, 60 references, 20 handouts and accompanying overhead transparencies, an evaluation form, and tips for a successful training session. (SV)

## Tennessee

This paper describes the context of education at two Appalachian middle schools and examines family, community, and school factors related to the academic success of economically disadvantaged and middle-class students. The 429 students at two rural middle schools in Appalachian Kentucky and Tennessee were assigned to low socioeconomic status (SES) and middle-class groups on the basis of whether they received free lunch or paid full price. They were designated as high achievers if they had a grade point average above 2.5 and an average standardized test score above the 50th percentile. Subjects completed the Rural School Success Inventory (RSSI) and a writing sample that reflected their aspirations and world views. Ethnographic findings illustrate the similarities between the two schools and their communities, but also indicate important differences, such as economic circumstances and the value placed on schooling. Factor analysis of RSSI data differentiated between schools, SES groups, achievement groups, and subgroups of each according to scores on five RSSI categories: family life, leisure activities (outside school), economics, health and hygiene practices, and school activities. Studies, such as this one, that illuminate the interaction among personal, sociocultural, and school-related factors are potentially more useful to policymakers than the traditional inputs-processes-outcomes paradigm. Contains 53 references and 18 data tables. (SV)

PUB TYPE- Speeches, Conference Papers, "Papers Presented at..." (150), Information Analyses/State-of-the-art Materials (070)

DESCRIPTORS- Adventure Education; Elementary Secondary Education;

\*Experiential Learning; Group Activities; \*Group Dynamics; \*Instructional Development; \*Learning Theories; Teaching Methods; \*Transfer of Training

IDENTIFIERS- \*Isomorphism

The creation of isomorphic activities can be accomplished when an instructor with a broad repertoire of activities applies a clear definition of purpose to a strong understanding of the clients involved. Experiential education is based on the use of experience to increase human potential. In order to capitalize on specific behaviors for focused training, experiential education often uses a simulated environment of experience, rather than "real-life" experience. The identification and linkage of similar attributes of a modeled experience with attributes in a real experience is called "isomorphism." The key to positive growth or behavior modification is in the transfer of learning from the simulated environment to future real-life behaviors. Transfer can take place at a specific, nonspecific, or metaphoric level. Many significant aspects of learning and intelligence theories apply to experiential education, including: (1) Piaget's theory of cognitive development (assimilation and accommodation); (2) Maslow's hierarchy of need (basic needs of participants); and (3) Bloom's taxonomy of cognition (level of complexity of an experience). The Tuckman model of group development is also

IDENTIFIERS- \*Outdoor Leadership; Outdoor Recreation

This document contains a list of authors who have published research studies pertaining to women's experiences and adventures in the outdoor environment, a complete bibliography of their publications, and a set of abstracts of a selection of these publications in a separate section. The complete bibliography includes 124 books, journal articles, research papers, doctoral dissertations, and conference papers about female participation in outdoor education, experiential education, athletics, adventure experiences, physical recreation, camping, wilderness experiences, and leadership programs. Publication dates range from 1977 to 1992; the majority of materials were published after 1985. The annotated bibliography contains 70 entries from the larger list. The list of authors includes their professional affiliations. An outline of the bibliography project, and forms for submitting further entries, are also provided. (SV)

PUB TYPE- Reports - Evaluative/Feasibility (142), Collected Works - Proceedings (021)

DESCRIPTORS- Cost Effectiveness; \*Educational Policy; Foreign Countries; Institutional Evaluation; Intermediate Grades; \*Rural Schools; School Closing; School Community Relationship; \*School Effectiveness; School Size; Secondary Education; \*Secondary Schools; \*Small Schools

IDENTIFIERS- \*England

Amidst controversy over proposed school closings, Hereford and Worcester (England) local education authorities (LEA) asked for an evaluation of the effectiveness of six small rural "comprehensive" secondary schools (180-450 students) and their importance to surrounding communities. Data were collected on student achievement; teacher and school characteristics; graduation rates; student discipline; further education and employment of graduates; and attitudes of parents, students, teachers, administrators, and community members. Some very positive findings emerged. As a group, the schools attracted well qualified and experienced teachers and offered all subjects of the national curriculum. Compared to larger schools in the county, the group had higher student scores on school-leaving examinations, fewer discipline problems, and a higher percentage of graduates pursuing further education. The community made extensive use of four of the schools, and the attitudes of parents, students, and local employers were positive. Only the smallest school had significantly higher per pupil costs than larger comparison schools. Differences among the schools are discussed, and recommendations are offered to the LEA and the schools. Educational policy issues related to cost effectiveness, unproven assumptions about school size and performance indicators, school-community relationship, and school choice are examined. A reply critiques the study and its recommendations from a policymaker's perspective. Subsequent round-table discussion focused on the generalizability of the research findings and on the overall cost-benefits of small schools. (SV)

(160), Guides/Methods/Techniques (For Practitioners) - Classroom Use - Teaching Guides (For Teacher) (052)  
DESCRIPTORS- Check Lists; Elementary Secondary Education; Evaluation Criteria; Higher Education; \*Lesson Observation Criteria; \*Microteaching; \*Peer Teaching; \*Preservice Teacher Education; \*Science Education; Science Instruction; Science Teachers; Teaching Methods

IDENTIFIERS- Science Process Skills

Microteaching, or peer teaching, is an activity that requires science methods students to plan, teach, and evaluate a particular lesson. The peer teaching activity, although obviously similar to teaching a lesson in a traditional classroom, enables the methods students to teach to a small group of their peers, thus easily receiving constructive criticism of the lesson taught. This paper describes preparation for peer teaching, deciding on the type of lesson and evaluation forms to use, self-assessment, and the post-peer teaching interview. The importance to the peer teacher of communication skills is stressed, and the teaching strategies that have proven most successful, namely, the Illustrated Talk, the Inquiry lesson, and the Process Skills lesson are described. The following five appendixes are included: (1) Communication Skills Performance Checklist; (2) Illustrated Talk Performance Checklist; (3) Inquiry Lesson Performance Checklist; (4) Process Skill Lesson Performance Checklist; and (5) Student Feedback Form. Science educators and the communities they serve have made the improvement of student achievement a high priority, and they have identified more effective teaching as part of the solution to this problem. This document answers the following two questions: What does the research show about effective science teaching? and What kinds of professional development opportunities exist for science teachers? Eight collaboration ventures incorporating one or more of the principles of effective professional development are described in this document; in each case the name and address of a contact person is also supplied. These collaborations are: (1) Teachers Academy for Math and Science; The Orr School Science Connection, Chicago, Illinois; (2) Dayton Public Schools and the University of Dayton, Dayton, Ohio; (3) Delta Teachers' Academy, Lower Mississippi Delta Region; (4) Juniata College & the Central Pennsylvania Association of Chemistry Teachers, Huntingdon, Pennsylvania; (5) Scope, Sequence, and Coordination Project (SS&C), Houston, Texas; (6) Tri-State Education

availability, and the condition of existing research facilities. Data on current spending, sources of support, and future plans for construction and renovation are also included. Highlights of the report include: (1) research space at universities and colleges increased by 9% since 1988 when the first survey data were gathered; (2) from 1988 to 1992, the amount of academic research space reported as being "suitable for use in the most highly developed and scientifically sophisticated research" increased by 22%; (3) doctorate-granting institutions contained 96% of all academic science and engineering research space; and (4) the 70 research-performing historically black colleges and universities represented about 2% of the national total for research space. IDENTIFIERS- Middle School Students

The purpose of this study was to explore science teacher decision-making with students of diverse populations. The research site was a suburban middle school located in the southeast. The student body consisted of African Americans, Caucasians, and international students from 62 different countries. Extensive social contextual research was performed. Case studies of two science teachers, a veteran White female life science teacher and a first-year White male earth science teacher were conducted over an extended time. The teachers, their students, a student teacher, and key informants from the school and the community participated in extensive formal interviews throughout the study period. Participant observation and videotaping data collection strategies were used to collect data in the science teachers' lessons throughout the study period. Analytic induction and the constant comparison technique were used to analyze both textual and videotaped data. Findings focused on an analysis of the teacher's decision-making conducted before, during, and after instruction. Analytic constructs describing each teacher's decision-making were constructed. The key finding was that the teachers did not believe that consideration of their students' diverse cultural backgrounds should be included in their decision-making. The students' diversity was extolled in the social sphere; in the teaching sphere it was excluded. (Author)

IDENTIFIERS- Music Festivals; \*Music Performance

Band, orchestra, and choir festival evaluations are a regular part of many secondary school music programs, and most such festivals engage adjudicators who rate each group's performance. Because music ensemble performance is complex and multi-dimensional, it does not lend itself readily to precise measurement; generally, musical performances are evaluated subjectively, that is, reflecting either consciously or subconsciously the criteria that an individual evaluator considers most important. Allowing individual adjudicators to employ their own criteria in evaluating performance festivals, however, presents some potential problems. To help alleviate these problems, most performance festivals do two things: (1) employ more than one adjudicator, and (2) ask adjudicators to consider a common set of performance categories in arriving at a final rating. The purpose of this study was to examine the

IDENTIFIERS- New Brunswick

This document presents the findings of a study that examined whether the marital status of women in New Brunswick (Canada) influenced their ability to obtain administrative or managerial positions within nontraditional fields. The study cited research suggesting that women are still viewed as dependent, passive, and lacking in competitiveness, ambition, and leadership. For the research, 23 companies were chosen from the telephone directory for Fredericton and Oromocto (New Brunswick). The firms were designated as either engineering, academia, or other. Targeted companies were phoned and asked about the number of women, their marital status, and their positions within management or administration. Callers informed respondents that answers would be confidential and no names would be required. The 23 companies reported a total of 87 women in administrative or managerial positions. Of those 87 over 73% were married, while less than 12 percent were single. No marital status was provided for about 14% of the women. The percentage of married women was high (94%) within the engineering field, but was only 35% within academia (although no marital status was reported for 60% of the academics). Findings dispute the hypothesis that marital status influences women's professional advancement in male dominated fields. Further study of the topic should be pursued. (SG)

DESCRIPTORS- \*Comparative Education; Educational Development;  
Educational History; Educational Research; Foreign Countries;  
Kindergarten; \*Preschool Education; Preschool Evaluation

IDENTIFIERS- Bereday (George Z F); \*Egypt; Japan; \*Oman

This paper examines preschool education in Egypt, Oman, and Japan in the light of the comparative education approach developed by George Bereday utilizing description, interpretation, juxtaposition, and comparison. The literature of early childhood education is surveyed, beginning with the three most influential pioneers: Friedrich Wilhelm Froebel, Maria Montessori, and Rudolf Steiner, and a list of 10 common principles drawn from their works are enumerated. In Egypt the number of preschools affiliated with primary schools has expanded. Governing bodies have been asked to expand preschool education in order to aid working mothers. In Oman there are no government nursery schools, but a very small number of coeducational private schools exist. In view of the increasing entry of women into the work force, governmental kindergartens may be necessary in the near future. However in Egypt and Oman, most children of kindergarten age still are looked after by

socialization, sexual harassment, athletics, teen pregnancy, testing and assessment, vocational education, welfare reform, and women in leadership and educational administration. Part 2 deals with the education reform movement and includes works that provide key background on current issues of education reform and restructuring. It is suggested that the reader scan the entire bibliography before focusing on a single section because the placement of particular references may not be obvious. Section headings include references to other headings containing related material. (DK)

IDENTIFIERS- Dubois (Pierre); Europe; \*Lull (Ramon); Missionaries; \*Vincent de Beauvais

The agenda of 13th and 14th century educational theorists embraced issues that stimulated innovation in educational theory and practice. Christian thinkers of the late middle ages were preoccupied with adapting their educational notions to the changing conditions of their socio-political milieu. The question of the training of Christian rulers generated an extensive literature. Vincent de Beauvais, educational consultant to the family of Louis IX, wrote a practical manual of child rearing with a view to the everyday pedagogic practice necessary to prepare 11 children for their leadership role in society. His treatment of the nature and use of history was innovative. He understood the incompleteness and falsity of many sources and used them critically. He avoided the allegorical mode of interpretation in favor of the literal sense. On education of women he wrote extensively on practical reality. Ramon Lull displayed creativity in his educational views by founding language schools for the preparation of missionaries. His innovation in educational theory and practice was necessitated by Christian purposes. He was alone in attaching importance to Muslim attitudes and culture, as well as training in Arabic for missionaries. Pierre Dubois gave the concept of education for women an interesting twist by proposing that females be trained in languages, medicine, and surgery before being sent to the Holy Land. Once there they would be married off to wealthy Easterners and convert their husbands to Christianity. He was not developing a theory of education for women, but proposing a novel strategy for crusade. (DK)

IDENTIFIERS- \*Politeness; \*Requests

A study investigated politeness indicators in the speech of three groups of university students: 37 native Spanish speakers, in Spain; 34 American students; and 33 native Spanish-speakers learning English as a Second Language (ESL) in Spain. Subjects responded to a questionnaire that outlined 24 situations combining 2 contextual variables: 2 degrees of social distance or familiarity, and 3 degrees of social dominance of interlocutors; each of the 6 variable combinations was represented in 4 situations. Subjects were asked what they would say in each situation. The first subject group was given the questionnaire in Spanish; the others were given an English version. Responses were analyzed for lexical forms that served as mitigators in direct requests, including frequency, type of strategy used, and inclusion of the hearer in the request statement. Results do not support the traditional assumption that directness and politeness are incompatible. In particular, the data on Spanish-speakers were characterized by patterns including the hearer in the interaction and considering his needs. Native English-speakers were, in general, more impersonal. The type of politeness encountered in the Spanish sample exemplified "positive politeness." A brief bibliography is included. (MSE)

IDENTIFIERS- Family English Literacy

After a brief literature review, this paper examines the problem of defining literacy. It emphasizes the importance of using a flexible definition based on learners' needs and goals in social contexts in determining the goals of literacy instruction. In order to illustrate the wide variation in not only students' levels of English-language proficiency but also in their experience with literacy, different types of learners who may attend adult English literacy programs are described. An overview is provided of the types of programs available to immigrants in the United States, as well as some of the obstacles that may discourage adults from participating in these programs. Finally, the paper discusses a number of learner-centered approaches to English-as-a-Second-Language (ESL) literacy instruction that have been used for helping limited English proficient adults acquire skills that will empower them socially, politically, educationally, and economically. It is concluded that literacy educators must continue to investigate and use approaches that utilize teacher/learner collaboration. (Contains 30 references.) This manual provides specific lesson plans for teaching life skills and literacy to adult beginning readers and English-as-a-Second-Language (ESL) students. It includes four curricular sections: Focus on Language Arts, Focus on Life Skills and Literacy, Focus on Holidays and Observances and Focus on Survival Math. A total of 95 topics are presented. Each topic includes the following elements: an introductory lesson for individual tutoring or classroom instruction, a follow up lesson specifically for individual tutoring and a follow up

IDENTIFIERS- Washington (Seattle)

A Family Story Curriculum Project was implemented in three English-as-a-Second-Language (ESL) classes at the Refugee Women's Alliance (ReWA) center in Seattle, Washington. This project followed a successful storytelling project in which students remembered and told folktales from their native countries. The purposes of the Family Story curriculum were varied: to increase self-esteem, cultural adjustment, and language skills of the participants; to create student-generated materials that address family issues and bridge the cultural and generational gap between newcomers and their American-raised children; to print 5 to 10 stories for classroom use; and to train ReWA instructional staff in collecting and using family stories. All goals were easily met, with 17 ReWA staff trained and more than 24 stories printed. Curriculum materials and a description of the project were also developed. This document contains the following sections: (1) Training: Oral History and Journal Writing; (2) Pre-Collection Activities; (3) Collecting Stories; (4) Follow-up ESL Activities; and (5) Conclusion (including two major concerns that arose during the course of the project--the need for more ESL activities and management of the grief and sadness that accompanied student memories). Sample student illustrations are included. (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

PUB TYPE- Speeches, Conference Papers, "Papers Presented at..."

(150), Opinions/Personal Viewpoints/Position Papers/Essays (120)

DESCRIPTORS- Cultural Awareness; \*Cultural Context; Cultural Differences; English (Second Language); Ethnic Groups; Females; Foreign Countries; Literacy; Mathematics Anxiety; \*Mathematics Instruction; \*Mathematics Skills; Minority Groups; \*Number Concepts; \*Numeracy

A plenary address to an Australian conference on adult literacy focuses on cultural barriers to numeracy. Mathematics, and therefore numeracy, is considered as part of cultural knowledge. It is noted that over the last decade there has been a growing awareness of the cultural basis of mathematical knowledge and teachers can no longer assume that mathematics is culture-free and therefore value-free. Numeracy is defined as "the particular mathematical knowledge needed by every citizen to empower them for life in that society." It is shown that particular groups have experienced alienation from and conflict with mathematics as it is commonly taught. These groups include ethnic minority children in westernized societies, second language students, indigenous "minorities" in westernized societies, girls in many societies, western "colonial" students, fundamentalist religious groups, children from lower-class and lower-caste families, physically disadvantaged students, and rural students. It is suggested that the key is to first recognize the existence and legitimacy of different mathematical practices, and then search for similarities between them. All mathematical knowledge is analyzable into six main categories: counting, locating, measuring, designing,

Program Evaluation; Student Attitudes; Teacher Attitudes; \*Test Construction; Undergraduate Students; Undergraduate Study IDENTIFIERS- \*University of Connecticut

A 3-year research program at the University of Connecticut evaluated the effectiveness of a recently implemented general education curriculum on undergraduates. The research consisted of testing students for performance on locally developed test instruments created for each of six general education areas: (1) Science and Technology, (2) Foreign Languages, (3) Culture and Modern Society, (4) Philosophy and Ethical Analysis, (5) Social Science and Comparative Analysis, and (6) Literature and the Arts. Faculty and students were surveyed to determine their views. Test instruments for each of the six areas were developed by faculty, pilot tested one year and revised the next. Students were tested on the revised instruments during the final project year. The evidence pointed to modest, but clear, positive effects of the general education curriculum most evident in the Foreign Language and Science and Technology areas. Faculty reported strong and consistent support of virtually all goals of general education. Students, especially seniors, reported support for general education but showed dissatisfaction with lack of choice of courses within the curriculum. Extensive appendixes contain general education goal statements; sample procedures; a final testing report; project evaluation details; dissemination information; and summary reports used for dissemination. IDENTIFIERS- \*Hospital Ethics Committees; \*University of Connecticut

A team at the University of Connecticut Health Center developed a model ethics and law curriculum for Hospital Ethics Committee (HEC) members. A multi-disciplinary project team composed of philosophers, lawyers, physicians, and social scientists developed a 7-day intensive bioethics/health law/medicine curriculum. The team designed the curriculum around three interrelated areas: committee structure and operation, analytic techniques, and topical issues. When the curriculum was in place, 47 participants from across the nation attended the seminars in three groups. Following the seminars, a working conference was convened for all 47 participants. Two significant outcomes were the production of a new bi-monthly journal, "HEC Forum," in which the essays written by the participants will be published, and the establishment of a national HEC network. To assess the impact of attendance on the seminar participants, information was gathered through the administration of scored pretests and posttests, and the

historical setting. The case study involved interviews with 11 faculty members of the Institute, interviews with people not in the department but instrumental in its establishment, and evaluation of relevant written material. Results are interpreted in terms of the arguments behind the emergence of the Institute including: the debates and introduction of media as a school topic; the organization of media and public policy; and arguments and motives of persons within the University. The development of a fully integrated curriculum and the Institute's final location within the Faculty of the Arts are recounted. (Contains 44 references.) (GLR)

IDENTIFIERS- \*ProfNet

This book presents a step-by-step account of how to work with print and electronic media to achieve higher education marketing results. Chapters examine how to be the media/marketing person on campus, develop a media and marketing plan, gain access to the press and market the institution through news and the media, and getting higher education stories aired on radio, television, and into print. In addition, the book discusses the development and use of a higher education media list, provides tips from higher education news professionals on the use of the media, and examines the use of the media when handling crisis situations. The final chapters provide advice on how to measure the success of media campaigns as well as identifying reasons for success, and discuss the importance of using global thinking when designing media and marketing plans so that the institution's image is properly projected to the right audience. Information on using ProfNet, a cooperative of college and university public information officers linked via Internet to provide journalists and authors access to experts on the nation's campuses, is also provided. Contains a 63-item bibliography. (GLR)

IDENTIFIERS- \*German Culture

This book addresses the problem of the future of Germanics as a field of study at colleges and universities in the United States. It is noted that the study of Germanics has been losing tens of thousands of students for the past 25 years, that this slide downward is no longer attracting enough attention from the Germanics community, and if it continues, the field will die. First, the book describes the decline in German studies and the response thus far illustrating the seriousness of the crisis. Then it offers a general critique of the field of German studies and proposes an agenda for revitalizing the field of Germanics involving changes in the academic department, considerations in the training of graduate students in German studies, a review of the lessons learned from the teaching of business German in Mississippi universities, some local options for raising enrollment, and the need for more options for teachers in German language classrooms. An appendix contains the numbers of American and European-born professors of German at specific American colleges and universities. Contains 114 references and an index. (GLR)

IDENTIFIERS- \*Army Reserves; Computer Mediated Communication

The purposes of this research were to evaluate the cost effectiveness of using Asynchronous Computer Conferencing (ACC) and to develop guidelines for effectively conducting high quality military training using ACC. The evaluation used a portion of the Engineer Officer Advanced Course (EOAC) as a test bed. Course materials which taught the same content presented in the resident course were developed for the remote, asynchronous presentation. This delivery system was called the System for Managing Asynchronous Remote Training (SMART). The efficacy of remote presentation was compared to that of the resident program with regard to completion rate, performance, acceptability, and cost. A summative evaluation determined the cost effectiveness of the SMART presentation as compared with the resident training. A formative evaluation and literature review were used to develop guidelines for conducting ACC training. Summative findings indicated: (1) ACC training costs less than resident training; (2) there were no differences no differences between resident and ACC students on objective performance measures; (3) ACC students perceived greater learning benefits than resident students; (4) ACC training had greater user acceptance; and (5) resident training takes less time than ACC training and has a better completion rate. The formative findings indicated that: (1) deadlines and group activities were the most effective pacing total of 8 hours of work on a course per week is a reasonable total of eight hours of work on a course per week is a reasonable student requirement; (4) immediate feedback is preferable to delayed feedback; and (5) support communications, such as a telephone hotline, are critical to the success of an ACC course. This report provides guidelines for how ACC courses should be implemented to maximize performance and acceptance. It also presents evidence supporting the cost effectiveness of ACC as a method of remotely delivering training to the Army Reserve Components. (DB)

 Education; Equal Education; Foreign Countries; Higher  
 Education; Learning; Models; \*Teacher Role; Teaching Methods;  
 Technological Advancement; Telecommunications  
 The meaning of distance education and the two approaches to it  
 that are commonly adapted are discussed. In most American  
 usage, distance education is structured learning where the  
 student and teacher are separated by space. A key distinction  
 in two types of distance education is the definition of  
 teacher. The teacher may be a person who instructs orally, or  
 the teacher may not be a person but a course in which content  
 is made available by other than the spoken word. The term  
 distance education began to be used after 1970 to describe the  
 purpose-built qualification-awarding industrial model  
 institutions. At present, the world of distance education is a  
 bimodal continuum in which one mode is this industrial model  
 based on a predesigned learning environment using fairly  
 mundane technology and the other (a more American approach) is  
 a model that seeks to develop high technology to increase the  
 size of an otherwise conventional classroom with an instructor  
 at its core. Both modes can contribute to the democratization  
 of access to knowledge and open learning. The variants of both  
 modes hold the key to massive expansion in educational  
 opportunity. Those who speak of a third generation of distance  
 education are speaking of the use of electronic information  
 technologies rather than models based on print and  
 broadcasting. A chart presents the two models of distance  
 education. (Contains 6 references.) (SLD)

IDENTIFIERS- Library Policy; National Policy; \*South Africa

This paper identifies obstacles to physical and intellectual access and effective use of books and media by South African children and suggests some possible solutions. It also includes a description of a study of the attitudes of first-year student teachers at colleges of education and universities in the Transvaal towards school libraries. The paper includes nine graphs depicting the findings. Obstacles to access identified in South Africa are similar to those in other developing countries and include: socio-economic problems, illiteracy, lack of reading tradition, insufficient library facilities or information technology for the majority of the population, few books published locally by black writers in indigenous languages, and few qualified media teachers. Resources found in South Africa include many well-stocked media centers, some centralized and regional media collections, training courses for media teachers, and programs to encourage reading undertaken by READ Educational Trust (an independent organization) in many of the disadvantaged schools. Ways to make books and media accessible to all children include the redistribution or sharing of resources, community libraries,

Management; \*Rural Areas; \*Volunteers; Volunteer Training  
IDENTIFIERS- \*Arizona; \*Circulation (Publications)

Papers on two projects are presented that deal with the effective use of volunteers in rural public libraries. The first paper on simplifying manual circulation techniques, explains a circulation system that volunteers in a rural library can use easily and efficiently. Setting only four due dates a month and filing all materials alphabetically in only adult and juvenile files makes it possible for volunteers to easily locate, check in, and renew materials. All four due dates are stamped on circulation cards, and the date that is uppermost is the due date for the material. Renewal simply means turning the card to the appropriate new date. The second paper describes the effective use of volunteers in the Chino Valley Public Library (Arizona), where volunteers perform services in a variety of ways, for an average of 200 volunteer hours a month. The volunteer presence is vital to the continued operation of this library. (Contains 11 references.) (SLD)

IDENTIFIERS- Christopher Newport College VA; \*Classics  
(Literature)

The frequency with which students borrow works of literature that can be called eminent or great works from a university library was examined in two studies that are interesting for their methodology and their findings. An operational definition of great or eminent works was developed, and a list of such works was derived from three sources on Western culture. In the first study, circulation records for 45 eminent novels from the list were studied for the last 10 years, and a rate was developed from dividing the number of checkouts by the elapsed time in years since the first circulation stamp during the 10 years. Obtained ratios for each volume of the same work were simply together. In the second study, the same sample of works was studied through the library's online circulation system for the recent past. The only difference between the two studies was in the method of obtaining the basic data (i.e., an automated or online system in the second study rather than the older manual system in the first study). Library material borrowing results

learning" is the purpose of community colleges. Under the old paradigm, community colleges are judged not on the basis of their output, but on the basis of inputs. The focus on instruction, rather than on learning, has made educational innovation suspect. Once this key assumption of the old paradigm is recognized, it becomes easier to recognize and undo the corollary assumptions. Under the old paradigm, faculty were primarily teachers providing classroom-based instruction. Under the new paradigm, faculty become designers and managers of learning experiences and environments. The new paradigm calls on colleges to judge their success not on the quality of instruction but on the quality of learning, allowing for fulfillment of the student outcomes accountability movement. Under the old paradigm, productivity is defined as cost per hour of instruction per student, while under the new paradigm, it is defined as cost per unit of learning per student. A table lists and compares assumptions of the old and new paradigms in the seven categories of mission, purposes, criteria for success, structures, means to ends, nature of roles, and learning context. The purpose of this study was to assess the need for information about transfer students of both "sending" institutions (schools from which students transfer) and "receiving" institutions (schools to which students transfer) and to assess also the institutions' capacity for and willingness to enter into data-sharing activities. The survey instrument was distributed to 97 Kentucky public and private postsecondary KAIR (Kentucky Association for Institutional Research) member institutions, of which 32 sent usable responses (a 33% response rate). Study findings, included the following: (1) "sending institutions overwhelmingly responded that their needs included specific demographics on transferring students, where specific students transfer, transferred student grade point averages (GPA's) at new institutions, degrees earned by transfer students, specific student persistence information, and the time required to complete degree programs; (2) much of the information required by receiving institutions is ordinarily available on student transcripts (except for an American College Testing program (ACT score); (3) 72% of the respondents felt that it would be permissible to share data, although such responses came with qualifying caveats, including concerns for student confidentiality, student notification about the release of

IDENTIFIERS- \*Johnson County Community College KS  
As a major component of Johnson County Community College's  
(JCCC's) annual institutional effectiveness assessment, follow-  
up studies are conducted of students completing a career  
program during the previous academic year and of their  
employers. In November 1992, surveys were mailed to 733 program  
completers, 489 of whom responded for a response rate of 85%.  
In addition, 257 employers were identified by respondents  
working in jobs related to their programs of study, 79.8% of  
whom (n=205) returned usable questionnaires. Study findings  
included the following: (1) 8 out of 10 respondents were  
working in a job related to their career program, although 21%  
were working part-time only; (2) the average hourly wage of  
respondents working full-time was \$11.47, up from \$11.28 in  
1991; (3) fewer respondents had earned an associate degree in  
1992 than in 1991, while more had earned a vocational  
certificate; (4) nearly 83% of the respondents reported feeling  
more self-confident as a result of their experience at JCCC,  
and 97% of respondents would recommend JCCC to friends; (5) the  
lowest levels of satisfaction were reported for job placement  
services (38% positive rating), the availability of financial  
aid (41%), and the registration process (65%); (6) despite the  
recent completion of a career program, 30% of respondents were  
enrolled in classes; and (7) 91.5% of the employers rated JCCC  
completers as very good in terms of job-related conceptual  
knowledge, 85.5% as very good in terms of technical skills, and  
another 91% as very good with respect to attitude and quality  
of work. Detailed data tables, survey instruments, and follow-  
up letters are appended. (MAB)

IDENTIFIERS- Sinclair Community College OH

Instead of relying on graduates' perceptions of their educational experiences a year or more after graduation, Sinclair Community College in Dayton, Ohio, decided to survey students applying for graduation about their recent experiences. Questionnaires were sent to all 1,450 graduating students in the 1992-93 academic year, with 872 returning completed surveys for a 60% response rate. Responses were received from the students in the academic divisions of allied health (29%), business technologies (26.9%), engineering technologies (13.8%), extended learning and human services (11.8%), liberal arts and sciences (7.6%), and fine and performing arts (6.9%). Study findings included the following: (1) in ratings of courses, quality of instruction received the best mean rating and course availability the least positive mean rating; (2) in general, students rated the courses in their divisions as somewhere between "excellent" and "good"; (3) compared to the previous year, services receiving more favorable ratings were veterans' services, disability services, tutoring, student activities, and the bookstore, while financial aid and registration received noticeably poorer ratings; (4) at the time of their initial enrollment, over 75% of the respondents reported being "very" or "somewhat certain" of their educational goals; (5) the average length of time that respondents took to complete their educational goals was 3.5 years; (6) 65.8% of the respondents reported being currently employed, of whom 67.5% indicated that their jobs were related to their majors; and (7) 49% of the respondents stated an intention to transfer to a four-year institution. Data tables and the survey instrument are included. (PAA)

DESCRIPTORS- Community Involvement; \*Educational Legislation; \*Educational Planning; Employer Supported Day Care; Policy Formation; Preschool Children; \*Preschool Education; State Government; \*State Programs

IDENTIFIERS- \*Colorado; \*First Impressions; Public Awareness

The First Impressions initiative was created in 1987 by Governor Roy Romer of Colorado to increase public awareness of the critical importance of the first 5 years of life, assist communities in developing effective programs for young children and their families, and influence early childhood policy and practice. In 1991-92, the priorities of First Impressions were to: (1) build community coalitions to address early childhood issues locally; (2) stimulate the development of innovative initiatives that improve the lives of young children and their families; (3) assist in developing a statewide children and families agenda; and (4) promote the concept of community investment in early childhood as an investment in the future. Activities focusing on these priorities included community forums on families and children, the creation of an Early Childhood Professional Standards Task Force, the expansion of the Parents As First Teachers program, and the exploration of options for reducing parents' travel related to child care. Other accomplishments included the expansion of Colorado's statewide system of child care resource and referral, the creation of the Colorado Business and Child Care Council to assess and promote private sector involvement in child care, and coordination of a strategic plan for Colorado's families and children. Throughout the year, Governor Romer and First Impressions' staff pursued various avenues to heighten public awareness of the issues of young children. (AC)

DESCRIPTORS- \*Age Differences; Comparative Analysis; Elementary Education; \*Elementary School Students; \*Peer Groups; \*Peer Relationship; Self Concept; Sex Bias; \*Sex Differences; \*Social Networks; Sociometric Techniques

IDENTIFIERS- \*Sociometric Status

This study explored the development of children's representations of the affiliative structure of their peer group during primary school. Subjects were 467 boys and girls in first through sixth grade, who were assessed using a standard sociometric procedure and asked to give their perception of the existing networks in their peer group. Variance analysis was conducted by gender and grade level. Results showed that across all age levels, both girls and boys perceived themselves to be mainly affiliated with individuals of their own gender and that this pattern increased as a function of grade level. Exhaustivity and accuracy of the perceptions do improve with age, girls surpassing boys. In addition, both sexes appeared to show a better perception of the peer networks of their own gender, yet this pattern fluctuated with age. Results are discussed in light of current research on gender segregation, gender differences, and cognitive processes involved in social categorization. (Author/MM)

abilities. These intelligences were identified as logical-mathematical, linguistic, musical, spatial, bodily-kinesthetic, interpersonal, and intrapersonal. These units, however, bear striking resemblance to cognitive style constructs and intelligence quotient factors identified by others in unified theories of intelligence. In fact, MI theory merely adapts factors identified as primary abilities in factor analyses of data derived from intelligence tests and relabels them as intelligences. A review of the literature on cognitive styles shows numerous compatibilities between styles of cognition and the MI intelligences. For example, the logical-mathematical intelligence is applied to individuals who are sensitive to logical or numerical patterns and have the ability to handle long chains of reasoning, and whose ideal career is as scientists or mathematicians. These characteristics are compatible with the cognitive style identified as field-independent, and also with numerical ability, one of the factors identified by intelligence factor analysis. While single factor constructs of intelligence have certainly been invalidated by current research, the label of separate intelligences for aspects of cognition does not appear to be warranted. Critiques of each of the seven MI intelligences and 97 references are included. (BCY)

PUB TYPE- Reports - Research/Technical (143), Speeches, Conference Papers, "Papers Presented at..." (150)

DESCRIPTORS- Affective Behavior; Child Development; Cultural Traits; Family Environment; \*Family Influence; Infants; Interviews; \*Parent Attitudes; \*Parent Child Relationship; Parent Role; \*Preschool Children; Preschool Education; \*Sex Role; \*Sex Stereotypes; Sexual Identity; Toddlers; Toys

To examine parental sex stereotyping of young children, a study was undertaken in spring 1993 of 59 parents and caregivers and their infant and toddler children at child care centers and schools in Arkansas. Interviews and observations were conducted of the parents/caregivers, focusing on the types of toys bought for children, the toys that the family encouraged children to play with, views on allowing children to play with toys traditionally associated with the opposite sex, feelings about names used for both boys and girls (i.e., Jamie, Kelly, etc.), the importance of showing males and females in traditional and/or non-traditional roles, and willingness to fill non-traditional roles at home, although the spouse might perform them better, to provide a model for children. Study findings included the following: (1) 68% of the parents bought toys considered traditional for the child's gender, while 2% bought gender-neutral toys; (2) 75% of the parents' families encouraged children to play with traditional toys, 2% with toys considered non-traditional, and 20% with educational toys; (3) 76% of the parents thought that children should be allowed to play with non-traditional toys; (4) names used for both sexes were disliked by 41% of the parents, citing the possibility of teasing by other children; (5) 37% thought it was important for children to see males and females in traditional roles, 25% in

framework for alcohol education that integrates physical, spiritual, mental, and emotional perspectives. The rubric of science alone will not alter the impact that alcohol and alcohol abuse have had on the lives of some American Indian students. This unit of the curriculum focuses on the digestion and metabolism of alcohol. It discusses: (1) the concept of holism; (2) the four basic processes of the alimentary canal; (3) the value of the machine model of the body; (4) physical and chemical actions of digestion in the mouth; (5) peristalsis in the esophagus; (6) roles of the stomach, intestines, liver, and pancreas in digestion; (7) disruption of the stomach's normal functions by alcohol; (8) alcohol metabolism in the liver; (9) damage to the liver and pancreas by alcohol; (10) digestion of food compared to that of alcohol in the mouth, esophagus, and small intestines; and (11) effects of alcohol on the urinary tract. This unit contains a participant's handbook, 21 references, a glossary, 24 handouts and accompanying overhead transparencies, tips for a successful training session, and an evaluation form. (SV)

IDENTIFIERS- \*Brain; \*Nervous System

The Science of Alcohol Curriculum for American Indians uses the Medicine Circle and the "new science paradigm" to study the science of alcohol through a culturally relevant holistic approach. Intended for teachers and other educational personnel involved with American Indians, this curriculum aims to present a framework for alcohol education that integrates physical, spiritual, mental, and emotional perspectives. The rubric of science alone will not alter the impact that alcohol and alcohol abuse have had on the lives of some American Indian students. This unit of the curriculum focuses on the central nervous system (CNS) and its responses to moderate drinking and alcohol abuse. It discusses: (1) the Medicine Circle as a better model than the machine for studying the CNS; (2) the importance of culturally relevant education; (3) the structure of neurons, process of a synapse, and function of neurotransmitters; (4) effects of alcohol on neurons; (5) roles of the cerebrospinal fluid and the blood-brain barrier in brain functioning; (6) alcohol effects on the hindbrain, midbrain, and forebrain; (7) differences in alcohol reactions of high and

\*Educational Change; Elementary Secondary Education; Higher Education; Professional Development; Rural Schools; School Districts; \*Shared Resources and Services; \*Small Schools

IDENTIFIERS- Oregon; Small School Districts

Small schools may resist educational reform because they view the implementation of change as too costly and time consuming. Formation of a consortium of small schools allows the pooling of staff and resources, thereby increasing capabilities while maintaining the positive attributes of small schools. In rural northeastern Oregon, eight small school districts formed a consortium to implement state-mandated changes toward a goal-based curriculum. Initially, many area teachers were skeptical about both the reform effort and the consortium. A council composed of representatives from each district and the local college received training in curriculum development, program implementation, and related matters and disseminated the information to their member districts. Teachers in each discipline worked in curriculum study groups to develop curriculum guides that blended traditional content with the outcomes-based and process-oriented goals of the statewide program. These work groups met monthly for 1 year, with college credit available to participants. Working together sparked excitement for innovative teaching practices and improved teachers' self-esteem and sense of empowerment. Continued collaboration and peer mentoring contributed to the successful implementation of the curriculum projects. Districts that were highly committed to the consortium in terms of financial support and personnel showed the greatest implementation of change. (SV)

DESCRIPTORS- \*Child Abuse; Employment Patterns; Family Life; Leisure Time; Parent Child Relationship; \*Rural Family; \*Seasonal Employment; \*Stress Variables; \*Unemployment

IDENTIFIERS- \*Job Stress

Both the literature and common beliefs suggest that unemployment increases family stress and child abuse. To test this idea, data were collected on monthly unemployment rate and number of child abuse complaints during 1978-91 in a rural county in the northwestern United States dependent on the lumber industry. Unexpectedly, the data showed that there was a strong negative correlation between unemployment and child abuse. Interviews with 50 families revealed that lumbering activities were usually suspended during the spring thaw, and that this period of anticipated unemployment affected families in positive ways, providing time for leisure activities and parent-child interaction. On the other hand, lumbermen worked long hours during the late summer and families in which child abuse had occurred reported increased job stress and alcohol consumption among men during this time and increased stress for wives from carrying all other responsibilities alone. Suggestions for social-work interventions during high-stress employment periods include provision of support groups for mothers, parent education, and children's activities. (SV)

IDENTIFIERS- \*Science Process Skills

When teachers search the literature for activities they can do with their students, they are exposed to science process vocabulary that is improperly used and ambiguous in meaning. This is particularly so with the science process skills of observing, inferring, and hypothesizing. This study examines the process understanding of science teachers at various levels in order to see if concerns about their misunderstandings are warranted. To accomplish this goal the Science Process Questionnaire (SPQ) was developed for assessing each teacher's understanding of science processes of observing, inferring, and hypothesizing. The SPQ was administered to 1,378 teachers in 12 states. Total percentage scores (average percentages of correct scores in response to observation inference, and hypothesis statements) are reported: preservice elementary teachers (67%), elementary teachers (70%), preservice secondary teachers (72%), secondary teachers (69%), and college science and science education teachers (77%). Ranges of percentages of correct scores were 84%-93% for observation statements, 59%-77% for inference statements, and 57%-74% for hypothesis statements. (PR)

IDENTIFIERS- Enlightenment Thought; Nature Study Movement; Normal Schools; \*Object Teaching; Pestalozzi (Johann Heinrich); Sheldon (Edward Austin); State University of New York Coll at Oswego

The object teaching revolution challenged the 19th century American education practices of learning by rote memorization and relying on the textbook and teacher for knowledge. The American version of object teaching evolved from Pestalozzi's

"interjudge" reliability for five groups of judges on seven rating categories on a band/orchestra adjudication form and determine the extent to which category ratings are interrelated. Interjudge reliability coefficients for three sets of judges were found to be marginally acceptable (in the .80s); those for the other two sets of judges (.67 and .54) were not. Interjudge reliability coefficients for the various category ratings were generally much lower than those for the final ratings. Two performance categories (technique and intonation) were the best predictors of final ratings. The categories "selection" and "general effect" contributed nothing toward predicting the final ratings. (Author/DB)

parents or extended family. The assumption of the study is that preschool education level would achieve its aims and meet societal demand if the aims, admission system, curriculum, teacher training, and administration were available and well established and each of these elements is examined in relation to each of the three countries under study. Despite the cultural differences between the Arab countries and Japan, the study reveals that there are more similarities than differences concerning educational goals. The three societies always have been under the influence of traditions and moral values internally, and the influence of western educational theories externally. Both Egyptian and Japanese societies pay great attention to preschool education. These two countries stress moral education especially at this early level. In Oman because of limited resources there is no specific curricula for this age level. (DK)

DESCRIPTORS- \*Educational Philosophy; Educational Principles; Educational Research; Elementary Secondary Education; \*Foundations of Education; \*Philosophy; Social Science Research; Social Scientists

IDENTIFIERS- \*Analytical Philosophy of Education; McGregor (Douglas); Smith (B Othanel)

This collection of documents concerns the Analytical Philosophy of Education (APE) and its history. APE was the dominant approach to philosophy of education during the 1960s and 1970s; it is no longer fashionable. The main paper included in this collection sketches the history of APE and attempts to show its relevance to the idea of "institutional democracy." APE is applied to an address by former Midwest Philosophy of Education Society President Arthur Brown's Presidential Address on "institutional democracy," which draws upon the work of famed management theorist Douglas McGregor. The use of the methods of APE on Brown's and McGregor's texts show that McGregor's use of the word "democracy" is much less clear than Brown's; McGregor's research may not support Brown's views. This paper includes 24 notes and is accompanied by an outline of McGregor's thought and career, a supplemental bibliography of three books and two selected articles by McGregor and a list of discussion questions for the Binghamton presentation. The remaining documents included are four bibliographies entitled respectively, "Founders of Analytical Philosophy of Education"; "History of Analytical Philosophy of Education"; "Students and Faculty in Foundations of Education at Temple University"; and "Critical Thinking and Philosophical Analysis." IDENTIFIERS- High School and Beyond (NCES); High School Sophomores; National Education Longitudinal Study 1988

This study is part of an on-going research project to assess differences in educational attainment when controlling for race, sex, and socioeconomic status. The National Educational Longitudinal Survey (NELS) 1988 of 8th graders and a survey of 10th graders, High School and Beyond 1980-82 (HSB), were utilized to obtain data that were then analyzed. This research found that socioeconomic status determined educational outcomes more than any other variable. This result is in keeping with the findings in previous research. In addition, the study found that the school performance of low socioeconomic status boys is not as good as that of girls from low socioeconomic backgrounds in the eighth grade sample. This finding was consistent across racial and ethnic groups. The finding did not hold true in the high school sample however. Although this result was due in part to the fact that many low performing boys may have dropped out, those boys who remained in school made considerable gains relative to girls as they approached graduation. Boys from higher socioeconomic homes did as well as or better than girls in both data sets. Nevertheless, girls expressed a greater interest in college, especially girls from higher socioeconomic backgrounds. Black and Hispanic girls were more likely to take advanced placement examinations. This may reflect the better employment opportunities many boys have right after high school. Many Black young men and some Hispanics express interest in the military as an alternative to college. Literacy for Metis and Non-Status Indian Peoples: A National Strategy.

SPONS. AGENCY- Department of the Secretary of State, Ottawa (Ontario).

PUB DATE- 93

NOTE- 44p.

LANGUAGE- English

EDRS Price- MF01/PC02 Plus Postage.

PUB TYPE- Reports - Research/Technical (143)

DESCRIPTORS- \*Canada Natives; Educationally Disadvantaged; Federal Legislation; Foreign Countries; \*Indigenous Populations; \*Literacy Education; National Programs; Needs Assessment; \*Policy Formation; Public Agencies; \*Public Policy IDENTIFIERS- \*Canada; \*Metis (People)

The condition of literacy programming for Metis and Non-Status Indian Peoples in Canada is reported. Metis peoples are defined as Aboriginal People distinct from Indian and Inuit, descendants of the historic Metis, and descendants of Aboriginal Peoples who have been absorbed by the historic Metis, all of whom share a common cultural identity and political will. The Non-Status Indian Peoples are those of Aboriginal ancestry who are not defined as Indian within the criteria of the Indian Act and are not part of the Metis community. The research was designed to identify successful approaches and programs presented in existence and to discover gaps and needs. Data for the study was obtained through a literature review and telephone interviews with three separate groups: personnel in literacy programming for provincial and territorial governments; representatives of Metis and non-status Indian organizations; and personnel in literacy programs deemed successful for Aboriginal peoples. This report consists of the following parts: the Literacy Campaign of Canada as it affects this population; defining literacy in general; defining literacy for a literacy strategy for Metis and Non-Status Indian People and communities; characteristics of successful programs; and developing a national strategy. The report concludes with recommendations for: a national forum to discuss the issues; a literacy campaign; an education act; Aboriginal control of Aboriginal education policy; support structures; needs assessment; a literacy coalition; development of a research base; and formation of a National Literacy Council for Metis and Non-Status Indians. Appended are the names and addresses of individuals and organizations surveyed. (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

DESCRIPTORS- \*Adult Literacy; Cross Cultural Studies; \*Cultural Context; Developing Nations; Educational Policy; Ethnography; Foreign Countries; Language Planning; \*Literacy Education; Policy Formation

This paper reviews some of the issues in the new literacy studies and the questions, from an anthropological perspective, of self, person, and identity that affect literacy practices. It is suggested that in discussing literacy, it is better to start from a cultural viewpoint rather than an educational one. The traditional autonomous model of literacy is critiqued, particularly the "we" of western cultures giving literacy to "them" in the developing world. The complexity of the relationship between literacy and culture is also addressed. The notion of personhood in different cultures is further discussed, and some ethnographic examples are reported. Implications for education and pedagogy are considered. Contains approximately 70 references. (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

IDENTIFIERS- Academic Community; \*Chapman College CA; \*Freshman Seminars

Chapman College (California) developed a Freshman Seminar Program which provides a rigorous, integrative intellectual experience for students in the first semester of college study. The program's aims were to provide students with a common learning experience, to provide a basic foundation in history, geography, literature and other fields; to improve students' skills in oral and written communication and in the analysis and interpretation of ideas; to strengthen freshmen advising; to build a sense of community among small groups of freshmen; and to improve retention from the first to the second semester and from the freshman to the sophomore year. Various strategies were employed to develop a sense of "esprit de corps" and academic community among the faculty. The actual freshman seminar was taught by approximately 20 faculty from various departments, and focused on the topic "war and peace." Students received constant mentoring as they made the transition to the college setting. The program succeeded in creating a new sense of intellectual excitement and academic community as demonstrated by increased retention of students and development of new courses and teaching strategies by faculty. Attachments making up 75% of the document include: a list of faculty participants, course syllabi, speaker series information, student evaluation results, materials from a special exhibit, faculty responses to the seminar, faculty workshop information, and community recognition materials. School Relationship; Higher Education; Models; Political Issues; \*Politics of Education; Universities

IDENTIFIERS- \*Colleges of Applied Arts and Technology

This paper examines the college board governance system of the 23 Colleges of Applied Arts and Technology in Ontario, Canada, with an assessment of specific issues related to the system's effectiveness and suggestions for improvement. Contextual factors currently affecting the role of governing boards are discussed including a decline of authority, confusion of mission, the politicization of the campus, accountability, and financial problems. The paper then examines what roles governing boards should perform, including the role played by the board's president; what the board's composition should be; the differences and issues concerning developing boards around either the community or constituency models; and how board members should be selected and paid. Finally, recommendations are presented on ways to strengthen college governing boards so they may respond appropriately to community needs in light of the considerable social, economic, and political changes occurring in Canada. Recommendations include adherence to a community model of board governance, the development of conflict of interest guidelines for governing boards, and a close monitoring of the composition of governing boards for the purpose of increasing board effectiveness. IDENTIFIERS- \*Texas

This report addresses the issues of underrepresentation and equity involving women in Texas colleges and universities. These issues include the numbers of women administrators and faculty, salary and compensation differentials, recruitment and retention of women in faculty and administrative ranks, the climate for women in higher education, and methods for measuring outcomes related to these issues and assuring accountability. The first and second sections provide statistics, within the text and appendices, that document the underrepresentation of women in terms of their faculty or administrative rank and salary. The third section addresses the climate for women in Texas higher education, including both the atmosphere in which women work and study and issues related to families and supportive services which would improve the environment for both men and women in higher education. The report's final section develops a set of goals, objectives, and an action plan for achieving parity in higher education faculty, administration, and governing boards. Appendices provide recommendations for collecting supplemental data and developing institutional plans as well as a list of methods and procedures for recruiting, retaining, and promoting women in

Vocational Education

IDENTIFIERS- \*England; Polytechnics

This paper addresses issues generated by the British government's decision to abolish the binary division between university institutions of higher education and other postsecondary institutions. Sectoralization of British higher education in a post-binary system has created some problematics, two of which appear especially noteworthy: (1) student accessibility to higher education provision; and (2) the vocationalization of that provision. This essay presents the argument that the coordination of contemporary revised higher education missions in Britain, given concerns relative to student accessibility and vocationalization of higher education programs, requires minimally public modes of sectoral regulation, energized by other than market-responsive and privatized policies of institutional development. Prior to these arguments there is a discussion of student accessibility to British higher education within the context of the government - authored "binary principle" of higher education provision. An appendix contains a list of renamed binary polytechnics. (Contains 26 references.) (GLR)

This book presents papers, originally given as part of a seminar series in 1988 and 1990, that address issues in higher education and its role in U.S. society. In addition to the papers, two articles that were used as the basis for discussion at the 1990 seminar are also presented. One article was the speech given by William J. Bennett, then Secretary of Education, at the 350th Anniversary of Harvard University in which he attributes the loss of public confidence in the endeavor to an inattention by educators to the legitimacy of dialogue about the outcomes of higher education. The second article is by Arnold R. Weber and is titled, "Higher Education, Public Concerns, and Institutional Angst." The papers presented at the seminar and their authors are as follows: "Why Are People Beating Up on Higher Education?" (Chester E. Finn, Jr.); "Rethinking What It Means to be a Scholar" (R. Eugene Rice); "The Economics of Cost, Price, and Quality in U.S. Higher Education" (Michael S. McPherson and Gordon C. Winston); "Quality and Access in Higher Education: The Impossible Dream?" (Arthur M. Hauptman); "The Evolution of Access Policy: 1965-1990" (Judith S. Eaton); "Is the Goal of College Access Being Met?" (Arthur M. Hauptman and Maureen A. McLaughlin). (GLR)

Documents providing background and information about the plans of the Owego Apalachin Central School District (New York) for instructional technology are presented. An outline of the technology plan emphasizes key components, the planning process, and details about instructional and administrative computing. The current uses of electronic technology in the schools are summarized, reviewing instructional computing and administrative uses in student recordkeeping and instructional and business management. Future directions are also summarized. "A Note to Parents" introduces the comprehensive plans for school computer use to parents, explaining the district's emphasis on integrating computer use into regular instruction and including a brief review of the curriculum as it exists. Possible long-term goals are summarized in an attachment. A separate section lists assumptions on which future long-term plans are based. A description of the academic design model on which planning rests is included, with an overview of the planned distributed computer network. (SLD)

Software; Computer Software Development; Computer Software  
Selection; \*Federal Programs; Guidelines; Information  
Dissemination; Interviews; \*Research and Development; Research  
Methodology; Research Projects; \*Technological Advancement  
IDENTIFIERS- Advanced Research Projects Agency; General  
Accounting Office; \*High Performance Computing; High  
Performance Computing Act 1991; \*Supercomputers

High-performance computing refers to the use of advanced  
computing technologies to solve highly complex problems in the  
shortest possible time. The federal High Performance Computing  
and Communications Initiative of the Advanced Research Project  
Agency (ARPA) attempts to accelerate availability and use of  
high performance computers and networks. The House Armed  
Services Committee asked the General Accounting Office (GAO) to  
assess this program, particularly the agency's distribution of  
advanced computers to research sites, its interaction with the  
research community, and the balance between hardware and  
software. Interviews with agency and industry representatives  
and a review of documents were conducted. Results indicate that  
the ARPA has fostered significant advances, but with several  
shortcomings. Placing of new computers has focused on just a  
few machines. Limited interactions with the technical community  
may be hindering progress toward ambitious program goals. Much  
progress has been made in hardware development, but software  
remains too primitive to make massively parallel processing  
systems useful. Recommendations for improvement are presented.  
Four appendixes provide details about methodology, placement of  
machines, and project selection, and list contributors to the  
report. Five tables contain study findings, and two figures  
illustrate computer applications and product selection. (SLD)

IDENTIFIERS- Southeast Missouri State University

This guide serves as an academic departmental planning instrument and provides a description of the various collections, goals, and policies of Southeast Missouri State University's Kent Library. An overview provides information about the library's mission, funding sources and allocation procedures, departmental library liaisons, overall selection criteria, and nondisciplinary and interdisciplinary criteria. The second section describes 17 of the library's collections, including the general and periodical collections, reference, microforms, rare books, and the browsing collections and describes the kinds of materials that are added to the collections. Policies governing acquisitions, by purchase and by gift, and their disposition once they have been acquired are described in the third section. The next section covers interlibrary loan policies, and the last section describes the purpose of departmental library profiles and procedures for developing the profiles. The form used to collect information for the profiles is attached, but the individual profiles from the complete guide are not included in this document. (KRN)

IDENTIFIERS- Australia; \*Information Skills; \*Information Society; Resource Based Learning

Features of the information society are discussed, and implications for education are reviewed. The information society is dominated and even overwhelmed by information. Its future is uncertain, but regardless of the eventual potential for good or harm, information literacy is a precondition of the information society. Young people in Australia are becoming more computer literate, and education authorities are developing new educational agendas for the information society. Resource-based learning is an approach that is particularly appropriate in fostering the development of individual students. The shift in emphasis from the content of what students learn to the processes of learning depends on the use of information and the development of information skills that define the purpose of an information task, locate data, select and interpret data, and use the information to complete the task. A look at information skills as they are taught in other countries highlights developments, with implications for teachers, teacher-librarians, and principals. Effective information skills programs depend on a wide range of resources. Information technology in all its forms must be an integral part of the school curriculum. (Contains 44 references.) (SLD)

IDENTIFIERS- \*Center for the Study of Community Colleges CA;

\*Jefferson Community College KY; Transfer Rates (College)

The Transfer Assembly is a research effort of the Los Angeles-based Center for the Study of Community Colleges. The Assembly defines transfer students as "all students entering a two-year college in a given year who have no prior college experience, who complete at least 12 credit units at the college, and who subsequently enroll at a senior institution." Every year since 1989, colleges participating in the Assembly have provided student cohort data, and the Assembly calculates transfer rates for the colleges and provides data from all colleges in an annual report. In 1990 and 1991, Jefferson Community College (JCC), in Louisville, Kentucky, participated in the Transfer Assembly. Once student data were obtained for the 1,483 first-time freshmen for fall 1985, a cohort of approximately 816 were identified each of whom had earned a minimum of 12 credit hours. By contacting all public and private four-year institutions in Kentucky, data were obtained on students in the JCC cohort who had transferred to senior institutions. Study results for the 1985 cohort included the following: (1) Hispanics and Caucasians in the 1985 cohort were most likely to earn the requisite number of credit hours; (2) 27% of the cohort had transferred to a four-year institution, with Asians showing the highest transfer rate (50%); and (3) by modifying the Assembly's definition of transfer through removal of the 87 students in the cohort still enrolled at JCC, an adjusted transfer rate of 31% was generated. The paper discusses limitations of Transfer Assembly definition of transfer rate; reviews JCC 1985 cohort findings; and provides a revised formula for calculating transfer. Data tables and references are included. (PAA)

Institutional Assessment, Planning, and Institutional Change: An Integrated Institutional Assessment and Strategic Planning Process for Community Colleges.

PUB DATE- 25 May 93

been standardized, and thus can be difficult to assess. A model program and assessment format developed by Hudson County Community College (HCCC), in Jersey City, New Jersey, however, provides a possible framework for standardizing field placement programs. Students in HCCC's program are expected to complete two consecutive courses of field placement, with each course requiring 128 hours of actual work at a placement site, weekly one-hour seminars, the maintenance of weekly logs of student activities, and final term papers. The field placement is designed to develop a sense of professional belonging and identity by requiring students to identify client service needs and gaps, prepare progress reports, assess case studies, and evaluate a strategic treatment plan. Grades are determined by students' weekly journals, term papers, and evaluations of their performance at the placement sites. To effectively evaluate placement site performance, an instrument was developed at HCCC focusing on descriptive, qualitative, and quantitative aspects of the field experience. The instrument was intended to evaluate students individually at mid-term and again at the end of the course to provide comparative data, and has been used with about 20 students annually for the past 5 years. The evaluation instrument is included. (MAB)

IDENTIFIERS- \*Prince Georges Community College MD

Each year, the Board of Trustees of Prince George's Community College (PGCC) in Largo, Maryland, must submit a report evaluating the effectiveness of PGCC's financial plan to the state's Higher Education Committee and General Assembly. This report, for fiscal year (FY) 1993, is divided into four sections. The first section reviews the cost containment measures taken in both FY 1992 and 1993 to maintain low tuition in spite of cuts in state funding in both direct aid and contribution programs. These measures included employee furloughs, reduction of the administrative staff by 17%, hiring freezes, elimination of conference travel and professional development budgets, a freeze on all equipment purchases, and an early retirement program. The second section analyzes the total cost per full time equivalent (FTE) student by instructional discipline, indicating that per student costs ranged from a low of \$3,107 per FTE in remedial math to a high of \$7,465 in education, resulting in an average cost of \$3,984 to teach each FTE student. The third section provides an evaluation of enrollment, student outcomes, and cost analysis of the disciplines reporting the highest costs in FY 1992; namely, drafting, electronics, medical records, nuclear medicine, office technology, and respiratory therapy. The final section, a review of Prince George's County's contributions to

In fall 1992, a study was conducted at Sinclair Community College (SCC) in Dayton, Ohio, to determine factors contributing to former students' decisions not to return to the college. Two groups of former students were included in the study: those who had last attended in fall 1990 and had thus been absent for 6 quarters, and those who had last attended in fall 1991 and had been absent for 3 quarters. Random samples of 360 and 400 students were selected from the two groups, respectively. Of the 760 surveys mailed, 243 former students provided usable responses for a 36% response rate. Study findings included the following: (1) personal/family considerations or financial concerns were cited by more than 50% of respondents, while 17% indicated that they had achieved their educational goals, 12% had moved, and 18% had transferred to another college; (2) 72.9% of the 1990 group stated that they had originally planned to get a degree, compared to 88.1% of the 1991 group; (3) 38% of the 1990 group and 53% of the 1991 group indicated an intent to return to SCC; (4) students from the 1991 group were more likely to cite goal uncertainty, scheduling problems, and financial concerns as reasons for not returning, and less likely to cite time and transportation considerations than the 1990 group; and (5) career uncertainty and scheduling problems were more frequently cited as reasons for not returning among students who indicated they were degree-seeking. Responses to open-ended questions, tables, and a reader evaluation survey are included. (PAA)

IDENTIFIERS- Childhood Experiences; \*I Can Do Program

This study evaluates the "I Can Do" program, a 13-session preventive intervention curriculum designed to teach children methods of coping with five stressful events or experiences (parental separation or divorce; loss of a loved one; spending time in self-care; move to a new home or school; and feeling ethnically, socially, or intellectually different). The program also taught children how to help peers cope with the same experiences. Targeted coping skills included the use of social support and social problem-solving skills. Subjects were 92 fourth-graders who were assigned to the Immediate Intervention Group (participating in the fall semester) and the Delayed Intervention Group (participating in the following spring semester). Subjects completed several measures before and after their participation in the program, including a fact and attitudes measure, a self-efficacy measure, and a problem-solving measure. Results showed significant immediate or delayed effects on improvement in children's self-efficacy for coping with stressors. (MM)

IDENTIFIERS- Home Child Care; Sweden

This longitudinal study examined the experiences of out-of-home preschool child care to performance and adjustment in elementary school. Subjects were 145 children in Goteborg, Sweden, who were on average 16 months of age when they were enrolled in this study. Within 4 weeks of enrollment in the study, 54 children began center-based day care, 36 began family-based day care, and 55 remained in the care of their parents. Children's verbal abilities were assessed using the Griffiths developmental scale, and Caldwell's home inventory for measurement of the environment (HOME) was completed when children were 40 months old. Home and school visits were conducted again prior to enrollment in elementary school and in second grade. Objective tests of intellectual performance were administered, maternal and teacher ratings of children's adjustment were collected, and the HOME inventory was completed

(Psychology); \*Schemata (Cognition); Whites  
IDENTIFIERS- African Americans; \*Racial Preference

This study applied a schema-based, social information processing model to examine the development of social cognitive aspects of preschoolers' racial stereotyping and stereotype beliefs (i.e., preschoolers' race schemas). The study examined developmental and individual differences in preschoolers' race schematization (salience of the race dimension in social information processing), same-race and other-race preferences, and memory for racially stereotyped portrayals. Subjects were 27 African American and 38 white preschoolers between 3 and 6 years of age, who participated in 2 interviews. Children's recognition memories for 12 racially stereotyped depictions were assessed. In a separate session, children indicated their peer preferences regarding a series of 28 pairs portraying competing pictures of same-sex African American and white children. Children's response latencies in the peer preference task were used as a measure of race schematization. Results indicated significant differences across several aspects of preschoolers' race schemas. Younger children, white children, and children rated high in race schematization demonstrated significantly greater same-race peer preferences than older children, African American children, and children rated low in race schematization. African American children showed significantly better memories than white children for racial schema-consistent depictions. Results support the application of schema-based social cognitive approaches to examinations of the development of children's racial stereotyping and stereotype beliefs. (MM)

School Students; Foreign Countries; \*Humor; Interpersonal  
Competence; Kindergarten; \*Kindergarten Children; \*Peer  
Acceptance; Peer Relationship; Predictor Variables; Preschool  
Education; Self Concept; \*Student Behavior

IDENTIFIERS- Norway; Self Report Measures

This study examined relations between children's humor, behavioral characteristics, acceptance by peers in kindergarten and primary school, and self-perceptions. Subjects were 35 kindergarten, 88 fourth grade, and 95 eighth grade Norwegian children. For all students, assessments included sociometric ratings of classmates, teacher assessments of children's behavioral characteristics, and children's assessments of their own social behavior. Eighth graders also completed a peer assessment measure. Analysis indicated that kindergarten children's humor as assessed by their teachers was not consistently related to peer acceptance or rejection, or to self-perceived humor and behavior. For school-age children, the study used a theoretical model to analyze predictive relations between humor, behavioral characteristics, acceptance by peers, and self-perceptions of humor. For eighth graders, humor was found to be predictive of self-perceptions of humor; and humor

non-traditional, and 32% in both; and (6) 39% were willing to perform a non-traditional task they might not normally perform to provide a model for their children. (BCY)

IDENTIFIERS- \*Nepal; Save the Children Federation

In 1981, Save the Children (SC) opened an office in Nepal to support projects related to health, education, income generation, and resource management. Statistics show that between 7 and 8 million of Nepal's 19 million people live below the poverty line, and almost 2 out of 3 adolescent girls do not attend school, placing the overall female literacy rate at only 18%. In recognition of economic and educational needs, SC organized a community-based, nonformal education program to promote literacy and community organization in a rural area of the country. SC enlisted community participation by requiring each literacy group to: (1) pay for books, registration, and a partially subsidized tuition; (2) construct a shelter for the school; and (3) select a facilitator from the community. The program adapted literacy course content to issues and economic needs in the community. Program participants have expressed an increased sense of power; mobilized for community development activities; decreased smoking; and begun sending more of their young children, including girls, to school. The program has been effective in assisting women in particular, and the literacy rate for the program area has risen from 42% in 1989 to 54% in 1992. The initial literacy programs have given rise to other initiatives, including the organization of women's groups and income-generating collectives, the transformation of women's social roles, and the development of a home-based, rotating child care system. IDENTIFIERS- \*Outdoor Leadership

This volume of conference proceedings addresses critical issues related to leadership in the field of outdoor recreation. It contains keynote presentations, panel and individual presentations, and working session reports covering the following topics: (1) leadership styles; (2) K-12 teacher certification in outdoor education; (3) accreditation and standards for outdoor programs; and (4) hiring practices of and benefits for the seasonally employed. The section on leadership styles reviews various theories of leadership, such as situational leadership and conditional outdoor leadership, and stresses group dynamics and teamwork. Papers in the section on teacher certification introduce current outdoor education programs being run in public school districts, outdoor and environmental scope and sequence curricula being utilized in public schools districts, special outdoor education trips that schools are taking, and outdoor teacher education programs were developed at universities. In the section on accreditation and standards, experts from professional organizations in the fields of outdoor education and experiential education present overviews of their organizational involvements in accreditation and standards and summarize current trends and problems from their perspectives. The major issues addressed in the section on the seasonally employed are: (1) improving employment opportunities; (2) fostering of professionalism by employees; and (3) providing insurance coverage. were established by villagers to provide relevant education that combined features of a formal academic school system with a nonformal vocational system. Historical periods of the development of the BHS system were: (1) period of introduction and experimentation (1964-69); (2) period of legalization (1970-86); and (3) period of nationalization (1986-92). These stages coincide with national social and economic reform policies. Access to education increased dramatically with expanding BHS enrollments and the increasing financial capacity of parents. However, with increasing government participation, support, control, and finally takeover of these village schools, the original features of the system have been altered and lost. During the 1960s and 1970s, the BHS curriculum was more vocational than academic. After 1986, the BHS curriculum became more academic than vocational under the direct control of the national government. Besides extending opportunities for schooling, the BHS system achieved its educational goals by providing university education to an increasing number of graduates and by preparing large numbers of its high-school leavers for work after school. Parental and community support in terms of finances and services have diminished sharply from the first period to the third period of BHS development. (KS)

children. Subjects were divided into four groups based on generation in the United States (second through fifth). Most fathers, irrespective of generation status, engaged in literacy activities and viewed parents and schools as having joint responsibility for children's education. Fathers' reading and writing activities were not related to generation status or socioeconomic status, but were related to the father's length of time on present job, prior job training, and role at home. Compared to other fathers, those who shared child-care tasks with their wives were more likely to engage in literacy activities, particularly joint literacy activities with their children. (SV)

IDENTIFIERS- \*Aztec (People); Hispanic American Students; \*Mexico

The curriculum presented here contains three units designed to help Mexican-American migrant students understand and value the richness of their culture, experiences, and family. Unit 1, "My Roots," examines the different components of a culture, and presents aspects of the Aztec civilization and culture. Activities include hearing a poem in Nahuatl, the original Aztec language, art activities involving pre-Columbian designs, reading and acting out Aztec myths, learning about Aztec religion and its role in Aztec culture, and reading and writing activities concerning Cortes and the Spanish conquest of Mexico. This unit contains many drawings suitable for coloring or tracing. Unit 2, "My Family," covers the roles and responsibilities of family members, traditional versus modern family, and immigration and the migrant experience. Activities include diagramming families; writing about a favorite relative, family traditions and values, and student's own or family's migration experiences; interviewing a family member; and painting family scenes. In Unit 3, "Myself," the student examines his/her own name, appearance, feelings, and room or favorite place. Activities include group discussion, journal writing, making "me" paper dolls and personal-history mobiles, exploring feelings, and drawing self and favorite place. A resource section lists 54 recommended books, summarizes the process of leading a group circle session, provides teacher and parent evaluation forms, and describes slide shows available for use with lessons. Some student materials are provided in both Spanish and English. (SV)

Education; Science Instruction; Scientific Literacy; Secondary  
School Science; Standards; Technology

IDENTIFIERS- America 2000; \*National Education Goals 1990

This strategic plan, based on two years of coordinated  
interagency effort, presents a five-year planning framework and  
associated milestones that focus the plans and resources of the  
participating Federal agencies toward achieving the National  
Education Goals in terms of the competence in mathematics and  
science expected of all students. The Plan also identifies  
three tiers of program activities, presented in descending  
order of priority, with goals that address issues in science,  
mathematics, engineering, and technology education meriting  
special attention. Within each tier, individual agency programs  
play important and often unique roles that strengthen the  
aggregate portfolio. The following three tiers are discussed:  
Tier I: Reforming the Formal Education System; Tier II:  
Expanding Participation Access; and Tier III: Enabling  
Activities. Implementation of the Plan will require more  
effective use of extant Federal human and institutional  
capabilities. Monitoring the progress and performance of  
activities outlined in the Plan will continue. (PR)

(11) "Women in Astronomy: A Bibliography" (A. Fraknoi and R.

educational philosophy of "Arschauung," which refers to learning from direct concrete observation. Early efforts to introduce object teaching in America failed because proponents of this system did not utilize teacher education. Sheldon was responsible for successfully initiating the object teaching revolution. In 1859, he introduced the system in the school system of Oswego, New York by utilizing inservice teacher education. Two years later Sheldon started a teacher training college at Oswego that appears to be the first that combined theory and practice. Sheldon and his colleagues made it their goal to also educate teacher educators. Graduates of Oswego found employment in school districts and newly forming normal schools (teacher training schools) across America and were key reasons for the spread of object teaching. Despite the eventual decline of object teaching, it impacted art education, vocational education, and reading textbooks, and had a large impact on science education. The focus on natural objects made object teaching an early form of science education. Object teaching evolved into nature study, which later evolved into elementary school science. At all levels, science teaching methods such as field trips, demonstrations, and science laboratories were promoted by object teaching. The object teaching revolution provides evidence that meaningful educational change can occur in schools through teacher education. (Contains 55 references.) (PR)

IDENTIFIERS- \*Square One TV

This report summarizes the mathematical and pedagogical content of the 230 programs in the SQUARE ONE TV library after five seasons of production, relating that content to the three goals of the series: (1) to promote positive attitudes toward, and enthusiasm for, mathematics; (2) to encourage the use and application of problem-solving processes; and (3) to present sound mathematical content in an interesting, accessible, and meaningful manner. The report describes the mathematical content covered in the shows and an analysis of the 76 segments added during the fifth season. Results of the content analysis indicate that for the entire collection of segments 81% satisfy one or more of the criteria for Goal 1, 58% exhibit at least one of the three stages of problem solving of Goal 2, and 90% of the segments address Goal 3 by incorporating one or more of the series' seven mathematical areas: numbers and counting;

DESCRIPTORS- \*Childhood Attitudes; \*Cognitive Development; Creative Writing; Developmental Stages; Educational Development; \*Educational Philosophy; \*Parent Child Relationship; \*Poetry; \*Preadolescents

IDENTIFIERS- \*Childhood Experiences; Egan (Kieran)

This paper contains a poetry reading presented to a meeting on poetic narrative and educational development. The presentation was based on the theory that the field of philosophy of education should include the realm of the possible as created and populated by the imagination, and often portrayed by works of art. The poems consist of attempts to represent childhood experiences from a child's point of view. They are poetic representations of a phenomenology of preadolescent cognitive development. Through the series of eight poems, the child (Puggy) becomes the little boy (Larry) by becoming able to distinguish self from other and advancing from a mythic to a romantic stage of development. A warning is included to the effect that the attempt to impose such adult terminology on this poetry may be destructive of the poet's work. Also included is a work in progress, a piece of prose that begins from an adult point of view when a morning brings back memories of long ago and childhood games. The poems are narrated by either Puggy the child, Larry the boy, or the poet as an adult. Each narrator could be identified as one of Kieran Egan's four stages of educational development. The mythic stage is identified with Puggy and encompasses the ages 4 through 10. The romantic stage is identified with Larry and ages 9 through 15. The philosophic state is represented by the poet and ages 14 through 20. The final ironic stage is ages 19 and over. (DK)

DESCRIPTORS- \*Administrator Role; Basic Skills; \*Black Achievement; Black History; Black Influences; \*Blacks; College Administration; \*College Presidents; Community Colleges; Cultural Differences; Higher Education; \*Leadership Responsibility; \*Multicultural Education

IDENTIFIERS- African Americans; \*City University of New York La Guardia Comm Coll; Cooperative Education Program

In this speech the black president of an urban community college discusses how his experiences as an African American has affected his performance as the leader of his school. He suggests that people from the ghettos tend more naturally to develop genuine understanding of fairness, that African Americans bring a vision of leadership that stresses inclusiveness, and strive for greater cultural and ethnic

subjects. This professional development/mentoring program for classroom teachers then enabled the teachers to provide turnkey training to other colleagues in their school. The program took place in six elementary schools that participated in school-based management/shared decision-making. The program consisted of on-site, hands-on workshops for participants, plus planning sessions between individual teachers and artists, supervised classroom presentations, exhibitions of student art work, and turnkey training workshops. Evaluators concluded that the workshops were well planned and modeled effective art teaching techniques. They reported that teachers were comfortable with the materials, techniques, and classroom environment. The children were interested and active in class discussion. Supplies and equipment were found to be generally adequate. Teachers felt that the program had a positive impact on students' art awareness, abilities, self confidence, and ability to make critical distinctions. They agreed that art education was an important part of the curriculum and should not be abandoned in times of budgetary restrictions. They felt that with the proper training, art could be taught successfully by teachers without an art background. Evaluators recommended that the program be expanded, be implemented earlier in the school year, and a refinement in school selection procedures be requested to ensure full support for the program at the school level. Five appendices include results of interviews with classroom teachers and principles. (DK)

DESCRIPTORS- Curriculum Enrichment; \*Educational Resources; Elementary Secondary Education; Foreign Countries; \*Instructional Materials; \*Intercultural Programs; \*International Educational Exchange; International Relations; \*Japanese; Social Studies

IDENTIFIERS- \*Japan; \*Japanese Culture

This book lists resources for materials and ideas for teaching about Japan. The resource listings are not intended to be encyclopedic and are not intended to be a comprehensive listing of every useful curriculum item. The attempt has been made to highlight especially those organizations that work with kindergarten through grade 12 teachers, understand their needs, respect their challenges, and design meaningful materials. Programs, materials, and groups are organized in 16 sections. The first section describes the National Precollegiate Japan Projects Network. Thirteen programs across the United States are included with address, telephone, and contact information. The section on outreach programs includes 31 entries connected with museums, educational organizations, and federally funded programs. The third section lists 19 related organizations that do not focus on Japan specifically but provide services and materials helpful to those teaching about Japanese culture. The section for audio-visual materials lists three sources to

IDENTIFIERS- University of Southern California

A lesson in essay planning designed for college and graduate students of English as a Second Language is described. The intended audience is a group with varied linguistic backgrounds and levels of English proficiency. The lesson's objective is to develop metacognitive skills for planning well-organized essays. A computer program using graphics, pull-down menus, and color coding was created to direct students' planning events, and the actual writing is done with paper and pencil. This lesson is designed for use early in the writing course, before the first essay is written, to make the writing process more efficient. Criteria used for evaluating the instructional design, lesson content, and technical quality of the program are outlined. Specific instructional components incorporated into the lesson are also described. These include: gaining attention; informing the learner of the lesson objective; communicating the function and utility of the strategy; communicating the context in which the strategy will be used; confirming or teaching subordinate skills; describing and demonstrating the planning task strategy and providing varied practice with novel problems; eliciting unprompted performance; providing informative feedback; assessing performance; and enhancing retention and transfer. Student and instructor questionnaires and some screen designs are appended. (MSE)

DESCRIPTORS- Adult Basic Education; \*Adult Literacy; English (Second Language); \*Functional Literacy; \*Literacy Education; Program Descriptions; \*Reading Improvement; \*Reading Instruction; Self Esteem

IDENTIFIERS- Illinois (Cook County)

The Learn to Read project was designed to provide a supportive setting in which functionally illiterate adult students from suburban Cook County, Illinois, and surrounding areas could develop reading and writing skills. The target population included English-dominant adults with basic oral competency but no literacy skills, as well as limited-English-proficient adults who had limited experiences in an educational setting, did not use the Roman alphabet in their first language, or lacked adequate comprehension skills and strategies. The project strategy focused on immediate application of students' needs, with an interactive approach using professional instructors, community volunteers, and peer involvement. More than 50 students were recruited and attended the multi-level classes; at least 66 percent attended 2 or more cycles. Short-term results include the following: two students received previously unattainable driver's licenses; several students enrolled in adult and continuing education or Oakton Community College courses following or concurrent with the reading classes; several students who had been unemployed got jobs; and several students decided to meet in a self-help group during the summer months to continue to improve their skills. Appended are the recruitment brochure and flyer, a suggested materials list; exercises in reading the newspaper, advertisements, discount coupons, and food labels; and a step by step approach used by a volunteer tutor for teaching a student how to read stories specifically written for the student. PUB TYPE- Reports - Evaluative/Feasibility (142)

DESCRIPTORS- Adult Students; Children; \*English (Second Language); \*Family Programs; Foreign Countries; Language Proficiency; Latin Americans; \*Literacy Education; Program Evaluation

IDENTIFIERS- Canada; \*Family English Literacy

This final evaluation of the 1991-92 program year of the Latin American literacy Project, designed to foster English language literacy in Spanish-speaking families in Canada, is intended as a formative report, American Literacy Project is intended as a formative report, assessing the changes in the students' language proficiency and the progress in the program's design. Standardized tests and questionnaires measured progress in language proficiency, and additional data were collected via observation and unstructured interviews. The following findings are reported: (1) the children's program is successful in its language and educational readiness goals, with the children showing progress in literacy skills and attitudinal changes; (2) the adult program, a combination of traditional and more modern methodologies for teaching English, is functioning at a satisfactory level with students exhibiting a degree of second

cooperation in literacy, the possible damage to local cultures, and how international cooperation can be promoted in a way that sustains local identity. The notion of multiple literacies is discussed. Three ways to consider "local literacies" are suggested: different languages and writing systems; invented local literacies, often based on or connected with a dominant writing system but signalling for its users a different social identity; and vernacular literacies, or alternative uses of reading and writing within the same language and writing in a culture that is neither elite nor institutional. It is concluded that the issue of local literacies is not a marginal matter but that it is central to any language and literacy program. Contains 33 references. IDENTIFIERS- \*South Carolina

A consortium of South Carolina colleges and universities developed assessment programs which would fully satisfy state and accreditation assessment mandates and increase program quality and institutional effectiveness. A South Carolina Higher Education Assessment Network was established with a Coordinating Center at Winthrop College to provide organizational and technical assistance for member institutions, manage Network services and activities, and collect and produce assessment resource materials. The project itself featured 10 ongoing objectives: (1) formation of the Network; (2) organization of a state advisory board; (3) conduction of a needs assessment for member institutions; (4) organization of core groups of assessment leaders on member campuses; (5) holding an annual Statewide Assessment Conference; (6) establishment of an assessment clearinghouse and technical assistance center; (7) publication of a Network newsletter; (8) creation of an assessment primer; (9) dissemination of the primer; and (10) publication and dissemination of information on the Network to media, professional organizations, and the institutions outside the Network. All goals with the exception of the fourth one were accomplished with high degrees of participation and satisfaction by members. By the end of the program implementation period, the Network had 42 institutional and agency members including all 33 public colleges and universities in the state. Project Director comments are appended. (JB)

IDENTIFIERS- \*Family Education Loan Program

This report presents the results of an audit of the Principal  
Financial Statements of the Department of Education's Federal  
Family Education Loan Program and its internal controls and  
compliance with laws and regulations for the fiscal year ended  
September 30, 1992. The report details the following findings:  
(1) the Statement of Cash Flows were found to be reliable in  
all material respects; however, it was not possible to give an  
opinion on the Principal Statements taken as a whole; (2)  
internal controls in operation were ineffective in protecting  
assets and assuring that there were no material misstatements  
in the Principal Statements; however, they were effective in  
assuring material compliance with laws related to the use of  
budget authority and with significant provisions of other laws  
and regulations; and (3) no material noncompliance with laws  
and regulations were detected. In addition to these  
discussions, the report offers conclusions on the Overview of  
Financial Entity and other supplemental information and the  
scope of the audit. (GLR)

IDENTIFIERS- \*State University of New York

This report provides statistical tables on the age groups and sex of full-time and part-time graduate and undergraduate students in the State University of New York (SUNY) system for Fall 1992. Part 1 contains data for the entire system including headcount tables with corresponding percent distribution arrays. Part 2 displays headcount and percentage arrays of students by age group for each institution and institution type. Tables are available for undergraduates, graduates, and first-time students by full-time or part-time status. Part 3 provides summarized data of historical trends on all students from Fall 1986 through Fall 1992. The trend reports are grouped into sections by level--undergraduate or graduate. Each level has both headcount and percentage distributions for total, full-time and part-time students. Part 4 displays age and sex trend by level and status indexed to Fall 1986. The data for Part 4 and Part 5 are divided into two age groups; those under 25, and those 25 and over. Part 5 displays change and percent of change in the age and sex trends by student level and load from Fall 1986. The final part of the report contains a map locating the institutions of the State University, Chronology of Dates of Establishment of Institutions of the State University of New York and a list of publications from the school's Office of Institutional Research. DESCRIPTORS- \*Academic Persistence; Astronomy; Comparative Analysis; Curriculum Development; \*Degrees (Academic); \*Enrollment; Foreign Students; Graduate Students; \*Graduate Study; Higher Education; Minority Groups; \*Physics; Science Curriculum; Statistical Data; Trend Analysis; Undergraduate Students; \*Undergraduate Study

Periodic revisions of the physics and astronomy curricula have been made to make scientific course-work more appealing to a greater number of college students and ultimately create a more positive image of these disciplines. This report, in an attempt to determine how effective these revisions have been, provides 13 tables and 3 figures of trend data concerning enrollment in introductory physics and astronomy courses and the numbers of degrees conferred in these disciplines. Several tables present 5- or 10-year trend data. Tables include data such as the numbers of institutions granting physics degrees by highest degree offered, numbers of physics enrollments and degrees awarded by academic year from 1981 to 1993, graduate

carrying 250,000 pages of text per 19 hours of audio per 72 minutes of full motion video or a combination of all 3. Aspects that are examined include: (1) attributes of CD-I as an innovation; (2) advantages and properties of the process; (3) compatibility; (4) complexity; (5) trialability; (6) observability; (7) cost-benefit analysis; (8) potential adopters; (9) rate of adoption; (10) criticisms of the current diffusion efforts; and (11) recommendations for an alternative campaign for communication, marketing, and diffusion. Although it is too early to make a definitive pronouncement on the outcome of the introduction of CD-I, a sufficient body of criticism has emerged to suggest that its launch without full-motion video was a serious drawback that may undermine the whole launch of this new technology. Many new ingredients are needed for an alternative diffusion campaign. The effort highlights the many problems in the introduction of a new technology. (Contains 39 references.) (SLD)

IDENTIFIERS- Information Skills

This paper presents a method for creating school libraries through the production of materials by the students themselves. Purposes of the project are to promote literacy in elementary and secondary schools through opportunities for students to read and write and to encourage the creation of school libraries where none exists. Teachers are shown how, by using a core reference collection, elementary and secondary students can prepare research reports that can be transformed through the use of electronic desktop publishing into a basic library for the schools. In this way, teachers are encouraged to make research assignments that take the classroom beyond lecture/text instruction, and students are encouraged to expand their information seeking skills. Adding to, maintaining, and distributing the collection are assignments for someone who is knowledgeable, thus identifying the need for school librarians to assist in the resources process and management of resource collections. A list of criteria for establishing a library is appended. (Contains 7 references.) (KRN)

Networks; \*Information Technology; Library Development;  
 \*Library Role; Models; \*Technological Advancement  
 IDENTIFIERS- \*Brandon University MB; Canada; Information Society  
 Information technology is having a profound effect on higher education in North America, and Brandon University in Manitoba (Canada) is in a position to join this movement in its early stages. The case for integrating information technology into the curriculum is argued, and the potential role of the new library complex in the teaching function is outlined. The recent expansion of the campus information network, MONET, has enhanced opportunities for faculty members, but this technology has yet to be extended to students. The new library is planned to allow the incorporation of information technology into the curriculum, should the university and the community elect to move students into the information technology age. Practical suggestions are offered to accomplish this. A first step is to begin developing courses that apply information technology to the specific research assignments required of students. A second, longer-range task is to create new courses on the history, sociology, and psychology of the information society, so that students gain an intellectual context in which to place contemporary events. It will also be essential to ensure that the technological infrastructure of the campus does not become progressively obsolete because of financial constraints. An appendix provides an annotated bibliography that lists 45 sources of additional information. (Contains 42 references.) (SLD)

IDENTIFIERS- \*Focus Groups; \*New Mexico State University Alamogordo

In 1992, Alamogordo Branch Community College (ABCC), a branch campus of New Mexico State University, developed and implemented the Institutional Assessment and Strategic Planning (IASP) process, an integrated process designed to assess both student academic achievement and institutional effectiveness. Each year, the IASP process begins when individual faculty members evaluate their assessment activities for all courses and complete reports about their assessment efforts. Next, instructors in all academic disciplines discuss their assessment activities at discipline-specific focus group meetings. Other activities include focus groups among each of the four academic divisions, focus retreats for faculty and for student services personnel, focus group meetings in each student service program, and Institutional/Instructional Support focus groups and retreats. At focus group meetings, participants complete forms listing strengths and concerns in their areas, and develop action plans. These forms and action plans are forwarded to the IASP Committee and used as support documentation for the strategic planning process. The IASP Committee, with 10 members appointed by the Provost, develops a set of institutional issues. The issues are ranked, and institutional actions are developed to address each issue. Subsequently, an institutional plan is developed and presented to the college community. Institutional research is important to the IASP process, including internal and external environmental scans and student tracking systems. The IASP process is successful at ABCC because it provides an opportunity for everyone on campus to be heard. (PAA)

IDENTIFIERS- Brazosport College TX; \*Transfer Shock

A study was performed to determine the feasibility of using grade point averages and course-completion ratios in determining the success of community college students who transferred to four-year institutions. Four Texas universities searched their transcript files for students who had transferred from Brazosport College (BC), and provided BC with machine-readable copies of the transcripts. The BC transcripts and those from two of the universities, the University of Texas-Austin (UTA) and Sam Houston State University (SHSU), were matched and merged. Study findings included the following: (1) grade point averages (GPA's) dropped from 3.304 at BC to 2.256 at UTA, an average decrease of 1.048 points; (2) GPA's for students transferring to SHSU dropped 0.191 points, from 2.689 to 2.498; (3) course completion rates fell significantly upon transfer to the four-year institutions, with UTA students showing a particularly large decrease; (4) 67% of those who received a "C" or better in a BC English course received a "C" or better at one of the four-year institutions in subsequent English courses; and (5) overall, BC students did not do as well after transferring as they had at BC. A history of similar research efforts, a 12-item bibliography, and an appendix describing the next study undertaken at BC to test the usefulness of the software system used to analyze transfer data are included. IDENTIFIERS- \*Iowa

In an effort to provide the people of Iowa with a clearer sense of the needs for improvement in the state's 15 public community colleges, this report examines problem areas and causes and presents recommendations for improving educational quality. First, a discussion is provided of four key problem areas identified through a survey of over 1,000 faculty members and subsequent focus group discussions, including: (1) teaching conditions, such as increases in enrollment, expanding curricula, lack of adequate funding, an increase in students drawn from the third quartile of ability, overworked faculty, use of part-time faculty, and limited facilities and equipment; (2) leadership and governance, discussing such problems as inconsistent and inexperienced leadership, faculty members failing to raise issues of quality, declining standards, and the inability of colleges to commit to decentralization; (3) the community college mission, highlighting confusion in redefining the mission and concerns about economic development and partnerships with business; and (4) the lack of opportunities for professional development. For each area, recommendations for improvement are listed. Causes of these problems are then examined, indicating that many are chronic, having existed in the colleges for 20 years, and are similar to those experienced by public K-12 education. Finally, suggestions for statewide action are made, including adequate financial support, pilot programs to improve governance, support for mentor programs, and the creation of five autonomous college districts. IDENTIFIERS- Classroom Adjustment Rating Scale; England (London)

This study examined background factors in children that influence teachers' ratings on the Classroom Adjustment Rating Scale (CARS). Sixteen classrooms in five schools were selected to include a range of socio-economic and cultural groupings from Inner London, England Primary Schools. Teachers used the CARS and an additional short scale of overall adjustment to rate 190 children, ranging from 8 to 12 years of age. The information collected about the children and their families included age, birth order, family size, parental occupation, mother tongue, language, number of schools attended and number of residence changes. Separate analyses for English and non-English mother tongue groups indicated that social ethos and gender contributed to a significant percent of the variability in total teacher rating for both groups. Analysis suggested that teachers' ratings of children are influenced by the children's social and family situation. Gender also had a significant impact on the teacher rating process. Females overall were rated more positively than males on school-related adjustment behavior. Overall, children who came from families with higher status occupations, who had families which provided child-centered reasons for school absences and provided relative consistency of communication with the child and school, were rated more positively than children with less favorable environments. IDENTIFIERS- \*Conversation; \*Emotional Expression; Negative Affect; Positive Affect

This study examined the effects of adolescent pubertal status, adolescent gender, parent gender, and conversation topic on parent and adolescent affective expression. Subjects were 85 adolescents in fifth through ninth grade who participated in 2 separate 8-minute conversations, one pleasant and one unpleasant, with their mother and father separately. Results showed that in general, less positive and more negative affect was expressed during late puberty than during early- or mid-puberty. Father-adolescent interactions were more neutral than mother-adolescent interactions. Pleasant conversations were more neutral, and contained more positive and less negative affect, than unpleasant conversations. Results are discussed in terms of the distancing hypothesis, dyadic differences in relationships, and situational influences. (Author/MM)

DESCRIPTORS- Educational Philosophy; \*Hidden Curriculum; \*Ideology; \*Preschool Children; Preschool Education; \*Sex Differences; \*Sexual Identity; \*Socialization

It is maintained in this paper that, though rarely acknowledged, gender neutrality operates as an official curricular ideology, and thus the organizational force of gender in school settings is often hidden in unnoticed interactional and discourse practices. To examine this phenomenon, the play activities of 4- and 5-year-old girls and boys in an ethnically mixed preschool were analyzed from videotapes, and interviews with the children

IDENTIFIERS- \*Environmental Tobacco Smoke

A study was undertaken to determine the effects of tobacco smoke in the home on children's cognitive development. The study focused on 280 children, representing equal numbers of boys and girls and of Whites, Blacks, and Hispanics. When the participating children were 2 years old, their mothers were surveyed, interviewed, and tested to gather information on socioeconomic status, smoking habits, day care, infant feeding practices, intelligence, and the home environment. At age 3, the children completed the Stanford-Binet Fourth Edition (SBIV) measure of intelligence quotient (IQ) and the Peabody Picture Vocabulary Test. Data analysis revealed that the total number of packs of cigarettes smoked in the home was inversely related to child intelligence. Specifically, data indicated that as cigarette smoking increased by 1 pack per day, child IQ decreased by 1.65 points. Further analysis found that only the amount smoked by the mother was related to the children's IQ scores. Finally, data were also analyzed for 108 of the original children retested at 5 years of age, revealing that the particular relation of mothers' smoking habits to child IQ at 5 was not statistically significant. Study findings support the growing body of evidence that inhaling tobacco smoke from the environment has harmful effects on development. (AC)

PUB TYPE- Reports - Research/Technical (143), Speeches, Conference Papers, "Papers Presented at..." (150)

DESCRIPTORS- Adolescents; \*Behavior Patterns; Conflict; \*Conflict Resolution; Fathers; Mothers; \*Parent Child Relationship; Parent Role; \*Sex Differences; Sex Role

To gather information on the role of gender in parent-adolescent interactions, a study was conducted of patterns of alliances formed during disagreements between 28 male and 28 female early adolescents and their parents. Interactions among adolescents and their parents were recorded while they planned an ideal vacation, and the transcripts were coded for meaning, occasions of disagreement between two individuals, and alliances formed in the disagreement by the third person. Alliances were defined as a third person entering a disagreement and taking sides, and were coded as either supporting or negating the idea in dispute. Results indicated that: (1) parents formed more supporting and negating alliances than did adolescents; (2) boys and girls did not differ in the way they formed alliances, while parents showed significant gender differences in their coordination of responses to disagreements; (3) mothers formed more alliances in families with boys than in families with girls; (4) when fathers opposed sons, mothers were more likely to add their opposition than fathers were when the mothers opposed sons; (5) fathers were more likely to take sides by supporting ideas in families with boys than in families with girls; and (6) fathers were more likely to support mothers' ideas when opposed by sons than when opposed by daughters. Graphs of alliance patterns are included. (AC)

DESCRIPTORS- Adolescents; American Indians; \*Canada Natives; Children; \*Child Welfare; Community Control; Community Services; Delivery Systems; Foreign Countries; \*Juvenile Justice; Legislation; \*Self Determination; \*Social Services  
IDENTIFIERS- \*Ontario

Extensive evidence indicates that the Native family and society are "at risk," having been undermined by the existing non-Native child welfare, education, and justice systems. This paper examines issues in juvenile justice, child welfare, and family services with regard to control by Canada Native communities of their own social services. The document includes: (1) selected Ontario statistics on Native children in care, Natives in the criminal justice system, and costs to the provincial government; (2) jurisdictional disputes related to the delivery of social services on reservations; (3) strategies to expand Indian control of social services; (4) the effects of the Canadian Young Offenders Act and the Children's Services Act of Ontario on aboriginal peoples; (5) difficulties in the implementation of the (U.S.) Indian Child Welfare Act; (6) issues in foster care and adoption of Native children; and (7) community programs and initiatives addressing parenting skills education, prevention of child abuse and neglect, use of Native family courtworkers, substance abuse prevention, counseling and homemakers' services, and youth activities. Appendices provide related legal documents and information about the project. A bibliography contains approximately 100 entries, including research papers, legislation, program reports, statistical reports, and journal articles. (SV)

PSinet (People Sharing Information Network) is a national computer teleconferencing network for science and mathematics teachers. It is funded by the National Science Foundation (NSF) in cooperation with IBM and is housed at Drake University in Des Moines (Iowa). The NSF grant has provided: a workstation computer and software for each state department of education office and each major educational office in Washington, D.C.; state servers to be linked to users in each state; and training for users. By June 1993, all states will have servers in place and may begin to link down to regional servers and then to school buildings. Ohio already has connected all schools to the system. Iowa is proceeding with a plan to connect all schools, colleges, and major museums with a state network called IOWANET. If installed in every school in the country the PSinet would make it possible for teachers and students everywhere to communicate easily and inexpensively with each other. The potential for reducing teacher isolation and enhancing

DESCRIPTORS- \*American Indian Reservations; American Indians; Contracts; \*Economic Development; Entrepreneurship; Federal Legislation; Hearings; \*Small Businesses; Tribes

IDENTIFIERS- Bureau of Indian Affairs; \*Buy Indian Act 1908; Congress 102nd; \*Federal Contractors

A Senate hearing received testimony on amendments to the Buy Indian Act, which allows the federal government to give preference to Indian businesses when awarding contracts on reservations. The legislation focuses on reservation economic development, sets aside for small businesses all contracts below \$1 million, addresses the prompt payment concerns of contractors, and outlines procedures for self-certification of Indian firms and for resolving disputes concerning the legitimacy of particular businesses receiving preferences. Representatives of the Bureau of Indian Affairs and the Indian Health Service discussed the extent of present agency contracts with Indian firms and problems encountered in implementing the Buy Indian Act. A speaker from the National Center for American Indian Business Development discussed: (1) the bottom ranking of American Indians in a national survey of minority owned businesses; (2) previous circumvention of the Buy Indian Act by the use of "front" companies with nominal Indian owners; (3) negative educational and economic statistics from "Indian country" and their relationship to lack of economic opportunity; (4) percentage of Indian-owned firms in 15 states; and (5) positive and negative labor-force, cultural, and environmental factors affecting business development on reservations. Representatives of tribes, Indian-owned businesses, and Indian organizations spoke in support of the legislation. (SV)

IDENTIFIERS- \*Fetal Alcohol Syndrome

Three themes run through the accounts of parents and teachers as they relate their experiences rearing and teaching children with fetal alcohol syndrome (FAS): (1) Children with FAS can achieve far more than current negative stereotypes suggest; (2) Early intervention and excellent family care make an enormous difference to the success and happiness of children with FAS; and (3) Specific educational strategies can help alcohol-affected children learn in the classroom and the home. Through their accounts, these parents and teachers provide the "wisdom of practice," that is, lessons and inventions based in experience that can help other parents and educators devise educational strategies adapted to the unique needs of individual alcohol-affected children. Part I discusses how prenatal alcohol exposure affects children and their families, and explains the difficulties in information processing related to many behavioral problems of children with FAS. In Part II, parents present stories about parental advocacy, the importance of early diagnosis and early intervention, and the successes of alcohol-affected children. Part III covers teaching methods, classroom techniques, strategies for mainstreaming children with FAS in a small rural school, and alternative schooling for alcohol-affected children. Part IV presents recommendations for counselors and therapists working with families of alcohol-affected children. Appendices contain an extensive outline of educational strategies for preschool, elementary, and adolescent students with FAS or alcohol effects, and a list of 74 resources (audiotapes, videotapes, books, journal articles, newsletters, and organizations). An index is included. (SV)

IDENTIFIERS- \*NCTM Curriculum and Evaluation Standards

The implementation of the National Council of Teachers of Mathematics' "Curriculum and Evaluation Standards for School Mathematics" implies fundamental shifts in the teaching and learning of mathematics. Intended for those individuals who will be instrumental in the implementation of those changes-- teachers, administrators, and parents--this document presents 10 ideas for transforming mathematics teaching and learning based on research and successful practical experience: (1) All students can and must learn mathematics, which should serve as a "pump," not a "filter"; (2) Teachers need to listen to students and incorporate into their instruction what they learn from listening; (3) Students learn mathematics best when they construct their own mathematical understanding; (4) Students need to learn more and different types of mathematics; (5) Mathematical discussion should be a daily part of classroom activity; (6) Teachers need to become "informed guides" to the learner; (7) Calculators, computers, and related technology can be effective tools in the teaching and learning of mathematics; (8) Students need shared learning experiences; (9) Curricular and pedagogical change in mathematics cannot occur without accompanying change in student assessment; and (10) Lasting change takes broad support. (Contains 14 references.) (MDH)

DESCRIPTORS- Comparative Analysis; \*Developing Nations;

\*Educational Planning; Educational Research; Elementary

Secondary Education; Foreign Countries; Higher Education

IDENTIFIERS- \*Caribbean; \*Small Countries

This paper describes a study whose twofold purpose was to: (1) use the monograph approach to improve knowledge about the situation of education in small countries, particularly in the Caribbean; and (2) distill ideas and techniques to make a technical contribution to educational planning in small countries. Part 1 presents a preliminary reminder of the theoretical and methodological bases of the socio-economic analysis of small countries to explain underlying problems. Part 2 is an in-depth, comparative investigation of small countries' educational problems. The study focuses on two subgroups of islands: those of the eastern Caribbean and of the French West Indies. Part 3 presents alternatives and options open to educational planners, bearing in mind the constraints imposed by the countries' small size. The report accents long range forward analysis. A bibliography lists 9 books, 15 articles and chapters, and 8 reports and research works. Statistical annexes comprise half the document. (SG)

balance. As a result of these tendencies, La Guardia Community College (New York) has a cooperative education program, and the teaching of basic skills is an integral part of the curriculum. If schools are to succeed in educating minority youngsters who lack both home and community support, educators must fill that void through active involvement and sensitivity in revitalizing the curriculum. A nurturing climate must be established. Presidential leadership is pivotal to the life of any institution of higher learning. Because a person brings to a leadership role the sum total of his unique experiences, being black is inextricably linked to the way an individual operates as president. The richness of a multicultural environment, understanding the importance of economic development, and the necessity of learning basic skills after high school are experiences that benefit a leader of a community college. The critical points and importance of the black experience as race relations changed throughout the 20th century are discussed. The struggle of blacks to gain empowerment played a role in the development of this college administrator as a man and a president. (DK)

This document sets out the details of a program of six lesson plans for teaching about Africa and the African diaspora across the world. The program seeks to enable students to: (1) associate classroom instruction with a cultural reality; (2) evaluate the social, political, cultural, and academic concerns among trans-Africans; and (3) increase proficiency skills and interests in target languages (French and Spanish). Each month of the school year focuses on a different aspect of African life and culture; among the topics are geography, family life, seasonal celebrations, and sports and leisure. PUB TYPE- Legal/Legislative/Regulatory Materials (090)

DESCRIPTORS- \*Foreign Policy; Higher Education; \*International Cooperation; \*International Educational Exchange; \*International Relations; Secondary Education

IDENTIFIERS- \*United States Information Agency

This hearing discusses the profound political changes taking place in the world with the collapse of the Communist governments of the Soviet Union and Eastern Europe, and the importance of an exchange of students and educational programs among nations in an attempt to promote a new manner of thinking to go along with the new world situation. It is urged that the United States Information Agency (USIA) be strengthened and improved so that it will support the needs of U.S. citizens to understand other nations and their languages. Overseas post support from USIA is critical to maintaining privately funded educational exchanges, including important educational advising services. USIA also traditionally has provided support for research on issues essential to exchange activities. This includes information on the structure of other nations' educational programs, their degrees, and the educational credentials they issue. The information is necessary for the admission of foreign students into U.S. institutions and for the provision of credit for U.S. student academic work abroad. The report consists of testimony on the importance of international educational exchange as new foreign policy funding legislation was discussed. Representatives of USIA testified that the matter of international educational exchange was very important to the Agency, both training students and fostering the true exchange of ideas. Private international exchange groups are faced with new concerns for international citizen and youth exchange in the increased demand from the states of the former Soviet Union and the need to ensure quality exchanges while increasing quantity. May, Wanda T.

A Summary of the Findings in Art and Music: Research Traditions and Implications for Teacher Education. Elementary Subjects

educational system, focusing on attitudes toward questioning. The first chapter offers sociolinguistic and pragmatic perspectives on classroom questioning, looking at aspects of the classroom environment that affect student questioning practice. The second chapter discusses categories of questions according to their linguistic form, type and function, and cognitive and affective domains. Chapter 3 reports on a survey of 43 professors from 18 varied academic departments, investigating the kinds of questions professors prefer, their perceived contribution to subject-matter learning, and the impact of questions on classroom atmosphere. In Chapter 4, a pedagogy for teaching non-native English-speaking students how to ask questions in American classrooms is outlined. This chapter includes a sample lesson, additional suggestions for lessons related to specific domain or level of questioning, and suggestions for activities related to asking questions and development of classroom community. Appended materials include students' comments on their oral abilities, academic needs (by major field and academic level), notes on cognitive and affective domain questions, and forms pertaining to the faculty survey and sample lesson. Contains 81 references. (MSE)

IDENTIFIERS- Canada

This guide is designed for adults who want to improve their literacy and basic numeracy skills in English. The guide is partly a workbook, providing room for learners to write directly on the pages. It contains facts and figures of interest to both learners and teachers, and it encourages discussion and provides its users with an opportunity to share a wide variety of experiences. The guide consists of learner-centered material that reflects the experiences of many people who live in public housing. Stories, poems and factual information form a basis for discussion. The materials on percentages and fractions offer an opportunity to strengthen numeracy skills in a living context. Backgrounds materials provide important information for a better understanding of the experience of some immigrants to Canada, the Native experience in Canada, the realities confronting people living on inadequate incomes, and the impact of racism on community life. Some material is written in a mixture of standard English and Jamaican, so that the reader is challenged to try a new language experience. The book consists of four chapters: From Around the Globe, Housing, Health and Happiness, My Mama Says Education is a Must and This Land is the House We Have Always Lived In. Important resources for further reading are listed. (Adjunct ERIC Clearinghouse on Literacy Education) (LET)

courses in English-as-a-Second-Language (ESL) techniques to all public school teachers, but the scarcity of trainers and the distance between schools and training sites constitute substantial obstacles. With the cooperation of the University of Hawaii's interactive television system, many teachers are now being trained through distance training (DT). This paper describes three models of in-service teacher training in distance education at three levels of interactivity. The most interactive of the models is closed-circuit TV with two-way audio and video, although not all sites have these facilities. The second model is two-way audio and one-way video. The third approach is to provide the course over cable TV on a public access channel. In all models, as the direct contact between the trainer and the teachers is attenuated, there is increasing need for the trainer to structure the class so that the teachers are kept active and involved. A description of the Hawaii Interactive Television System (HITS) is appended. Contains 20 references. (Adjunct ERIC Clearinghouse on Literacy Education) (Author/LB)

\*English (Second Language); Listening Skills; Reading  
Instruction; \*Rural Areas; Small Towns; \*Whole Language  
Approach; Writing Instruction

IDENTIFIERS- \*Tennessee (Maury County); Workplace Literacy

A curriculum designed by the Maury, Tennessee, Literacy Council to address deficiencies in English-language skills is presented. Maury County, Tennessee, is a rural area south of Nashville whose automotive industries and ethnic restaurants have immigrant populations in need of English instruction. A state 353 teacher training grant was obtained to provide college coursework towards English-as-a-Second-Language (ESL) certification for two teachers and to produce a supplemental curriculum for non-metropolitan ESL services. The curriculum integrates traditional and whole language instructional approaches while seeking to meet the needs of adult students in a rural area. Each unit is independent and affords a variety of pronunciation, listening, speaking, reading, and writing experiences. The text is designed to meet the needs of the typical Maury County student (an employed adult or spouse with basic survival skills). The units cover the following: telephone skills, stores, car care and travel, health care, community services, commerce, recreation and entertainment, and community events, holidays, and traditions. Appended are a list of resources and forms for personal data, directory information, field trips, and journal entries. (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

DESCRIPTORS- \*College Outcomes Assessment; College Students;

\*Comparative Analysis; Cross Sectional Studies; \*General

Education; Higher Education; Individual Development;

Intellectual Development; Liberal Arts; Longitudinal Studies

IDENTIFIERS- \*Miami University OH

A study was done to examine the impact of two different models of liberal education on students at Miami University (Ohio).

Students enrolled in two general/liberal education programs completed a wide-ranging battery of instruments to assess the impact which their educational experiences had on their intellectual and personal development. The class of 1989 was

administered a battery of tests during their first, sophomore, and senior years. Tests included the American College Testing

COMP; the Test of Thematic Analysis; Analysis of Argument;

Measure of Epistemological Reflection; and the American College Testing Activity Inventory. For cross-sectional studies

students in both programs completed seven assessments and a structured interview. These instruments were used to evaluate

the performance of students enrolled in an interdisciplinary, core curriculum as compared to that of students taking a

disciplinary, distribution general education program. Results suggested a number of differences between the two groups. On

measures of liberal arts skills, cognitive development, student culture/campus ethos, and academic behavior the groups had some

notable differences in their responses. Extensive appendixes contain an overview of the testing schedule, results of student

culture testing, a summary of program survey results,

information on a program award, two proposals, and sponsor assessment comments. (JB)

provisions, and integration of the loan process into the existing Title IV delivery system. Further, the Committee suggested that any new direct lending program would require minimal interface with the prior FFELP, beyond capture of default information, be a centralized federal program, and have minimal numbers of participants outside the educational institutions. Additional implementation imperatives reported for future student loaning required (1) access to loan capital being maintained for all populations; (2) full integration of the student loan program into the existing Title IV delivery system to minimize the burden on students and institutions; and (3) care in keeping a reformed program from becoming extremely complex. Appendices include a description of recommendations for simplifying the FFELP and the direct lending program. A summary letter is attached. (GLR)

\*Teaching Assistants

IDENTIFIERS- \*University of California Riverside

In response to the need for better trained teaching assistants to serve a growing undergraduate population, this project established a campus-wide Teaching Assistant Development Program (TADP) at the University of California Riverside. Project efforts included inviting departmental participation in shaping teaching assistant (TA) seminar content; focusing seminars on "practical" instructional, testing and grading techniques; developing three "disciplinary cluster" seminars; fostering cooperative TA-faculty relations in the seminar's content; and inviting departments to develop their own TA training programs. In addition the project actively promoted TADP services and benefits in meetings with departments, in publications and memos, as well as successfully courting the campus press for favorable coverage of its events and services. Project results included public accolades from top administrators, funding for additional equipment for the next fiscal year, heightened campus commitment to teaching, reduced numbers of low-evaluated (problematic) TAs by 33 percent, and improved student ratings of first- and second-year TAs. In addition the project compiled a book of readings from other TA handbooks and newsletters and published an original TA handbook and a quarterly TA newsletter. Extensive appendixes contain correspondence and memos from the project, event announcements, evaluation forms, student evaluations, three issues of a TA newsletter, the Tadpole, and a quarter report for fall 1989. IDENTIFIERS- \*Moorhead State College MN

This report examines experience of Moorhead State University (Minnesota) in attracting and retaining nontraditional, high-risk students through an alternative program called The New Center for Multidisciplinary Studies. The program's two-tier admission system represents an open-access concept offering an alternative way to begin college for students who do not meet full university admission requirements. Enrollment is limited both numerically and geographically. Program participants take standard and career-centered courses that explore problems or themes that cross subject lines, linking knowledge and insights from a variety of fields. Refresher courses are also available. Experience shows that the 30 to 35 percent attrition of program participants is slightly above the university as a whole over the past several years. A key ingredient of the program is the mentor/advisor component that guides students through the learning process, thus fostering a learning community atmosphere of students, faculty, and staff. It is felt that the Center's success resides in: (1) its attention to the subject in achieving academic success within a liberal arts atmosphere that develops contemporary skills and knowledge, and (2) the overall commitment of its faculty (all of which are tenured and hold rank in the university). Despite the persistent problem of having to justify itself, the Center continues to renew its curriculum, renew its faculty and its students. Contains five references. (GLR)

IDENTIFIERS- \*Reform Efforts; Virtual Reality

To ensure that the classroom of the next century offers all its potential, schools must plan for changes in technology that will bring opportunities that currently can only be imagined. Virtual reality is already amazing, and has the potential to be the most effective method for training people who learn and remember best by doing. Verbal computer communications, multimedia instruction, and global information retrieval all promise to revolutionize education. By the 21st century, students may choose what schools to attend, as well as whether they wish to be educated at home or at school. Competitive public schools are gaining more and more support. Principals of the future will have more power and responsibility than they do today. Some of the issues educators must face now to be ready for the future include: (1) teaching middle school students to program in BASIC; (2) developing a composite laboratory in the school; (3) developing community and home computer use; (4) encouraging computer use by every class, but not necessarily in every classroom; (5) avoiding unproven innovative equipment; (6) supporting teacher education in computer use; and (7) using hardware effectively. Examples of effective computer use are taken from three high schools. (Contains 8 references.) (SLD)

This booklet offers an introduction to keeping and documenting the history of community organizations. With their variety of purposes these organizations add texture and variety to a community's heritage. A knowledge of that heritage, provided by written documentation as well as oral tradition, proves valuable to members of the organization, to historians and to the community itself. It should be the responsibility of someone in every organization to systematically save and preserve documents in an orderly fashion for future reference. Adequate historical records, well organized and readily accessible, can provide information for the organization's decision making. What to keep will vary, but permanent and temporary items can be determined based on the needs of the organization and its facilities for storage. A brief list of five resources suggests reliable and practical advice for the

 IDENTIFIERS- \*African Americans; New York State Library  
 Selected resources of the New York State Library that document the achievements of African Americans in the arts, as well as the historical and cultural contexts of these achievement, are listed. In addition to primary sources and significant historical and critical works, the bibliography contains references to other bibliographies and research aids. Works are subdivided into primary works, biographies, history and criticism, bibliography, and reference in each of the following categories: (1) general (32 titles); (2) literature (189 titles); (3) music (78 titles); (4) performing arts (59 titles); and (5) visual arts (52 titles). The entries are indicative of African American artistic vitality and innovation. They highlight the long tradition of African American literature, its distinctive rhetorical devices and narrative forms, the current renaissance of African American literary criticism, and the concomitant rediscovery and reprinting of the works of pioneering African American artists. The entries also illustrate the achievements and special difficulties faced by African Americans in the visual and fine arts. (SLD)

 IDENTIFIERS- \*Library of Congress Subject Headings; \*Lista de Encabezamientos de Materia; Mexico; OCLC  
 This study shows to what extent Gloria Escamilla's "Lista de Encabezamientos de Materia," the only published Mexican subject heading list, is equivalent to the Library of Congress subject headings (LCSH). A LCSH heading sample is obtained from OCLC's Online Union Catalog. Using the EPIC search from OCLC, 1947 bibliographic records were obtained, and the topical headings appearing in those headings were compared with those in the Escamilla list. The findings show that 79% of the bibliographic records have at least one subject heading; 78% of these were topical subject headings; of the topical subject headings, 60% are found in the Escamilla list either as a near equivalent or absolute match; 2% of the headings show change in meaning; and 38% do not have any type of possible match. A list of proposed translations for those topical subject headings under the

IDENTIFIERS- New Mexico State University Alamogordo

New Mexico State University-Alamogordo's (NMSU-A) Institutional Assessment and Strategic Planning (IASP) process is designed to identify what the institution is doing, what the community is doing that may affect NMSU-A, how well NMSU-A is achieving its mission and purposes, and what the college should do in the future. The IASP is an integrated process involving the assessment of institutional effectiveness, institutional research, and strategic long-range planning. Data are collected from student surveys and focus sessions, a student long-range tracking system designed to follow student cohorts through NMSU-Alamogordo, as well as from faculty, staff, and the external environment. This handbook describes each component of the IASP, including flow charts and relevant forms. After tracing the development of the IASP process, the handbook details the assessment of the institutional effectiveness component. This component identifies institutional strengths and concerns and generates a series of action plans through a multi-step process of institutional evaluation and assessment. Steps in assessing instruction, student services, and instructional/institutional support are detailed. The next section focuses on the institutional research component, providing a schedule and brief descriptions of seven activities of the IASP committee ranging from the review of existing data and information reports to the contemplation of emerging trends. Finally, the strategic planning component is outlined. A schedule of activities for each component and a set of IASP forms conclude the handbook. A 44-item list of suggested reading is included. IDENTIFIERS- New Mexico State University Alamogordo

This report, emanating from New Mexico State University-Alamogordo's (NMSU-A) Institutional Assessment and Strategic Planning (IASP) process, presents information pertinent to NMSU-A's planning process for 1993-1996. Following a brief introduction and the IASP Committee cover memo, the report highlights seven high-priority institutional issues: (1) inadequate state funding in certain categories, particularly instruction, academic support, and physical plant; (2) double-digit student enrollment growth and resulting stresses on human, fiscal, and physical resources; (3) the need for new and/or remodeled classroom and administrative space and an increased level of maintenance for the physical plant; (4) the continued allocation of human and fiscal resources to IASP; (5) the need to revise the IASP process to make it more effective and responsive to institutional needs; (6) the need to establish a set of administrative computing policies and

IDENTIFIERS- \*New Jersey College Basic Skills Placement Test  
In Connecticut, the Board of Trustees for Community-Technical Colleges mandated the assessment and placement of entering community college students, adopting the New Jersey College Basic Skills Placement Test (NJCBSPT) for a systemwide pilot test beginning in spring 1989. At (then) South Central Community College, a study was conducted to determine whether students who followed placement recommendations had higher success rates than those who enrolled in higher level courses; and whether students who were successful in basic skills courses enrolled in and successfully completed college-level English and math courses in greater percentages than students who did not follow the recommendations. Study findings, based on the fall 1990 NJCBSPT scores of 804 students, included the following: (1) 71% of the 702 students who took the math test placed in Basic Math I, 25.5% placed in Basic Math II, and 3.4% placed in College Math; (2) 45.5% of the 673 students who took the English tests placed in Basic English, and 54.5% in English Composition; (3) 63% of those recommended for Basic Math I, 79.3% of those recommended for Basic Math II, and 72.0% of those recommended for Basic English completed the remedial courses successfully; (4) 60% of those recommended for Basic Math I but who took Basic Math II were successful, as were 67% of those recommended for Basic Math II but who took College Math, and 68% of those who were recommended for Basic English but who enrolled in English Composition; and (5) among students who took the NJCBSPT prior to enrolling in fall 1990, only 23.8% were still enrolled in spring 1993. IDENTIFIERS- \*Johnson County Community College KS

In order to determine the number of Johnson County Community College (JCCC) students transferring to four-year institutions and their academic performance at the institutions, records were obtained from 10 of 11 regional institutions most often accepting JCCC transfers. In addition, questionnaires were mailed to the 1,403 JCCC students who completed at least 6 credit hours and transferred to four-year institutions between summer 1991 and spring 1992. A total of 349 former students responded, for a response rate of 25%. Major findings from the survey and the analysis included the following: (1) the 1,403 students who transferred between summer 1991 and spring 1992 represented 29% of the students who could have transferred; (2) 71% of transfers attended either Kansas State University or the University of Kansas, with the remainder of students enrolled primarily in Kansas and Missouri institutions; (3) 77% of respondents indicated that their primary educational objective had been preparation for transfer, with 92% responding that they had achieved their ultimate objective at JCCC; (4) the transfer students had an overall grade point average (GPA) of 3.00 at JCCC and an overall GPA of 2.59 at their four-year institutions; (5) in 8 out of 10 institutional quality ratings, more students were satisfied with JCCC than with their four-year institution; and (6) most students felt that JCCC helped them improve in such skill areas as communication, arts and sciences, and self-confidence. Detailed data tables and the survey instrument are included. (MAB)

IDENTIFIERS- \*Virginia Community College System

A statewide retention study conducted in fall 1992 revealed significant differences in graduation rates among Virginia Community College System (VCCS) institutions. To determine factors related to student graduation and differences in graduation rates for VCCS colleges, an analysis was undertaken of the characteristics of fall 1989 entering students and the characteristics of students from this cohort who received an award (i.e., certificate, diploma, or associate degree) by June 1992. Results of the analysis included the following: (1) graduation rates for the 23 colleges in the VCCS ranged from 53.8% to 4.8%, with a system-wide average of 10%; (2) with respect to graduates system-wide, 53% were female, 82% were

Rating Scales; Elementary Education; \*Elementary School Students; Evaluation Methods; Foreign Countries; \*Student Adjustment; Student Behavior; \*Student Evaluation IDENTIFIERS- England (London); Teacher Rating of Student Characteristics

This study compared the relative frequency of the identification of students as maladjusted to school by standardized achievement tests and by teacher ratings. Subjects were 290 primary school children between 8 and 12 years of age from London, England. Children's achievement was assessed using the mathematics, maps, and reading subscales of the Richmond Tests of Basic Skills (RTBS). Teacher ratings of children's adjustment to school were obtained through a revision of the Classroom Adjustment Rating Scale (CARS). The revised CARS included subscales for aggression, withdrawal, academic performance, sensitivity, dependency, and physical problems, and an overall adjustment scale. Analysis revealed that a greater number of children were classified as deviant by the achievement tests than by the revised CARS. The subscale ratings of the teachers were so highly intercorrelated that important issues concerning the practical usefulness of teacher ratings are raised. (MM)

DESCRIPTORS- \*Elementary School Students; Elementary Secondary Education; \*Learning; Learning Processes; \*Learning Strategies; Learning Theories; Memory; Metacognition; Mnemonics; Notetaking; \*Secondary School Students; \*Study Habits; \*Study Skills

This seven chapter book offers guidance to elementary and secondary teachers on how to help students develop strategic study skills. Chapter 1 summarizes current knowledge about information-processing theory, the teacher's role in facilitating learning, and the necessity for changes in instructional techniques across grade levels. Chapter 2 outlines the research on memory development and on the developmental nature of memory monitoring and knowledge about study skills. Two methods of teaching study skills, the detached strategy training approach and the embedded strategies approach, are compared in chapter 3. Chapter 4 focuses on kindergarten and first grade students and suggests specific methods classroom teachers can use to promote the development of effective memory and study skills in this age group. Chapter 5 outlines relevant changes in children's memory strategies during elementary school and presents information and strategy suggestions related to specific content areas. Chapter 6 describes children's strategic development during the middle grades and offers suggestions for helping middle grade students develop both general and curriculum-related study skills. Addressing the specific study-skill needs of secondary students, the concluding chapter discusses systems designed to aid studying and memory skills, including aids for enhancing

on their understanding of gender identity and their social representations of gender were conducted. Based on the results of these analyses and interviews, a case is made that preschool teachers, and adults in general, fail to notice the children's own ideas on the role of gender during play. In support of this assertion, a number of vignettes are presented. Developmentally based nursery programs encourage children to initiate their own play and be self-directed in their learning in a rich and stimulating, albeit gender-neutral, environment. But because the child's need to use gender as a category in the realization of a personal self do not match the ideological world view of the adults, they may be ignored or left unaddressed in the gender-neutral classroom. IDENTIFIERS- \*Japan

This poster presentation examined the structure of Japanese elementary school children's social support systems to demonstrate how they are related to: (1) academic achievement; (2) teacher evaluations; and (3) the children's own sense of self-esteem. A total of 91 fifth and sixth graders, along with their teachers, were interviewed and surveyed. Data on the children's intelligence test scores, grade point averages, teacher ratings, and attendance records were obtained. Results indicated that peers and close family members were the main providers of social support, while the support provided by teachers and relatives was limited. Boys with low support from their fathers generally had low levels of self-esteem, high levels of feelings of isolation in the classroom, and ranked low in academic achievement and teacher's ratings. For girls, low support from their fathers was correlated with feelings of isolation, while low support from their mothers was correlated with low teacher ratings. Peer support within the classroom tended to be almost entirely gender-exclusive, while grade point averages and teacher ratings were positively correlated with children's self-esteem. These results point to the need for more investigation into children's social support networks and the negative influence of the lack of paternal support. (MDM)

IDENTIFIERS- Dysfunctional Family; Ecological Psychology; \*Parent Empowerment

During the past 40 years, the rapid pace and complex nature of social change has created a stress-filled environment for families. New challenges such as AIDS (Acquired Immune Deficiency Syndrome), drug abuse, increasing crime, economic malaise, moral deterioration, and increases in mental health problems contribute to the increasing stress in families. Historically, our society has looked to the family and the school to deal with the dynamics of social change. However, families have not received needed support for effectively dealing with these changes, and schools still function within designs more suited to the past than to the present or the future. A new paradigm based on a family-school-community learning and support system is needed. The focus of this book is on strengthening the early childhood educator's position in creating supportive relationships with families, particularly with those who are in at-risk situations. The book's goal is to promote new ways of thinking about and relating to families, with the focus on strengthening families and family-school relationships. The book has five chapters: (1) "At-Risk Families: The Context"; (2) "Empowering At-Risk Families"; (3) "Understanding the Barriers to Empowerment"; (4) "Insights on Relating to the Needs of At-Risk Families"; and (5) "Supporting At-Risk Families." (150), Opinions/Personal Viewpoints/Position Papers/Essays (120)

DESCRIPTORS- \*Administrator Role; \*Change Agents; \*Educational Change; Elementary Secondary Education; Leadership; \*Rural Schools; \*Superintendents

Educational research typically overlooks the significance of the superintendent in improvement efforts. The superintendent must not only be a good manager, but must also provide leadership, direction, vision, and purpose, and must establish an atmosphere conducive to learning. Because effective communication is vital, and in order to avoid confusion, the superintendent must also form an administrative team to maximize interaction and create commitment. One of the key elements of superintendent leadership is the search for effectiveness and excellence in the educational program. Effective leadership that produces effectiveness in schools can be accomplished only when the superintendent is fully organized and knowledgeable. The superintendent must evaluate the success or failure of improvement efforts, and be willing to abandon a project when necessary. Superintendents who wish to implement school reform are risk takers who view their job as requiring them to educate community and staff about what is needed and what they should want. This paper contains two figures mapping out superintendent activities and the superintendent's role in instituting reform efforts, and a list of 15 suggestions for superintendents. (KS)

IDENTIFIERS- \*Iowa (Black Hawk County)

This paper provides a history of early public schools in two Iowa townships. Townships are six by six mile areas of land that were established as the result of the Northwest Ordinance of 1787. The civil townships of Bennington and Cedar Falls were part of 17 townships located in Black Hawk County, Iowa. The Northwest Ordinance specified that the sale or income from a section in each township would be used by the state to build and support public schools. Additionally, an act of the Iowa Legislature in 1858 made each civil township a school district, ensuring that the tax unit for common schools was no smaller than a township. In Bennington and Cedar Falls Townships, nine subunits were created, each containing a school. Schools were usually started by a family or teacher and were private or subscription schools that required payment per child from the family to the village. In 1872, the Iowa General Assembly allowed a township to divide into nine rural independent districts, each having a three-member local board. After 1872, many townships voted to create independent districts that consisted of nine tax units instead of one. The number of school districts in Iowa increased rapidly in the next 4 years, until this authorization was withdrawn by the General Assembly in 1876. In the mid-1950s, due to low attendance and the passage of the School District Reorganization Law, most one-room schools became part of consolidated high school districts. Diagrams illustrate changes in school districts. (LP)

IDENTIFIERS- Bureau of Indian Affairs; \*Tribal Government

This paper analyzes and evaluates federal assistance to Indians on or near reservations and recommends public policies to promote self-determination through economic development. Most Indian tribes rely on federal funds for basic necessities and services. At current funding levels, reservation residents lead lives of deprivation or opt for outmigration to achieve personal self-sufficiency. The goal of federal policy should be

in 1974. Involving Bunumbu Teacher's College and 20 pilot schools, the project sought to improve preservice and inservice teacher training and to produce a new elementary school curriculum with a rural bias. In the mid-1980s, program implementation and impact were evaluated using case study methodology, including observation and interviews. Findings revealed that the project was implemented via many trials and errors. Outcomes with regard to major program objectives were as follows: (1) rural curricula for pilot schools and the college were developed; (2) pilot schools were rebuilt but were not transformed into community learning centers; and (3) implementation of the adult literacy program was not successful. Program impact included teacher development, improved school conditions, technical support for local agricultural development from blacksmithing workshops associated with pilot schools, and increased administrator and teacher confidence to tackle educational and community problems. Weaknesses and problems included unclear goals, too many objectives, physical isolation, lack of feedback and participative planning, lack of personnel trained in change implementation, and lack of resources. The Fullan model of implementation used in the evaluation was not adequate for the Sierra Leone context because it neglected social, political, and cultural factors affecting the change process. The hearing reported in this document focused on H.R. 4726, a bill concerned with improving the facilities and instructional equipment available at science-technology centers, two-year colleges, and other non-profit institutions engaged in informal and formal education in science and technology. Witnesses from three agencies (National Aeronautics and Space Administration, National Science Foundation, and Department of Energy) charged with implementing and administering the bill described how the new program relates to their agencies' current educational activities and provided an assessment of the likelihood of the bill achieving its objectives. The SouthEastern Regional Vision for Education (SERVE) is a coalition of educators, business leaders, governors, and policymakers seeking comprehensive and lasting improvement in education in Alabama, Florida, Georgia, Mississippi, North Carolina, and South Carolina. SERVE'S Consortium for Mathematics and Science Education provides support to members of the system by providing technical assistance, linking and coordinating resources, using technology, and disseminating information about successful practices targeted for at-risk students. This document describes 28 programs that have been categorized as Programs of Excellence, Quality Programs, or Promising Programs. There were 16 Programs of Excellence, 10 Quality Programs, and 2 Promising Programs identified and reviewed. The programs cover the following topics: constructivist learning, elementary mathematics and science, environmental studies, chemistry, physics, biology, problem solving, algebra and pre-algebra, life sciences, mentoring, high school mathematics, general mathematics, and geometry. A section lists 26 exemplary programs identified by the National Diffusion Network. Contact persons are listed for each of the programs reviewed. (MDH)

IDENTIFIERS- Mathematics Education Research; \*National Assessment  
of Educational Progress

This report presents the mathematics assessment results from the 1992 National Assessment of Educational Progress (NAEP). The assessment included nearly 250,000 fourth-, eighth-, and twelfth-grade students attending approximately 10,000 schools across the nation and the states. Students' performance is categorized into three achievement levels: Basic, Proficient, and Advanced. Among the major findings were that: (1) for the nation there were statistically significant increases in average mathematics proficiency in all grades and in both public and private schools from 1990 to 1992; (2) despite these positive findings, 60 percent of the students in grades 4, 8, and 12 were estimated to be at or above the Basic level on the 1992 mathematics assessment; (3) considerable variation in

This document describes a classroom learning activity that brings together role playing, learning about the Middle Ages, and working for rewards. In the course of the activity, entitled "Knights of the Round Table," students advance by completing assignments and amassing points. Players move upwards through the beginning or "peasant" level through "serf," "page," and "squire" levels until they finally accumulate enough points to become "knights." There are different characteristics assigned to each of the roles and varying numbers of points required to advance through the game. For instance, peasants and serfs earn points called "coppers," while pages and squires can earn "silvers." Only knights can earn "golds." Each special project to which teacher and student agree is a "quest," and a student may earn a "jewel" upon completion of a special task. Students who land on specially marked spaces can draw cards marked "Merlin's Magic," while those who fail to earn at least 50% of possible points on a given day go to the "Dragon's Lair" until they earn enough points to receive three jewels. IDENTIFIERS- Fulbright Hays Seminars Abroad Program; \*Indonesia  
This collection of works from the Fulbright-Hays Summer Seminar presents curriculum projects and cross cultural studies developed by the participants. The 18 works deal with Indonesia and the problems facing developing nations. Subjects include tradition, popular culture, change, and economic development and its impact on women. Indonesia is compared with nations in Africa, and with the United States in a project dealing with freedom of speech, censorship, and freedom of the press. Some of the works include reference bibliographies, maps, classroom handouts, and lesson plans. Many of the items included are materials and projects for teachers to use as a basis for a lesson plan or unit. A teacher workshop agenda provides all materials necessary to hand out to students, a list of goals for the program, and the agenda and program for a teacher workshop on Indonesia. Several units consist of syllabi for university courses and include required and reserve readings, videos, and course outlines. Research proposals also are included. Plans suitable for elementary or secondary school levels include materials covering geography, history, economics, anthropology, and government. Mass communication is discussed in several works. Because of the diverse nature of the population and cultures making up Indonesia, some of the projects deal with multiculturalism, unity in diversity, and problems relating to ethnic and religious differences. Instruction; \*Humanistic Education; Intermediate Grades; Self Actualization; \*Social Studies; \*Student Development; \*United States History

IDENTIFIERS- \*Literacy in Science and Social Science Project

This report examines cases of students learning from their experiences in a fifth grade classroom as they studied a U.S. history curriculum organized around concepts that would not only help students understand history but also be powerful in their lives, concepts that planners hoped would make students more human. The teacher-researchers also considered themselves as learners through the collaborative work done within the Literacy in Science and Social Science Project. This report explores how social studies in this particular context was powerful or not for these particular fifth grade students, powerful in understanding U.S. history, powerful in text analysis, and powerful in analyzing their own lives. The report is not an attempt to show exemplary practice. Instead, it is an attempt to open up dialogue surrounding the teaching and learning of social issues and social justice in the context of social studies. The study seeks to address such questions as: What is powerful social studies? Whose history is being taught in the schools? For whom is it powerful, those who dominate or those who are dominated? For what purposes is it powerful? and Powerful to dominate or to liberate? Contains 57 references and 4 appendices.) (Author/SG)

DESCRIPTORS- \*Art Education; Art Teachers; Educational Objectives; Educational Research; Elementary Education; Elementary School Students; Elementary School Teachers; Grade 1; Grade 2; Grade 5; \*Music Education; Music Teachers; Teacher Effectiveness; \*Teacher Role; Teaching Methods

This report presents five case studies of teaching for understanding in the arts. The first two studies are of expert elementary music teachers who engaged in weekly planning together. In the case of Anna Spaulding, a first grade lesson is presented in detail as well as a description of how this teacher conceived of music as a discipline, planned lessons, taught music classes in the first and fifth grades, and evaluated students' learning. In the case of Esther Bromfeld, similar topics are addressed with a focus on her teaching second and fifth grade classes, a presentation of a fifth grade lesson on improvisation, and her dedication to students' listening in music. The third case is of Martha England, an expert art teacher. Similar topics are treated in the analysis of this teacher's curricular goals and pedagogy that focused on art production, her teaching from an art cart, and students' learning. Together, these individual case studies present a portrait that captures how itinerant teachers in the arts manage exemplary teaching despite workplace constraints, their teaching concerns, and what students can learn in the arts when their teachers love and understand the subjects they teach,

IDENTIFIERS- Discipline Based Art Education

This report focuses on the implications of eight Center for the Learning and Teaching of Elementary Subjects studies in elementary art and music education and synthesized existing research with respect to teacher education in art and music education. *The first section provides a summary of the major findings in each of the Center studies in art and music conducted over a 5-year period. Of particular interest to researchers was the improvement of teaching these subjects to enhance students' depth of understanding and meaningful applications in everyday life. The second section presents a synthesis and comparative review of the research literature in art and music teacher education in light of these findings. The literature review addressed several perennial and contemporary issues in arts education at the elementary level. The interests and goals of art and music education were mapped onto the larger historical context of U.S. curriculum and the multiple, competing goals for education. Little attention has been given to how to teach these disciplinary areas beyond art production or musical performance and what kind of knowledge, experience, preparation, and support teachers need in order to implement such a reform in K-12 practice. The third section examines research trends and current interests in general teacher education. Concerns such as contextual constraints in teacher education reform, teachers' subject matter knowledge, conceptual orientations to teacher education programs, and change strategies are used as a template to identify similarities, omissions, and promising directions in research and program development for art and music teacher education.* (DK)

IDENTIFIERS- \*Self Empowerment

The argument is advanced that many literacy materials, such as basal readers and workbooks, do not allow literacy students to learn to read and write in the daily context in which the skills will be used, and an alternative is described. The limitations of phonics-based materials and the resulting controlled vocabulary of readers and workbooks include students' lack of freedom to choose relevant topics. The whole language approach, referred to as an "apprenticeship" approach to literacy learning, is the basis of a "Projects" kind of learning. The Projects method involves choosing a topic, getting started through brainstorming, asking questions, beginning the research by developing a chart, finding resources, reading and recording the information, rewriting for presentation (revising and editing), and rewriting. The approach is based on both whole language theory and the theory of empowerment. Illustrations of students' work are included. Contains 8 references. (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

Instruction; Second Language Learning; Teaching Methods  
IDENTIFIERS- Ontario (Toronto)

This book consists of a collection of stories written by adults who attend a bilingual ESL (English as a Second Language) program co-sponsored by the Toronto Board of Education and Chinese Information and Community Services. All the writings deal with Chinese culture but the book may be used by people of diverse backgrounds and of varying levels of English language proficiency. The stories and accompanying exercises are of different levels of difficulty. Discussion questions follow each story. The goal of the book is to: (1) promote language development by way of exercises and discussions of topics that are relevant and meaningful to adult learners; (2) to provide instructors with descriptions of three approaches to teaching writing (Language Experience Approach, Process Writing and a Variation on Process Writing) that they can use in their programs and (3) to provide a springboard for intercultural communication and understanding through cultural exploration and comparison. IDENTIFIERS- Ontario (Toronto)

This book is a collection of 11 stories written by adults learning English as a Second Language at the Centre for Spanish Speaking People in Toronto, Canada. It deals with their past experiences, their present situations in Canada, and their future aspirations. Each reading selection is followed by activities and discussion questions. This educational tool is recommended for use with any ethnic/linguistic group because it reflects the struggles, hopes, dreams, and problems that all newcomers face during the adaptation process. This book deals with real life situations with which all students can identify. The issue of stereotypes is addressed and suggestions on how students and instructors should deal with them are made. IDENTIFIERS- United States

This book attempts to counter the fears of many native English speakers and educators that the recent surge of speakers of English as a Second Language (ESL) into U.S. universities and U.S. society as a whole represents a threat to the integrity of U.S. pedagogy and culture. More specifically, the book wrestles with the questions: What does it mean to write and read in a second language? The first of six chapters explores the evolving definitions of literacy in the field of ESL. Chapter 2 focuses on social meanings of ESL literacy, discussing how ESL literacy involves cultural, social, and political action. The third chapter outlines a dialectical theory of ESL literacy as a social act. Chapter 4 presents Carlos Bulosan's autobiography, "America Is in the Heart," as an illustration of the dialectics discussed in Chapter 3. The connections between theory and practice are elaborated in chapter 5 through a discussion of the teaching practices that have been shaped by a social perspective on ESL literacy. And finally, chapter 6 examines the ways in which teachers construct meaning out of nonnative prose. (Contains 180 references.) (LB)

IDENTIFIERS- Canada; Personal Reports of Subjective Experiences

Developed by a Canadian volunteer organization, this textbook for

high school and adult English-as-a-Second-Language (ESL) and

literacy students explores current international events and

social issues using both personal and global perspectives. It

includes personal stories of people's lives, discussions of

social and political issues in a wider context, and facts about

various countries (Canada, the United States, Mexico,

Guatemala, Nicaragua, Peru, Bolivia, England, Eritrea,

Ethiopia, Nepal, Thailand, and China). The direct and easy-to-

read language stories also make connections to life in Canada.

The reading material is divided into five major theme areas:

People and the Land; Rebuilding After War; Ending Family

Violence; Literacy; and Workers Making Connections. The text is

written in intermediate-level English, illustrated on almost

every page with photographs. A final section, "Teacher's

Notes," suggests classroom activities and opportunities for

further reading. Though written for intermediate-level ESL and

The University of California San Francisco's Medical Scholars

Program was designed to encourage women and minority students  
to consider careers in academic medicine. The program ensured  
academic success in the basic pre-medical courses through the  
use of peer learning groups and exposed students to research  
opportunities through informal discussion and summer research  
participation. The program operated for 3 years and served 93  
white students (29% of those entering in that period) and 71  
non-white students (70% of those entering in that period).

During the program the number of minority students  
participating in summer research doubled; minority failures in  
pre-clinical courses declined; and the impact of pre-medical  
school achievement on the National Board of Medical Examiners  
Part 1 ceased to be a significant predictor of students' actual  
scores. The program also appeared to have a school-wide effect  
in increasing the use of group study, in decreasing the onus on  
"help-seeking," and in promoting consideration of academic  
careers. Finally, the program created an infrastructure of  
medical student teachers who serve as a peer support group to  
first-year students. The report's three sections include a  
quantitative analysis of the program and its effect on student  
performance on the National Board Examination, a summative  
qualitative analysis based on student interviews, and a  
description of summer research experiences. (JB)

IDENTIFIERS- Aviation; \*Aviation Occupations

A study was done to examine the reasons for the low number of women in collegiate aviation education by focusing on the number and status of women aviation educators and on attitudes toward women in aviation. Information was sought from each of the 67 four-year University Aviation Association member institutions, with a response rate of 63%. Structured telephone interviews with 47 aviation program directors and aviation collegiate educators at the 42 responding institutions were conducted. The instrument requested data concerning the present status of women in collegiate aviation education and used open-ended questions to allow respondents to recommend changes. Analysis revealed that women hold 10.5 percent of the full-time aviation faculty positions, that women hold 8.8 percent of the earned doctorates in the technologically related field of engineering, and that 5.2 percent of Certified Flight Instructors are women. Responses from the 13 female interviewees indicated that the majority of them became involved in the profession by accident. Several respondents indicated that mentoring is important in a woman's career. Suggestions to women interested in collegiate aviation education included: networking, joining professional organizations, participating in conferences, acquiring higher degrees in education, acquiring as many flight ratings as possible, becoming more aggressive, seeking leadership from women, and being a role model for other women. (Includes a copy of the instrument, a list of participating institutions, information on the researcher, and a 125-item bibliography. (JB)

Self-regulation in North American higher education is inherent in university behavior, having existed and expanded throughout most of the past century. However, the rest of the university world is just starting to experience a significant level of control over program development, financial management, and evaluation and the subsequent need for self-regulation. This book describes the development and evolution of several major forms of regulatory systems for higher education in the United States and other countries, with particular emphasis on the universities' increasingly complex and self-regulatory intentions and characteristics. It focuses primarily on the nature and development of evaluation systems as they are experienced in the wider concept of regulation--their attributes, strengths, limits, and how they can be improved. The presentation is based upon conceptual models for regulation, evaluation, and self-assessment developed over the last 20 years, some of which have been used by those constructing collaborative self-regulation schemes in several countries. In addition, the book presents analyses of the patterns that are emerging, the apparent national determinants, and the critical relationships between purposes and means in the systems. Appendices contain sources of information concerning evaluation programs, a sample survey, and excerpts from several handbooks and papers addressing internal and external quality control and self-evaluation. Contains approximately 150 references and an index. (GLR)

IDENTIFIERS- \*University of South Florida

This report presents findings from a plant survey of the University of South Florida conducted in April, 1993. It contains recommendations for the educational plants of the university for the period from April, 1993 through June, 1998. The statistics presented are intended to assist the university with the preparation of building programs submitted for review to the Board of Regents and the Office of the Governor. The report contains eight sections. The first section presents an introduction to the educational plant survey that covers the statutory foundations for the survey, the procedural policies, and the cooperative process. The second section presents an overview of the university, its historical perspective and

these purposes for educators who responded. These educators represent a specialized group of highly educated and experienced teachers, who are knowledgeable about computer technology and who have been using a range of computer-based applications in classrooms for several years. Computer and library media specialists are generally the leaders in telecommunications practices, serving as a resource for other teachers. Most respondents are self-taught, and their responses highlight the lack of training in telecommunications for teachers. Implications of findings for improving the educational uses of telecommunications are discussed. Ten tables and 49 figures present survey findings. Appendix A is an annotated bibliography that lists 55 educational telecommunications services and regional Internet providers, and Appendix B lists the computer networks respondents used. (Contains 21 references.) (SLD)

DESCRIPTORS- Ability; \*Computer Assisted Instruction; Computer Games; Computer Software; Females; Foreign Countries; Junior High Schools; Junior High School Students; Males; Performance; \*Problem Solving; \*Sex Differences; Sex Stereotypes

IDENTIFIERS- England

Whether gender differences in performance using computer software are due to sex stereotyping or gender differentiation in the programs was investigated in two studies. An adventure game, "King and Crown," with all male characters, and a gender neutral game, "Honeybears," were played by 26 female and 26 male 11- and 12-year-olds in Milton Keynes (United Kingdom). Both games were essentially route-planning tasks with similar features. In a second study, a new version of "King and Crown," called "Pirates," was compared to "Honeybears" in a study with 24 female and 24 male 11- and 12-year-olds in Milton Keynes. Considered together, results of these studies provide a clear illustration of the way characteristics of the software can exert an effect on the performance of girls. While the performance of boys was relatively unaffected by the software, that of girls was far superior when playing "Honeybears." Further studies will examine the expressed preferences of boys and girls for the two games. (SLD)

IDENTIFIERS- South Africa

The objectives of the Launching Conference of the South African Institute for Distance Education (SAIDE) are reviewed, and its recommendations are explored. The conference participants considered how theories, teaching, and administrative practices in distance education worldwide could be used to design a new distance education system for a democratic South Africa. It was necessary to recognize that present practices are not adequate alone, and that student success depends on the quality of educational experience that an institution provides. The conference has therefore provided a good forum for considering how access to education and equal educational opportunities can be established. A summary of what delegates want from SAIDE includes the following roles: (1) policy, advocacy, and lobbying; (2) networking, cooperation, and facilitating; (3) acting as a resource center; (4) acting as a research and evaluation body; (5) training and staff development; (6) initiation and enabling; and (7) immediate tasks of information dissemination and administrative efforts. IDENTIFIERS- British Columbia; \*Computer Mediated Communication; \*Mainframe Computers; University of Victoria BC

At the University of Victoria (British Columbia), computer mediated communications have been used since 1988 in the delivery of distance education in the Certificate Program in Computer Based Information Systems. From 1988 to 1990, a university mainframe computer was used as the host for communications, but since 1990, the host has been a personal computer (PC) based electronic bulletin board system (BBS) operated by program staff. These two methods of using computer-mediated communications are compared and contrasted from the perspectives of data communications procedures, technical support required, usage, costs, and reactions of students. BBS usage was analyzed by studying the experiences of 21 students in a version of the course. Experience with the earlier system

person who takes care of the organization's documents. A list of helpful organizations is also included. (SLD)

From August to November of 1992, 10 institutions from central New York State (Colgate University Library, Fayetteville Free Library, Herkimer County Community College Library, Oneida Community Mansion House, Onondaga Community College Library, Onondaga County Public Library, Onondaga Historical Association, Skaneateles Library Association, State University of New York Health Science Center - Syracuse Library, Utica Public Library) participated in a cooperative preservation needs assessment project for the Central New York Library Resources Council. The assessment consisted of three phases, each launched by a 1-day training seminar. Each of the institutions conducted the survey on a 100- or 400-item random sample drawn from its library collection (either general or a special collection). The project identified preservation problems, solutions, and priorities; developed institutional preservation plans; identified collective preservation problems and solutions; and identified and established priorities for collective action. The target collections samples represented an estimated 627,500 items, with a variety of preservation problems. The vast majority lacked environmental control. The survey formed the basis for a grant proposal for future cooperative action centering on disaster preparedness, preservation program implementation, and a preservation techniques refresher program. Nine appendixes provide supplemental information about the projects, its participants and agenda, and a sample plan. The survey document is included. (SLD)

DESCRIPTORS- Adult Basic Education; \*Adult Literacy; \*Adult Reading Programs; Case Studies; Community Involvement; Futures (of Society); \*Literacy Education; Tutoring; Tutors; Volunteers; Volunteer Training

IDENTIFIERS- Historical Background; Ohio (Cleveland); \*Project LEARN OH

This study examines the history, development, and important characteristics of Project: LEARN, a community-based literacy program in Cleveland (Ohio). The program started in 1974 and is an affiliate of Laubach Literacy International. It has successfully used volunteer tutors to teach basic reading and writing skills to thousands of illiterate adults. Data collected for this case study were derived from interviews conducted with present and former staff of Project: LEARN, as well as from correspondence, board meeting minutes, reports, newsletters, publicity releases, newspaper articles, and an annual meeting of Project: LEARN. Related literature is reviewed; and the following characteristics of Project: LEARN are described: mission statement and purpose, organization and structure, facilities, programs, student support groups, funding, budget, tutor training, educational materials, and future plans. IDENTIFIERS- \*Church Libraries; \*Synagogue Libraries

This annotated bibliography is intended as a general background guide for volunteer librarians in churches and synagogues. It is assumed that the user has little knowledge of contemporary literature for youth in grades 7 through 12, but is aware that their reading needs are not identical to those of younger children or adults. Rather than listing books that are explicitly devout, the guide lists books that emphasize values that all religions hold in common. Criteria used in selection include proven popularity, the presence of values beyond self, and availability in paperback. The works of four contemporary authors who write for young adults--Lois McMaster Bujold,

procedures to guide planning, acquisition, technical support, and staff training; and (7) continuation of the emerging pattern of decentralization of the acquisition of audiovisual equipment and tape libraries. The final section presents a list of 18 vital campus issues identified during the IASP process, a list of 80 potential new and expanded campus programs and processes, charts showing 39 personnel requests and 43 equipment requests by unit, and outlines of campus space utilization and computing needs and projects. Arizona Community Colleges: Report of the Task Force on Community College Enrollment Growth Planning.

PUB DATE- Aug 93

NOTE- 58p.

LANGUAGE- English

EDRS Price- MF01/PC03 Plus Postage.

PUB TYPE- Reports - Descriptive (Program/Project Descriptions) (141); Numerical/Quantitative Data (110)

DESCRIPTORS- \*College Planning; College School Cooperation; Community Colleges; Educational Finance; Educational Legislation; \*Enrollment; Enrollment Influences; \*Enrollment Projections; \*Enrollment Trends; Intercollegiate Cooperation; School Statistics; Two Year Colleges; Two Year College Students  
IDENTIFIERS- \*Arizona

The Task Force on Enrollment Growth Planning (TFEGP), authorized in 1992 by the State Board of Directors for Community Colleges (SBDCC) of Arizona, includes representatives from each community college as well as staff from SBDCC office. The Task Force was created to prepare enrollment growth estimates for community colleges through the year 2010; to develop alternative strategies to accommodate the anticipated enrollment growth; and to provide recommendations. Using the Arizona Enrollment Demand Model, the Task Force estimated that community college enrollment demand would increase by approximately 95,000 students (62%) between 1990 and 2010, which would be equivalent to the services provided by an additional 11 to 14 average-sized Arizona community colleges. To deal with the projected growth in enrollment demand, the Task Force proposed a variety of strategies described under the following headings: Strategic Planning for Facilities, Equipment, and Staffing; Collaborative Efforts among Institutions; Confronting the Challenge of Growth; and Financial Support. This report reviews the enrollment growth estimates and the methodologies used to arrive at these estimates, as well as describing the strategies to accommodate the anticipated growth. The report also details specific recommendations to each of the following bodies: the Arizona Board of Regents; the Governor and State Legislature; the SBDCC; and the District Governing Boards and colleges. An appendix provides a report of the Task Force's Statistics subgroup, describing enrollment growth models reviewing district-prepared enrollment projections, and detailing enrollment projections by program type, and student age, gender, ethnicity. Data tables, graphs, and pie-charts are included. (PAA)

PUB TYPE- Guides/Methods/Techniques (For Practitioners) - Non-Classroom Use (For Administrative and Support Staff, and for Teachers, Parents, Clergy, etc. in Non-Classroom situations) (055); Test, Questionnaires, Evaluation Instruments (160)

DESCRIPTORS- \*Academic Advising; \*Career Counseling; Community Colleges; Counseling Services; \*Counselor Role; Counselor Training; \*Educational Counseling; \*Faculty Advisers; Referral; School Holding Power; Student Needs; \*Student Problems; Teacher Student Relationship; Two Year Colleges; Two Year College Students

Drawing from the literature and research on educational advising and student retention, this handbook provides practical guidelines on advising students, based on five propositions. The propositions are that: (1) educational advisement should be designed to provide accurate, consistent, accessible information for students concerning their progress within their curriculum; (2) the best single indication of the likelihood of college persistence is the student's ability to cope with academic problems; (3) educational advising should be career focused; (4) the quality of student-faculty interaction is a major contributing variable to college holding power; and (5) the premier goal of educational advising is a full response to the student's needs. Each of the five sections of the handbook deals with one of these propositions. Part 1 deals with providing information to different categories of students, including returning, entering, freshmen, English-as-a-Second-Language, international, undecided, change of major, transfer, part-time, and probationary students. Part 2 suggests ways of helping students cope with 19 difference academic problems. Part 3 deals with 15 categories of difficulties encountered in the course of making a decision about a career. Part 4 reviews seven ways of responding to students who come for advisement. Finally, part 5 outlines the method of making an effective referral and summarizes referral skills. Each section concludes with case studies and specific recommendations. An academic advisor checklist and evaluation form used at Bronx Community College and responses to case problems are included. IDENTIFIERS- ERIC Digests

The role of ethics in institutional management and instruction and the need for ethics codes have been identified as major issues currently facing community colleges in the United States. In general, ethics codes represent professional ideals, serving as guides for behavior and establishing principles of performance. A study was recently conducted by the Community College Studies Program at the University of California, Los Angeles and the Irvine Group (a group of prominent current and emeritus educators) of 2,500 two- and four-year colleges to identify existing administrator and faculty ethics codes. A total of 413 institutions provided usable responses, and only 36 of these institutions reported administrator ethics policies. With respect to community colleges, these policies tended to specify professional standards for conflict of interest, integrity, nepotism, and accountability. The most common issue covered in college faculty ethics codes was faculty responsibilities, occurring in 27 of 33 responding two-year colleges. In addition, most locally developed policies included a section concerning the ethical obligations of faculty as teachers. The survey also revealed a strong emphasis on faculty rights and conflict of interest. Only four community colleges submitted sexual harassment ethics codes, and no community college submitted a policy concerning ethics in research. In addition to institutional ethics statements, many collective bargaining agreements also detail the rights and responsibilities of faculty members. (PAA)

IDENTIFIERS- \*Developmentally Appropriate Programs; Maine

This summary report describes Maine's early childhood demonstration sites--three model programs within the schools which serve as demonstration and training sites for public school and preschool educators and which increase access to quality programs for four-year-old children and their families. Demonstration sites were designed to provide an individualized, child-centered curriculum, regional training opportunities for early childhood educators, and parental education programs. The first section of the report provides background information, providing national and state contexts as well as brief descriptions of Head Start and other child development services in Maine. The next section describes the demonstration sites project in detail, including site selection, training of site personnel, and community resource teams. An evaluation study is presented in the third section, and the findings of that study are outlined in the fourth section of the report. The report concludes with a discussion of the implications for other state efforts in early childhood education. (MM)

IDENTIFIERS- \*National Middle School Association

Prepared by the National Middle School Association (NMSA) and approved by the National Council for Accreditation of Teacher Education (NCATE), this handbook presents curriculum guidelines and worksheets for undergraduate and graduate teacher preparation programs focusing on grades 5 through 9. Specifically, the guidelines are designed to assist in the preparation of curriculum folios as part of the accreditation process and to aid in the development or revision of middle-level programs. Following introductory materials, the first part of the handbook provides requirements for middle-level teacher training programs at four levels: a basic teacher education program, a master's degree program, a specialist's degree program, and a doctoral program. For each program, minimum standards and appropriate accreditation documentation are described for the following program components: (1) in-depth study of the developmental stage of early adolescence; (2) knowledge of middle-level philosophy, curriculum, and instruction; (3) content knowledge in at least one broad teaching field; and (4) field experience at the middle level. The second part of the handbook provides four sets of matrices for use in reporting compliance with NMSA guidelines for the basic through doctoral program levels. Matrices include a list of the minimum requirements described in the handbook and space to cite courses or experiences that fulfil the requirement. (AC)

DESCRIPTORS- Adolescents; Case Studies; Committees; \*Evaluation Methods; \*Informal Assessment; Instructional Effectiveness; Intermediate Grades; Junior High Schools; \*Middle Schools; \*Program Evaluation; Program Implementation; Role of Education; School Role

Designed as a guide to conducting informal evaluations of middle school programs, the nine sections of this booklet review current thinking on issues of evaluation and offer sample questions to be considered by school evaluation teams. Following introductory materials, the first section reviews the benefits to conducting evaluations of middle-level programs, while the second examines the unique role of middle schools in

traced in Indian lore to a time before Columbus. Today, fingerplays delight and fascinate young children and provide a variety of learning opportunities. Fingerplays can provide a source for strengthening language experiences for young children, such as opportunities for listening, speaking, discussing, reading, writing, and following directions. Extended learning activities also enrich language experiences. When selecting fingerplays and planning extended activities with fingerplays, adults should consider the developmental level of the children, the purpose of the fingerplay, the theme or unit of study, and the learning expectation. For presentation, fingerplays should be memorized. Making an illustrated chart to go with the rhyme can enhance reading experiences. Recorded fingerplays with accompanying illustrations at a listening station or learning center give children opportunities to participate with the fingerplay independently or in a group experience. This paper presents three fingerplays: "Apples"; "Five Brown Teddy Bears"; and "Butterflies." Each fingerplay includes instructions, the rhyme that accompanies the fingerplay, and several extended learning activities. The suggested activities provide a variety of learning opportunities that embrace field trips, dramatic play, games, motor activities, music, art, books, and stories. (TJQ)

IDENTIFIERS- Child Safety; Developmentally Appropriate Programs

This report presents data collected in a pilot study of 55 day care programs in 14 states by the National Child Care Association. Information was gathered through: (1) day care center self-evaluations; (2) surveys of staff, parents, and children; and (3) on-site visits. The first of the report's two sections presents data from the self-evaluations that deal with center compliance with specific early childhood program standards in regard to administration, developmentally appropriate programming, health, safety, parental involvement, and child care environment. The percentage of centers that responded positively to each question in the self-evaluation survey is reported in this section, which also presents data obtained during on-site observations that pertain to professional development, child care environment, health and safety, and developmentally appropriate programming. Section 2 presents demographic data about the centers concerning funding, children served, auxiliary services, staff, and transportation. The results of the parent and staff surveys are also presented. (MDM)

two high schools have been participating for the past 2 years in restructuring efforts that involve collaboration between public school teachers and university faculty. Project goals include restructuring of the teacher preparation curriculum at West Virginia University (WVU) and the establishment of PDS emphasizing site-based decision making and the development of school visions. Data concerning the project were obtained from meeting minutes of the Cross-Site Steering Committee (CSSC), work session notes, focus-group interviews, individual interviews, and CSSC participants' written responses to open-ended questions. The major issues emerging from the data were: (1) defining what a PDS was and understanding the concept; (2) understanding "who is in charge of the process" and moving toward collaboration; (3) developing relationships among PDS sites and between PDS sites and WVU representatives; and (4) maintaining PDS sites through continued funding, increased participation, and an atmosphere of trust and open communication. The keys to development and maintenance of PDS are the existence of true collaborative activities, thorough planning, consistent communication, a commitment by all those involved, and a belief that the process is important. IDENTIFIERS- \*Community Learning Centers; \*Delaware

This report summarizes discussions held in 1992 at two public forums to examine ways to improve the quality of rural education in Delaware. The forums focused on two goals: building support for quality education and promoting partnerships between families, communities, and schools. Participants discussed expanding schools to become "community learning and service centers," possibly integrating them with social-service agencies as a means of overcoming duplication and fragmentation in services. Problems with this approach include school accessibility, establishing roles and responsibilities, and the lack of existing services. Family and parental involvement was discussed in terms of changing family roles and parental disenfranchisement from the educational system. Participants recommended that schools take a leadership role toward redesigning themselves as learning centers while improving their relationships with social-service agencies. It was also recommended that schools work more closely with parents and communities in decision-making. Other recommendations dealt with the need for professional development and community cooperation. The paper ends with conclusions and reflections of the Delaware Rural Assistance Council, which expressed the view that the ultimate commitment

to raise the standard of living on reservations by expanding opportunities for individuals to function independently of the federal welfare system. A precondition to achieving this goal is the creation of effective tribal governments. The key to tribal economic success lies in taking advantage of all available federal, human, and natural resources. In particular, a comprehensive reform of reservation educational and training systems is necessary to expand self-governance initiatives. Tribes that achieve self-sufficiency will face conflicts between economic development and cultural identity. This paper provides overviews of: (1) American Indian demography; (2) the history of federal Indian policies; (3) reservation economies (employment and welfare); (4) land resources and land use (agriculture, mining, water rights, and environmental issues); (5) federal economic development programs, private investments, and reservation gambling; (6) education (schools, funding, educational attainment, achievement, tribal colleges, and use of new technologies); (7) job training programs; and (8) tribal government, courts, and taxation issues. \*Career Ladders; Change Strategies; \*Educational Change;

\*Educational Improvement; Elementary Secondary Education;

\*Participative Decision Making; Rural Areas; School Districts;

\*School Restructuring; Teacher Evaluation

IDENTIFIERS- Ganado School District AZ; Navajo (Nation); \*Teacher Empowerment

This report describes the Career Ladder Program at Ganado Unified School District 20, which serves approximately 2,000 students in grades K-12 in the Navajo Nation in rural northeastern Arizona. A committee of teachers and principals developed a model that influenced the evolution of the district and school system from conventional management to a quality-school management model. Program components include outcome-based education, teacher reflective practice, performance-based teacher evaluation and compensation, and a teacher evaluation model based on student outcomes. As a result of the program, positive changes have occurred in teacher empowerment, program planning and management, communication, teacher evaluation, student assessment, curriculum alignment, and professional development. A comparison between the career ladder program model and a conventional management model indicates that the career ladder program approach has led to reform at the local level, teacher empowerment, and improvement of student and teacher performance. Graphics illustrate the career ladder program model. (LP)

IDENTIFIERS- Pollutants; Power Plants

Educators are faced with the task of teaching students to be responsible stewards of the world's natural resources. This curriculum focuses on three interrelated topics in this area: energy, economics, and the environment. The goal of this book is to: (1) teach students basic knowledge and concepts about energy, the environment, and economics; (2) teach students effective decision-making skills; and (3) to engage students in meaningful learning activities. The book is divided into five sections. The first section provides a general economic framework for analyzing environmental and energy issues. The framework is composed of three components: the relationships between production, energy and the environment; economic considerations; and methods such as regulations, taxes, subsidies, and incentives that counteract negative external forces influencing the environment. The next four sections present case studies and learning activities to attain the educational goals of the curriculum. The units investigate: solid waste using a case study of the school cafeteria; air pollution using a case study of burning leaves; energy using a case study of power plants; and natural resources stewardship using a case study about drought conditions in California. A list of 49 additional energy, economics, and environmental resources is provided. (MDH)

DESCRIPTORS- \*Astronomy; Concept Formation; Earth Science; Educational Research; Elementary Education; Elementary School Science; Higher Education; Methods Courses; \*Preservice Teacher Education; \*Science Instruction; Science Teachers; Scientific Concepts; Teaching Models

IDENTIFIERS- Earth; Moon; Preservice Teachers; Sun

This study investigated the effect of three specific hands-on teaching strategies on the attainment and alteration of preservice elementary teachers' conceptions about earth-sun-moon relationships. The subjects (n=76) were enrolled in an elementary school science methods course. The descriptive nature of this study explored: (1) the effect of two instructional strategies--those using models versus those not using models--on preservice teachers' abilities to develop models to explain the occurrence of the lunar phases; and (2) whether spatial skills and reasoning levels interact with the ability to develop explanatory models. The results of the study suggest that models do have an effect. The group using only mental models did not show any significant change from pretest to posttest on the retention test. The group using physical models had significant categorical shifts from pretest to posttest. No significant interaction between spatial ability and model development was found. Results also suggest that concrete manipulated models appear to work best for novel situations, but that the type of models used in teaching abstract phenomena should be carefully determined. The paper concludes with several recommendations for further study. Contains 26 references. (PR)

Curriculum Reforms in Post-Secondary Science in Nigeria.

PUB DATE- Apr 93

NOTE- 11p.; Paper presented at the Annual Meeting of the National Association for Research in Science Teaching (Atlanta, GA, April 14-19, 1993).

LANGUAGE- English

EDRS Price- MF01/PC01 Plus Postage.

PUB TYPE- Reports - Research/Technical (143), Speeches, Conference Papers, "Papers Presented at..." (150)

DESCRIPTORS- \*College Science; \*Curriculum Problems; \*Educational Change; Educational Research; Foreign Countries; Higher Education; \*Science Curriculum; \*Science Education History; \*Science Instruction

IDENTIFIERS- \*Nigeria

Since attaining independence in 1960, Nigeria has attempted vigorous promotions of science education involving changes in curricula. This paper examines the impetus, nature, and impact of such curricular reforms at the post-secondary level. The historical context of these issues is provided. Issues necessitating reform and reform trends are discussed and the nature of current reforms is described. Two studies conducted in three Nigerian universities, to ascertain the perceptions of staff and undergraduates concerning the impact of reform are presented. For these studies, a total of 206 undergraduates and 15 lecturers randomly drawn from the Faculties of Science and Education were surveyed. In study 1, 86% of the students and 95% of the lecturers believed the new reform has not brought about appreciable improvement in the quality of instruction. The deplorable state of the laboratories and the lack of

performance existed within and across states and territories; (4) increases in mathematics proficiency between 1990 and 1992 did little to alter the relative standings of the demographic groups; (5) gains were noted in the content areas of numbers and operations, measurement, geometry, data analysis, and algebra, and (6) one-fifth of the 4th graders, two-thirds of the 8th graders, and 90 percent of the 12th graders demonstrated ability in solving two-step problems involving multiplication and division. Chapter 1 contains overall achievement results for the states by grade and by state. Chapter 2 contains results for the nation and states by the demographic groups of race/ethnicity (White, Black, Hispanic, Asian/Pacific Islander, American Indian); gender; type of community (advantaged urban, disadvantaged urban, extreme rural, and other); parents' highest level of education; and type of school (public, Catholic, private). Chapter 3 contains national and state mathematical content areas of estimation, numbers and operations, measurement, geometry, statistics, algebra, and functions. The four appendices, one-third of the document, discuss NAEP's anchor-level results, the guidelines for sample participation, state contextual background factors, and an overview of the procedures used in the 1992 mathematics assessments. IDENTIFIERS- \*Hands on Science

This paper presents the results of a comparison of the effects of gender on fourth-grade students' learning in hands-on science. This study is part of a 3-year classroom based project of hands-on science in 6 urban and 2 suburban classrooms (n=171). Half of the teachers used a supported-inquiry approach, and half used activity-based science to teach a hands-on science unit on electricity over a 6 week period, each completing 12 learning experiences. Both approaches engaged students in hands-on exploration. Teachers participated in a 1-day training session, followed by two after-school coaching sessions. A written electricity test was used as a pre and posttest. A diagram analysis exam was used as a posttest only (both instruments are in the appendix). There were no gender effects on the pretest, posttests, and assessment modality. (Contains 15 references.) (PR)

Objectives; \*Educational Research; Elementary Secondary  
Education; Foreign Countries; International Relations; \*Policy  
Formation; \*Public Policy; Research Needs

IDENTIFIERS- \*European Community

This report considers the character of youth policies, youth  
research, and other aspects of youth in the member states of  
the European Community (EC). The goal is to provide a useful  
basis for further Community thinking on youth matters. Section  
1 of the report depicts central aspects of youth across the EC.  
The aim is to demonstrate how young people's lives are framed  
by the social, economic, political, and cultural contexts in  
which children grow up. Sections 2 and 3 of the report examine  
the nature and direction of research concerning youth in the EC  
and offer proposals for change. In section 2, an initial  
working map of the EC's research and policy perspectives  
enables an assessment of the ways in which the EC Commission  
could promote a transnational approach to youth policy and  
research. Section 3 translates the assessment into a set of  
recommendations for EC policy. All of the recommendations seek  
to: (1) respond to themes identified in discussions with  
practitioners, policymakers, and researchers as important for  
the future; (2) take into account the range of experience and  
expertise available across the EC; and (3) develop the basis  
for a transnational tradition for youth research and policy  
in Europe. Nineteen footnotes are included; an appendix and a  
bibliography containing 126 references are attached. (SG)

DESCRIPTORS- \*Citizenship Education; \*Civics; Curriculum Design; \*Curriculum Development; Elementary Secondary Education; \*Geography Instruction; \*History Instruction; \*Social Studies; State Curriculum Guides

IDENTIFIERS- \*North Carolina

This curriculum guide for North Carolina social studies teachers stresses the fact that social studies traditionally has accepted the dominant burden of preparing young people to inherit the right and the responsibility of effective citizenship. It is the single curriculum area whose subject matter is the entirety of human experience. The sequence for

search for excellence in all areas of education. The study attempts to clarify what the arts contribute to education. While it indicates that much more needs to be done, it suggests actions and approaches which can be utilized now so that the singular contributions of the arts to children can be supported. To enter the future citizens will need the power, thinking, creativity, discipline, energy, and unique forms of apprehending and organizing knowledge that the arts offer. Some key findings of the study include: (1) the arts can foster the development of students who are engaged actively in learning; (2) the arts contribute to the development of a creative, committed, and exciting school culture of teachers, students, and parents; (3) the arts play a role in generating a dynamic, coordinated, and cohesive curriculum; (4) the arts can build bridges to the larger community, the broader culture, and other institutions; (5) the arts can humanize the learning environment; and (6) the arts contribute to improved academic performance. The schools and the eight exemplary models identified in this study are examples of excellence, and each of the programs is discussed and related to the key finding of the study. Four significant sets of implications emerged from the study. The first set is concerned with the general contours of an emerging comprehensive arts education model; the second is concerned with the model's connection to excellent education; the third pertains to ways such a model might be implemented more broadly; and the fourth concerns the characteristics of further assessment research that would advance the understanding of the model and its effects. IDENTIFIERS- \*Culture Transmission; \*Navajo (Nation)

This paper describes a microethnographic pilot study describing, analyzing, and interpreting how culture is transmitted and retained in one Navajo public school system. The study is both historically and educationally significant because it presents a portrait of the everyday realities of art teaching and learning in a school system during a period of transition as new teachers were hired, and new programs were developed. The aim of the study was to understand education in this context and to come to know the participants in order to offer a vivid education picture and some sensitive insights. Comparisons suggested that Navajo art education had changed greatly and was centered around the student as a Navajo and an American. Conflicts in the meanings of culture and education existed between the Navajo conception of education as a process of cultural preservation and harmony and the dominant culture emphasis on cultural change. The quality and quantity of art

IDENTIFIERS- British Columbia (Vancouver); \*Workplace Literacy  
The teaching of literacy, primarily to second language learners, in the Vancouver, British Columbia, Municipal Workplace Language Training Program is examined. The program arose out of reports to the city's Equal Employment Opportunity (EEO) program about language difficulties among workers who couldn't pass tests required for promotion or permanent appointment or workers who had difficulty conveying written/oral messages, legal documents, or job orders. EEO's leeway for experimentation allowed for the Workplace Language Training program's learner-centered teaching approach and emphasis on open discussion. The teaching is active, based on an understanding of the importance of extended periods of spoken and written language use, and of the interplay of language learning with the experience of immigration. Students are led to useful attitudes and practices and away from self-restrictive ones. Examples of the classroom learner-centered approach are cited, including some from student writing assignments. This program is viewed as a model on collaboration in workplace literacy because the EEO and the Canadian Union of Public Employees have come together as partners with a shared intention to develop a program that can be made available to other employers and employees. The successes and challenges of the Arlington Education and Employment Program (REEP) Workplace Literacy Project in Virginia are described in this evaluation report. REEP's federal Workplace Literacy Project Consortium is operated as a special project within the Department of Adult, Career and Vocational Education of the Arlington Public Schools. The project offered job-related instruction in English as a Second Language (ESL), literacy, and basic skills to 696 students at various sites, including office buildings, nursing homes, convenience stores, hotels/motels, and hospitals. Participants

and educational experiences, observed information on student performance, self-report data, and test data from standardized patient and National Board scores. These results showed that the New Pathway students preferred a student-directed environment, studied differently, and demonstrated a stronger orientation towards "deep" learning. The students in the new curriculum were more humanistic in orientation, possessed better relational skills, and had superior knowledge of social and behavioral science. In addition they were more challenged, better known to the faculty, and somewhat more anxious. There were no differences in biomedical cognitive performance measures or career choices. Includes appendixes detailing evaluation instruments, giving summary tables of learning and psychosocial behaviors, and listing 25 references. (JB)

IDENTIFIERS- \*University of Arkansas Little Rock

A planning and discussion committee was formed at the University of Arkansas (Little Rock) to evaluate the role that faculty teaching assessment might take in a planned liberal arts teaching excellence project. The committee leader attended an Assessment Strategies Workshop conducted by Trudy Banta at the University of Tennessee. The committee head then shared materials from the workshop with all committee members and other faculty and had a research assistant check the availability of all bibliographical material, about half of which was readily available. The committee met continuously for project planning over the weeks following the workshop in order to prepare the project proposal for liberal arts teaching excellence. Though the committee's proposal for further funding was denied, the discussion committee's work had many beneficial results including increased understanding by faculty participants of assessment and its role in higher education. The committee developed resource materials for assessment and identified library holdings, a draft for a faculty development project was produced and participants are positioned to plan future projects. Appended is a copy of the draft project proposal on faculty development. (JB)

IDENTIFIERS- \*University of South Florida

This report presents findings from a plant survey of the Florida Health Sciences Center at the University of South Florida conducted in April, 1993. It contains recommendations for the educational plants of the university for the period from April, 1993, through June, 1998. The statistics presented are intended to assist the university with the preparation of building programs submitted for review to the Board of Regents and the Office of the Governor. The report contains eight sections. The first section presents an introduction to the educational plant survey that covers the statutory foundations for the survey, the procedural policies, and the cooperative process. The second section presents an overview of the university, its historical perspective and statement of purpose. The remaining six sections contain tables that present data on: (1) the student population, (2) the academic programs and degrees offered by the university, (3) the existing inventory of sites and buildings, (4) the school's plan for housing programs, students, personnel, and services, (5) an analysis of capital outlay finances, and (6) recommendations for educational plants at various campus sites. Factors; Federal Legislation; Foreign Countries; Futures (of Society); Marketing; \*Policy Formation; \*Public Policy; Standards; \*Technological Advancement; Technology Transfer; \*Television  
IDENTIFIERS- Federal Communications Commission; \*High Definition Television; Historical Background

Some of the arguments for and against an industrial policy to invigorate the new High Definition Television (HDTV) industry are reviewed, arguing that the potential impact of an HDTV industry on the U.S. economy has been overstated and that the industry, considered to have great potential for educational and other uses, will cost consumers much more than conventional television while only providing limited benefits. It is further argued that, by setting standards to establish an HDTV industry, the Federal Communications Commission (FCC) may stimulate manufacture of sets by foreign countries that will have negative impacts on the U.S. economy. The history of HDTV development is traced, and probable costs and benefits are outlined. A market for HDTV will not develop unless programming is available. By setting a standard and a mandatory phase-in period, the FCC will guarantee a market and programming, and the industry will no longer be reluctant to produce the receivers and auxiliary equipment needed. It is probable that an industrial policy will cost consumers billions of dollars for a negligible and unsought improvement in their lives with no likely recovery in the American consumer electronics industry. IDENTIFIERS- \*Audiographics; Computer Mediated Communication

The interaction of adult learning styles and the media, methods of instruction, and group functioning in a distance learning class using audiographics and computer-mediated communication was studied and compared with similar interaction in non-equivalent traditional classes. One graduate class in theory and practice of distance education, taught at a distance with 15 students, and 3 traditional on-campus classes were selected. The interaction of learning style and media, methods of instruction, group functioning, and support was determined by administering a questionnaire developed for the study and subjecting results to an analysis of variance. The major finding is that learning styles do not impact how students interact with media and methods of instruction, but do affect satisfaction with other learners. Class type impacts student satisfaction with media, methods, group satisfaction, goal setting, and group climate. Results of this study cannot be

was described by staff participants. Students found the BBS easy to use and easy to learn. The instructor found it to be a good vehicle for broadcasting information. Help-desk functions were used much less often with the BBS than with the mainframe system, and installation of the system was easy and efficient. While the BBS does not meet every need of the distance education class, it represents an improvement over the mainframe system and will serve until an improved method is developed. (SLD)

DESCRIPTORS- Administrators; Cataloging; Churches; Classification; Guidelines; \*Institutional Libraries; Library Administration; Library Collection Development; Library Personnel; Library Planning; Library Services; \*Library Standards; Religious Cultural Groups; \*Religious Organizations; User Needs (Information)

IDENTIFIERS- \*Church Libraries; Standard Setting; \*Synagogue Libraries

This outline of standards is designed for administrators and committees concerned with libraries for religious congregations. The standards were developed based on the understanding that the church or synagogue library is a special library that serves the institution in which it is housed and which is supplemental to other libraries in the area, providing materials related to the teachings and programs of its faith. Standards are presented as goals to work toward in organizing and developing congregational libraries. The standards begin by establishing the need for a policy statement and providing a sample statement. Other areas discussed include: (1) physical requirements; (2) administration and operation; (3) personnel qualifications and responsibilities; (4) finances; (5) selection of materials; (6) cataloging and classification; (7) public relations; and (8) a check list for long-range planning. An appendix contains sample policy statements, a sample materials selection policy, and sample by-laws for a library committee. (SLD)

IDENTIFIERS- \*Nebraska

Designed to assist the Nebraska Coordinating Commission for Postsecondary Education (NCCPE) in the development of a statewide policy for transfer of credit from two- and four-year postsecondary institutions and a smooth transition from secondary to postsecondary learning, this report describes articulation agreements and cooperative programs in place at the state's colleges and universities. The document begins with a two-page status report on articulation in Nebraska, highlighting the role of the state's community colleges in providing affordable entry-level postsecondary education. The bulk of the report consists of brief descriptions of agreements relating to articulation or cooperative programming in place at Nebraska postsecondary institutions. Institutions are categorized by the six divisions in Nebraska higher education (i.e., community colleges, state colleges, the University of Nebraska system, independent colleges and universities, federally supported institutions, and proprietary institutions), and for each, the nature of the arrangement and the participating institutions are provided. Three appendixes are included, of which the first discusses goals and funding for Tech Prep programs in Nebraska, designed to prepare secondary students for technologically advanced careers by course sequences and experience from the secondary to postsecondary levels; the second describes Tech Prep and other cooperative ventures between community colleges and secondary schools; and the third provides the articulation agreement of the Nebraska Association of Collegiate Registrars and Admissions Officers. Techniques; Community Colleges; \*Discipline; Discipline Policy;

Discipline Problems; Educational Theories; Interpersonal

Relationship; \*School Holding Power; Teacher Effectiveness;

\*Teacher Student Relationship; Teaching Styles; Two Year

Colleges; Two Year College Students

This guidebook recommends methods for teachers to use to improve

teacher-student interaction in the classroom, as a means of

increasing student retention. Chapter I introduces eight major

systems of classroom management which teachers may use as their

values and the classroom situation dictate: "Behavior

Modification," "Reality Therapy," "Discipline Without Tears,"

"Teacher Effectiveness Training," "Transactional Analysis,"

"Social Literacy," "Discipline and Group Management," and

"Mastery Learning." In chapter II, typologies of student

behavior are traced to needs for security (reflected in the

behavior of onlookers, untouchables, seekers, and

perfectionists), caring (performers, leaders, developers, and

becomers), and belonging (loyalists and operators). Contracts

suitable to the 10 types of student behavior are included.

Chapter III provides information about interaction patterns and

"games" that students often play to gain attention and social

position, to relieve boredom, to test the system, to combat

restrictions, and to express frustrations. Chapter IV presents

a "Survival Kit for Teachers," combining a list of behaviors

and options for coping with them. A 28-item bibliography, and

appendixes containing case studies, an attitude survey, and a

status of discipline scale are included. (MAB)

Cooperation; Program Descriptions; \*School Community  
Relationship; Volunteers

IDENTIFIERS- \*Blalock FIRST

Blalock FIRST (Fund for the Improvement and Reform of Schools and Teaching) is a 3-year, federally funded intervention program designed to increase school attendance, student achievement and self-esteem, and parent and community involvement in school activities among low-income housing project residents. As a way of easing strained parent-school relations, a Parent Center was established in the program's pilot year. Over the school year, 61% of the school's families used the center, which is a spacious area within the adjacent elementary school with living and dining room furnishings. The center serves as a vehicle to facilitate parents' involvement in their children's education as well as communication and trust among parents, project staff, and school personnel. Parents share their concerns and offer suggestions on improving the program. One activity initiated by the parents involved a dance class and a weekly practice session staffed by parent volunteers. The job of acting as assistant dance instructors provided parents with experience in planning, public speaking, coordinating events, keeping records, and otherwise participating in an activity in which they were personally invested. In follow-up interviews, parents expressed their satisfaction, their sense of accomplishment, and constructive ideas on similar undertakings. During the year, parents completed several projects and saw themselves as successful change agents. Several parents have taken on increased responsibility within the school. (AC)

IDENTIFIERS- \*Vulnerability

This report on the state of children in the United States begins with a call to action that points out the destructive effects of poverty, violence, and drug use on America's children while outlining 10 needed steps that should be followed to help

using Strom's Parent as a Teacher Inventory. Hierarchical regressions were used to determine whether parent and provider differences remained significant predictors of child behavior after controlling for the quality of care. Results indicated that most of the child behaviors could not be predicted from parent and provider continuity. While parent and provider continuity significantly contributed to the prediction of some child behaviors, even in these cases it accounted for only a small percentage of the explained variance. Continuity of adult approval seemed to be more important than continuity in active engagement or continuity in the use of positive discipline techniques. (MM)

the education of young adolescents and lists 20 components of exemplary middle schools. Section 3 discusses the major factors to be considered when developing an evaluation plan, and section 4 describes and provides guidelines for evaluation techniques, including surveys and questionnaires, observations, interviews, self-checklists, and shadow studies of representative students' activities. Next, steps for carrying out customized evaluation plans are described in section 5, including: distributing information, organizing a committee, revisiting targeted program components, determining the major purposes of the evaluation, reviewing available evaluation techniques, selecting and training individuals to implement the plan, compiling data, interpreting findings, organizing the information, and determining ways to use results for school improvement. The sixth section presents a case study outlining the goals and techniques of an evaluation conducted at a midwestern middle school, while section 7 describes the use of technology in the case study evaluation. Finally, sections 8 and 9 provide, respectively, tips and samples for writing the evaluation report, and a discussion of effective use of the results. The guide concludes with a "sampler" of evaluation instruments for interdisciplinary teams, the advisory program, classroom instruction, students, faculty, administrators, parents, and support staff. Advisers; Intermediate Grades; Junior High Schools; \*Middle

Schools; Parent Role; Program Design; \*Program Implementation;

School Counselors; Student Needs; Teacher Role; Teacher Student Relationship

In recognition of the importance of effective advisory programs at the middle school level, this monograph provides specific suggestions for organizing and sustaining a teacher advisory program and presents sample activities to assist program implementation. Following introductory remarks, the first section reviews aspects of early adolescent development which make an effective advisory program essential, while the second section suggests key elements of programs at this level, including work with students' physical, moral, social/emotional, and career development. Section 3 examines the roles of advisors, counselors, administrators, community members, and students in the whole advisory endeavor, while section 4 reviews important characteristics of advisors. The fifth section provides specific suggestions for developing advisory skills, including asking open instead of closed questions, restating student comments to elicit more information, and using silence. The next two sections describe and suggest sources for successful activities that build relationships, including dealing with personal concerns of students, assisting with instructional difficulties, helping students with school regulations and procedures, and exploring career options. Administrative considerations are discussed in

IDENTIFIERS- Medicaid

Millions of American children and youth, especially low-income  
and minority children, lack health insurance and access to  
appropriate health care services. This publication addresses  
several major public policy topics related to improving  
children's health, and is designed to serve as a resource for  
policymakers who want to improve access to quality health care  
services for children. Each of the publication's six sections  
covers a specific topic and highlights existing state programs  
to illustrate a variety of approaches to common issues. The  
first section focuses on the millions of American children  
without health insurance coverage, and the second section looks  
at ways to bring Medicaid services to more eligible children.  
Special health care needs, such as chronic illness or severe  
impairment, are discussed in the third section. The fourth  
section examines the reasons for, and ways to improve, poor  
immunization rates in the United States. Basic adolescent  
health care services and services relating to sexual activity,  
substance abuse, accidents, and violence are covered in the  
fifth section. The last section highlights three health care  
issues: access to care by minorities, early intervention for  
high-risk families, and emergency medical services for  
children. Sixty-seven notes, a glossary of abbreviations, and a  
list of organizations that can supply further information are  
included. An annotated bibliography cites 31 references. (TJQ)

IDENTIFIERS- Canton Galva Unified School District KS

This document provides information about two closely related innovative programs in a small rural school district. The Home-School Specialist program coordinates resources to meet the personal, social, emotional, and academic needs of students, while the Student Connection Program, coordinated by the Home-School Specialist, involves senior high school students serving as role models for at-risk elementary students. The Home-School Specialist is a licensed master-level social worker who, as a student advocate, works with students, parents, faculty, and outside agencies to identify students' special needs and provide direct services to students and parents. Services include home visits; counseling; parent education classes; communication between home, school, and other agencies; study skills group; social assessments; and classroom presentations. In addition, the Home-School Specialist coordinates and implements programs for both parents and students. Included is a detailed job description for the home-school specialist and a performance evaluation form. The Student Connection Program, one of several programs resulting from the creation of the Home-School Specialist position, recruits senior high school students to serve as advisors for the Home-School Specialist, and to work as positive role models for elementary students who have been identified as at-risk. The primary objectives of this program are to increase the self-esteem and academic achievement levels of the students involved. This document includes interview questions for student applicants to the program and other forms used for program implementation and evaluation. (LP)

DESCRIPTORS- \*English Instruction; \*High Risk Students; High Schools; High School Students; \*Integrated Activities; Personal Narratives; \*Reading Instruction; Rural Schools; \*Small Schools; Teaching Experience; Teaching Methods; \*Writing Instruction

As in urban schools, at-risk students in rural schools may be unmotivated, lack purpose for learning, have special learning problems, or come from dysfunctional families. In this paper, an experienced teacher in a small rural Oklahoma high school describes her efforts to demonstrate that at-risk students would improve in all language areas as a result of intensive work in English, using an integrated approach to language arts. Her 20 students (including special education mainstreamed, transient, limited-English-speaking, and unmotivated students) had scored in the lower 50 percent on standardized tests. Instructional methods were based on the idea that, despite special programs, secondary students do not become better readers or writers, because they lack intensive reading practice, the background knowledge and general information that enables comprehension, writing experience and practice, and the vocabulary needed in various subjects. Elements of the approach included study skills; structure and self-discipline; a rigorous vocabulary program (including etymology); handwriting instruction; speed reading; thematic units to improve comprehension; local history; instruction in grammar and the conventions of written language as prompted by need during in-class writing assignments; and the integration of writing, speaking, and listening in every assignment. At the end of the year, students had made significant growth as measured by standardized test scores and evident improvement in self-esteem. (SV)

IDENTIFIERS- Alaska

This proceedings describes a conference organized by the Alaska State Department of Education and the Alaska Association for Bilingual Education. The theme of the conference emphasized the common foundation of story telling across all cultures as a way to impart learning to younger generations. A focus on language learning strategies and gender equity concerns were interwoven throughout the sessions. Over 800 educators, parents, students,

which students investigate soil science and study the social impact of soil by examining the history of land use by local Native Americans. Unit 2 contains 10 activities in which students examine soil erosion and soil conservation. Unit 3 contains six activities that examine six issues in soil conservation. Each activity is accompanied by a corresponding ditto master for student handouts and contains background information, a list of objectives, and a list of needed supplies. A list of 19 additional resources arranged by unit is provided. Four transparencies illustrating a soil ecosystem, a soil profile, a soil map, and a land use planning map for use in Units 1 and 2 are included.

IDENTIFIERS- \*Collis Romberg Mathematical Prob Solv Prof; SOLO Taxonomy

Problem solving has become a focus of mathematics programs in Australia in recent years, necessitating the assessment of students' problem-solving abilities. This manual provides a problem-solving assessment and teaching resource package containing four elements: (1) profiles assessment items; (2) profiles diagnostic forms for recording individual and group information; (3) guidelines for using profiles for diagnostic assessment; and (4) suggestions for further teaching based on the student's current level of understanding. Two forms of the instrument measure the problem-solving abilities of Juniors (9-13 years) and Seniors (13-17 years) on the topics of algebra, chance and data, measurement, number, and space. Instructions are given for administering both versions of the instrument and for completing and interpreting an individual diagnostic profile. Suggestions for future learning activities are provided according to the student's SOLO level (unistructural, multistructural, relational, or extended abstract) as determined in the profile. A lengthy section is devoted to explaining the underlying theory of the SOLO Taxonomy and describing the development of the instrument. Separate documents provide the Profile A and Profile B forms of the instrument that can be used for pre- and posttest measures. Contains 32 references. (MDH)

DESCRIPTORS- College Science; Higher Education; High Schools; \*High School Students; Physics; \*Science Education; \*Science Laboratories; Science Projects; \*Scientific Research; Secondary School Science; \*Summer Science Programs

This study was an ethnography of high school students working as apprentices in university solid state physics labs, as part of a summer science program. It was designed to explore the learning potential for high school students in such an environment. It examined the social interactions between scientists and students and how these constrain/support learning. Video-taped key laboratory instructional events and student public presentations of what they were learning in their labs were submitted to an interactional sociolinguistic analysis. Findings focused on important discourse links between presentations and lab activities. Students selected a subset of topics from a range of topics covered in lab instruction. Contextualization cues employed by student and scientist to make sense of Lab talk were modeled in the Presentation. Conceptual understanding in Lab was sometimes represented in Presentation appropriately, sometimes vaguely or inconsistently. The speaker's vagueness was usually not apparent to the audience of a Presentation. A learning model for high school students in research labs is proposed based on the findings. The characterization of students learning in university research labs lays a foundation for a match between doing science in such research labs and doing science in school labs. (Author)

DESCRIPTORS- Citizenship Education; \*Curriculum Development; \*Educational Objectives; \*Educational Research; Elementary Secondary Education; \*Global Approach; \*State Surveys; Student Educational Objectives

IDENTIFIERS- \*Global Education; \*Maine

This study of Maine schools inquires into efforts that have been made to internationalize the curriculum. Specifically, the researchers were interested in how curricular goals and organization contribute to an understanding of global society. The efforts to internationalize the curriculum upon which the researchers focused included the organizational factors: (1) time allotment; (2) teacher involvement; (3) relationship to other subjects or disciplines; and (4) scope of focus on other countries/themes. Five widely accepted goals of global education also guided the research: (1) to learn about the culture and customs of other countries; (2) to address global problems; (3) to compare the similarities and differences the world's peoples share; (4) to analyze international organizations and national, state, and city governments; and (5) to focus on the interrelatedness of human beings. The frequency and range of foreign languages included in the

review of literature provides an overview of what researchers in education, anthropology, psychology, and art education have found most significant regarding visual thinking. The issue can best be explored from a cross-cultural and cross-disciplinary perspective. The power of art and community to present symbols and metaphor is explored from a philosophical and biological viewpoint. Research suggests that shapings are the key to understanding child art, and that the human brain spontaneously comprehends visual stimuli. Differences between scientific and artistic approaches to qualitative research are enumerated. Photography provides a means of gaining insight into material culture and the relationships reflected by that culture. An exploration of visual thinking in three different cultures through a qualitative research methodology is proposed. Preschoolers and adult artists from Navaho, Pueblo, and Anglo cultures would be observed, interviewed, and photographed for a year. The research project would seek to discover how each creator arrives at individual meaning within the cultural context. (Contains 22 references.) (BK)

This document summarizes the activities of REACH, the Rural Education Alliance for Collaborative Humanities. REACH is an effort to strengthen rural education in South Carolina through writing and the study of local history and culture. Among REACH projects are the REACH School Programs, fostering student created research on the history and lifestyles of the state's communities. The South Carolina Network for Educational Telecomputing links teachers, students, scholars, and others into an interactive learning community. South Carolina's Cultural Memory, another REACH campaign, is a summer teacher development institute series focusing on South Carolina's cultures. REACH's South Carolina Curriculum Congress is a professional development program for teachers, college faculty, state agencies, business, and parents. South Carolina Cross-Age Tutoring enables students to learn by having them teach. Writing and Performing Across Cultures uses improvisation and drama to motivate students and improve writing. Writing for the Public involves students in collecting, analyzing, and rewriting public documents. The report includes sections on "Accomplishments and Primary Areas of Impact," collections of exhibits relating to ongoing projects, and bylaws and other materials concerning the Curriculum Congress. A basic evaluation packet for the project, "Transforming Stories for Many Voices," includes a summary of Project REACH, descriptions of individual projects, a basic assessment model, and implementation strategies. SO 023 093

social studies described in this handbook defines in general terms the subject matter to be emphasized in social studies at each grade. The general description is intended to guide local curriculum coordinators as they select specific content for each level and course. Within these general guidelines, teachers and curriculum coordinators have flexibility to select topics and areas of study for their students. The recommended organizational pattern is both sequential and developmental. Introductions to the primary, elementary, middle level, and secondary social studies programs as well as the introductions for specific grade levels outline content and skills. Specific goals and objectives further delineate the social studies program at each level. Skill goals include: (1) acquiring information from a variety of sources; (2) using information for problem solving, decision making, and planning; (3) demonstrating skill in self-management and social participation; and (4) participating effectively in civic affairs. Methods and lesson plans for teaching these skills are included for primary, elementary, middle level, secondary, and elective courses. The lessons range from the beginning level of kindergarten children's study of themselves and their families, through the secondary electives of psychology, sociology, law and justice, economics, and government. DESCRIPTORS- Citizenship Education; Educational History;

Elementary Secondary Education; \*Ethical Instruction; \*Moral Development; \*Moral Values; School Community Relationship

IDENTIFIERS- \*Integrated Character Education

The Integrated Character Education model recognizes both the affective and cognitive factors involved in educating the whole child and ultimately the responsible adult. The basic question is how to transmit the values of a common heritage from one generation to the next, while supporting the personal development of youth. The goals of Integrated Character Education are to fulfill personal development goals such as physical and psychological health, positive self-concept, interpersonal skills, and responsibility and caring, and social goals such as upholding the social system, belief systems, and intellectual traditions and preserving the physical environment. The criteria that such a program must meet take the following form: (1) character develops through responsible action, so the curriculum must allow students to confront meaningful questions, and become involved in activities and actions to implement their solutions; (2) character develops through interaction so the curriculum must focus on interactions with the moral and ethical dimensions of the social, cultural, and ecological environments; (3) character integrates the whole personality so school should provide ample activities for the development of a strong sense of identity; and (4) character involves consistent patterns of action so curriculum should help students commit themselves to a set of positive values and to act on them consistently. Two key principles for implementing Integrated Character Education are the recognition of character education as part of every subject and the community and school as partners. Other principles

teachers have improved greatly. Even Anglo teachers adopted some Navajo teaching strategies such as being patient, flexible, gentle, and offering more individual technical and perceptual guidance, to relax and exchange good natured teasing. The Navajo word for teaching is showing. The culture teachers showed more than just technique. They shared ethical values like persistence, self-esteem, sharing, and the aesthetics of beauty. They were more repetitive in teaching and used more personal story telling, an appropriate art history method to adopt. (DK)

Countries; \*Global Approach; Instructional Materials;  
International Relations; Learning Activities; Living Standards;  
Social Studies; \*Waste Disposal; \*World Problems

IDENTIFIERS- \*Consumers; \*Consumption

This material asks social studies students in Canada to recognize the implications of the lifestyles of citizens in developed countries, and the power that consumers have to create change for a better world, to be agents of positive development. Development is seen as a four faceted process. This model implies that development is an approach to change rather than a move to a certain standard of living. Positive development involves: (1) awareness of interconnectedness and interdependence in the global community, (2) awareness of cultural, social, and environmental costs of economic growth, (3) equitable distribution of global wealth and decision making, and (4) empowerment of individuals and communities to make socially just choices and to take responsibility for their choices. Economic growth and consumerism are interconnected in that social and economic systems are built on consumerism. The consumption of goods helps drive the economy. Consumerism and economic growth have an enormous impact on the world, yet seldom are questioned by society. By using power as consumers wisely people can take action for positive development both locally and globally. Environmental, economic, and human costs are explored, as are advertising, and waste management. A student activity for role play helps students to investigate the decision making and policy aspects of community waste management. Additional activities and a list of available resources are included. (DK)

A Statement of Policy.

PUB DATE- 93

NOTE- 6p.

LANGUAGE- English

EDRS Price- MF01/PC01 Plus Postage.

Assumptions underlying literacy, nationalism, assessment, and the links among them are questioned, and approaches to alternative assessment procedures are considered. Arguments about the formation and reproduction of the nation-state proposed by scholars such as Gellner and Anderson are examined and their relationship to theories about literacy are suggested. Two further sets of literacy relations are then described: the relationship between literacy and pedagogy, and the relationship between literacy and orality. It is proposed that the question "Why assess?" can be answered in terms of the analysis of the broader issues involved in the literacy and nationalism debate. The question "How to assess?" is integrally linked to the association between literacy and pedagogy. Finally, the question "What to assess?" depends upon answers to the questions raised by new conceptualizations of the link between orality and literacy. Contains 48 references. DESCRIPTORS- \*Adult Students; Beginning Reading; Curriculum Guides; \*English (Second Language); Grammar; \*Literacy Education; Oral Language; Reading Instruction; Student Centered Curriculum; Student Experience; \*Teaching Guides; Vocabulary Development; Writing Instruction

A teacher's manual is presented for "The Working Experience," a series of three texts for English-as-a-Second-Language (ESL) students. The series builds on oral skills to develop reading and writing ability while still expanding oral English-language proficiency. Because one of the basic principles underlying the series is the idea that students learn best when the content relates to their daily lives, the words and concepts introduced have immediate importance. The readings and exercises allow students to share learning experiences in a flexible, multilevel format. The series uses as its basic text stories told by other adult ESL students. The three student texts (Books 1, 2, and 3) that comprise "The Working Experience" contain increasingly difficult readings and exercises that focus on conversation skills, grammatical structure, and vocabulary development. Each lesson ends with an activity to encourage open-ended discussion and written expression. The teacher's manual includes an overview of the series, guidelines for using the language experience and for facilitating reading, and suggestions for teaching each lesson and for using the series in multilevel classrooms. Separate guidelines are provided for Books, 1, 2, and 3. (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

IDENTIFIERS- \*California

In response to state legislation and a statewide strategic plan that included a recommendation for quality standards and accountability defined as measurable goals and conditions, model standards for California English-as-a-Second-Language (ESL) adult education programs were established. This document describes general standards, defines language proficiency level, and identifies possible tests for measuring the language proficiency of adults in the California ESL programs. The language proficiency levels are sequenced from ESL beginning literacy through advanced-high. The descriptions included in the ESL model standards reflect current thinking about developmental stages in second-language acquisition and the nature of communicative competence. They distinguish different levels of language proficiency based on content, language functions, and language forms as well as listening, speaking, reading, and writing skills. The contents of this guide are as follows: (1) general standards (program, curricular, instructional, and standards for student evaluation); (2) levels of language proficiency (descriptions of proficiency levels, descriptions of course content, and sample lessons); and (3) ESL testing (general standards, testing materials, selected references). Appended are additional information on levels of language proficiency, general nature of instruction

also had access to a technology-based learning center. Employees attended 1 or 2 cycles of 60-hour English and literacy instruction. Innovative features of the REEP project include the following: joint recruiting efforts by industry and REEP; consortium approach; range of industries served; combination of on-site classes and learning center involvement; and cable television usage. Retention rates ranged from 100 percent in hospitals to 77 percent in nursing homes; pre- and post-test progress reports indicated that both supervisors and students considered the program a success. REEP strengths include strong partnerships, use of effective feedback, and design of a comprehensive curriculum framework. Ongoing challenges perceived by industry include on-going problems with foreign-born employees (e.g., failure to ask for clarification, inadequate understanding of forms/schedules and safety procedures, and lack of preparation for the workplace of the future) and the need for strong industry involvement. Learner and industry responses to the project are summarized. (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

PUB TYPE- Guides/Methods/Techniques (For Practitioners) -

Classroom Use - Instructional Materials (For Learners)

(051), Guides/Methods/Techniques (For Practitioners) - Classroom

Use - Teaching Guides (For Teacher) (052)

DESCRIPTORS- Adult Learning; \*Communication Skills; \*English

(Second Language); \*Games; Job Skills; Language Skills;

\*Learning Activities; \*Literacy Education

IDENTIFIERS- Mainstream English Language Training Project;

\*Workplace Literacy

Techniques for effective communication are presented in a work style handbook for use by adults with little or no English language skills. Minibook A is composed of some learning activities in the form of games that provide language drill and encourage group rapport. They accommodate students' diverse learning styles and provide flexibility in multi-level classes. The minibook was field-tested with more than 150 adult non-native speakers, aged 18 to 63, in a series of seminars and workshops for job skills and personal effectiveness training. Contents include: (1) "Getting To Know You, Getting To Know All about You" (interview and social language); (2) Feedback for Fun and Profit (active listening, listen/report/do); (3) Please Show Me: A TPR Task-Shadowing Game; (4) Summary of Mainstream English Language Training (MELT) Competencies; and (5) tear-out masters for photocopying. Each chapter is organized with explanations and directions for the teacher, followed by game pages for use with students. Game pages are identified for beginning, intermediate, and advanced levels. PUB TYPE- Reports - Descriptive (Program/Project Descriptions)  
(141)

DESCRIPTORS- Advisory Committees; Alternative Teacher Certification; \*Career Change; \*Early Retirement; Elementary Secondary Education; Feasibility Studies; \*Government Employees; Higher Education; \*Military Personnel; Outreach Programs; Teacher Education Programs; \*Teacher Recruitment; Teacher Shortage

A study tested the feasibility of recruiting career switchers, early leavers and retirees from government and military service to teaching. The study also documented the need for a National Center for Transition to Teaching (NCTTT). The effort established a National Board of Advisors consisting of 17 high-level military, government, and university educators. Exploratory outreach consisted of advertising, direct mail, a recruitment meeting, and collateral activities. Project findings indicated that certain conventional recruitment methods can attract interest. Advertising in a Washington-area chain of military weeklies generated 143 inquiries and a poster campaign to 450 government and military offices resulted in 3 inquiries a week. In addition educators who had developed similar programs offered encouragement and specific cautions. Finally, high-level military and government officials endorsed efforts to enable the transition of their personnel into teaching careers. In addition the study revealed that there are programs for these recruits but that they tend to operate in isolation from each other. The study findings also suggested that institutionalization of a NCTTT should be decoupled from recruitment and that such a Center should focus more on research, placement, information clearinghouse activities, and general service provision. An appendix lists members of the National Advisory Board. (JB)

A Study of Faculty Needs in Texas, 1991-2008. A Report to the Texas Higher Education Coordinating Board by the Faculty Shortages Advisory Committee.

PUB DATE- Jan 92

NOTE- 110p.

LANGUAGE- English

EDRS Price- MF01/PC05 Plus Postage.

PUB TYPE- Reports - General (140), Numerical/Quantitative Data  
(110)

DESCRIPTORS- \*College Faculty; Community Colleges; Comparative Analysis; Departments; Enrollment Trends; Higher Education; Long Range Planning; \*Minority Group Teachers; Postsecondary Education; Public Colleges; Statistical Data; \*Teacher Recruitment; \*Teacher Shortage; \*Teacher Supply and Demand; \*Trend Analysis

IDENTIFIERS- \*Texas

This report predicts that, during the next two decades, Texas colleges and universities will have increasing enrollments with larger increases in minority students. Quantitative and anecdotal evidence indicates faculty hiring will become more difficult in this and the next decade if current trends continue, particularly in minority faculty where there already exists a shortage of African American and Hispanic college faculty. This report examines the faculty shortage needs of Texas in the public senior universities and junior colleges and makes a determination of how the state will be affected by the projected nationwide shortages. The report provides recommended approaches to alleviating the expected problems which focus on:

Agree On What's Happened to U.S. Living Standards? Income and Wealth Trends Among the Middle Class" (Richard C. Michel); "Income Distribution of New Jersey Families with Children in College, 1977-1986: Data from State Income Tax Returns" (Lutz K. Berkner); "The NASFAA Rapid Survey Network" (Karl Knapp); "Outreach Programs in Texas" (Jane Caldwell); "Guaranteed Student Loan Indebtedness: Its Influence on Undergraduate Student Decision-Making At Virginia Commonwealth University" (Alice E. Presson); "Development of the Pell Grant Pre-Established Criteria" (Pedro J. Saavedra); "Corporate Support for Scholarships: A Tale of Two Cities" (Joseph M. Cronin); "Report on Early Awareness" (Ernest T. Freeman); "The Effectiveness of Early Awareness Program Information" (Jerry S. Davis); "National Service and Student Aid" (Patricia Smith); "Further Exploration of the Distribution of Higher Education Subsidies" (John B. IDENTIFIERS- Higher Education General Information Survey; Integrated Postsecondary Education Data System

Using two large national survey databases, a study was done of trends in degrees conferred by colleges and universities. The data were gathered from: (1) the Integrated Postsecondary Education Data System (IPEDS) 1986-87 through 1990-91 "Completions" surveys, and the 1990 and 1991 "Consolidated" surveys; and (2) the Higher Education General Information Survey (HEGIS) 1984-85 survey of "Degrees and Other Formal Awards Conferred in Institutions of Higher Education." These surveys collected information on degrees conferred by level of award (associate's, bachelor's, master's, doctor's, first-professional; race, ethnicity, and sex of recipients; and major field of study. The results are displayed in eight tables.

Methodology; Student Attitudes; Student Motivation  
IDENTIFIERS- \*Kuring gai College of Advanced Educ (Australia)

This study uses an adaptation of the Illuminative Evaluation method in examining experiential learning through a case study of its application in practical legal training. The study's prime focus is on the experiential learning method known as the "current matter" process as conducted by the College of Law, Sydney (Australia). This teaching method is described, then examined as a method of simulating actual occurrences within legal practice. The study's report also identifies problems associated with a holistic approach to research and provides insight into the nature of postgraduate law students in New South Wales and their adaptation to experiential learning in relation to legal matters. Finally, the study offers an effective working definition of experiential learning. Besides an evaluation of the appropriateness of experiential learning within this academic course, evaluation results are also presented in terms of student motivation; their attitudes to employment, competence, and learning; and improvements in student learning. Appendices include selected materials involved in the implementation of the research project including the student entry profile questionnaire, examples of students' tests and individual student results, and a sample of the research questionnaire. Contains 81 references. (GLR)

PUB TYPE- Numerical/Quantitative Data (110), Reports - Evaluative/Feasibility (142)

DESCRIPTORS- College Faculty; Comparative Analysis; \*Degrees (Academic); Educational Facilities; \*Educational Finance; \*Enrollment; Financial Support; Higher Education; Income; National Surveys; Postsecondary Education; \*Private Colleges; \*Public Colleges; Statistical Data; Statistical Surveys; \*Student Financial Aid

This report represents an updated edition (fiscal years 1989-90 data are combined) of the State Higher Education Profiles (SHEP) report providing statistics and indicators on enrollment, revenues and costs, financial aid, degrees and other formal awards conferred, and faculty compensation for accredited institutions throughout the United States and Puerto Rico. It also indexes each state's statistics to the national average for that statistic and ranks states on selected statistics for the 1990 year. Twelve basic data tables for fiscal year 1989 and 13 tables for fiscal year 1990 are included for each state, the District of Columbia, and the nation. Data are presented in three chapters. Chapter 1 provides national data for 1988-89 and 1989-90 fall enrollment numbers, educational and general revenues and expenditures, degrees conferred, and faculty salaries. Chapters 2 and 3 examine the same data at the state level, with chapter 2 presenting state rankings and chapter 3 providing the state profiles. Appendices supply a glossary of terms, a listing of SHEP institutions by state; the response rates for each of the surveys by control, level of institution, and by state; and a profile section on Puerto Rico. Evaluation Methods; Evaluation Problems; Foreign Countries;  
French; \*Interactive Video; Interviews; Japanese; Political  
Influences; Program Evaluation; Rural Schools; \*Second Language  
Instruction; \*Teaching Methods; Technological Advancement

IDENTIFIERS- \*Australia (Queensland); Stakeholders

Issues emerging from a collaborative evaluation of an interactive  
video teaching trial conducted in Rockhampton (Queensland,  
Australia) are reported. The trial aimed at providing an  
assessment of the feasibility and potential of interactive  
video technology for teaching and learning in a diverse area of  
Australia with a number of small, widely separated schools.  
Data were gathered through semi-structured interviews from  
teachers and students at the five participating schools,  
teachers of Japanese and French who took the lessons,  
administrators, and representatives of education agencies.  
Positive outcomes of the evaluation, which found potential for  
the technology in all areas, include: (1) the opportunity for  
engagement in research; (2) greater variation in approaches to  
evaluation; and (3) the potential application of the technology  
for the evaluators' teaching practices. Issues of concern are  
the political context of the evaluation, the practical  
inconveniences caused by the large number of evaluators, and  
conflicting perceptions of various stakeholders. It appears  
that positive outcomes have outweighed the negative issues at 6  
months after the evaluation. (Contains 9 references.) (SLD)

IDENTIFIERS- Association of Research Libraries

Topics related to research library interlibrary loan staffing and organizational structures were explored through a survey conducted by the Systems and Procedures Exchange Center (SPEC) of the Association of Research Libraries. Data gathered from 82 libraries show a very small increase in the number of full-time equivalents in loan units between 1987 and 1992, with a static number of professionals and a slight increase in paraprofessionals and student employees. Lending operations are shown to be more labor-intensive than are borrowing activities. The use of students and paraprofessionals is high because of the many routine processing duties. Interlibrary loan operations generally tend to be part of the reference department or the circulation/access services department. The variety and complexity of new automated systems mean that training is a continuing requirement in loan operations. If interlibrary lending continues its rapid growth, the research library's ability to meet its clientele's needs will continue to be challenged. In addition to the survey results, information and sample documents for organization charts, and professional, support staff, and student job descriptions are included. A list of five selected readings is also provided. Flyer 187 is included, which summarizes the kit. (SLD)

IDENTIFIERS- \*Association of Research Libraries

Over the years academic libraries have developed various field experience models to supplement traditional library education and provide career development and advancement. To assess the availability of internship, residency, and fellowship programs among its members, the Association of Research Libraries (ARL) conducted a survey of its membership in 1992. The importance of practical learning in a library situation is reflected in the number of well-established graduate internship programs.

IDENTIFIERS- \*ERIC

This is the fifth in a series of annual reports summarizing the activities and accomplishments of the Educational Resources Information Center (ERIC) program, which is funded and managed by the Office of Educational Research and Improvement in the U.S. Department of Education. The eight main sections cover: (1) highlights of the year in the areas of database building, electronic communication, and outreach and user services; (2) an overview of the ERIC system, including the clearinghouses, support components, funding, staffing, and the ERIC database; (3) electronic communication, including network access to the ERIC database, AskERIC (an Internet-based service for K-12 educators), ERIC resources on other online services, and other uses of networks by the ERIC system; (4) database building, including increasing quality acquisitions, expanded coverage, and full-text products; (5) user services, including training sessions to promote ERIC and responding to user needs; (6) publications and outreach; (7) collaborations and professional liaisons with other federally funded programs and ERIC Partners, as well as international activities; and (8) management and operations. Future directions are summarized. Exhibits present an OERI/ERIC organizational chart; staffing and funding for 1992; total number of records for the ERIC database; document acceptance versus rejection, 1988-1992; methods used to contact ERIC components, 1988-1992; analysis of ERIC users, 1988-1992; searches completed by ERIC clearinghouses, 1988-1992; and popular ERIC publications. IDENTIFIERS- Homosexual Literature

In response to the increasing emphasis on issues of diversity, this document addresses the need for bibliographic instruction in classes dealing with issues of gender and sexuality. The document consists of various bibliographies, guides to research, information headlines and services, library special collections and research institutes, electronic discussion groups, and other sources of information concerning the general topic of homosexuality. The document is broken into the following sections: (1) Introduction; (2) Researching Sensitive Topics in the Library; (3) Intellectual Freedom and Academic Freedom in the Library; (4) Defusing Controversies Regarding Homosexuality on Campus; (5) Top-Down Acceptance of Homosexuality on Campus; (6) Research Guides and Bibliographies on Homosexuality; (7) Professional Literature Regarding Homosexuality and Libraries; (8) National Information and

Proposal Writing; School Business Relationship; Shared Resources and Services; Two Year Colleges; Vocational Education IDENTIFIERS- California; \*Center for Consumer Home Economics Education CA

In an effort to improve community college home economics programs, the Chancellor's Office of the California Community Colleges established the Center for Consumer Home Economics Education (CCHEE) to provide support services for colleges receiving home economics MiniGrants, to establish linkages between colleges and the Chancellor's Office, and to offer assistance in bidding for MiniGrants and other funds. This report describes the goals and activities of the CCHEE project, and provides sample documents used in the project. Following introductory remarks and a project chronology, the report discusses the main objectives of the CCHEE project and provides a comparative list of anticipated and actual project outcomes. Next, the major activities undertaken during the project are discussed, focusing on pre-funding actions and post-funding actions related to project management, staffing and equipment of the Center office, processing and reporting MiniGrants, working with the InfoNet electronic network, and the development of program directories and a handbook. Finally, descriptions are provided of project dissemination and evaluation efforts. Appendixes making up half the document provide lists of project advisory committee personnel, MiniGrant application forms with instructions, a list of colleges funded from 1990 to 1994 and amounts funded in 1991-92, CCHEE facilitator guidelines for providing workshops and subject area discussion sessions, sample documentation from a workshop on InfoNet, a sample evaluation of a grant writing session, and a report on a workshop for project directors. California State Universities' Business Education Policies: Their Cost to Community College Students and the State.

PUB DATE- 22 Jun 93

NOTE- 17p.

LANGUAGE- English

EDRS Price- MF01/PC01 Plus Postage.

PUB TYPE- Reports - Research/Technical (143)

DESCRIPTORS- Accreditation (Institutions); \*Articulation (Education); \*Business Education; College Transfer Students; Community Colleges; Comparative Analysis; \*Course Content; Higher Education; \*Intercollegiate Cooperation; Program Development; \*State Universities; \*Transfer Policy; Two Year Colleges; Two Year College Students

IDENTIFIERS- California Community Colleges; \*California State University

In April 1992, the American Assembly of Collegiate Schools of Business (AACSB) and the American Association of Community Colleges approved the "Joint Statement on Transfer" (JST), urging two- and four-year institutions to facilitate the transfer of students among institutions. In addition, the AACSB modified accreditation standards to allow as much as 50% of business credit hours to be earned at the lower-division level. In spite of these changes, there has been little effort by the California State University (CSU) system to work with community colleges in implementing the JST recommendations. A number of introductory business courses offered in two-year institutions cannot be used to meet major field requirements, because these same courses are offered in the CSU only as upper-division courses. In addition, CSU campuses are inconsistent in terms of

community college student attendance patterns. To develop a conceptual model of community college student persistence, a study was conducted of the attendance patterns of 510 students attending a southeastern Texas community college during spring semester 1992, using student goal-attainment as the indicator of successful termination. Specifically, the study examined the relationship between goal commitment for five groups of students (i.e., those preparing to transfer, preparing for a new career, retaining current or upgrading skills, attending for personal reasons, and upgrading basic English skills) and the student's perception of gains on the following general educational goals: career preparation; arts; communications skills; mathematics, science, and technology; personal and social development; and perspectives of the world. Perceptions of gains in these six dimensions were measured by the "Estimate of Gains" section of the Community College Student Experiences Questionnaire (CCSEQ). Results indicated that the more strategic a student's goal-commitment (i.e., the longer the student expected to attend college), the more likely that he or she would perceive gains in the six areas. In addition, members of the transfer group were the most satisfied with their college experiences and showed a greater tendency to persist until goal attainment. A literature review, detailed data analyses and tables, implications and recommendations, and an 86-item bibliography are included. (PAA)

PUB TYPE- Reports - Research/Technical (143)

DESCRIPTORS- \*Academic Achievement; \*College Transfer Students; \*Community Colleges; Enrollment Trends; Followup Studies; \*Grade Point Average; Higher Education; Tables (Data); Two Year Colleges; \*Two Year College Students; Universities

IDENTIFIERS- \*Piedmont Virginia Community College; \*Virginia  
Following a legislative mandate that requires public four-year colleges and universities in Virginia to report to community colleges the academic progress of their transfer students, eight senior institutions submitted progress data for 1991-92 to Piedmont Virginia Community College (PVCC). An analysis of those data revealed the following: (1) 306 former PVCC students were enrolled in Virginia public four-year institutions, including 135 (44.1%) PVCC graduates; (2) 55.8% (n=121) of the transfer students continued studying their PVCC major after transfer; (3) the PVCC instructional program with the largest number of transfers was Business Administration, making up 24.2% (n=74) of all transfer students; (4) Liberal Arts (23.9%) and General Studies (12.1%) accounted for the next largest percentages of transfers; (5) 1991-92 PVCC transfers attempted an average of 36 credits at the four-year institutions, completed an average of 34 credits, and earned an average of 81 total credits at all schools attended; (6) the average grade point average (GPA) for the 1991-92 transfers at the four-year schools was 2.813, while the average pre-transfer PVCC GPA was 3.267; and (7) students who transferred before graduating PVCC performed academically about as well as PVCC graduates,

alleviate these problems. The greater part of the report focuses on: (1) health; (2) child care; (3) family income; (4) housing and homelessness; (5) education; (6) youth development; and (7) vulnerable children and families. The concluding sections present 1-page fact sheets on the state of children in each of the 50 states, as well as a compilation of national and urban trends and a subject index. (MDM)

PUB TYPE- Collected Works - Proceedings (021)

DESCRIPTORS- Child Development; Child Health; Cocaine; \*Congenital Impairments; Developmental Disabilities; Drinking; Drug Abuse; Followup Studies; Marijuana; \*Neonates; Neurological Impairments; Physical Development; \*Pregnancy; \*Prenatal Influences; \*Research Methodology; Smoking; \*Substance Abuse; Young Children

IDENTIFIERS- Fetal Alcohol Syndrome; \*Fetal Drug Exposure

This monograph presents the proceedings of the first National Institute on Drug Abuse technical review related to the conduct of controlled studies on prenatal exposure to drugs of abuse. Papers in the monograph are categorized by session. The first session (two papers) focused on the detection and quantification of prenatal drug exposure in infants, including studies of the effects of smoking and of pharmacokinetic correlates of fetal drug exposure. The second session (three papers) explored assessments of pregnancy outcomes, including discussions of the implications of previous research methodologies on future research; definitional problems in cocaine research; and the use of birth defect monitoring programs for assessing the effects of maternal substance abuse. Assessment of the status of the newborn, including studies on neurobehavioral organization, cardiorespiratory functioning, and brain development, was considered in the four papers presented in the third session. The fourth session (three papers) offered a framework for measuring drug-induced physical and behavioral delays and abnormalities, including both clinical and psychophysiological perspectives. The next two sessions (with two and three papers respectively) focused on specific types of behavioral delays and abnormalities, covering cardiac and respiratory control, endocrine function, monoamine systems, behavioral development, nonhuman primate models, learning and cognition, and social and emotional development. The final session focused on tracking drug effects over the lifespan, and includes three papers on research challenges for following exposed infants into childhood, patterns of growth and development in narcotic-exposed children, and the integrity of psychopathology diagnoses across the lifespan. Each session concluded with a discussion paper highlighting study findings, methodological issues, and research problems and needs. (AC)

IDENTIFIERS- \*Developmentally Appropriate Programs; \*Flexible  
Learning

Developmental continuity refers to designing early childhood instruction that provides learning experiences based on children's prior knowledge, follows a natural progression across preschool and the early grades, and allows progress at each child's rate and style of learning. There are many ways of providing developmental continuity, but common to all is the idea that teachers, parents, and administrators work together to provide a continuum of developmentally appropriate educational experiences for children. This book is a resource for teachers who wish to put developmental continuity into practice in their classrooms. The book is organized in six chapters. Chapter 1 discusses the meaning and history of developmental continuity and associated problems and concerns. Chapter 2 serves as a planning guide and highlights some projects already in place. Necessary changes in school and classroom organization, the importance of coordination of schools with preschools, and communication with parents and the community are examined in chapter 3. Chapter 4 covers the creation of meaningful curriculum for developmental continuity, and chapter 5 offers suggestions for structuring the physical, social, emotional, and intellectual environment in which the curriculum will be implemented. Finally, chapter 6 examines evaluation issues and discusses methods for documenting children's progress and achievement. Contains 80 references. (TJQ)

IDENTIFIERS- Education Consolidation Improvement Act Chapter 1; Home Based Programs; Massachusetts; Pittsfield School District MA

The United States Education Department recognizes projects that effectively meet the special needs of educationally deprived students. In 1992, the Pittsfield, Massachusetts, Chapter 1 preschool program earned national validation as an "unusually successful" compensatory education program. The program has served as a statewide model, and has helped hundreds of at-risk children enter school on an equal educational basis with other children for over 20 years. The program has two components. The Parent-Child Home Program (PCHP) for 2- and 3-year-old children is a home-based program that fosters verbal interaction between preschoolers and their parents, thereby supporting children's cognitive growth. Paraprofessionals teach parents to effectively use developmentally appropriate materials and activities with their toddlers. The school-based Four-Year-Old's Program serves as a transition between the PCHP and kindergarten, and consolidates and extends the educational gains the child has made in the PCHP. Activities reinforce or introduce basic readiness skills, and foster social growth and physical development. Other vital elements of Pittsfield's program are: (1) coordination with the regular school program; (2) the provision of feedback through the monitoring of student progress; (3) strong leadership; (4) professional development and training; (5) parent and community involvement; (6) positive school and classroom climates; (7) recognition given to children for positive behavior or performance; and (8) the use of evaluation results for program improvement. social, cultural, economic, and technological change, further complicated by the normal emotional, physical, and intellectual changes of 14- to 18-year-old children. The philosophical bases of high school education, therefore, should be reexamined to provide an environment conducive to positive learning. Schools should place a high priority on the community so that students view school as relevant to the world around them. Specific goals for high schools should include: (1) developing critical as well as cultural literacy; (2) integrating theory and practice in instruction to provide more concrete experiences for students; (3) developing effective language skills, such as speaking, listening, reading, and writing; (4) helping students learn to use technology to learn; (5) helping students develop their abilities and productive thinking strategies; (6) teaching students to work cooperatively and understand the consequences of their actions; and (7) helping students cope with change. To fulfill these goals, schools need to create effective learning environments by making classrooms more student centered and more conducive to risk taking, by meeting students' intellectual needs, and by maximizing the aesthetic potential of students. Schools should also create in students a sense of the community and prepare them for life and work by providing practical and relevant instruction. Local educational authorities should develop a plan which includes information dissemination and assessment processes and a procedure for involving all high school staff in school planning. Contains 50 references. (AC)

EDRS Price- MF01/PC03 Plus Postage.

PUB TYPE- Guides/Methods/Techniques (For Practitioners) - Non-Classroom Use (For Administrative and Support Staff, and for Teachers, Parents, Clergy, etc. in Non-Classroom situations) (055)

DESCRIPTORS- \*Children; \*Child Responsibility; \*Child Role; Early Childhood Education; Elementary Education; Parent Influence; Parent Materials; Parent Role; Parent School Relationship; \*Responsibility

This generously illustrated booklet offers practical suggestions for helping young children appreciate the importance of acting responsibly in their everyday lives, and provides ideas and activities for parents to help encourage responsible behavior in their children. After defining responsible behavior and suggesting how parents can encourage it, the booklet describes activities or situations that parents can do or use to encourage their children to: (1) learn about other people; (2) acquire good manners; (3) be generous; (4) be honest; (5) display courage; (6) deal with bullies; (7) help with household chores; (8) learn the rewards of a job well done; (9) learn about heroic people; (10) face up to mistakes; (11) choose friends wisely; and (12) learn responsible behavior from stories that are read to them, or that they read on their own. The booklet also stresses the importance of parent-teacher and parent-parent cooperation, and provides a bibliography of 290 books, magazines, and other reading material appropriate for young children of various age groups. Designs and drawings appear on every page of the text. (MDM)

Effective Schools Research; Elementary Education; \*Elementary Schools; Elementary School Teachers; Rural Schools; \*Rural Urban Differences; \*School Effectiveness; School Surveys; \*Teacher Attitudes

IDENTIFIERS- Minnesota; \*School Culture

An inventory consisting of 25 Likert-type statements assessed the perceptions of 62 urban and 66 rural Minnesota elementary teachers concerning educational practices that enhance or prohibit success in their schools. Urban teachers were more positive than rural teachers about factors contributing to success in their respective schools, differing significantly on 13 of 25 statements. Successful school practices identified by urban teachers included: (1) time and money for staff development; (2) grade level meetings; (3) support for professional development; (4) use of alternative delivery systems in the classroom; (5) site based management; and (6) an array of parent communication techniques. Rural teachers often commented that they valued being left alone to run their classrooms as they chose. Practices identified by urban teachers as lessening school success appeared to focus on curriculum and time. Most negative school practices identified by rural teachers centered on budgets and consolidation. Other negative rural school practices were related to lack of appropriate communication with parents. Further analysis of written comments indicates that unsuccessful practices identified by urban teachers could be changed with time management improvements, while rural teachers portrayed a feeling of hopelessness. Contains several tables of survey results and 23 references. (KS)

DESCRIPTORS- \*Bilingual Education; Child Advocacy; Cultural Differences; \*Educational Strategies; Elementary Secondary Education; English (Second Language); \*Equal Education; \*Limited English Speaking; \*Mexican American Education; Mexican Americans; Native Language Instruction; Role of Education

IDENTIFIERS- \*Hispanic American Students; \*Language Minorities

This monograph describes implications for public schools of rapidly growing populations of Mexican-Americans and other language minorities and recommends ways to eliminate institutional barriers to equity and excellence in education. It presents current information about such issues as dropout rates, reading levels, and participation in advanced mathematics and science courses. It includes a synthesis of research about current trends, including the growth of this population, changes in immigration patterns, and changes in the segregation of this population. Chapter 1 describes Mexican-Americans and other language-minority groups in terms of levels of educational attainment, cultural and language diversity, and

and community members participated in over 100 workshops, cultural presentations, general sessions, and exhibits. The proceedings provides information on: (1) conference organization, including planning committees and conference supporters; (2) bilingual multicultural education programs in Alaska for 1991-92, listed by school district and including the name of the program coordinator and address; (3) profiles of Akabe award recipients, including educator of the year and administrators recognized for their outstanding work in bilingual education; (4) three featured presentations about story telling and the importance of ethnic, linguistic, and gender diversity; (5) a conference agenda including workshops, presentations, and cultural presentations and brief descriptions of each; (6) a student conference agenda, including workshops and poetry contest winners; and (7) conference presenters and resource persons. DESCRIPTORS- \*Academic Achievement; \*Educational Equity  
(Finance); \*Financial Support; \*High Schools; \*School Size;  
\*Secondary School Curriculum; Small Schools

IDENTIFIERS- \*North Carolina

This paper examines the relationship between school size and funding levels in North Carolina secondary schools. Data included information from 94 secondary schools concerning classes offered, school enrollment and staffing, school size and location, funding levels, and student achievement in eight selected subjects; principal and teacher interviews in selected secondary schools and feeder elementary schools; and supportive data from state and census archives. The results are organized into two sections: the relationships of school size and funding level to depth of curriculum, and variances in student achievement across levels of school size and levels of funding. School size appears to be the most important factor in variety of curriculum and specialized courses, with larger schools providing more course offerings. In addition, funding appears to make a difference when special equipment is needed to offer a course. Regression analyses indicate that funding level was a predictor of student achievement in algebra, biology, chemistry, and geometry, while school size was a predictor of achievement in biology and physics. IDENTIFIERS- Air Quality; Concept Maps; \*Hands on Experience  
In studying the earth's natural resources and the systems  
governing them, students need to understand the  
interrelationships of resources and ecosystems. This curriculum  
program for junior high school students investigates the  
environment as a whole. It is designed to supplement existing  
school curricula in science and social studies by presenting  
activities that draw from students the concepts of  
interdependence, change, adaptation, energy flow, and  
diversity. The curriculum guide contains eight units of study:  
(1) Air Resources; (2) Cultural Resources; (3) Energy  
Resources; (4) Forest Resources; (5) Recreation Resources; (6)  
Water Resources; (7) Wildlife Resources; and (8) an overview  
unit on how the curriculum integrates the management of these  
resources. Each unit consists of an overview and a series of  
factsheets, a concept map, an activities matrix for factsheet  
references, students activities, a curriculum rationale, and a  
glossary of terms. A list of 121 additional Tennessee Valley  
Authority (TVA) selected references, TVA publications,  
curricular and book resources, resource materials, and resource  
organizations is included. (MDH)

\*Secondary School Mathematics; Teaching Methods; Thinking Skills

IDENTIFIERS- \*Netherlands; Subject Content Knowledge

This study, conducted in the Netherlands, examined the effects of  
a problem-solving program on students' problem-solving and  
metacognitive skills. The program consisted of four parts  
involving one or more aspects of problem solving in the content  
areas of proportions, geometry, numbers, and solving equations  
and inequalities. The experimental program was implemented in  
seven classes from three secondary schools, and the control  
group consisted of seven classes from four secondary schools  
taking regular classes on the same subjects. Comparisons on pre-  
and posttest measures for the two groups indicated that  
students in the experimental group made better use of heuristic  
rules and were more reflective than students from the control  
group. A delayed posttest indicated that 3 months after the  
experimental period, the effect of the program had disappeared,  
implying that the positive effect of the program was temporary.  
A 13-page summary in English is included and a list of 161

DESCRIPTORS- \*Conflict Resolution; Elementary Secondary Education; Foreign Countries; Global Approach; Higher Education; \*History; Interviews; \*Peace; \*Values Education; \*War IDENTIFIERS- Brazil; Gandhi (Mahatma); India; Nonviolence; \*Peace Education

As a means of studying ways to help children and young people deal constructively with questions of peace and war, Anima Bose and Zlmarian Jeanne Walker, who have worked to promote peace education in India and Brazil respectively, are interviewed. The influence of Gandhi on the concept of peace in India is emphasized. One cannot teach peace, it must be learned through practice. Peace education must include a form of apprenticeship where students go out into the real world to find out what violence is and what solutions are. Peace education is especially important in this day and time because all of society seems to be overcome by violence, even in entertainment. Peace must not be viewed as "no war." A nation with no war but with injustice, poverty, economic discrimination, and inequity cannot be said to have peace. The teacher is the most responsible person in any peace education course at any level. At the elementary level the examples of parents and teachers and cooperation between them is very important for teaching peace. The interviewees emphasize the lack of materials available to be used in peace education. Peace education should not be taught as a separate subject in elementary school, but included in various subjects. In higher grades it may be emphasized in one particular subject. In secondary school it can be dealt with through the study of international organization, transnational concepts, and the reality of interdependence. (DK)

This monograph describes the preliminary findings of two studies concerning the experiences of low income women who attended college in Massachusetts. The first study, conducted in 1986, examined the combined effects of public assistance and student financial aid upon the lives of women who attended college. A 1990 study explored the assumption that higher education results in higher income levels for women. Results of the research suggest that recipients of Aid to Families with Dependent Children (AFDC) tend to be among the poorest of the older women in college and they tend to take the longest to graduate. Furthermore, a college degree in the liberal arts or a more technical or specialized field can enhance economic opportunity for low income women. The research also suggests that a college education increases satisfaction with work and life in general. Policy conflicts continue to exist with regard to older women in higher education, and further research remains to be undertaken. Eighteen endnotes are included and 28 references are attached. (SG)

This document presents the results of a survey questionnaire of undergraduate education in sociology sent in spring 1991 to a nationally representative sample of 597 four-year colleges and universities. The data from 502 responding four-year colleges and universities (out of 529 eligible institutions) were weighted to provide national estimates about instructional staff, computer resources, course offerings, and issues and concerns in undergraduate education in sociology. Results showed that most of the nation's four-year colleges and universities had sociology programs, and that most institutions with sociology programs offered bachelor's degrees in the subject. Twenty percent offered master's degrees, 10% doctorates, and 5% associate degrees. About half of the chairs of departments with sociology programs stated that the number of students who declared a major in sociology had increased in

DESCRIPTORS- Ancient History; \*Course Content; Curriculum Guides; Foreign Countries; \*Grade 8; \*History Instruction; Junior High Schools; Maps; \*Social Studies; Teaching Methods; \*Western Civilization; World History

IDENTIFIERS- Manitoba; People through the Ages

This Manitoba (Canada) curriculum guide includes the grade 8 overview, unit overviews and topics, focusing questions, specific objectives, and outline maps needed for the course. The teaching of the identified objectives is mandatory in Manitoba. Manitoba curriculum guides are produced in three different formats referred to as Level I, II, or III. This is considered a Level II document to be used in conjunction with the Level I social studies overview and the teacher's guide to the textbook, "People through the Ages." The teaching strategies and learning activities found in the teacher's guide have been developed from the topic objectives and the focusing questions of this guide. Each strategy or activity should satisfy one or more of these categories of objectives: (1) knowledge, (2) thinking and/or research, (3) attitude and value, and (4) social participation. This course focuses on ways of life and the changes that have evolved from very early times to the present. It is designed to help students explore the ways that people lived within certain societies of the past and to realize that life today is related closely to developments that have occurred through the ages. Students should be made aware that all societies have not developed or changed at the same rate or to the same degree. The intent is to encourage students to compare a wide variety of ways of life of the past and present in order to be able to examine contemporary life against a range of alternative possibilities. The study is divided into four units with suggested time frames for each unit: (1) life during very early and early historic times; (2) civilizations of the past; (3) life in early modern Europe; and (4) life in the modern world. DESCRIPTORS- Citizenship Education; College Preparation; Critical Thinking; \*Curriculum Design; Elementary School Curriculum; Elementary Secondary Education; \*History Instruction; Moral Development; Secondary School Curriculum; \*Social Studies

This policy statement by a national professional association of history teachers from kindergarten through grade 12 begins by pointing out that history currently functions as the core of the social studies curriculum prior to college. This position should be expanded and enhanced as a matter of sound curriculum policy. History alone of the social studies provides an orderly plan, integrating the different elements from the other social studies and the humanities. History is the most comprehensive, integrated way of knowing about human societies. History's core concepts of change and continuity best represent the full context and complexity of human experience. History prepares young people for citizenship in the United States through a broader vision of the world. It expands the self-knowledge needed by young people for healthy moral development. The study of history refines the habits of mind needed for academic achievement and success in the modern world. It involves: (1) determination of the facts with an open mind; (2) scrupulous attention to context; (3) sensitivity to the interplay between the immediate and the long term; (4) awareness of the perversity of sources; (5) resistance to conspiracy theories and notions about reality being predetermined; and (6) appreciation of broad reading and experience as a basis for conclusions. History's narrative approach uniquely conveys the human drama, infusing the past, present, and future by providing emphasis on chronology and sequential order, attention to rhetoric and verbal expression, focus on men and women as the nexus for historical forces, and concern with description first and analytical judgments second. History enjoys a wider support than other social studies. For these reasons, history should remain the mainstay of the social studies. (DK)

Books 1, 2, and 3 of "The Working Experience," a series of texts for English-as-a-Second-Language (ESL) students, are contained in this document. The series builds on oral skills to develop reading and writing ability while still expanding oral English-language proficiency. Since one of the basic principles underlying the series is the idea that students learn best when the content relates to their daily lives, the words and concepts introduced have immediate importance. The readings and exercises allow students to share learning experiences in a flexible, multilevel format. The series uses as its basic text stories told by other adult ESL students. Storytellers' voices can be clearly heard in such accounts as "New on the Job," "Job Hunting," and "The Working Mother." The three texts contain increasingly difficult readings and exercises that focus on conversation skills, grammatical structure, and vocabulary development. Each lesson ends with an activity to encourage open-ended discussion and written expression. An accompanying teacher's manual includes an overview of the series, guidelines for using the language experience and for facilitating reading, suggestions for teaching each lesson and for using the series in multilevel classrooms. This manual, a basic guide to the field of English as a Second Language (ESL), including bilingual education (BE), lists nearly 1,000 U.S.-based organizations that service ESL/BE educators. The core of this guide consists of ESL-oriented data in the form of names, addresses, and telephone numbers. Resources are presented in the following categories: ESL and Bilingual Education (principal association, affiliates and related organizations, state Title VII offices and evaluation assistance centers, and multifunctional resource centers); Literacy Organizations; Related Organizations (languages and linguistics, federal agencies, foundations and research centers, special education interpreters and translators); Multicultural Organizations (ethnic societies, embassies);

by ESL proficiency level, language skills objectives by ESL proficiency level, language functions by ESL proficiency level, and language forms by ESL proficiency level. (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

IDENTIFIERS- Clayton County Schools GA; Georgia (Clayton County); Support Services

Project CLASS, a collaborative family literacy demonstration research project designed to meet the language and literacy needs of limited English proficient families in Clayton County, Georgia, is described. Intergenerational and age-graded classes were provided for Cambodian, Laotian, Vietnamese, and Hispanic adult family members, their out-of-school youth, and their school-age or preschool children. The Project CLASS curriculum, based on the work of D. Scott Enright, was a multi-level, integrated language and literacy curriculum delivered through content-based themes and supplemented by contextually-based activities. Fifty-six families representing 92 adults and 145 children participated; unfortunately, attendance was not consistent, ranging from 2 to 71 percent of classes attended. Reasons for absences and dropouts included job changes, moving, and family problems; additional factors included conflict with a local church program, the closing of a major employer, and violence in the Cambodian community. It is recommended that future family English literacy programs give more attention to ways to motivate families to attend and to remain in the program long enough to demonstrate gains in language and literacy. The integrated, thematic approach; the multi-level, intergenerational activities; and the field trips and holiday celebrations were found to be important components of the family program. The assessment instruments and a list of project dissemination efforts are appended. (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

IDENTIFIERS- Illinois (Chicago)

An outgrowth of several previous projects conducted by the Illinois Literacy Resource Development Center (ILRDC), the Quality Programs Project is a collaborative effort to improve the quality of literacy services in the Chicago area. A long-term investment in quality programming at the local level, the Quality Programs Project has as its primary goals the training and professional development of literacy program staff and the formation of site-specific evaluation systems. Staff from six sites participated in three sequential training sessions. The sites were the Onward Neighborhood House, Youth Service Project, Chicago Consortium for Worker Education, Midwest Women's Center, The Neighborhood Institute, and Firman Community Services. The sessions introduced site staff to the evaluation system adapted by the ILRDC, presented information on qualitative and quantitative data collection methodologies, and introduced strategies for comprehensive data analysis. The ILRDC staff provided on-going support to site staff as they developed and refined their goals. Each site used the ILRDC evaluation framework to create assessment systems and tools that were customized for their programs and their own goals. This report summarizes the development and progress of the first phase of the project. Appendices making up the greater part of the report contain several questionnaires and evaluation instruments. DESCRIPTORS- Academic Education; College Instruction; \*Curriculum Development; Educational Needs; Educational Objectives; \*Educational Planning; \*Education Work Relationship; General Education; Higher Education; Intellectual Disciplines; Majors (Students); \*Relevance (Education); School Effectiveness; Student Educational Objectives

Examination of almost any university's curricular goals or expectations and the actual courses taken by particular students demonstrates significant discrepancies between the rationale and the actuality and between the intentions of general or specialized education and the knowledge made available in the courses taken. A major reason for the existence of these discontinuities lies with the assumption that the organization of the curriculum of higher education should be done in the same manner that the university organizes to do its research and knowledge production. This essay sets forth a plan for organizing the curriculum of higher education that takes into account the difference between academic or disciplinary knowledge and mission-oriented or practical knowledge. This plan is oriented around four types of mission-oriented knowledge: knowledge required as a citizen and human being (servicing the general education function); knowledge required for a specialty or profession; knowledge required to conduct research and advance knowledge itself; and knowledge pertaining to the education of people in these four domains. Contains nine references. (GLR)

This report presents data on the occupational and educational experiences of graduates approximately 1 year following graduation based on a nationally representative sample of 16,172 bachelor's degree recipients during the during the 1989-90 academic year. The report is divided into two sections. The first section presents an overview of principal occupational and educational outcomes, and the second section focuses on outcomes for specific major fields of study. Among the study's highlights are the following: (1) 84 percent of the graduates were employed, the rest being unemployed or not in the labor market due to school or other reasons; (2) employment rates were higher among graduates in the professional fields; (3) the unemployment rate at 4.5 percent for graduates was 2 percent less than the general labor force as of April 1991; (4) one-third of the graduates reenrolled for further education within 1 year of graduation; (5) mean annual salaries for full-time employees were higher among professional field majors than among arts and sciences majors; and (6) among graduates employed full time, the mean salary for women was 87 percent of the mean salary for men. Appendices provide detailed tables with standard errors, study technical notes, and definitions. (GLR)

DESCRIPTORS- Case Studies; Computer Assisted Instruction; Computer Literacy; \*Computer Software Selection; \*Courseware; Decision Making; Evaluation Methods; Evaluation Utilization; Foreign Countries; \*Information Dissemination; Secondary Education; Secondary School Teachers; Workshops

IDENTIFIERS- Netherlands

The selection of courseware is a difficult problem in the use of computers in education. A dissemination procedure for a courseware selection instrument involving workshops for computer coordinators is described. Computer coordinators of 267 Dutch secondary schools were asked how they used certain sources of information in selecting courseware. Many used results of evaluations by the Soft- and Courseware Evaluation Centre for the Netherlands, but expressed the need for additional information. Six secondary schools participated in a workshop for computer coordinators who were taught to use an instrument called "The Courseware Selector" to evaluate courseware. The coordinators were expected to disseminate the information in their schools through further workshops. A multiple case study design was used to compare developments in the six schools involved in this cascade approach. In general, effects on the overall selection of courseware were not large, but promising effects did appear related to teachers becoming better acquainted with courseware and reducing their computer phobia. A critical variable in implementation was the level of experience in computers at the school initially. (Contains 7 references.) (SLD)

IDENTIFIERS- \*Virtual Reality

The essence of the computer revolution is yet to come, for computers are essentially generators of realities. Virtual reality (VR) is the next step in the evolutionary path; the user is placed inside the image and becomes a participant within the computational space. A VR computer generates a direct experience of the computational environment. The participant wears hardware that senses his natural behavior and displays from his personal perspective. The characteristics of VR are the same as those of good teaching. The teacher wants to create an environment that is programmable (curricula) and in which the students participate. Everything we do to educate with words and with pictures can be provided as virtual experience. We can vary location, scale, density of information, interactivity and responsiveness, time, and degree of participation. VR makes immediate sense because what a participant sees and hears has a meaning that does not require explanation. Text does not fare well on VR because text is not constructed for interaction; the VR analog of text is natural speech. Rather than teaching a structure of symbols, such as algebra, VR will first teach meaning through experience, then the symbolic abstraction of those experiences. VR is a natural interface with abstractions. No one has any idea what extended exposure to high-quality VR is like or other possible negative impacts, but VR will be commonplace in 20 years. (KRN)

IDENTIFIERS- \*Association of Research Libraries; \*Liaison Administrators

To gather more information on the role of the liaison in research libraries, the Association of Research Libraries (ARL) Office of Management Services conducted a survey in 1992 of its academic library members. Completed surveys were returned by 49 libraries. Liaisons in both technical and public services were reported by 59 percent, while 31 percent reported having only public service liaisons. While no typical liaison position could be identified, 13 libraries reported having written definitions of liaison practice, 24 reported policies or guidelines, and 15 formulated definitions for purposes of this survey. New aspects of liaison work are emerging as access to electronic information sources expands. There is a growing need to know what factors contribute to effective liaison relations in the academic setting, and more focused and objective studies may be necessary. The kit contains: (1) survey results; (2) responses about organization and coordination of liaison librarians from nine libraries; (3) position descriptions from eight libraries; (4) definitions and guidelines from 15 organizations; (5) descriptions of internal communication of liaison activities from four libraries; (6) liaison services for library users from five libraries; (7) training descriptions from four libraries; (8) goals and evaluation criteria from eight libraries; and (9) assessment policies from two libraries. An annotated bibliography of 30 entries is provided. Flyer 189 is included, which summarizes the kit. (SLD)

IDENTIFIERS- \*Canada

Designed as a guide to accreditation for educational programs in the allied medical disciplines in Canada, this report provides educators with guidelines, general requirements and requirements for specific programs. Following information on the organization, structure, goals and terminology of accreditation of allied medical programs in Canada, the first part provides general requirements and guidelines for programs in all allied medical disciplines in Canada. Guidelines are presented with respect to responsibility for educational programs, program committees, program objectives, program structure, program direction/coordination, didactic program staff, clinical education, instructor/student ratio, medical input, program records, program policies, educational facilities, recommended number of students, and program self-evaluation. Part II provides specific accreditation requirements and guidelines for programs in each of the following allied medical disciplines: medical laboratory technology (general and subject), cytotechnology, radiography, radiation therapy technology, nuclear medicine technology, diagnostic ultrasound technology, respiratory therapy (basic and advanced), emergency medical technology (levels I, II, and III), ophthalmic medical assisting technology, and cardiovascular perfusion technology. Appendixes include information on: categories of accreditation; steps in the accreditation process; responsibilities of accredited programs; and specific procedures for accreditation of subject and advanced programs in respiratory therapy as well as sample accreditation application forms. IDENTIFIERS- California Community Colleges; \*Student Tracking Systems

The Post-Education Employment Tracking System (PEETS), operated by the Chancellor's Office of the California Community Colleges (CCC) in cooperation with the State of California's Employment Development Department (EDD), is an automated system for tracking the post-college employment rates and earnings of community college program completers and leavers over an extended period of time. The system uses social security numbers to match EDD quarterly wage data with student records. To determine the feasibility, cost, and educational value of using PEETS, a study was conducted in 1992-93 by the Chancellor's Office, EDD, Santa Barbara City College, and Grossmont College. The study found that PEETS can be used to answer questions regarding employment patterns of former students, employment rates by major and type of degree, comparative earnings of associate degree graduates and those who did not complete the degree, earnings and employment rates in different population groups, geographic mobility of working graduates, type of industries employing graduates, relationship of training and employment. It concluded that PEETS is an inexpensive method for tracking the success of former students, and can be used to meet accreditation requirements and respond to consumer inquiries. This report describes PEETS; presents the results of the 1992-93 study of the technical feasibility, cost, and educational value of using PEETS to trace employment rates and earnings of community college vocational program graduates and dropouts over a 4-year period; identifies potential applications of PEETS-generated information for assessing and strengthening occupational programs; lists the major advantages and disadvantages of PEETS as a method for assessment of labor market outcomes; and advances recommendations for enhancing the value of PEETS. IDENTIFIERS- United States (Northwest)

This study builds on an earlier one in which the role of institutional researchers in providing computer information systems (CIS) data to administrators was investigated. To examine the relationship between college culture and the role of institutional researchers as either providers of information or interpreters of data, a study was conducted at three community colleges in the Pacific Northwest. The president, top level administrators, and the institutional researcher were sent audio tape questionnaires and were interviewed about college culture, decision making processes, and the roles of the institutional researcher. The study found that the three colleges differed in organizational climate: one was described as working as a team, another as essentially political in its decision-making process, and the third as chaotic and inconsistent. These climates affected the researchers' view of data as capable of capturing a knowable "reality," with data representing an incomplete reality at the first institution, a negotiated reality at the second, and a construct that could be interpreted from many different perspectives at the third. However, administrators at all sites relied primarily on institutional researchers for data, and therefore recognized the role of researchers as providers of data. The administrators also indicated that the major role of researchers should be to interpret the data, stating that they themselves did not have the skills or time to perform analyses and that researchers had objective methodologies and training in statistical analysis. Finally, at the college described as chaotic the researcher functioned as institutional critic, a role stemming from the cultural climate, the view of data as an interpretable reality, and administrative support. DESCRIPTORS- \*Age Differences; Cognitive Processes; \*Eye Movements; Infant Behavior; \*Infants; \*Intelligence Quotient; Motor Reactions; Perceptual Motor Coordination; Predictor Variables; Psychological Studies; \*Reaction Time; \*Young Children

As part of a study to determine whether visual and manual response systems are correlated, 26 children between 40 and 51 months of age took part in visual and manual reaction time (RT) tasks. Subjects, whose RTs had previously been tested at 3 months of age, were tested in 1 of 2 conditions. In the first condition, subjects viewed pictures only while eye movements were recorded. In the second condition, subjects pressed a left or right button depending on the location in which a picture appeared, and both eye movement RTs and manual RTs were recorded. All subjects received the RT measures first and then were administered part of the Wechsler Preschool Primary Scale of Intelligence to determine verbal, performance, and full-scale IQs. Children's RTs were compared with the RTs previously measured at 3 months to establish the stability of processing speed from infancy to early childhood. The study found a moderate correlation between manual and visual RT in early childhood, and stability in RT from infancy to early childhood. Negative correlations between manual and visual RTs and IQ, reflecting faster RTs with higher IQ, were found. Subjects were consistently slower to initiate eye movements when they were required to make a choice of which button to press than when they were not, but this effect was less striking for children with high IQ than low IQ. IDENTIFIERS- \*Japan

In the late 1920s, in conjunction with a new passion for freedom and concern for human rights, two associations were formed in Japan to promote parents' education and children's welfare. In 1928, following a 2-year study of education in America, Tetsuya Kamimura started the Japan Parents' Re-education Association. The association's members included teachers, principals, physicians, scientists, and artists. The association published a 10-volume "Child Study Course" and a monthly magazine, "Itoshigo"; held meetings for mothers; and set up branches throughout Japan. The second association, Kodomo no Kyoyo, was

IDENTIFIERS- \*Australia

As Australia recognized the need for a better educated and highly trained workforce, national attention focused on secondary and post-secondary education and vocational training, with an emphasis on the acquisition of basic, entry level work skills. Because the foundations for success at this level are laid at an early age, however, the Schools Council sought to address issues of importance to the crucial beginning years of education with a project called The Compulsory Years of Schooling. This report elaborates on some of the issues relevant to the early childhood years in schools. The paper asserts that children five to eight years of age need educational programs that have been specifically designed for them and teachers who have been trained to work with young children. Although the style of teaching throughout primary school is gradually changing, teachers are encouraged to adopt developmentally appropriate practice with their youngest children. The report also proposes that early childhood teacher training should be largely separate from the discipline-oriented primary and secondary teacher education courses, and offer narrower specialization within the early childhood range. Improvement in early childhood education also depends upon the ability of the early childhood field as a whole to find its voice and advocate for good practice in all early childhood programs. Curriculum Development; \*Curriculum Enrichment; Educational  
Change; Elementary Secondary Education; Mentors; Self  
Expression; Sociocultural Patterns; Teacher Student  
Relationship; Teaching Methods

In most schools in America little attention is paid to the nurturance of students' creative potential, with emphasis too often placed instead on rote, repetitive learning. The literature contains many suggestions for enhancing creativity in the classroom setting, such as refraining from discounting odd or unusual questions from students, finding something positive in all ideas, systematically rewarding creativity, demanding creativity of students, giving credit for creativity in grading, and modeling creative behaviors. The translation of theories of creativity into practice, however, is hindered by: (1) reliance on true-false, multiple-choice, and fill-in-the-blank tests; (2) an ideology which suggests that there is one right answer; (3) the increasing specialization of teachers, which results in a focus on subject matter and a neglect of students' talents; (4) teacher reliance on only one technique, such as brainstorming, to enhance creativity; (5) teacher overload; and (6) students' tendencies to underachieve and to pursue little outside reading. Overcoming these barriers requires an open and supportive classroom environment, where creative thinking is accepted and encouraged, dissent is tolerated, and students are encouraged to trust their own judgment. Teachers can do much to nurture creativity in the classroom, but they need guidance, training in behavioral management, and institutional support as well. Creativity and inventiveness must first become important to society to be important in educational institutions. Contains 13 references. (AC)

DESCRIPTORS- \*Computer Assisted Instruction; Computer Assisted Testing; \*Learning Strategies; \*Preschool Children; Preschool Education; \*Problem Solving; \*Puzzles; Teacher Student Relationship; \*Thinking Skills

This study was designed to test preschoolers' thinking about strategies and the relationship between strategy selection and performance through the use of computer-presented puzzle tasks. A total of 61 children between the ages of 3 and 5 years were observed to see whether they used trial and error, model consultation, or a mixed strategy to solve animated puzzles. The children were divided into four groups, with each group receiving different levels of feedback before or during the testing by one of two teachers who had instructed them in the mechanics of computer-presented puzzles, and who were blind to the research hypothesis. It was found that the majority of children resorted to the trial and error method. Although a trial and error approach required more trials, it took a shorter period of time than the model consultation or mixed strategy. It appeared that the children were motivated to find the quickest solution to the puzzle rather than the most effective strategy. Contains 38 references. (MDM)

IDENTIFIERS- \*National Education Goals 1990; Project Head Start  
National Education Goal One, as framed by President Bush and the governors of the 50 states in 1989, declares that by the year 2000, all children in America will start school ready to learn. This sourcebook identifies and provides information about 20 promising comprehensive state and local strategies designed to improve learning readiness among children and adolescents. After defining learning readiness, the booklet discusses some obstacles to readiness, such as poor child health, the lack of a stable and caring home environment, and the lack of an engaging and responsive school environment. Successful programs that address the obstacles to learning readiness: (1) are comprehensive and flexible; (2) focus on the whole family; (3)

population trends and projections. Chapters 2-4 address personal, instructional, and school factors important for the success of language-minority students and examine trends and issues in bilingual education. Chapter 5 discusses ways to create school systems that support instruction of language-minority students including: (1) knowing student rights; (2) imparting high expectations; (3) ensuring appropriate student placement; (4) working to reduce the achievement gap; (5) taking an advocacy position in testing and grade retention; (6) improving staff development and minority teacher recruitment; and (7) involving parents in meaningful activities. Chapter 6 covers policy recommendations that include disaggregating student data, demonstrating commitment to uphold civil-rights laws, pursuing excellence and equity (not simply compliance), identifying a top-level administrator as an equity advocate, and joining the equity network. Desegregation assistance centers and other organizations providing information about educational equity are listed. Contains 99 references. (LP)

IDENTIFIERS- \*Culturally Responsive Education; Native Americans; \*School Culture

Overwhelmingly, the cultures of schools reflect the norms of middle-class European-Americans. Many young Native Americans fail to adapt to this culture and are perceived as unacceptable and uneducable. Deprivation of a sound educational system and concomitant social relegation lead to dismal educational outcomes and subsequent effects on health, life expectancy, employment, and income. This monograph examines the still prevalent stereotypes and prejudices operating in mainstream society and schools, and explores research findings and resources that can help chart new directions in Native education. Chapter I discusses the history of assimilation policies, historical misinformation about Native American cultures, the dilemma of non-Native teachers teaching Native students, school failure as a form of resistance, and 10 types of bias found in instructional materials. Chapter II describes the diversity of Native cultures, both among groups and over time, and suggests ways that educators can put Native cultural capital to use. Chapter III discusses the importance of training more Native teachers and the value of tribal colleges in this effort. Chapter IV describes ways that all teachers can become more responsive to Native students, parents, and communities; examples of promising practices; and criteria for

IDENTIFIERS- Health Behavior; Health Risk Appraisal; \*West Virginia; \*Youth Risk Behavior Survey

In 1990, the Youth Risk Behavior Survey (YRBS) was completed by a random sample of 1,448 West Virginia public-school students in grades 9-12. The sample was 51 percent male and 89 percent white. About 71 percent of subjects were aged 15-17; 39 percent were in the ninth grade. The YRBS covered behaviors producing vehicle-related or other injuries, drug and alcohol use, sexual behaviors, tobacco use, dietary behaviors, and physical activity. A 6-point scale to measure level of rurality was developed, based on the number of enrolled students per school attendance area in square miles. Half of the subjects attended extremely rural or very rural schools. One-way analysis of variance resulted in significantly higher risk scores on the entire YRBS for males compared to females, for 12th graders compared to lower grades, and for subjects aged 16-18 compared to younger subjects. Both when subjects were clustered as three risk groups (high, average, and low) and when they were clustered as two groups (high and average), discriminant function analysis indicated that rurality was the most consistent discriminator of the groups, with higher risk being associated with less rural classification. Gender was the next most potent discriminator of risk groups, but results were affected by a few extreme scores. (SV)

DESCRIPTORS- Definitions; Elementary Secondary Education;

\*Environmental Education; Independent Study; \*Instructional

Improvement; \*Learner Controlled Instruction; \*Learning

Strategies; \*Nonformal Education; Teaching Methods; \*Teaching Models

IDENTIFIERS- \*Informal Learning

Learning activities in environmental education require the use of the physical environment or moving into nature and natural settings to explore issues of the environment. These approaches are sometimes labeled as "nonformal." This informational bulletin examines a taxonomy of four learning environments and explore the application of nonformal learning theory into practice in the arena of environmental education. The bulletin is presented in four sections. The first section establishes definitions for four learning environments: formal learning, nonformal learning, informal learning, and self-directed learning. The second section examines the roles of formal, nonformal, informal and self-directed learning related to environmental education. The third section discusses methods of improving nonformal education in environmental education by stressing the principle that learning is an individual process of meaning-making. The summary reemphasizes that learning outcomes can improve if nonformal learning is an opportunity for the learner to be active, volitional, internally mediated, and in the process of constructing meaning. IDENTIFIERS- \*Osmosis

This study focused on the knowledge of six outstanding science students who solved an osmosis problem meaningfully. That is, they used appropriate and substantially accurate conceptual knowledge to generate an answer. Three generated a correct answer; three, an incorrect answer. This paper identifies both the accurate and inaccurate conceptions about osmosis of each correct and incorrect solver. The investigation consisted of a presolving clinical interview, think-aloud solving of the problem, and retrospective report of the solving. Of the 12 accurate conceptions identified here, 2 were especially important in enabling these solvers to generate a correct answer. Of the eight inaccurate conceptions, either of two blocked a correct answer. Four, however, accompanied (and could therefore be concealed by) a correct answer. Teachers could use this information to make a meaningful solving of this problem accessible to more students and to identify more effectively students' inaccurate conceptions about osmosis. Scientific Literacy

From the smallest plankton to the most massive whales, marine biology is the study of the flora and fauna, the living creatures of the ocean. This Zephyr self-directed study unit was developed to bridge the gap between students as passive learners to students as active participants. Originally developed for gifted students, these units emphasize the use of higher-level thinking skills and are appropriate for use in any classroom where the goal is to encourage students to become responsible for their own education. Interdisciplinary in content, the unit envelops a broad view of the topic by integrating the "basics" into each activity. The book contains two complete units: one created for the lower elementary gifted student (kindergarten through third grade) and one created for the upper elementary gifted student (fourth through eighth grades). Suggestions for adapting or adjusting either of the levels to fit any individual classroom are provided. Black and white drawings illustrate each page of text. (PR)

the last five years. When evaluating components of undergraduate education in sociology, department chairs assessed curriculum and faculty/staff resources more positively than the academic preparation and interest and motivation of students. The academic preparation of entering freshmen was ranked as the most important issue of concern to chairs of departments with sociology programs. Other issues ranked as major concerns were student interest and motivation, computer background of students, recruiting and retention of qualified faculty, and appropriateness of class size for introductory courses. All students had access to campus-wide computer resources, but only 37% of respondents stated their department offered undergraduates access to departmental computers. Full time faculty members teaching sociology to undergraduates were 84% White, non-Hispanic; 8% Black, non-Hispanic; 4% Hispanic; 3% Asian; and 1% nonresident alien. A mean of 82% of the instructional contact hours was taught by full-time faculty. (DK)

IDENTIFIERS- General Agreement on Tariffs and Trade; North American Free Trade Agreement

This document contains a student text, teacher outline, and lesson plan that places beliefs and values at the center of the national discussion on trade policy. The focus of the unit is particularly relevant with the emergence of U.S. trade policy as a vital public issue. In 1993, two key elements of U.S. trade policy--the North American Free Trade Agreement (NAFTA) and the General Agreement on Tariffs and Trade (GATT) will occupy a prominent position on the national agenda. This course can provide students with the tools to express their views on these important topics. At the core of the unit is a framework of three options for U.S. trade policy. By exploring a wide ranging spectrum of alternatives, students gain a deeper understanding of the values underlying specific policy recommendations. The background readings are intended to introduce students to the terms and concepts essential to a basic understanding of international trade. Part 1 uses the history of television manufacturing as a context for considering changes in the U.S. position in the global economy since World War II. Part 2 allows students to reflect on the impact of shifting trade patterns on the lives of four U.S. citizens. The unit contains a five-day lesson plan and student activities. The lesson plan calls on students to analyze the global economic changes that have shaped the direction of the television industry. The lesson plan concludes with students developing their own options. An official description of NAFTA

"Collaboration" appears to be a popular trend in business and education as it is discussed more and more frequently in publications. One of the problems associated with collaboration is the lack of clear definition among similar terms such as cooperation, team effort, and partnerships. This paper briefly reviews the literature related to the concept of collaboration and adopts a three-level definition among the terms collaboration, coordination, and cooperation. Cooperation forms the base, coordination forms the second level, and collaboration, the most complex of the three, forms the third level. Each level is generically higher according to the complexity of the process. All three levels must interrelate. When collaboration is viewed as a current organizational structure in education, collaborations are defined as organizational and interorganizational structures where resources, power, and authority are shared in order to achieve common goals that could not be accomplished singly. Another problem related to collaboration is the future. Often the future or success of a collaborative effort rests on the critical issue of ethics. When values collide, collaborations often falter or fail because there was no consensus of ethical guidelines established by the participants. A model to help establish guidelines is suggested which provides a check list of items to be considered, includes a sample of ethical guidelines, and offers a self-explanatory generic model for self-evaluation of ethical issues. Contains 25 references. (Author/DK)

DESCRIPTORS- Educational Research; Elementary Secondary Education; Foreign Countries; International Cooperation; \*International Education; \*International Educational Exchange; \*International Organizations; Interviews; Oral History; Professional Associations; \*Role of Education

IDENTIFIERS- Organizational History; \*Peace Education

The Peace Education Commission (PEC), a subgroup of the IPRA (The International Peace Research Association), was established to facilitate international cooperation among individuals interested in peace education and research related to peace education. PEC is coordinated by a Council and an Executive Secretary (at present Ake Bjerstedt). The full list of former Executive Secretaries of PEC contains five persons who have served in the following order: Christoph Wulf (Germany), Magnus Haavelsrud (Norway), Robert Aspeslagh (the Netherlands), Robin Burns (Australia), and Celina Garcia (Costa Rica). The present Executive Secretary interviewed these five "predecessors" about their opinions on peace education. Present PEC members and other people interested in peace education should find the publication interesting and stimulating. (Author/DB)

British Perspectives on Peace Education and Its Difficulties:

citizen in fostering environmental consciousness?" A basic premise running throughout the lessons is that new, globally-oriented thinking must take the place of the old, narrowly defined nation-state system if humanity is going to overcome the environmental crisis facing it. Thus, in addition to lessons such as "Re-thinking 'Security' in the 'New World Order'" and "Weapons Conflict Resolution at the Personal, Social, and International Level," there is also a strong focus on nuclear proliferation as a paradigm of the special dangers of violent confrontation in the modern age. The lessons offer a variety of activities and strategies to encourage an active and constructive engagement with these issues, in particular role-playing, cooperative learning formats, and journaling. A resource list at the end of the packet describes currently available fiction, non-fiction, videos, journals, and organizations relevant to the issues at hand. (RMH)

DESCRIPTORS- \*Educational History; Elementary Secondary Education; Guidelines; Higher Education; Teacher Certification; \*Teacher Education

IDENTIFIERS- Madison (Robert Lee); National Board for Professional Teaching Standards; \*Normal Schools; \*Western Carolina University NC

Three events in U.S. teacher education are discussed: the founding of the first state supported normal school in Massachusetts in 1839, the founding of Western Carolina University in 1889 (Cullowee, North Carolina), and the announcement by the National Board for Professional Teaching Standards (NBPTS) in 1989 of guidelines for national certification of elementary and secondary school teachers to take effect in 1993. In exploring the reasons for the low status of teaching as a profession, this paper traces the history of teacher education from ancient through colonial and Victorian times. Normal schools were inspired by European models and provided a climate where teacher education could be idealized as a profession without the elite academy and college disdain. By 1900 U.S. teacher education was hindered by low pay, part year work with most schools open only 3 to 7 months a year, and unfair hiring practices in which relatives of school board members usually got the jobs. With the transformation of society from frontier-agrarian to urban-industrial after 1900, normal school training could no longer meet society's need for education. The institutions had to be upgraded or replaced by higher education programs. Opposition came from traditional eastern colleges and universities and the normal school officials. The application of science and psychology to education aided in the switch from normal schools to teacher colleges. In addition, the rising accreditation standards for teachers in the last few years have raised issues that may eventually help to elevate teaching to a higher status. (DK)

IDENTIFIERS- \*California

Dedicated to the 1.6 million Californians newly legalized under the Immigration Reform and Control Act of 1986, this booklet summarizes interviews with 148 immigrants conducted as part of the Amnesty Education Outreach Project. The interviews included the following topics: why they came, their educational experiences, changes in their lives, their dreams, and opening doors to their dreams. In interviews at educational agencies throughout California, including public adult schools, community-based organizations, and community colleges, groups of six to eight students met with bilingual staff. Most responded in Spanish. This document is comprised of excerpts from those interviews. Of the 148 individuals interviewed, 94 were male and 54 were female. Nearly 50 percent had been attending classes for 1 year or less. Nearly two-thirds were employed, and most stated that they use English outside of class, primarily in work-related settings. More than two-thirds were enrolled only in English-as-a-Second-Language (ESL) and civics classes. Two-thirds had children. Just over half of the children were currently attending school. Students reported needs in several areas: English language skills, finances, child care, transportation, and parking. (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

\*Educationally Disadvantaged; Educational Status Comparison;  
\*Hispanic Americans; \*Immigrants; Mexican Americans;  
\*Socioeconomic Status; Spanish

IDENTIFIERS- \*Michigan (Kalamazoo County)

The socioeconomic profile of clients who received the services of the Hispanic Liaison Program (HLP) from May 1991 to October 1992 is presented. The HLP's primary objective is to serve as a link between the existing services in Kalamazoo County, Michigan, and the Hispanic population, a group of people often underserved due to language, cultural, and economic barriers. Statistics were gathered from the main client database and organized according to their educational attainment level. Four categories were established: elementary, high school, vocational, and college. The data make it clear that education has a significant impact on the economic standing of the Hispanic population, with the more educated clients having a higher annual income, smaller family size, more normalized immigration status, and better employment opportunities. Mexican Americans were concentrated in the undereducated group and other Hispanic ethnic groups were highly represented in the college group. Additional findings are: (1) there is a large group of single, undereducated clients; (2) college-educated families tend to use Spanish more often at home than high school-educated families; (3) 100 percent of the elderly clients are concentrated in the undereducated groups; (4) 17 percent of the clients are non-documented, 35 percent are U.S. citizens, 33 percent are permanent residents, and the remaining 14 percent are unknown, visitors, or temporary workers; and (5) 66 percent of the clients are under 35 years old. Tables and graphs illustrate the findings. (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

IDENTIFIERS- Washington (Seattle)

The Family Talk Time Curriculum is designed to provide the skills, information, and self-confidence needed to empower refugee and immigrant parents to raise their children successfully in the United States. It is part of the Washington state Multi-ethnic Family Intervention Project at the Refugee Women's Alliance. The curriculum was developed over a 2-year period by a multi-ethnic group of 10 refugee mothers, a bilingual staff, and parent educators from Seattle Central Community College. All techniques are designed to elicit input and opinions from the participants, to facilitate sharing among them, to introduce new information, to improve problem-solving skills, and to improve English language literacy skills. The

section called "Resources for Learning Partners: Understanding Diversity," which lists books and articles that may provide good background information on teaching and learning in a cross-cultural setting. IDENTIFIERS- California State University; \*California State University Inst for Teach Learn; \*College Teaching and Learning Collection

This publication describes programs in the California State University (CSU) system that support public school improvements in five areas: public school diversity, curriculum improvement, teacher diversification, teacher education, and leadership. An introduction notes the pressing urgency of school improvement and describes the need for business and community involvement in the five areas. The following five sections each cover one area providing an overview of issues followed by examples of relevant programs in which CSU is involved. The section on public school diversity notes that the majority of students in the California public school system are non-white and details concerns over an "achievement gap". Nine projects are described. The section on curriculum improvement also describes nine projects in this area. The section on diversifying the teacher pool discusses the projected shortage of teachers and two major statewide efforts to support beginning teachers. Nineteen projects are briefly summarized. Teacher education is focused on next with a discussion of reforms, national studies, and CSU accomplishments and challenges in this area. Six projects are described. Finally, the section on leadership describes statewide efforts overall as well as six sample programs for improving leadership. A conclusion stresses the complexity of the commitment to these issues. An article from the "Chronicle of Higher Education" on the CSU programs is appended. (JB)

Colleges; Educational Planning; Higher Education;  
\*Institutional Advancement; Long Range Planning;  
\*Organizational Change; \*Organizational Communication;  
Organizational Objectives; Universities

This paper addresses what characteristics of institutional approaches to change succeed in achieving stated institutional aims within a higher education context. It asserts, through an examination of two case studies, that successful organizational change depends on context-laden feedback-driven processes that result in steady incremental improvement. Further, it argues that successful organizational reform depends on polylogical leaders who: (1) develop an understanding of the cultural realities of different internal and external constituents--with themselves included as key constituents; (2) relate to different constituents in terms of their respective cultural realities in order to establish new expectations of the organization; and (3) work with each significant internal and local group to raise expectations, and then to close that group's expectation/experience gaps. The challenge of planning and implementing organizational change, therefore, lies in ensuring that constituents become creatively engaged in the process of bridging the gap between raised expectations and actual experience. Effects; \*Public Opinion; Resource Allocation; School

Effectiveness; \*School Support; Teacher Attitudes

The unsatisfactory status of higher education in the United States has many explanations, such as the declining value of scholarship and academic ethos and the neglect of teaching obligations in favor of research duties. This paper posits another theory for the skepticism toward academic institutions: the general loss of confidence of the American people toward their government. This general feeling of distrust is described in terms of a disease in which the most influential institution, the government, becomes infected first, followed by similar infections to the other institutions. The relationships between the federal government and the academic institutions, between the public and the learning establishments, and the effects of the mass media are discussed, including problems of the professorate and the tension that has developed between teaching and research obligations. The paper concludes with a call to faculty to take advantage of the current change in the political climate and act toward changing the general atmosphere surrounding academia. (Contains 41 references.) (GLR)

personnel to merge the worlds of theory and practice in which both parties achieve parity in governance and resource allocation, use negotiation as the chief problem-solving process, and promote communication between and among all levels of the partnership. The study sought teachers' perceptions of the collaborative process. Twelve faculty members of an elementary school, in its first operational year as a PDS, participated in interviews and classroom observations. Results revealed that: (1) an event beyond the teachers' control was usually responsible for their initial exploration of PDS; (2) the information that teachers remembered receiving about their role within a PDS was limited and had little effect on their decision to join; (3) teachers made their decision to become a part of the PDS based on their expectation of greater control over their environment; (4) teachers hoped the formation of the PDS would provide opportunities for them to assert greater control over their personal and professional growth; (5) the teachers' desire for control over their environment increased through their participation in PDS. PUB TYPE- Legal/Legislative/Regulatory Materials (090)

DESCRIPTORS- Administrative Problems; Colleges; Educational Finance; Eligibility; \*Federal Programs; Federal Regulation; Financial Problems; Financial Services; Higher Education; Loan Default; Program Design; \*Program Implementation; \*Program Improvement; \*Student Loan Programs

IDENTIFIERS- \*Department of Education; \*Direct Lending; Guaranteed Student Loan Program

In the current implementation of the Federal Direct Student Loan Program, there are lessons to be learned from past higher education loan programs, better ways to administer these programs and direct loans, and points to remember as direct loans are implemented. Current guaranteed student loan programs have been the subject of scrutiny recently because of rising costs related to defaulted loans and Department of Education inefficiencies. Loan program problems have involved program structure, weak gatekeeping procedures, and inadequate financial and management systems. Many of these problems will require the continued attention of the Congress and the Department of Education regardless of implementation of a new direct loan structure. Other issues that could be addressed include continuing to strengthen the Department's gatekeeping procedures, strengthening the incentives for effective loan servicing, and expediting efforts to develop a comprehensive plan to correct Department financial and management systems. A comprehensive strategy is needed for the direct loan conversion effort which should address the management and oversight of the conversion, human resources and support requirements, loan servicing and support to schools and students, and management and the winding down of the guaranteed loan portfolio. (Lists 13 related Government Accounting Office publications.) (JB)

Regents' and accreditation requirements. Institutional commitment and progress, however, varies widely, and it is suggested that the Utah State Legislature should act to spur greater efforts in developing these assessments at those institutions where their development is found to be at an unsatisfactory pace. Legislative alternatives are discussed. The report states that acquiring more information on faculty workload will require considerable political and administrative effort to overcome the barriers which now limit its availability. Obstacles to the availability of this information and problems with existing reports on faculty workload are identified. A past effort to collect workload data shows differences in teaching loads among Utah System of Higher Education (USHE) institutions that may be important to legislators or the public. However, the report data is incomplete and may not be accurate, suggesting that the legislature may wish to authorize regular reports on faculty workload. Appendices provide USHE institutional progress reports on student assessment programs and activities. (GLR)

Analysis

This report represents responses from 406 (out of 510) colleges, community colleges, and universities to a questionnaire survey concerning the changes taking place in the academic and administrative practices of American colleges and universities. Changes are discussed by type of institution: 2-year public, 4-year public, and independent institutions. For many topics, responses are compared with responses given on previous surveys. The collective image emerging from the report indicates evidence of much active planning and new initiatives by schools as well as documenting substantial variation by type of institution and geographic location. The report reveals: (1) continuing financial pressures, with strong regional differences; (2) downsizing and enrollment limits for some institutions; (3) active planning and restructuring, including widespread use of program review and student assessment as well as quality assessment; (4) uneven progress on the status of women in higher education; and (5) flexible program delivery for most institutions with a growing use of electronic instructional delivery. Appendices provide the data tables created from the survey, the technical notes, and the survey questionnaire. Contains 17 references. (GLR)

DESCRIPTORS- \*Codes of Ethics; Confidentiality; \*Cultural  
Differences; Freedom of Information; Higher Education;  
\*Librarians; \*Library Science; \*Moral Values; \*Social Values;  
Standards

IDENTIFIERS- Moral Reasoning; \*Professional Ethics

Cultural diversity raises dilemmas for the library profession, some of which are difficult to resolve on the basis of its absolutist ethical prescriptions. Psychological studies of class, cultural, and gender differences in moral reasoning support a professional ethics based upon care and cultural sensitivity, instead of universal and obligatory principles. Librarians can change their professional codes of conduct, in order to express more realistically their aspirations and community responsibilities, while accommodating social differences. IDENTIFIERS- \*Wichita State University KS

The Bibliographic Instruction Committee of the Wichita State (Kansas) University Libraries recommended changes to improve the current bibliographic instruction program for lower division undergraduates. The shortcomings of the current program, one class period in a required English course, were analyzed; and suggestions were made to improve the instruction given to students, who come to the university with a broad range of expertise in library skills. Recommendations include the following: (1) provide multiple options for students to learn about the library; (2) reduce the amount of time that reference librarians spend on undergraduate-level bibliographic instruction, allowing them to develop upper-level and graduate programs; (3) involve all library faculty in the instructional program; (4) allow the library to reach some goals defined by its planning committee, including enhancement of teaching functions; (5) allow the reference department to address issues of more effective strategies for users and increasing demands for bibliographic instruction; and (6) allow the library to meet the research component of the general education guidelines developed for the university by offering the first step in basic library skills and developing some higher-level courses. Appendixes contain sample library skills tests and a list of course outlines from other institutions. (Contains 38 references.) (SLD)

The study reported in this paper was conducted to determine how the implementation of a 1993 differential fee policy in California that charges higher fees to students with a bachelor's degree will affect the enrollment of students with bachelor's degrees, and how this policy may change the overall enrollments of the California community college system. Enrollment data were collected from individual institutions,

There has been dramatic growth at community colleges over the past decade in the use of computer and video technology in instruction programs, in academic and career counseling processes, to access libraries and other information databases, and for specific student support services. This has resulted in the creation of new support staff positions to manage computer programs, maintain equipment, and train staff. Since resources available to two-year colleges remain scarce, the increased use of computer technology raises important questions about sources of money to support initial capital investments and cover ongoing costs of instructional technology, and the ability of colleges to afford using both traditional and new technology-based instructional delivery systems. In California, a substantial portion of the funds used to purchase instructional technology in recent years has come from state equipment allocations paid for by voter approved bonds and state lottery allocations. The continued availability of these allocations is uncertain. Institutional operating costs are rising faster than cost-of-living adjustments from the state, and community colleges are in essence diverting funds from other areas of their budgets to pay for technology-based instructional delivery systems that operate alongside existing delivery systems. Community college leaders, therefore, should begin experimenting with methods of incorporating instructional technology into restructured delivery systems that utilize the capabilities of technology while maintaining the benefits of existing systems. A study was conducted to ascertain whether two-year college faculty are significantly different than faculties at research, doctoral granting, comprehensive, or liberal arts institutions on four measures of job dissatisfaction. Drawing from responses to the 1989 Survey Among College and University Faculty conducted by the Carnegie Foundation, the study compared faculty perceptions about the context of higher education in society; time constraints; salary; and thoughts about leaving the profession. A total of 510 two-year college faculty survey responses were compared with equivalent numbers of responses from each of eight institutional categories (Research types I and II, Doctoral Granting types I and II, Comprehensive types I and II, and Liberal Arts types I and II). Study results included the following: (1) two-year faculty were less confident about the quality of students and higher education's ability to help society than faculty at Liberal Arts I institutions; (2) two-year college faculty were less likely to perceive problems with time constraints than faculty at all other institutions; (3) two-year faculty respondents held significantly higher perceptions of their salary than other faculty; and (4) two-year college faculty did not hold significantly different thoughts about leaving the profession than other faculty, with all groups expressing little intention of leaving the profession. Data tables and 14 references are included. (PAA)

In planning for the 1989-90 academic year, Hazard Community College's Employee Professional Development Committee recommended and gained approval for a wellness program that would assist all employees in reducing stress and becoming more physically fit. Similar to fitness programs in the business sector, the wellness program utilized community facilities for aerobics, jogging, walking, tennis, racquetball, swimming, and weightlifting, and provided a qualified physical fitness instructor to individualize activities to each participant's abilities. The program, designed to run only 5 weeks, was expanded to 10 weeks due to overwhelming demand. In fall 1992, the college created an in-house version of the wellness program, calling it the "50 Mile Club." Employees were encouraged to set aside 50 days each semester to focus on physical fitness. An equivalency table was established to

established in 1929 by Yoshiki Takasaki and Takashi Takenami based on their belief in the importance of the education of children and parents. Kodomo no Kyoyo emphasized scientific approaches to child education, and psychologists, doctors, and scientists contributed articles to the association's journal. The religious background of the association's Christian staff influenced the association's position on child rearing and education. Kodomo no Kyoyo provided parents with a variety of learning opportunities, including short training courses, lecture and discussion meetings, and mothers' schools. Though both movements were active throughout Japan, they attracted primarily middle-class parents who were enthusiastic about their children's education. Both continued to publish until World War II. Japan's current social problems may speak to the need to promote parents' re-education once again. (AC)

IDENTIFIERS- \*Child Development Project

The Child Development Project (CDP) is a school-based program designed to foster children's social, ethical, and intellectual development through activities emphasizing cooperative learning, developmental discipline, social understanding, interpersonal helping, and prosocial values. The CDP was implemented in kindergarten through fourth grade by regular classroom teachers with a cohort of students who began kindergarten in fall 1983 in three northern California elementary schools. At one of the schools, CDP continued through grade 6. Students from two CDP and two comparison schools entered the same intermediate school, where long-term effects of the program were assessed. In kindergarten and grades 2, 4, and 8, individual interviews with the CDP and comparison students were conducted to assess certain social skills, inclinations, and values. In addition, group questionnaires were administered in grades 7 and 8. Study findings indicated that the program had some sustained effects on children's social development. Conflict resolution, which had shown strong effects in earlier years, maintained this effect in the eighth grade. Two moral reasoning variables concerned with helping and responding to transgressions showed a small effect when combined across years. Self-esteem, which had not shown an effect when last assessed in elementary school, showed a quite strong effect in eighth grade. Finally, the program's effect on democratic values, which was significant in grade 4, disappeared by grade 8. (AC)

DESCRIPTORS- Family Influence; Family Status; \*Family Structure;  
Kindergarten; \*Kindergarten Children; \*Peer Relationship;  
\*Popularity; Primary Education; Public Schools; \*Self Concept;  
\*Young Children

IDENTIFIERS- \*Sociometric Status

This study examined the relationship among peer status, family status, and self-concept of 184 kindergarten children from 10 classes in a mid-sized mid-south city. Self-concept data was collected using the Woolner Preschool Self-Concept Picture Test, and popularity data was collected using a peer-nomination procedure. Teachers provided information on family structure, with four structures identified for the study: child residing with both parents; child residing with one birth parent; child residing with one birth parent and one step-parent; and other types. Analysis showed that all four family types were found within the sample, although more than half of the children lived with both birth parents. No differences were found in self-concept score by sex, nor were there differences in peer popularity by sex. Informal analysis revealed no relationship between low self-concept and isolate peer status, and no relationship between children of divorced parents and isolate status. (MM)

DESCRIPTORS- Broadcast Journalism; \*Broadcast Television;  
\*Content Analysis; Documentaries; \*Programing (Broadcast);  
Television Research

IDENTIFIERS- Feature Analysis; \*Perceived Reality; \*Reality Based Television Programs; Television News

Reality-based television programs showcase actual footage or recreate actual events, and include programs such as "America's Most Wanted" and "Rescue 911." To identify the features that typify reality-based television programs, this study conducted an analysis of formal features used in reality-based programs. Formal features are defined as specific production techniques that are independent of content, message, or story. These features include cuts, dissolves, fades, zooms, voice characterizations, sound effects, and music. Samples of programming broadcast by the ABC, NBC, CBS, and Fox networks were collected for analysis. Programs were classified into six categories: (1) humorous reality; (2) serious reality; (3) serious re-enactment; (4) humorous fictional, or situation comedies; (5) serious fictional, or dramas; and (6) factual, or primetime news. Based on Nielsen ratings for March and May of 1992, the three top rated programs from each of the six

including students from grades 1 to 12, children, parents, educators, and citizens in a wide range of occupations to determine their perceptions of indicators of success in school and related behaviors. Chapter 4 presents five final indicators identified by the project: (1) self-worth; (2) ability to relate to others; (3) world awareness; (4) desire to learn; and (5) spiritual life. For each indicator, three corresponding behaviors are listed, and a conceptual model is described that relates the indicator to the whole person. Chapter 5 describes instruments developed to observe and record the identified behaviors, including brochures describing the behaviors, a class checklist, student self-evaluations, and feedback forms for parents and students. Chapter 6 provides a summary discussion of implications of the project and recommendations for LCS. Policies for LCS, and the observation instruments are appended. Contains 30 references. (AC)

IDENTIFIERS- \*Developmentally Appropriate Programs; Franklin County School District MS

In response to standardized test scores that did not accurately reflect student learning, Franklin Lower Elementary School in Meadville, Mississippi, began a process of restructuring to become a developmentally appropriate school by using hands-on materials, focusing on whole language, and emphasizing the development of thinking skills. To demonstrate the effects of this process on student outcomes, achievement tests were administered to first and second graders in December 1992; student behavior records were reviewed from 1988 through 1992; and attitude surveys were administered to students, parents, and teachers in 1992. Results of the assessments indicated that: (1) for first graders, average achievement test scores were 84% for reading and 81% for math, both above the national average; (2) for second graders, average achievement test scores were 54% for reading and 78% for math, also above the national average; (3) absences at the school decreased each year since the 1988-89 school year for students overall, although they increased for black males; (4) discipline referrals decreased from 100 during the 1988-89 school year to just over 20 in 1991-92; (5) among the student attitudes surveyed, students' attitude toward teachers was the most positive; (6) among items rated by parents, teachers were rated most positively, while testing was given the least favorable rating; and (7) classroom teachers were more positive about the curriculum and teachers' roles than were assistant teachers or support teachers. The survey instruments are appended. (BCY)

IDENTIFIERS- Childhood Experiences; ERIC Trends Issues Papers;  
Program Characteristics

This monograph on quality in early childhood programs contains two parts: an exploratory essay on the subject and an annotated bibliography selected from a search of the ERIC data base from 1985 through April 1993. The essay examines five perspectives on assessing the quality of early childhood programs. A top-down perspective on quality assessment identifies selected characteristics of a program, such as adult-child ratios and staff qualifications. A bottom-up perspective attempts to determine how the program is experienced by the participating children. Such an approach asks, among other things, whether the children feel accepted by peers, protected by adults, and interested in, rather than bored or frustrated by, their experiences. The experiences of the families served by a program are assessed in an outside-inside perspective, which asks whether families feel that they are accepted and that their goals for their children are respected. The fourth perspective, from the inside, considers how a program is experienced by its staff. In this approach, working conditions, career advancement, and respect for staff are assessed. Finally, the outside perspective takes into account how the community is served by the program through assessing such factors as allocation of community resources and affordability of the program to families. The implications of the use of multiple perspectives for assessing program quality are discussed. A list of 20 references is provided. The bibliography of documents and journal articles on quality in early childhood programs that follows the essay forms the bulk of the document. Each item in the bibliography contains

constructing a theory of Native education. An annotated bibliography includes 48 related items available through the ERIC system. Contains 72 references. (SV)

IDENTIFIERS- \*Arizona

This directory lists 48 successful public school, community college, and public university partnership programs to improve access and educational achievement for Arizona's American Indians, Hispanic-Americans, and other minority groups. The directory was compiled from questionnaires mailed to programs identified by the Arizona Minority Education Access and Achievement Cooperative (AMEAAC). AMEAAC is a voluntary association of senior-level public education officials and citizens whose primary mission is to improve minority educational achievement through cooperative planning, program development and shared expertise. The programs are listed in three categories: (1) Dwight D. Eisenhower Mathematics and Science Education Act programs funded for fiscal year 1990-91; (2) AMEAAC Medallion Award programs honored in 1991 for their success and promise for future replication; and (3) AMEAAC funded pilot programs. Entries provide the name of the program, program goals, participants, target groups, selection criteria for program participants, length of program, program impact and achievements, when the program ceases to exist or its funding ends, and the program director's name and address. Also included are an alphabetical index of programs, a map showing program locations, and a glossary. (LP)

DESCRIPTORS- \*Coordination; Educational Policy; \*Federal Programs; \*Identification; Labeling (of Persons); Limited English Speaking; \*Migrant Children; Migrant Education; Parent Attitudes; Parent Participation; \*Preschool Education; Puerto Ricans; \*Special Education

The National Preschool Coordination Project's (NPCP) Interstate Coordination Committee identified problems in finding and providing special education services for preschool migrant children. They propose training for parents and migrant staff and coordination among agencies to improve services. The NPCP Subcommittee on Special Education identified the following needs: (1) improved identification of migrant students with special needs; (2) more effective placement of migrant students needing special education; (3) training of service providers; (4) appropriate practices in the delivery of services; (5) consistency in services; and (6) coordination among service providers. An essay written for parents in Spanish and English, titled "Ninos Diferentes/Different Children," encourages parents to seek services for their children and become involved in education. Also included are reprints of the following articles: (1) "Practices and Policies in the Education of Migrant Students in Special Education" (Richard A. Figueroa); (2) "The Impact of Policies for Handicapped Children on Future Early Education Policy" (James J. Gallagher); (3) "Referring Language Minority Students to Special Education" (Paula Olson); and (4) "Making Sense of Disability: Low-Income, Puerto Rican Parents' Theories of the Problem" (Beth Harry). nations plus Japan. Americans are constantly asking whether or not our students know as much science as Japanese and German students, for example. While educators in non-Western, developing nations share an interest in achievement, they ask other questions that rarely arise in the West, more fundamental questions about world view and the compatibility of various non-Western world views with modern science. There is also the question of what influences Western scientific thought has on traditional thought, and whether those influences are always advantageous. Several scholars from Yemen, Nigeria, Lesotho, Botswana, and the United States have formed a cooperative team to examine some of these issues. Three points addressed by the research are: (1) the fallible and subjective nature of science; (2) learning as a constructive process; and (3) cultural features shared by the United States and developing countries. IDENTIFIERS- New Entrants Survey; \*Science Majors

This report presents the data collected as part of the 1990 New Entrants Survey on the demographic, education, and employment characteristics of recent college graduates in science and engineering fields. A major objective of the survey was to develop national estimates and characteristics of the total population of scientists and engineers in the United States. The report is presented in three sections. The first section discusses the survey design, response rates of the sample (25,686) of science and engineering graduates in 1988 and 1989, definitions of key variables in the survey, differences of the survey results with other data sources, and sampling errors. The second section, which makes up the majority of the report, presents detailed statistical tables reporting graduate characteristics by field of degree, sex, graduate school status, employment status, racial/ethnic group, type of employer, primary work activity, and annual salaries. The tables are grouped into the following science and engineering categories: (1) 1988 bachelor's-degree recipients; (2) 1988 master's-degree recipients; (3) 1989 bachelor's-degree recipients; (4) 1989 master's-degree recipients; (5) median annual salaries of 1988 and 1989 bachelor's-degree recipients; (6) median annual salaries of 1988 and 1989 master's-degree recipients; and (7) selected employment characteristics of 1988 and 1989 bachelor's- and master's-degree recipients. The third section reproduces a copy of the questionnaire used in the survey.

A microgravity environment is one that will impart to an object a net acceleration that is small compared with that produced by Earth at its surface. In practice, such acceleration will range from about one percent of Earth's gravitational acceleration to better than one part in a million. This teacher's guide presents an introduction to microgravity, a microgravity primer discusses the fluid state, combustion science, materials science, biotechnology, and microgravity and space flight, and 12 microgravity activities (free fall demonstration; falling water, gravity and acceleration, inertial balance--2 parts, gravity driven fluid flow, candle flames, candle drop, contact angle, fiber pulling, crystal growth and microscopic observation of crystal growth). Each activity contains: the objective, background, procedure and materials needed. Some activities also includes suggested questions and further research. These activities used metric units of measure. A one-page glossary defines words used in microgravity research and 22 microgravity references are provided. The guide is amply illustrated with black and white photographs, diagrams, and drawings. (PR)

This research investigated the teaching of concrete chemical concepts and procedures to beginning chemistry students. Data were collected for this study from students enrolled in a university-level course for nonscience majors (n=171). In the topic studied, chemical bonding, four different teaching strategies were investigated: remediation of basic concepts, bridging explanations, worked examples, and student-initiated discussions of concepts. Statistical analyses were used to compare each teaching strategy against the exam score on

IDENTIFIERS- \*Peace Studies

This document is the third in a series of biennial reports on the United States Institute of Peace. The Institute devotes itself to matters of international peace based on freedom and justice. Functioning as a nonideological educational resource for policymakers and officials, the Institute does not intervene directly in the formulation or conduct of U.S. foreign policy. Principal purposes of the Institute include: (1) expanding knowledge about international conflict and peace by sponsoring research, analysis, and training; (2) disseminating such knowledge; and (3) promoting understanding of the complexities of international conflict and peace among the U.S. public. The Institute promotes its goals through grants, fellowships, research, education and training, and library and information services. As Chapter 1 of the report indicates, the Institute undertook special initiatives during fiscal years 1990 and 1991 concerning the Middle East and Eastern Europe. In addition, according to Chapter 2, the Institute continued ongoing efforts in such areas as international conflict management, arms control, East-West relations, and sources of violence. Chapter 3 describes the Institute's education and training activities and has sections entitled "Helping Educate Secondary and Postsecondary Teachers and Students" and "Training for Other Professions." Chapter 4 discusses grants, fellowships, and research programs that the Institute sponsors. Descriptions of management and corporate affairs and biographies of Institute board members and senior staff comprise Chapter 5. A chairman's statement, message from the president, an overview, and three appendices regarding the United States Institute of Peace and its enabling legislation are attached. (SG)

This book contains the partial proceedings of a symposium dedicated to concern for basic education for the masses. The book includes a position paper that focuses on education in relation to its cultural setting, socio-economic context, and partnerships in research. The result of the meeting was the identification of research that seemed instrumental in addressing problematic issues in education in developing countries. The outcomes of the research were expected to contribute to an improvement of the accessibility, relevance, and effectiveness of education. The volume contains 28 articles written by participants in the symposium, beginning with a position paper that provides the theoretical framework. The articles are grouped into four sections. The first section

and an explanation of the ongoing GATT negotiations also is included. (DK)

\*Economics; Foreign Countries; \*Foreign Policy; \*International Relations; Public Opinion; Secondary Education; Social Studies; World Affairs

IDENTIFIERS- \*Foreign Aid; Marshall Plan; Perestroika; \*Russia; USSR

This unit of study allows students and teachers to step back from the confusing media reports of the day-to-day turmoil in the former Soviet Union (FSU) and to examine it from a more thoughtful vantage point. The unit focuses on the most important instrument of U.S. policy toward the FSU--economic assistance. At the core of the unit are four distinct options for U.S. aid policy. Each option contains a different perspective on the threats and opportunities presented by conditions in the FSU. By exploring a spectrum of alternatives, students gain a deeper understanding of the values and assumptions underlying U.S. foreign aid programs. The background readings provide students with information to assess U.S. policy. Part 1 describes the political and economic context of the Marshall Plan adopted in 1948 in the aftermath of World War II, and calls on students to compare the situation in Western Europe at that time with the current state of affairs in the FSU. Part 2 traces the historical roots of the Soviet command economy, the failure of perestroika, and the course of political and economic reform in the former Soviet states. The unit contains a five-day lesson plan and student activities. Students assess the Marshall Plan, reflect on how people in the FSU view the changes affecting their lives, and role play a simulation in which students assume the role of advocates for the four options. On the final day of the lesson plan students develop coherent policy recommendations based on their own values and beliefs. (DK)

DESCRIPTORS- \*Childrens Literature; Citizenship Education; \*Constitutional History; \*Constitutional Law; Elementary Education; Law Related Education; Learning Activities; \*Readers Theatre; \*Social Studies

IDENTIFIERS- \*United States Constitution

This book summarizes itself as "A collection of excerpts from children's literature on themes related to the United States Constitution scripted in Readers Theatre format for elementary school students." It is based upon the belief that an integrated curriculum that correlates content and skills is most appropriate at the elementary level. It contains scripts of stories that reflect constitutional principles and concepts with which the classroom teacher can infuse the study of the U.S. Constitution into the existing curriculum. Teaching is most effective when based on strategies that are characterized by student involvement and participation. This is especially important in citizenship education because students are unlikely to learn to become participating citizens if they only listen to instruction or work independently. A goal of this collection is to develop the child's ability to see more than one side or point of view regarding an issue or problem. The

EDRS Price- MF01/PC01 Plus Postage.

PUB TYPE- Reports - Evaluative/Feasibility (142)

DESCRIPTORS- Cultural Awareness; Cultural Differences;

\*Intercultural Communication; \*International Relations; \*Peace;  
Program Evaluation; Social Science Research; \*Social Theories;  
World Affairs

It is important for those interested in contributing to a stable world peace to focus their attention and work on positive, proactive programs that will promote peace building rather than negative, reactive programs intended to reduce violence. This paper focuses on such a training program for international negotiators. The program is intended to develop self-awareness and intercultural communication skills that will enable the negotiators to understand and collaborate with each other more effectively in future negotiations. The impact of these informed negotiations on the process of peace building is assessed. Peace building is a process that takes place through social organizations and relationships that can deal with the conflicts, stresses, and frustrations that are inevitable in international relations without resorting to violent behavior and war. NOTE- 59p.; Prepared by the National Guidelines Task Force.

LANGUAGE- English

EDRS Price- MF01/PC03 Plus Postage.

PUB TYPE- Guides/Methods/Techniques (For Practitioners) - General (050)

DESCRIPTORS- Concept Formation; \*Curriculum Development; Educational Practices; \*Elementary School Teachers; Elementary Secondary Education; Guidelines; Health Promotion; \*Secondary School Teachers; \*Sex Education; \*Sexuality

IDENTIFIERS- \*Age Appropriateness; Task Force Approach

The National Guidelines for Comprehensive Sexuality Education were developed by a Sex Information and Education Council of the United States (SIECUS) task force made up of health, education, and sex education professionals. The group was tasked with formulating sex education concepts and guidelines within four developmental levels, from kindergarten through high school, to provide classroom teachers with a theoretical basis for daily programs. Following a discussion of the goals and values of sex education, the main body of the document focuses on six key concepts: human development (reproductive anatomy, reproduction, puberty, body image, and sexual identity); relationships (families, friendship, love, dating, marriage, and parenting); personal skill (decision making, communication, assertiveness, and negotiation); sexual behavior (masturbation, abstinence, human sexual response, fantasy, and sexual dysfunction); sexual health (abortion, sexually transmitted diseases, HIV infection, and reproductive health); and society and culture (gender roles, sexuality in the law and religion, and sexual diversity). Tables displaying key concepts and a topical outline are provided. (LL)

revealed an alarming degree of illiteracy among francophone adults living in Canada. In the province of Alberta the illiteracy rate was dramatic, with estimates of up to 10,000 adults who were francophone by birth and yet illiterate in French. This report describes the underlying factors influencing the intervention of a literacy project for this population (including demographic, historical, and socioeconomic issues for Franco-Albertans) that was launched in 1989 on the initiative of the Lifelong Education Department of the Faculte Saint-Jean of the University of Alberta. A primary finding was that an adult literacy program should be developed and implemented by fall 1990. The recommendations include specific suggestions for implementing such a program regionally, taking into account the special needs of the aged, youth, and women. They also outline the required human, financial, and material resources needed and offer suggestions for future research. (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

teaching techniques include student stories, problem posing, brainstorming, charts and grids, student-drawn pictures, journal writing, and grammar activities. Chapters include: (1) Raising Children in the U.S. (remembering family history and culture, methods of discipline in different cultures, teenagers); (2) Understanding American Schools (parent-teacher conferences, supporting your children in school, notes from school); (3) Changing Family Roles in the U.S. (comparing customs and traditions about marriage, family violence, family planning); (4) Taking Care of Yourself (coping with depression, raising self-esteem); and (5) Using Community Resources (low-cost family entertainment, crime prevention). (Adjunct ERIC Clearinghouse on Literacy Education) (LB)

IDENTIFIERS- California; California State University; \*California State University Inst for Teach Learn; \*College Teaching and Learning Collection

This publication presents the findings and conclusions as well as policy recommendations for a California State University (CSU) policy on student outcomes assessment. The report was formulated based on 16 meetings to study and discuss assessment issues, to review material from the campuses and to provide guidance to CSU representatives serving on an assessment study group advisory to the California Postsecondary Commission. Chapter 1, "CSU Involvement with Student Outcomes Assessment" defines outcomes assessment, describes the undergraduate education reform movement, conferences, assessment projects and committee work on the issue, and state government interest. Chapter 2, "Factors Contributing to Interest in Student Outcomes Assessment" offers statements by leaders illustrating concerns about assessment and description of actions by governmental and professional agencies. Chapter 3, "Guiding Principles for Assessing Student Outcomes in the CSU," describes the reasons for adopting the twelve principles that guided response to external agencies and proposal of recommendations. Chapter 4, "Recommendations for a California State University Assessment Policy" contains 15 recommendations that seek to balance various objectives and responsibilities. Three appendixes contain current assessment practices at CSU, a summary of responses to a survey, and a bibliography of over 50 items. (JB)

IDENTIFIERS- \*Bradley University IL

This paper reports on an evaluation of the effectiveness of a graduate seminar on "Women and Leadership" attended by 18 participants during the 1992 winter interim at Bradley University, Peoria, Illinois. The course was based on theoretical assumptions from the literature about leadership and about women's development. The three major course objectives were: (1) to encourage development of each woman's "voice"; (2) to enhance each woman's leadership effectiveness; and (3) to raise each woman's professional aspirations. The paper includes a description of course design, materials, and activities. The evaluation comprises analysis of essay responses to final exam questions, responses on the university's required faculty form, and responses to a follow-up questionnaire completed 6 months after the course ended. Evaluation indicated that the course was highly effective in accomplishing the three objectives and that this success was related to the course's structure and design. Self-confidence of each participant was enhanced due to the exploration of the concept of "voice" and the idea that women may lead differently from men and still be effective. Class participants, encouraged by each other and through the examples of the guest speakers, illustrate that, through mutual effort and sharing, the group achieves more than any individual could alone. Planning

IDENTIFIERS- \*California; National Center for Higher Educ  
Management Systems; Public Discourse; \*State College and  
University Systems

The state of California faces trends which will significantly shape higher education in the coming century and which require public debate and decision in the near future. The trends are enrollment growth coupled with continued slow economic growth with consequent low appropriations for education. A study by the National Center for Higher Education Management Systems (NCHEMS) found that California would not be able to meet expected increased demand for postsecondary education without significantly altering the relationship between the state and its institutions of higher education. The cost of maintaining the current system will require either an increased proportion of state revenues for higher education or increased student fees. Faculty, students, administrators and others gathered for four informal meetings specifically to generate policy options that might guide future debate. Participants developed a list of areas for debate: the aims of higher education, paying for higher education, flexibility and responsibility, and quality. The state can either begin asking and tackling broader and more fundamental policy questions in an effort to design a new approach to the future or stay with the current fragmented, short-term, by-default approach. Appendixes list report contributors and participants in the four policy meetings. (JB)

PUB TYPE- Reports - Descriptive (Program/Project Descriptions) (141), Guides/Methods/Techniques (For Practitioners) - Non-Classroom Use (For Administrative and Support Staff, and for Teachers, Parents, Clergy, etc. in Non-Classroom situations) (055)

DESCRIPTORS- \*Access to Education; Access to Information; Career Education; Career Information Systems; \*College Admission; Cooperative Programs; Financial Support; Higher Education; Information Dissemination; \*Information Services; Libraries; Low Income Groups; \*Outreach Programs; Scholarships; Student Financial Aid

This report describes the development, mission, activities, funding, and administrative process of the Education Resources Institute's Higher Education Information Center. The Center, serving Boston and other Massachusetts communities, provides information on the educational opportunities and the availability of student financial aid, as well as encouragement and assistance in the application process, to those students and their families who would otherwise not be able to participate in higher education. Among the Center's services are various youth programs; programs for women who have lost their primary source of financial support through death, separation, or divorce; and a library drop-in service and career learning line. The Center also publishes numerous materials on such subjects as career guidance, locating funding sources, college preparation, and the transition from high school to college. Collaboration is a primary activity of the Center, and tips for building collaborative efforts are listed. In addition, operational and funding aspects of running Center programs and the Center itself are discussed. Finally, the report examines the various considerations and steps required in order to develop such a Center in other communities. (GLR)

learning may prove a cost-effective addition to, or substitute for, some current educational practices. Potential applications include use in smaller and more isolated schools and the provision of key lessons to multiple or remote sites. Four appendixes contain the trial interview schedule and comments and draft reports from three evaluators. (SLD)

IDENTIFIERS- Internet; New York City Board of Education; \*Sense of Community

In the fall of 1990, seven teachers at the Ralph Bunche School, a public elementary school in Harlem (New York) began an experiment in school restructuring they called the Computer Mini-School. An unexpected outcome of the project was an increase in standardized test scores among their 120 students. This outcome is explored. It is argued that the greater sense of stability and community that the program brought about was a contributing factor. The background and history of the project are traced. Students and teachers developed a tradition of staying outside school hours, in many cases adding to the instructional time available. A whole language approach to literacy was used, and computers were used extensively for student writing and a student newspaper. From the experiences of the Ralph Bunche School, the following principles for design of a project-based school are presented: (1) students and teachers take increasing responsibility; (2) workplaces are the units of work and communication; and (3) connecting the local area network and wide area networks, such as the Internet, is very useful. The sense of community and emotional belonging that became possible with the smaller class sizes, educational technology, and teacher sense of ownership were probable contributors to improved achievement test scores. Two figures illustrate the discussion. (Contains 5 references.) (SLD)

IDENTIFIERS- State University of New York Stony Brook

This workbook on library skills for psychological research covers: (1) how to look up books by title or author, including an introduction to STARS (the Stony Brook Automated Retrieval System); (2) how to find books by subject using STARS and how to consult the Library of Congress List of Subject Headings; (3) the kinds of informational questions in psychology that can be answered with reference works and the types of reference books available; (4) the importance of journals for psychological research and how to identify appropriate journals; (5) how to use a periodical index, the Stony Brook Union List of Serials, and the titles of periodical indexes useful for research in psychology; (6) how to use abstracting sources and the titles of abstracting sources useful for psychology; (7) how to use the Social Sciences Citation Index, CD-ROMs, and computerized information retrieval; (8) how to use newspapers and general magazines, the use of specialized newspaper indexes, and location of microform articles; (9) the use of reference sources for getting information about psychological tests and measures; and (10) government documents in the Stony Brook library and how to locate appropriate documents. Each chapter contains review questions, an answer key, and samples of questions that appear on the course practicum exam. (KRN)

educational telecommunications and to provide training and technical and program support for any individual or organization in the state. A statewide educational telecomputing network was created with participants from virtually all of the 92 school districts in the state, most of its colleges and universities, and a majority of the 16 technical colleges. This report is the fourth of four annual reports summarizing the objectives and accomplishments of the project. The project has been able to take advantage of a wide area network connecting South Carolina institutions of higher education to conduct training seminars and has provided extensive training and technical support for the telecommunications system that must be regarded as in its infancy. Teachers across the state are receiving training and learning to use electronic information applications. Some of the remaining problems and issues for the future of the network are discussed. (SLD)

the Office of the Chancellor of the California Community Colleges, state community college systems outside California, and the Center for the Study of Community Colleges, which provided nationwide statistics. Results of the study included the following: (1) before the fee increase, approximately 7% to 15% of California's community college students held a bachelor's degree or higher, with the attendance rate of college graduates increasing gradually in recent years; (2) there was an overall increase in student enrollment in California community colleges between 1990 and 1992; (3) while college enrollments were up 3% nationwide, California experienced a nearly 9% drop in enrollment in spring 1993; (4) California experienced a systemwide drop of nearly 50% in baccalaureate or higher level students in spring 1993, representing a 4% overall student loss; and (5) the number of full-time equivalent students is declining, with students taking fewer units. A bibliography, a list of tables, and the survey instrument are included. (MAB)

In 1987, the Chancellor's Office of the California Community Colleges (CCC) began implementation of the Management Information System (MIS) to improve its data collection and analysis capabilities by utilizing electronic mail communications systemwide. Specifically, the project seeks to replace paper copies of data generated for reporting requirements and serve as a resource for local research, examination of policy issues, and inquiries about the CCC. Phase I of the MIS was initiated in 1989-90, making data available concerning student profiles, course and program outcomes, matriculation, student services programs, high school performance reports, curriculum analysis, vocational education accountability, student high school of origin, and course data. To date, 57 of the 71 CCC districts have supplied all the MIS data files in phase I at least once. Phase II of the MIS project was begun in 1992, providing the CCC districts with grant money to enhance electronic mail access and make more data available via the MIS, including staff demographics, vocational education, basic skills limits, transfer and articulation, and college calendar information. In addition to the incentive grants, the Chancellor's Office has funded other projects to provide electronic access to frequently requested CCC documents. Appendixes provide information on districts reporting data as of August, 1993 and describe the Systemwide Communications Infrastructure designed by the California Community Colleges to aid the MIS project. (MAB)

equate time spent in a physical activity to mileage. Participants logging over 50 miles received a tee shirt. The first group of participants began in fall 1992, and 15 employees completed at least 50 miles. Each subsequent group has had an increased number of participants, each developing his/her own personal work out program. A sample progress chart is included. (MAB)

(141), Information Analyses/State-of-the-art Materials (070)

DESCRIPTORS- Adult Development; Adult Learning; Adult Vocational  
Education; Career Development; \*Child Care Occupations;

Employment Programs; Federal Programs; \*Job Training;

Literature Reviews; \*Low Income Groups; \*Mothers; \*Parent

Education; Parenting Skills; Program Descriptions; Research and

Development; \*Theory Practice Relationship; Welfare Services

This report provides an overview of the second year of the Family

Education and Training Program, a project constructed to: (1)

investigate the impact of a comprehensive child care training  
program on the employability of low-income mothers; and (2)

assess the effect of training and support in parenting and job  
readiness on parenting skills and children's cognitive and

social competence. During the first year of the project, a

comprehensive literature review was conducted. During the  
second year, the idea behind the project was converted into a

field program and research design. Based on findings from the  
literature review, an intervention was designed, an

implementation plan was developed, and a site was selected.

Section I of the report introduces the project, following which

section II presents key findings from the Year I literature

review. In sections III, IV, and V, the report reviews existing  
child care training, parenting, and job readiness curricula,

with the goal of laying the foundation of the curriculum to be  
used in the project. Section VI surveys the experiences of

current and recently operating child care training programs,  
culling field-based lessons on program structure, population,

staffing, support services, and outcomes. Section VII recounts  
advancements made in locating an appropriate home for the

program and developing a research design for evaluating the  
program. Finally, section VIII explicitly describes the

structure and content of the program's proposed intervention,  
detailing its framework, schedule, and staffing patterns. Four

appendices present reference lists of child care training  
curricula and projects, parenting curricula, and job readiness

curricula. (Contains 46 references.) (Author/AC)

categories were selected, and one example of each program was videotaped. Two 5-minute segments from each program were selected for coding, and trained coders analyzed formal features of these segments. Analysis revealed that serious re-enactment and serious reality programs were similar to primetime news programs in terms of their formal features, and trained coders had difficulty in accurately distinguishing these two categories of reality-based programs from news programs. \*Government Subsidies; Services for Families with Child Prog  
(Australia); Special Needs Children

This paper examines issues raised in an earlier paper prepared by the Australian government, viewed from the perspective of the children's services field. The government paper discussed fee relief and operational subsidies, and suggested five possible funding packages. Part 1 of the paper considers operational subsidies in child care. This part outlines the history of the use of operational subsidies, and of funding provisions of the Child Care Act and within the Services for Families with Children Program (SFCP); reviews proposed changes to child care funding policies; and examines likely consequences of the proposed changes. Parts 2 through 7 discuss: (1) funding of services for children with special needs; (2) fee relief; (3) child care not related to parents' work situation; (4) tax issues; (5) reforming SFCP; and (6) recommendations on child care by the National Association of Community Based Children's Services and the Australian Early Childhood Association. Descriptions of available operational subsidies and fee relief are attached. (MM)

\*Parent Role; \*Preschool Children; Preschool Education;  
Qualitative Research; Rating Scales; \*Reading Aloud to Others;  
Reading Habits; Reading Research; Self Concept; \*Story Reading;  
Vocabulary Development

To gather information on the relationship of parent behavior during reading situations to preschool children's cognitive ability, a study of 12 female and 9 male preschool children and their parents was undertaken. Children were administered a battery of tests that measured intelligence, creativity, perceived self-competence, and language skills. Parent-child interactions during reading time were assessed by videotaping parents while they read two stories to their children, one containing words and concepts easy for the child to understand, the other containing vocabulary and concepts developmentally advanced for the child. These sessions were qualitatively assessed according to nine variables, which were: parents' adjustment to the child's needs, feedback, verbal stimulation, type of utterances outside of reading, and consistency of storytelling; children's orientation and level of utterances; general interaction; and length of interaction. Finally, questionnaires completed by parents provided information on the quantity of home reading, the dynamics of parent-child reading sessions, and parents' reading practices. Results revealed significant relationships between the quantity of parent-child reading interactions and the child's level of vocabulary development. Children's creativity was related to the quality of parent-child reading interactions, and children's perceived competence was related to both the quantity and quality of parent-child reading. The parent questionnaire and qualitative rating scales for reading activities are appended. (BCY)

DESCRIPTORS- Child Development; Early Childhood Education;

\*Educational Trends; \*Information Dissemination; Information Utilization; Knowledge Level; Specialization

IDENTIFIERS- \*Educational Issues; ERIC Trends Issues Papers; Information Load; Knowledge Acquisition

This monograph consists of a paper outlining current trends in education and discussing issues related to the dissemination of knowledge, and a selected ERIC bibliography on this subject. Trends highlighted in the paper include: (1) the expansion of information; (2) the increasing pace of specialization; (3) the tendency of groups interested in education to blame other groups for the problems of education; and (4) the development of public and political sentiment against professionals and experts. This latter trend has an impact on education in various ways: through the inclusion of community leaders who are not experts in education on panels that set educational policy; through the conflict between fundamentalist groups and educational innovators; and via the punitive tone of recent school reforms. Issues discussed include: (1) the need to disseminate that amount of information which optimizes users' acquisition and adoption; (2) the benefits of information redundancy; (3) finding the balance of small- and large-scale concepts in research; (4) the "vividness" problem and use of the media; (5) presentation of information at a time propitious for its use; and (6) different orientations toward knowledge held by researchers, educators, and clinicians. The implications of these trends and issues for educational practice are briefly examined. The bibliography of documents and journal articles on the dissemination of educational knowledge that follows the paper were selected from a search of the ERIC database. Each item in the bibliography contains bibliographic information and an abstract of the document or article. (BC)

concerning the status of working teenagers. A questionnaire was sent to all public school principals (N=182) who had students in grades 9-12; 149 principals or 82% responded. Results indicate that 30 percent of South Dakota students age 14 years or older work, with the greatest percentage of working students from large school districts. Few schools (18 percent) use a work permit form. A perceived benefit associated with students working is an increased sense of responsibility; however, respondents were split in their perceptions of willingness to stick to a task, sense of accomplishment, and increased self-esteem as benefits of working students. In addition, 22 percent of respondents added money as a benefit for working students. Drawbacks to student employment include decreased school involvement, decreased academic performance, and decreased time spent on homework. Few administrators viewed the effect of working on student learning as a serious problem; most respondents felt this was a slight to moderate problem. (LP)

PUB TYPE- Reference Materials - Directories/Catalogs

(132), Reports - Descriptive (Program/Project Descriptions) (141)

DESCRIPTORS- Bilingual Education; \*Early Intervention; English (Second Language); \*Family Programs; \*Home Programs; \*Migrant Children; Migrant Education; Migrant Programs; \*Parent Education; Parenting Skills; Parent Participation; Parents as Teachers; Preschool Children; \*Preschool Education

This document describes programs that serve migrant preschool children and their families or that would be adaptable to the migrant population. Model programs illustrate trends in the direction of a "whole family" approach to early childhood education, respect for the importance of proficiency in the child's first language with regard to developing skills necessary for later learning, and a concern for the integrity of the family. Program directors emphasized the importance of working cooperatively with other community agencies to optimize the services available to migrant families. Most of the 10 program summaries contain: (1) name and address of contact person; (2) description; (3) environment or location of the program; (4) curriculum or learning plan; (5) materials needed; (6) staff needed; (7) benefits and results; (8) problems; and (9) suggestions. Additional information provided in this guide includes a description and directory of the Migrant Education Even Start Program, which integrates early childhood education and adult education, and a description of the National Preschool Coordination Project, which provides interstate coordination in the identification and development of effective educational services for preschool migrant children and their parents. IDENTIFIERS- \*College Science Instrumentation Program

The College Science Instrumentation Program (CSIP) was developed to provide seed money matching funds for the acquisition of laboratory instrumentation in order to improve the quality of undergraduate science/engineering education. This report describes the impact of the program and the program characteristics during the years 1985-87. An introduction provides background information about the number of grants awarded by the CSIP program, how the program evaluation was conducted, and the instrumentation used in the evaluation. Among grantees, 434 projects were sampled and 391 responded. Among unsuccessful applicants, 375 were sampled and 311 responded. Findings showed a 450 percent return on the CSIP investment and an increase of 130,000 square feet of laboratory space at grantee institutions. Three-fifths of the unsuccessful applicants reported that they obtained funding for equipment they had hoped to receive through CSIP funds. Further findings related to CSIP impact on students, faculty, departments, and institutions. The second part of the report describes CSIP program characteristics. The program attracted a total of 3,226 proposals from 811 undergraduate colleges and universities. Overall, 86 percent of the 1985-1987 grantees reported near or full implementation of the program. Program administration was considered fair by questionnaire respondents. Appendices include a list of CSIP site visit consultants and copies of the questionnaires sent to grantees and unsuccessful applicants. (Contains 41 tables/figures). (MDH)

chemical bonding. Results of these comparisons indicated that none of the strategies were superior ( $p < .05$ ); however, each had notable strengths and weaknesses. The students in the remedial group had the worst attendance, but scored the highest of all treatment groups on the bonding exam. Students in the worked examples treatment group had the best attendance, but derived the least benefit as indicated by the smallest increase between pre- and posttests and the weakest performance on the bonding exam. (Author/PR)

(Education, Culture and Development) contains a review of the major problems that developing countries face in providing adequate and relevant education to nations, and three articles highlighting the relationships among education, culture, and development. Section 2, "Education and Culture," deals more specifically with the link between education and culture, indigenous knowledge and indigenous learning, popular culture, creating of a national identity, and the relevance of social research in intervention systems. The third section is "Education and Productive Life." Articles in this section discuss education for self employment at the primary school level, work experience programs in secondary schools, and technical and vocational training for girls. The final section discusses educational research and networking. (DK)

\*Educational Testing; Educational Trends; Elementary Secondary  
Education; \*Evaluation Methods; Holistic Evaluation; \*Social  
Studies; \*Student Evaluation

IDENTIFIERS- \*Alternative Assessment; ERIC Digests

Alternative forms of evaluating student progress are changing testing or assessment in U.S. schools. From the teacher-made to the standardized test, the familiar over-emphasis on multiple-choice items is giving way to expanded generative formats in which students are called upon to demonstrate mastery through applications in which they use complex processes and webs of knowledge and skill. This Digest discusses three implications that changing assessment types will have for the social studies. First, to enable students to succeed on alternative assessments, it is imperative that the traditional social studies curriculum be re-examined and reorganized to insure mastery of knowledge, cognitive processes, and behaviors that characterize civic competence. Second, social studies instruction must provide students with real experiences as active and producing members of the community, structured to allow practice in thinking and acting as citizens. Third, assessment should no longer be viewed as separate from instruction. Students should have a clear understanding of expected outcomes of instruction and how evaluation will occur. A list of 12 references is included. (DB)

pieces are divided into the three sections. Those in the first section teach that choices have consequences. The second section deals with the rights of others. The final section works with the issue of developing a spirit of community in a country that values and celebrates individualism. The three scripts in this section explore how people treat each other and work together in a community. Issues include discrimination, problem solving, and taking care of each other. Advice on how to script a story is provided. The works are presented to be read in the form of a readers' theater, rather than to be performed as a skit or play. The emphasis is on participation not on being an audience. (DK)

IDENTIFIERS- \*Austin Science and Mathematics Consortium TX

The Austin (Texas) Science and Mathematics Consortium funded by a  
4-year grant that has 2 basic goals: to improve the skills of K-  
12 teachers in science and mathematics and to increase student  
learning and performance in science concepts. Program  
activities, which began in 1990-91, focus on four components:  
curriculum development, staff development, student  
participation, and private sector involvement. This evaluative  
report relates findings that emerged from survey data collected  
from participating teachers and students. The three new  
curricula piloted during 1991-92 focused on environmental  
issues and received positive ratings from the piloting  
teachers. Most students who participated in the pilot curricula  
projects reported an increased knowledge and awareness of  
environmental issues. Some students reported increased interest  
in science. During the three staff development institutes held  
for teachers during the summer of 1991, teachers received  
training in educational technology and curriculum development.  
As a result of the Technology Institute, teachers reported an  
increase in both their computer skills and classroom use.  
However, few of the teachers who participated in the institute  
on water pollution consistently monitored their curriculum-  
related activities, resulting in little information on the  
impact of this staff development activity. The program included  
extensive private sector involvement. (IAH)

How To Conduct Collaborative Action Research.

PUB DATE- 92

NOTE- 89p.

LANGUAGE- English

EDRS Price- MF01 Plus Postage. PC Not Available from EDRS.

PUB TYPE- Guides/Methods/Techniques (For Practitioners) - General (050)

DESCRIPTORS- \*Action Research; Classroom Research; \*Collegiality; Educational Objectives; Elementary Secondary Education; Professional Recognition; \*Research Methodology; Resistance to Change; \*Teacher Role; Theory Practice Relationship

IDENTIFIERS- \*Professionalization of Teaching; Teacher Isolation

Collaborative action research, conducted by teams of practitioners, is a process that enables teachers: (1) to improve student learning, (2) to improve their own practice, (3) to contribute to the development of their own profession, and (4) to overcome the isolation commonly experienced by classroom teachers. By promoting collegial relationships among practitioners, collaborative action research fosters professionalism in teaching. The process of collaborative action research has five sequential steps: problem formulation, data collection, data analysis, reporting of results, and action planning. Three techniques that facilitate effective problem formulation are reflective interviewing, analytic discourse, and graphic representation. Categories of data sources available to action researchers include existing sources (e.g., student work, archival evidence), tools for capturing everyday life (e.g., journals, logs, videos, observation checklists), and tools for questioning (e.g., interviews, written surveys, tests). The data analysis process involves identifying themes in the data collected and, then, using a scientific codification process to "interrogate" the data. Results are reported to break teacher isolation, contribute to the knowledge base, gain a voice in quality control, and foster a school culture that promotes learning for all. Four basic strategies can be used to implement an action plan based on data from action research: simple presentation of the data, establishing a pilot program, establishing a competing pilot program, and using the research as educational specifications. (Contains 30 references.) (IAH)

Attitudes; Teaching (Occupation); \*Teaching Experience

IDENTIFIERS- Reflective Teaching

This paper examines secondary preservice student teachers' conceptions of teaching and reflections upon teaching experiences, as expressed in journals written by the student teachers. The paper presents excerpts from the journals of several student teachers. A study is then reported of a student teacher in social studies and his cooperating teacher, who each kept dialectical journals on the student teacher's actions and perceived experiences. The journal information was categorized into four domains: ability of self, classroom skills, subject content, and concern for students. A survey of student teachers and cooperating teachers was also conducted, with the result that cooperating teachers scored student teachers higher in teaching ability than did the student teachers themselves. The paper concludes that training in teacher education preparation programs can be demonstrated and better understood through the use of journals. Copies of survey forms are appended. (JDD)

Teachers; Teacher Education Programs; \*Theory Practice  
Relationship

IDENTIFIERS- Monash University (Australia)

This case study describes a preservice program for prospective  
high school science teachers at Monash University in Victoria,  
Australia. The program views student teaching as only the first  
stage of career-long professional development, promotes the  
notion of the reflective practitioner, maximizes student  
teachers' contacts with school pupils and teachers, and defines  
pedagogy with a focus on constructivist research. The  
preservice program has evolved in response to research and  
continues to evolve; a considerable proportion of the research  
had been conducted as part of this program. The research-  
derived principles underlying the preservice program are  
considered. Salient issues in the research-practice interplay  
are discussed, including the requirements of professional  
registration to teach in Victoria, the problem of some faculty  
members wanting to abandon preservice teacher education, low  
academic status of preservice teacher education, and isolation  
of preservice from ongoing professional development. (JDD)

IDENTIFIERS- \*Tennessee; Tennessee Comprehensive Assessment Program

Investigators completed a series of studies of data reported in Tennessee's 1988-89 school district cards, and compared these with 1990-91 school district report cards. The relationships among 15 school district variables and relationships between each variable and student outcomes were determined. The 1990-91 report cards contain results of the new Tennessee Comprehensive Assessment Program. Several conclusions from the previous study were reinforced by the current one. Policymakers at all levels need to consider that few of the individual inputs commonly associated with student achievement have much impact on student performance. With the exception of student attendance (and perhaps per pupil expenditure), treatment of any isolated variable will have little effect. It is urged that consideration be given to collecting, reporting, and analyzing data on such things as school organization, school culture, student motivation, parental involvement, instructional methodologies, curriculum features, and other factors. Building-level results appear more useful than do district-level results, and report cards appear to be only as good as the assessments used to determine student performance. Ten tables and 1 figure summarize findings, and seven appendixes contain seven additional tables. (SLD)

PUB TYPE- Reports - Evaluative/Feasibility (142), Reports - Research/Technical (143), Speeches, Conference Papers, "Papers Presented at..." (150)

DESCRIPTORS- Academic Achievement; Cognitive Processes; College Faculty; College Students; Educational Assessment; Elementary Secondary Education; \*Evaluation Methods; Grades (Scholastic); \*Grading; Higher Education; Holistic Evaluation; Performance; Statistics; \*Student Evaluation; Summative Evaluation; \*Teacher Attitudes; Teacher Made Tests; \*Thinking Skills

IDENTIFIERS- \*Performance Based Evaluation

Qualitative methods for defining and assigning letter grades on classroom tests were studied. A hierarchical letter-grade scale is described that combines teachers' judgments of the importance of subject matter concepts and their classification of assessment tasks as reflecting cognitive processing skills identified from recent research. Using this grade assignment procedure shifts teachers' thinking so that grades on summative classroom assessments reflect quality levels of student thinking instead of simply the number of points students attain. The model incorporates a teacher's perception of the level of thinking that a student must use to perform a task and the value a teacher places on successful performance. Combining the thinking skills and importance factors can be done by crossing the factors in a two-way table, which can then be used to organize tasks into testlets or subtests. Four possible teacher-specific grading models can be derived from the ways teachers associate grades with thinking skills and subject content. The method was tested with 5 statistics instructors using an existing test and with 2 instructors whose 48 students took an examination designed for the grading method. This approach to grading provides an interesting rationale and merits further investigation. Four tables present study findings, and six figures illustrate the discussion. (SLD)

Relationship; \*Help Seeking; High Schools; \*High School  
Students; Interpersonal Competence; Junior High Schools;  
\*Junior High School Students; \*Peer Relationship; Predictive  
Measurement; \*Student Behavior; Test Reliability

IDENTIFIERS- Ontario; \*Self Report Measures; Student Surveys

Researchers have used children's self-reports to investigate the  
conditions under which children seek and give help. Little  
attention has been given to examining the predictive value of  
such measures, even though investigators in other domains have  
found discrepancies between self-reports and observed behavior.  
Two studies were conducted in which observations of 58 7th- and  
8th-grade students and 96 9th- and 10th-grade students in  
Ontario (Canada), respectively, working in cooperative learning  
groups were compared with self-reported intentions to ask for  
and give help to peers. Both studies found that self-reports  
were poor predictors. The low correlations are attributed to  
student uncertainty about their competence on the task they  
were working on when observations were made, rather than to  
inadequacies of the survey instruments. Four tables present  
study information. (Author/SLD)

PUB TYPE- Numerical/Quantitative Data (110), Reports - Descriptive (Program/Project Descriptions) (141)

DESCRIPTORS- \*Academic Records; Comparative Analysis; \*Core Curriculum; \*Course Selection (Students); Graduate Surveys; \*High School Graduates; High Schools; National Surveys; Required Courses; \*Research Methodology; \*Statistical Data; Tables (Data)

IDENTIFIERS- High School and Beyond (NCES); High School Transcript Study 1987; High School Transcript Study 1990

The 1990 High School Transcript Study (HSTS) collected 21,607 transcripts from 330 schools. Similar studies were conducted of high school course taking patterns in 1987 (the 1987 High School Transcript Study of approximately 22,700 transcripts) and in 1982 (approximately 12,000 transcripts from the High School and Beyond Study). The introductory section of this report contains highlights of the results, descriptions of all three studies, an introduction to the tables of data, a discussion of the significance of differences reported in the tables, and the comparability of samples. Seventy-nine data tables document significant, across-the-board increases in the percentage of graduates taking core curriculum degree programs since 1987. The percentage of graduates taking at least a minimal academic program rose from 13.4 percent in 1982 to 28.6 percent in 1987 and 39.9 percent in 1990. The percentage of graduates taking the core curriculum rose from 1.9 percent in 1982 to 12.0 percent in 1987 and 17.3 percent in 1990. Appendix A provides the 79 data tables. Appendix B lists codes for within subject categories. (SLD)

IDENTIFIERS- \*National Education Goals 1990; National Education Goals Panel; Progress Reporting; \*Reform Efforts; United States

This third annual National Education Goals Report continues the work begun at the Charlottesville (Virginia) Education Summit in 1989, when the nation's governors and President Bush agreed on six national goals for education to be achieved by the year 2000. The goals were intended to energize public opinion and ongoing education reform efforts by holding the United States to much higher expectations for all students and for the schools and learning systems that serve them. This volume describes the educational standing of the nation. In this third report, the focus is on the rationale for and potential implications of the movement the effort has come to be most closely associated with: establishing voluntary nationwide education standards. As in the past, the report contains the most up-to-date information available on the nation's current status with regard to meeting the six goals. Overall, the findings continue to reveal how far the nation is from achieving the goals. Modest progress is apparent in some areas, such as mathematics achievement and school safety, but there is stagnation or movement in the wrong direction in others (high school completion and adult literacy). The current rate of progress is wholly inadequate for achievement of the goals by the year 2000. New analyses conducted for the Goals Panel show that nearly one-half of all infants born in the United States begin life with one or more factors considered risky to their long-term educational development. While the incidence of students being victimized at school appears to have declined slightly, the levels are still unacceptably high. About one in five 8th graders report being threatened with a weapon in 1992, while one out of ten report carrying a weapon on school grounds. By documenting without equivocation how much more effort is needed from all Americans, the Panel creates the conditions necessary for a significant renewal in American education. The report is illustrated by 137 exhibits. Three appendixes provide technical notes and sources, descriptions of federal programs, and department and agency titles. (SLD)

IDENTIFIERS- \*Parents Assuring Student Success Program

The Parents Assuring Student Success (PASS) program draws on the talents and energies of parents to assist educators in raising educational standards for every child. The first part of the manual teaches parents what it takes to become an effective learner. The focus is on study skills, including well-known learning strategies. The second part of the manual gives parents the opportunity to acquire skills in teaching and reinforcing critical student study habits at home. Parents can study the PASS modules at home or meet in workshop groups conducted by a variety of parent education organizations. Such workshops should be geared to neighborhoods, be planned by a parent team, include social as well as learning activities, and target needy parents. Workshop modules encompass the following topics: (1) parent attitude; (2) structuring the home environment; (3) study skills; (4) homework and learning expedients; (5) note-taking skills; (6) helping children prepare for tests; (7) memory enhancement and developing thinking skills; and (8) teaching reading skills. This manual has been designed particularly for use with parents in urban school systems. (SLD)

The dropout problem in the United States is explored; and some suggestions for reducing the dropout rate are offered for parents, teachers, and principals. Several indicators have been recognized as placing a student at risk of dropping out of school. Dimensions of alienation have also been identified, as have social factors that contribute, including poverty, crime, drug and alcohol use, and teen pregnancy. Twenty-five general suggestions are given for the educational system to help reduce the dropout rate. Parent participation is essential, and a list of 111 suggestions is presented for parents, most centering around being a good example to a child. One hundred and five suggestions for educational improvement are directed toward teachers, and a final 104 suggestions are aimed at principals. Parents, teachers, and administrators have vital roles to play in combating dropouts. (SLD)

IDENTIFIERS- Internality Externality; \*Positive Impact Program

In response to concerns about the academic and discipline problems of young black male students in a small southern town, the Positive Impact Program (PIP) was developed for at-risk black males. Two possible at-risk factors, locus of control and the quality of parental verbal interaction, were studied for participants in the PIP. Locus of control and communications with parents were compared to those of previously normed groups. Subjects were 42 black males in grades 6, 7, and 8 identified as at-risk by teachers. The sample was found to be more externally controlled than the normative sample of same-age students, but equivalent to that of previously studied at-risk groups. The Verbal Interaction Questionnaire (developed by P. C. Blake in 1991) scores were comparable to those for rural predominantly white male and female high school students. In general, students more internally controlled reported having more positive parental verbal communication, while those more externally controlled had more negative parental verbal communication. Eighteen of the 42 boys were in the PIP, but no significant differences were found for these students on either measure, and no locus of control scores were available from the period before PIP participation. Additional program evaluation will be conducted. One table contrasts students in the PIP and non-PIP groups. (SLD)

DESCRIPTORS- Black Education; Classroom Desegregation; \*Community Attitudes; \*Desegregation Litigation; Educational History; \*Educational Trends; Elementary Secondary Education; Integration Readiness; Public Schools; \*Racial Attitudes; School Demography; \*School Desegregation; Social History; State Government; Voluntary Desegregation

IDENTIFIERS- \*Brown v Board of Education; \*Georgia; Policy Implications; Social Movements

An interpretive overview of Georgia's response to the 1954 school desegregation decision is presented. The study, approached historically, concludes that massive resistance to desegregation crumbled in the state in large part due to forces within the state. It is argued that the public's commitment to public education was stronger than its support of strict segregation, and this was significant because it took state government out of the business of legislating resistance and thus moved Georgia toward a more free and equitable society. Bibliographies list 64 primary and secondary sources. (SLD)

IDENTIFIERS- California; \*Preservice Teachers

This paper describes a simulation activity, which was coupled with Confluent/Gestalt meta-processing, that was designed to address the affective component of a mathematics procedures class for preservice teachers. The activity consisted of an explanation and demonstration for teacher educators. It is argued that a reconstruction of disposition towards mathematics is an essential component of effective professional education programs. In order for student teachers to acquire a positive disposition towards mathematical thinking, instructors must help these students to deconstruct their prior learning, which may have negatively impacted their attitudes toward mathematics, and to reconstruct a new understanding of mathematical processes. In the simulation which is presented, participants experience an intervention, characterized by Confluent/Gestalt meta-processing, that can be used with student teachers in a mathematics methods class. The intervention is designed to access the powerful affective inhibitors to performance. Confluent education is an instructional model, in which the learner plays an active role, based on the premise that all learning is accomplished by an affective as well as a cognitive component. Meta-processing is a form of reflective thinking that occurs in the intervention, as participants examine their affective responses. (IAH)

DESCRIPTORS- Cognitive Style; Course Content; \*Educational Psychology; Elementary Secondary Education; Foreign Countries; Higher Education; \*Preservice Teacher Education; \*Student Attitudes; \*Student Research; Student Teachers; \*Student Teaching; Teacher Education Curriculum; Teaching Methods; \*Theory Practice Relationship

The two conference presentations contained in this document are entitled, respectively, "Experience versus Theory in Teacher Education: Student-Teachers as Researchers" by a tutor, J. Heywood, and two student teachers, A. FitzGibbon and L. A. Cameron, and "Researching Instruction while Student-Teaching" by student teacher Paula Carroll. The first paper describes student attitudes toward a course in psychology in teacher education as they were systematically obtained during academic years 1989-90 and 1990-91. The course was called Applied Psychology of Instruction, and its purpose was to consider the range of instructional potential and to invite student teachers to experiment with as many strategies as possible during their teaching practice. Specifically, the study assessed student attitudes toward use of different theories of instruction, including: concept learning, imagery, decision making, matching learning styles to teaching, and discovery or guided discovery. The paper concludes that the course helped student teachers experience and understand the value of different approaches to teaching, and recommends that it be made into a 2-year course due to its extensive content. The data discussed are displayed

subjects tended to attribute their success to caring about others, hard work, organizational ability, and their ability to get things done. Other factors which respondents identified as highly significant in contributing to their success included risk taking and common sense. Respondents rated their ability to make money the lowest of the 20 areas on the questionnaire. Results are compared with results of a 1988 study by R. A. Jensen titled "Iowa's Young Leaders: Characteristics, Organizational Environments, and Career Orientations." The paper concludes that there are far more commonalities than differences between the responses of NSTOY designees and the responses of participants in the 1988 study, very few of whom were teachers. Environment; Higher Education; High Schools; Influences;  
\*Institutional Environment; Organizational Climate; Preservice  
Teacher Education; Socialization; Social Studies; \*Student  
Teachers; \*Student Teaching; Teacher Attitudes

This study, which examined the curricular decision making of student teachers, links research on the socialization of preservice teacher education with work focusing on socialization in the workplace. Interviews were conducted with four student teachers during their student teaching experience and 1 year after it. Curriculum materials used by the participants were examined, and some participants were observed teaching. The study found that: (1) the influence of particular institutional forces upon student teacher decision making is filtered through the cooperating teachers; (2) opportunities for significant student teacher curriculum decision making are severely limited; and (3) the school context discourages reflective approaches to teaching and incorporation of action research techniques. The study concludes that conception and execution of curriculum decisions are separated in practice for many student teachers. Therefore, student teachers do not experience important opportunities nor institutional pressures for personal decision making in the classroom. (Contains 22 references.) (JDD)

of qualitative research; students' dissertation projects; and the author's writing projects such as "Nora Barlow and the Darwin Legacy" and an essay on the biographical method for the "Handbook of Qualitative Research." The paper proposes that: (1) intense personal educational experiences lead to deeply held educational beliefs that may be strong enough to influence, if not control, educational practices, which has major implications for teacher education at all levels; (2) lives have interwoven strands that continue over long periods of time, and these strands can be broken into meaningful units such as episodes and projects, by individuals themselves or by outside researchers; (3) educational inquiry, including ethnography and action research, should occur in college and university classes; and (4) settings in which researchers live and work are important, as group norms are sometimes elevated to the status of "natural laws." DESCRIPTORS- Case Studies; \*Cognitive Processes; \*Cognitive Structures; Constructivism (Learning); \*Educational Research; Elementary Secondary Education; Higher Education; Preservice Teacher Education; \*Research Methodology; \*Student Teachers; Videodisks

This conference paper describes methodological tools being used to examine teachers' cognitive lives and to describe the meaning that teachers make of teaching, learning, and students in classrooms. Methodological difficulties with the "subsequent recall" approach and the "stimulation of current thought" approach are discussed. A set of techniques is then described that addresses the problems of comparability, internal validity, fidelity, and verisimilitude. The method involves making video recordings of cases that depict teachers and students involved in activities typically found in classrooms, recorded without unusual coaching or preparation in live classrooms. To assess the process of meaning-making in teachers, all respondents then view the same case; videodisks are used to allow for easy retrieval of any section of the case; the time between the respondents' initial meaning making as they examine the case and the time in which they describe their meaning is minimal; open-ended questions are used to reduce interviewers' influence on interview content; and key phrases elicited from the respondent during the interview are listed by the researcher on cards and then sorted into groups and labeled by the respondent, to develop an additional benchmark by which researchers can attempt to understand the respondents' meaning making. (Contains 14 references.) (JDD)

Smith, William E.  
Teachers' Perceptions of Role Change through Shared Decision Making: A Two-Year Case Study.

To determine whether the range of ability within the classroom has a significant effect on students' performance in mathematics, and to identify the class compositional or instructional characteristics that contribute to differences between homogeneous and heterogeneous classes in terms of mathematics achievement, an analysis was conducted using data from the Second International Mathematics Study. The sample consisted of 1,319 eighth graders in 79 classes from 61 schools. Data included pretest and posttest scores on the study's mathematics test, student and family characteristics, and student attitudes toward mathematics concerning effort. Hierarchical linear modeling (HLM) was used to study relationships. Results support previous research that found no advantage to being in a class with either heterogeneous or homogeneous ability levels. There was a non-significant effect of range of ability on the outcome. Results also point to the differentiating effect of previous achievement on subsequent mathematics achievement. Advantages of the HLM procedure are discussed. Four tables present study findings. An appendix describes the student-level variables. (SLD)

America's High School Sophomores: A Ten Year Comparison, 1980-1990.

PUB DATE- Jun 93

NOTE- 121p.

LANGUAGE- English

EDRS Price- MF01/PC05 Plus Postage.

PUB TYPE- Reports - Descriptive (Program/Project Descriptions) (141)

DESCRIPTORS- \*Academic Achievement; \*Academic Aspiration; Cohort Analysis; Comparative Analysis; Educational Change; \*Grade 10; \*High School Students; Longitudinal Studies; Minority Groups; National Surveys; Poverty; Racial Composition; Recreational Activities; Sample Size; School Activities; \*Self Concept; Statistical Data; Values

IDENTIFIERS- \*High School and Beyond (NCES); High School Sophomores; \*National Education Longitudinal Study 1988

This study of high school sophomores in 1980 and 1990 compares the experiences of students in the two cohorts, identifying changes in in-school and out-of-school activities, academic achievement, self-concept, values, plans, and aspirations. Similarities and differences between the two groups are documented using data from the National Education Longitudinal Study of 1988 (NELS:88) and High School and Beyond (HS&B, 1980). HS&B and NELS:88 sophomores are marked by basic demographic differences, including the smaller size of the NELS:88 1990 cohort, reflecting the baby bust of the 1970s, and a higher proportion of racial minority and poverty status sophomores in 1990. NELS:88 sophomores also reflect the influence of various waves of school reform since the late 1970s and early 1980s. Overall, the comparison paints a picture that is in most respects encouraging in its portrayal of the high school academic orientation and postsecondary expectations of the 1990 sophomore class. Positive changes, however, are typically small or moderate in magnitude. Among the findings are: (1) general and college preparatory program placement has increased, at the expense of vocational program placement; (2) patterns of extracurricular participation changed especially in musical activities (31% in 1980 to 22% in 1990) and in hobby clubs (21% in 1980 to 7% in 1990); (3) changes in sophomores giving high importance to particular life

IDENTIFIERS- \*Blooms Taxonomy; Hierarchical Models; \*Test Specifications

The functioning of a cognitive taxonomy within the test specifications of an allied health certification examination was studied. The taxonomy used was a simplification of the scheme of B. S. Bloom (1956), in which items were classified as comprehension, application, or analysis. Whether items written purposely to assess higher order cognitive processes actually assessed differing levels of cognitive processing was explored. A factor analysis of responses of 627 examinees does not support a cumulative hierarchical model of cognitive complexity. Several cases of model misfit were observed, in which some examinees performed better on the higher level subtest than on the lower level subtest, a finding that is counter to that which would be predicted under a functioning cumulative, hierarchical model. A finding that supported the hypothesis of functioning cognitive levels was that examinees who scored in the upper quartile of the higher level subtest were more likely to pass the examination than were those who scored in the lowest quartile. Overall, results support continued use of a cognitive classification dimension for test specifications. Implications for test specifications development, test construction, item writing, and score reporting are presented, as are limitations and suggestions for further research. Five tables present study findings. (Author/SLD)

IDENTIFIERS- School Culture; \*School Work Culture Profile; Statistical Analysis System

School culture has recently emerged as a framework for the study and interpretation of the structure and development of schools. This paper reviews a work culture productivity model and reports the development of a culture instrument. The School Work Culture Profile (SWCP) is a staff perceptions instrument on which school work culture is operationalized with 60 statements pertaining to existing work practices in a school, rated on a 5-point Likert scale. Early versions of the SWCP had been tested in pilot studies, including an investigation of content validity with 17 experts. The sample of subjects (n=498) for this study included 169 elementary school teachers, 140 middle school teachers, and 189 high school teachers. The Statistical Analysis System principal components program was used to examine factorial validity. The use of second-order component analysis shows areas of generalization across primary factors. Results indicate that the SWCP will provide a reliable profile of a school's strengths and weaknesses in its work

A Comparison of the Myers-Briggs Type Indicator Extraversion-Introversion Scale, and the Minnesota Multiphasic Personality Inventory 0 Scale (Social Introversion).

PUB DATE- 93

NOTE- 71p.; Master's Thesis, Fort Hays State University.

LANGUAGE- English

EDRS Price- MF01/PC03 Plus Postage.

PUB TYPE- Dissertations/Theses - Master Theses (042), Reports - Research/Technical (143)

DESCRIPTORS- \*Adults; Age Differences; Analysis of Variance; \*College Students; Comparative Testing; \*Extraversion; Introversion; Females; Higher Education; Males; Marital Status; \*Personality Measures; Psychological Patterns; Research Design; \*Sex Differences; Social Cognition

IDENTIFIERS- \*Minnesota Multiphasic Personality Inventory; \*Myers Briggs Type Indicator

The Myers-Briggs Type Indicator (MBTI) Extraversion-Introversion scale was compared with the Minnesota Multiphasic Personality Inventory (MMPI) 0 scale (Social Introversion) for 18 male and 66 female adult students in introductory courses in psychology, aged 17 to 83 years. A status survey design was used with a priori and post hoc groupings. Independent variables investigated were age, gender, and marital status. Dependent variables were the MBTI Extraversion-Introversion scale and the MMPI 0 scale scores. An analysis of variance was used to test the null hypotheses. Results suggest the following: (1) age and marital status should be investigated simultaneously when using the MMPI 0 scale scores; (2) an association is found between MBTI extraversion-introversion scores and the MMPI 0 score; (3) no association is found for age and the MBTI scores studied; (4) no association is found for gender and the MBTI scale scores studied; (5) no association is found between gender and MMPI 0 scale; (6) no association is found between marital status and MBTI scores studied; and (7) the two scales of the instruments studied appear to give approximately the same information. An appendix contains the authorization to use the case materials in research, teaching, or publishing. Three tables and one figure present study findings. (Contains 43 references.) (SLD)

PUB TYPE- Numerical/Quantitative Data (110), Reports - Descriptive (Program/Project Descriptions) (141)

DESCRIPTORS- \*Census Figures; Comparative Analysis; Decision Making; \*Educational Demand; Educational Planning; Educational Supply; Elementary Secondary Education; \*Enrollment Projections; Enrollment Trends; Futures (of Society); \*National Surveys; \*Population Trends; \*School Statistics; Trend Analysis IDENTIFIERS- \*Census 1990

Future trends in enrollment projections are useful to school planners who are involved in making decisions about long-term requirements for school facilities and teachers. The 5- to 17-year-old population is expected to increase by 13 percent over the projection period to 2003. During the projection period, total enrollment is expected in 1996 to surpass the level of 1971 (the previous peak), which is 2 years earlier than the previous projection. Enrollment in kindergarten through grade 8 reached its low in 1984 and has risen since, while enrollment in grades 9 through 12 did not reach a low until 1990. Enrollment in high schools is projected to increase by 22 percent. Trends are likely to differ by region and state. The present projections, the first ones based on 1990 Census figures, are higher than those previously presented. Three tables present enrollment projections and a comparison with past projections. The second volume of the third annual National Education Goals  
 Report contains profiles of the achievements of each state, the  
 District of Columbia, and five territories toward the National  
 Education Goals of 1990, which derived from the National  
 Education Summit of 1989. In brief, the goals for achievement  
 by the year 2000: (1) all children in America will start school  
 ready to learn; (2) the high school graduation rate will  
 increase to at least 90 percent; (3) American students will  
 leave grades 4, 8, and 12 having demonstrated competence in  
 particular areas, prepared for responsible citizenship; (4)  
 U.S. students will be first in the world in science and  
 mathematics achievement; (5) every adult will be literate and  
 possess the knowledge and skills needed in a global economy;  
 and (6) every school will be free of drugs and violence. The  
 profile for each state summarizes indicators for each of the  
 six goals, with tabulated data and a bar graph for each goal  
 for which information is available. The four-page profile for  
 each state lists (1) direct measures of the goal; and (2)  
 measures of the objectives. When available, baseline and 1993  
 Goals Report data are provided. Appended are 24 references and  
 technical notes relating to the statistical data. (SLD)

IDENTIFIERS- \*National Education Goals 1990; Progress Reporting;  
 Reform Efforts; United States

This Summary Guide to the third Annual Report of the National  
 Education Goals Panel continues the commitment of the Panel to  
 let the American people know the results being achieved in  
 education. Facts about performance are presented, with tangible  
 guidance about what each citizen can do to make the Goals a  
 reality. The National Education Goals developing from the  
 Education Summit of 1989 represent the educational centerpiece  
 of both the Bush and Clinton administrations and serve as a  
 nationwide compact for education. The most recent national  
 assessments indicate that students are showing some improvement  
 in mathematics, but that few understand complex mathematics  
 theory and problems. Similar findings appear in measurements of

have been successful in providing services to children and families and maintaining a close relationship between services and the welfare system were examined: (1) Integrated Family Services System, Oklahoma; (2) Greater Avenues for Independence (GAIN) Teen Parent Project, San Diego County (California); (3) a dropout prevention programs in Wayne County, Detroit (Michigan); (4) Teenage Services Act Next Step, Chemung County (New York); (5) Teenage Pregnancy and Parenting/GAIN, San Francisco (California); (6) ET CHOICES voucher and child care program, Massachusetts (and a supplemental site for adult case management); and (7) Parent and Child Education, Kentucky. Study findings are cautiously optimistic about the abilities of welfare agencies to play a richer role for children. It appears to be possible to identify practical tools and approaches to improve service delivery. Recommendations are made for advocates, policymakers, administrators, and others committed to the needs of children. (SLD)

DESCRIPTORS- \*Adolescents; Art Education; Childhood Needs; \*Disadvantaged Youth; Elementary Secondary Education; \*Ethnicity; \*Inner City; Juvenile Gangs; Policy Formation; \*Racial Identification; Self Concept; Sexual Identity; Social Control; Theory Practice Relationship; Urban Problems; \*Urban Youth

IDENTIFIERS- \*Identity (Psychological)

How ethnic identity and gender figure in building the embedded identities of youth in different contexts is examined, focusing on the self-concepts of inner-city youth. The voices of urban youth argue that their embedded identities, or multilayered self-conceptions, represent far more than simple labels of ethnic or racial membership. After an introduction "Identity and Inner-City Youth" by the editors, the following chapters are provided: (1) "Ethnicity and Gender in Theory and Practice: The Youth Perspective" (S. B. Heath and M. W. McLaughlin); (2) "Embedded Identities: Enabling Balance in Urban Contexts" (M. W. McLaughlin); (3) "Dances of Identity: Finding an Ethnic Self in the Arts" (A. Ball and S. B. Heath); (4) "Gangs, Social Control, and Ethnicity: Ways To Redirect" (J. D. Vigil); (5) "Child Saving and Children's Cultures at Century's End" (G. A. Fine and J. Mechling); (6) "Collaborate or Go It Alone? Tough Decisions for Youth Policy" (J. Langman and M. W. McLaughlin); (7) "The Winnowing of Organizations" (T. James); (8) "Misperceptions of Gender and Youth: Learning Together, Learning Apart" (E. Hansot); and (9) "Casting the Self: Frames for Identity and Dilemmas for Policy" (M. W. McLaughlin and S. B. Heath). (SLD)

\*Disadvantaged Youth; Dropouts; \*Drug Use; \*Family Life; Family Problems; High Risk Students; Interviews; \*Juvenile Gangs; \*Latin Americans; Secondary Education; Secondary School Students; Sexuality; Urban Problems; \*Urban Schools; Urban Youth IDENTIFIERS- African Americans; \*California (Los Angeles); Drug Use Forecasting Study; Hispanic American Students; Latinos; Los Angeles Unified School District CA; Sex for Crack Study; Student Surveys

The lives and places in society of urban youth at risk of dropping out of the Los Angeles (California) Unified School District schools are explored through interviews of adolescents whom the author met when doing field work in Los Angeles County. Data come from interviews conducted in the course of the 1991 Drug Use Forecasting Study (DUF) and the Sex-for-Crack study. Of the DUF sample, 394 were male and 44 female, with almost 60 percent Latinos and about 22 percent African Americans. Additional and more qualitative interviews were conducted with 123 of this sample. The Sex-for-Crack sample interviewed 40 dependent crack users in 8 cities in 1989-91. From these subjects, four social types of youth at risk for dropping out are identified: (1) gang members; (2) young parents; (3) substance abusers; and (4) youth from dysfunctional homes. The characteristics and problems of each group are explored. The different types of youth have different needs at different levels of potential intervention. Gang members, out of alienation from society, have created societies of their own. Teen sexuality must be addressed, and youth abusing drugs and alcohol need more realistic education at earlier ages. Child abuse is a dramatic example of the recurrent problems of dysfunctional families that must be addressed in multiple ways. Feelings of alienation from school can only be relieved when students and their parents feel less alienated from society. (SLD)

IDENTIFIERS- Drug Trafficking; \*Florida (Tampa); Student Surveys

Young people with records of involvement in the juvenile justice system were studied in Florida, primarily in the inner city of Tampa. The study is part of a longitudinal study of predictors of drug use, delinquency, and criminality. Overall, 32 percent of the 297 adolescents interviewed reported engaging in drug sales in the year preceding their initial interviews, and 35 percent sold drugs 1 or more times in the follow-up period. Only 13 percent lived with both biological parents, and most came from families of low to moderate social status. The following common findings indicative of at-risk status were physical abuse and sexual abuse, drug use, and other delinquent

Results

IDENTIFIERS- African Americans

African American urban sixth graders (28 males and 22 females),  
the majority of whom tested at or above grade level on the Iowa  
Basic Skills Test, were interviewed about 2 methods of  
selecting students for a summer science program. One method  
focused on student grades, and the other method focused on  
student interest in science. Subjects initially did not  
distinguish one method as significantly fairer than the other.  
By the end of the interview, however, approximately one-third  
of the subjects chose the selection method based on grades/test  
scores as fairer, while approximately one-third chose the  
method based on student interest as fairer, and the remaining  
subjects took various other positions. Male subjects shifted  
from an initial preference for student selection by grades to a  
more uncertain position. Female subjects continued to rate  
student selection by grades as a fairer selection process.  
Subject responses to the fairness of selection methods produced  
four themes relating to their views on the purpose of school.  
Implications of African American students' perceptions of  
fairness of student selection methods and subsequent views of  
the purpose of school are discussed. Two tables present study  
data. (Author/SLD)

Teacher Education Programs

IDENTIFIERS- Holmes Group; Oakland University MI; \*Professional  
Development Schools

Improved professional education for teachers, counselors, and  
school administrators is needed in order to successfully reform  
schooling. Fundamental change in professional education  
requires educational partnerships between schools and  
universities. The professional development school (PDS)  
represents a pivotal element in the strategy of utilizing  
partnerships to effect restructuring of schools and teacher  
education programs. The place of these schools in the  
professional preparation of educators is considered analogous  
to the place of teaching hospitals in medical education.  
Although there are similarities between PDSs and laboratory  
schools, there are also differences that contribute to the  
PDSs' uniqueness. Establishing a PDS is a complex process,  
which can be expected to pass through four phases of  
development: exploration, orientation, implementation, and  
operation. This paper provides guidelines and identifies issues  
related to each phase. Two documents are included in the  
appendices: "Oakland University Michigan and Pontiac Schools  
Professional Development Schools: Criteria for Partners" and  
"Application for Oakland University-Pontiac Professional  
Development School." (IAH)

IDENTIFIERS- \*Preservice Teachers

Prospective teachers and their supervisors completed a pre- and post-student teaching questionnaire concerning the perceived impact of education and training on their capabilities to teach. Forty-one undergraduate and 18 graduate student teachers participated, along with 66 supervisory teachers. Extensive practica, consisting of over 400 hours in elementary school classrooms, had been introduced to the undergraduate teacher education program but not to the graduate school program. Results indicated that student teachers began student teaching quite confident in their beliefs about their education, training, and ability to teach. After they completed two student teaching placements of 7 weeks each, they felt even more positive about their ability to teach elementary subjects, to use specific teaching methods and strategies, and to manage a classroom in general. Undergraduate students were more confident than graduates at the post-questionnaire point. Following the student teaching experience, supervisors conveyed a positive belief about undergraduate student teachers' general preparation to teach, with 76 percent of the supervisory teachers of undergraduates ranking their students at the 2 highest levels, while only 40 percent of the supervisory teachers of graduate students did so. Factors explaining these intergroup differences are considered. (JDD)

Teacher Response

Beginning elementary teachers (n=124) randomly selected from a pool of recent graduates and interns at a California State University campus completed the Teacher Concern Survey at the beginning and the end of their first year of teaching. The Teacher Concern Survey identifies three stages of concerns: (1) self--themselves and their own survival; (2) task--actual teaching duties; and (3) impact--related to the individual's abilities to be successful with students and the teaching-learning process. At the beginning of the year, teachers were most interested in self concerns. At the end of the year, the focus had changed to task concerns. Implications of these findings for restructuring teacher preparation and induction

DESCRIPTORS- Communication Problems; Elementary School Teachers; Elementary Secondary Education; Interaction; Interviews; \*Participative Decision Making; Role Perception; \*School Restructuring; Secondary School Teachers; \*Teacher Attitudes; \*Teacher Participation; Teacher Responsibility; \*Teacher Role

This study examines the perceptions of teachers in one school as they implemented shared decision making (SDM) over a period of over 2 years. Data from 100 interviews with 54 respondents including teachers, administrators, and other staff are analyzed. The changes the teachers experienced are examined at varying levels of SDM involvement from a symbolic interactionist perspective. Data indicated that teachers assumed new responsibilities through SDM. All teachers participated in the curriculum revision process, and many took part in faculty hiring. Faculty members elected to the SDM Council assumed a number of responsibilities associated with their roles as SDM representatives, but only a few Council members took responsibility for communicating effectively with grade-level colleagues. The breakdown in communication between the Council and the rest of the faculty and staff meant that almost all SDM responsibilities fell to Council members only. Some teachers did not perceive that they had the right to express their views and concerns. A number of participants felt that they had gained confidence from their involvement in SDM. Teachers' relationships with administrators changed only when administrators communicated clearly that SDM altered traditional governance. (Contains 26 references.) (JDD)

Care must be taken to ensure that students in teacher preparation programs are prepared to benefit maximally from field experiences. A curriculum that provides prerequisite knowledge, contrived teaching experiences on campus, proper sequencing of experiences, and balance between formal instruction and field experience is needed. Clinical and field-based experiences in teacher education programs can play either an educative or miseducative role in preparing future teachers. Potential pitfalls in provision of valuable field experiences are noted.

values (e.g., marriage and family 83% rating this as very important in 1980, 72% in 1990); (4) small but statistically significant increase in the number of females aspiring to traditionally male-dominated non-professional occupations (15.6% in 1980 versus 18.% in 1990). Sixteen tables and 13 figures present data from the 2 studies. Three appendixes contain information about the survey sample sizes, standard errors, and other methodological and technical information. Appendix A contains an additional 20 data tables. (Contains 46 references.) (SLD)

IDENTIFIERS- \*National Center for Education Statistics

To assist in its mission of providing information in the most timely manner, the National Center for Education Statistics (NCES) contracted for a study of current modes of information dissemination to its user population that would also identify new and emerging technologies for information dissemination. The project is divided into three phases of information collection activities. Phase 1 entails analyzing current information dissemination. Phase 2 explores new or emerging technologies. Phase 3 includes user requirements analysis. In general, NCES users are satisfied with the quality of NCES information, but want to be more informed about product offerings and want more timely access to NCES information. The end-user interface is the weak link in the Federal Government's program of providing statistical information about education in the United States. Otherwise, the NCES serves its pluralistic constituency well, packaging its information in a variety of formats and product types and delivering them in a variety of ways via current technology. Weaknesses are in the areas of timeliness, delivery targeting, and user awareness. Recommendations are presented mainly in the area of enhanced technology utilization. Seven figures illustrate the report. An appendix contains six illustrative figures. (SLD)

IDENTIFIERS- \*Teenage Inventory of Social Skills

In an attempt to determine the subscale structures most useful  
for identifying adolescents with social skill deficits, this  
study investigated the factor structure of the Teenage  
Inventory of Social Skills (TISS) and its relationship to two  
measures of adolescent social competence. Two measures were  
completed by 1,142 ninth-grade students (577 males and 565  
females) in 7 junior high schools: the TISS and a Sociometric  
and Friendship Questionnaire. Exploratory and confirmatory  
factor analyses, internal reliability analyses, and criterion  
related assessments converged to support a two-subscale  
structure (a prosocial and an asocial behavior subscale) of the  
TISS as well as provide evidence of the questionnaire's  
construct validity. Three tables present study data.

IDENTIFIERS- Eigenvalues; \*Personal Reactions Scale (Revised); Supervisor Supervisee Relationship; \*Supervisory Working Alliance Inventory

The Supervisory Working Alliance Inventory (SWAI) developed by J. F. Estabrook, M. J. Patton, and C. M. Kardash (1990) was further evaluated for its psychometric properties and relationships with the Personal Reactions Scale--Revised (PRS-R) developed by E. L. Holloway and B. E. Wampold (1984), the only other measure of the relationship in counselor supervision. The original factor structure of the SWAI was replicated on a sample considerably different from the one reported in the initial study. A sample of 65 supervisors (34 males and 31 females) and 88 trainees (20 males and 68 females) from university staffs returned completed instruments, which were supplemented by data for an additional 30 supervisors and 30 trainees from a university counseling center. Results suggest the suitability of the SWAI for use with participants of differing backgrounds and experiences. Correlations with the PRS-R indicate that the SWAI measures the supervisory relationship over more dimensions than the PRS-R, most notably focusing on trainees' understanding of clients. Two tables present means, standard deviations, factor loadings, eigenvalues, and variance for the two SWAI versions. (SLD)
